UNIVERSITY OF MICHIGAN-DEARBORN OFFICERS

Regents of the University
Michael J. Behm, Grand Blanc
Mark J. Bernstein, Ann Arbor
Laurence B. Deitch, Bloomfield Hills
Shauna Ryder Diggs, Grosse Pointe
Denise Ilitch, Bingham Farms
Andrea Fischer Newman, Ann Arbor
Andrew C. Richner, Grosse Pointe Park
Katherine E. White, Ann Arbor
Mark S. Schlissel, ex officio

Executive Officers of the University
Mark S. Schlissel, M.D., Ph.D., President
Daniel E. Little, Ph.D., Chancellor, University of Michigan-Dearborn
Sally J. Churchill, J.D., Vice President and Secretary of the University
S. Jack Hu, Ph.D., Interim Vice President for Research
E. Royster Harper, Ph.D., Vice President for Student Life
Timothy Lynch, J.D., Vice President and General Counsel
Jerry A. May, M.Ed., A.B.D., Vice President for Development
Susan E. Borrego, Ph.D., Chancellor, University of Michigan-Flint
Marschall S. Runge, M.D., Ph.D., Executive Vice President for Medical Affairs
Martha E. Pollack, Ph.D., Provost and Executive Vice President for Academic Affairs
Lisa Rudgers, B.A., Vice President for Global Communications and Strategic Initiatives
Kevin Hegarty, M.A., Interim Executive Vice President and Chief Financial Officer
Cynthia H. Wilbanks, A.B., Vice President for Government Relations

University of Michigan-Dearborn Senior Officers
Daniel E. Little, Ph.D., Chancellor
Catherine A. Davy, Ph.D., Provost and Vice Chancellor for Academic Affairs
Mallory M. Simpson, M.Ed., Vice Chancellor for Institutional Advancement
Kenneth C. Kettenbeil, B.A., Vice Chancellor for External Relations
Jeffrey L. Evans, M.B.A., Vice Chancellor for Business Affairs
Ray Metz, M.L.S., Vice Chancellor for Enrollment Management and Student Life

Academic Deans
Raju Balakrishnan, Ph.D., College of Business
Martin J. Hershock, Ph.D., College of Arts, Sciences, and Letters
Tony W. England, Ph.D., College of Engineering and Computer Science
Janine Janosky, Ph.D., College of Education, Health, and Human Services

Directors
Katherine Allen, M.B.A., Director of Financial Aid and Scholarships
Matthew Beaudry, M.S., Director of Athletics
Andrew Beverly, M.A., Director of Student Advising Resource Team
John J. Cristiano, Ph.D., Campus Director of Research Administration
Shareia N. Carter, M.L.S., Director of Women’s Resource Center
David A. Disney, M.S., Director of Student Union and Event

Amy Finley, M.A., Director of Student Success
Carol L. Glick, P.E., M.S., Executive Director for Facilities Operations
Robert Goffeney, M.B.A., Director of Information Technology, Strategy and Operations
Ana-Marija Grbic, M.S., Director of Human Resources
Roma M. Heaney, M.A., Director of Institutional Research
Noel G. Hornbacher, M.B.A., Director of Financial Services
Debra G. Hutton, Ph.D., Director of Counseling and Disabilities Services
Janice L. Lewis-Boyd, B.G.S., University Registrar and Director of Enrollment Services
Elaine M. Logan, M.I.L.S., Director of the Mardigian Library
Margaret M. Pattison, B.S., Director of Alumni Engagement
Deb K. Peffer, M.A., Director of Admissions and Orientation
Kathleen M. Pepin, M.U.P., A.I.C.P., Director of Facilities Planning
Reetha Raveendran, Ed.D., Director of Student Engagement
Regina M. Storrs, M.A., Director of Career Services

The origins of the University of Michigan-Dearborn can be traced to the recommendations of the Ross Committee (also referred to as the Balzhiser Committee, and officially called the Dearborn Campus Planning Study Committee), which radically changed the direction of the campus.

The 1969 report of the Dearborn Campus Planning Study Committee, appointed by University Vice President for State Relations and Planning Arthur Ross to consider the future of the campus, recommended the addition of the first two years of undergraduate education for the Dearborn Campus to become a full four-year institution along with expanding non-co-op programs. Those and other changes were implemented in 1971 giving the campus its present structure along with the newly designated title of "The University of Michigan-Dearborn" and a Chancellor as its chief executive officer. Two years later, the organizational structures changed from "divisions" to schools and colleges, and the Division of Education ("Urban Education" for the first few years) was created, with each of the major academic units headed by a dean. The Board of Regents appointed the first Chancellor of the UM-Dearborn, Dr. Leonard E. Goodall, in July 1971.

After that watershed change in 1971, UM-Dearborn grew rapidly from just under 1,000 students to over 6,000 in 1979. From 1971 through 1979 there was a scramble just to supply the courses and facilities needed to accommodate the soaring student population propelled by the transition into a University. New facilities were added at the rate of 10 to 20 per year, and the face of the campus changed as a new set of buildings (the former University Mall now remodeled as the University Center, the Fieldhouse, and the Library) was planned and constructed to the south of the original four buildings. These years of expansion also ushered in a period of severe retrenchment, when the debt burden of the new structures coincided with a recession and cuts in state aid to the campus. Dr. William Jenkins, appointed as UM-Dearborn's second Chancellor in 1980, took the helm at the beginning of what may be called the institution's "Years of Consolidation."

The early 1980's at UM-Dearborn were, as in the state of Michigan as a whole, a period of severe financial crisis. From 1979 through 1982, over a million dollars of funds allocated to UM-Dearborn by the state had to be recalled. During that same time, faculty and staff salaries were cut and student tuition rose 44 percent in three years. Nevertheless, student enrollment, after a slight drop from 1982 to 1984, resumed its steady rise that has continued to the present. Facilities were constructed also, including Manufacturing Systems Engineering Laboratory, the Social Sciences Building (formerly the School of Management Building), and the Computing Wing of the Science Building.

From about the time of the inauguration of Chancellor Blenda Wilson (1988), several developments in campus organization, administrative personnel, and academic offerings have highlighted what might be called the "Years of Redirection". At the center of this "redirection" has been a program of strategic planning, initiated in the summer of 1990 and reinforced by planning retreats for the whole campus in the fall terms of 1990, 1991 and 1992. A new campus mission statement arose out of the first retreat which rearticulates UM-Dearborn's commitment to providing an experience of academic excellence for a diverse body of students from the metropolitan Detroit area, encouraging full community attention to the traditions of free intellectual inquiry, critical thinking and ethical behavior through interactive teaching, research, creative and applied scholarship, and service. From the second retreat emerged the principal points of a set of learning goals for undergraduate students.

In 1993, the Board of Regents appointed Dr. James C. Renick as the fourth chancellor of UM-Dearborn. Under Chancellor Renick, UM-Dearborn experienced several important developments: (1) a new Mission
Statement was formulated; (2) a new set of Campus Bylaws provided for a newly formed Faculty Senate; and (3) funds were received from the State for the construction of four major new facilities for the School of Engineering, the College of Business, the Center for Corporate and Professional Development, and the College of Arts, Sciences, and Letters.

In July of 2000, the Board of Regents appointed Daniel Little as UM-Dearborn’s fifth Chancellor. Under Chancellor Little’s leadership the campus has achieved record enrollment growth, increased the academic quality of the student body, and improved the academic support system for student success. During these years the campus came to embrace a metropolitan vision that encourages engagement with the community by students, faculty, and staff. Particular areas of metropolitan focus include supporting advanced manufacturing, contributing to racial and ethnic equality, enhancing P-K-12 education, addressing urban environmental issues, and contributing to progress in health care and health equity. Little has helped to build strong relationships between UM-Dearborn and a wide range of community-based organizations to enhance the impact and partnership of the university in the Detroit metropolitan region. The Chancellor also led the campus in establishing a public-private partnership to offer a student-housing option for the first time on campus since the 1980s.

In 2009, UM-Dearborn welcomed its fourth Provost and Vice Chancellor for Academic Affairs, Dr. Catherine A. Davy. Under her leadership, the School of Education was transformed into the College of Education, Health, and Human Services with a focus on health studies. In addition, a new campus-wide general education program titled the Dearborn Discovery Core was developed. Finally, in the fall 2014, Provost Davy led the successful reaccreditation of UM-Dearborn by the Higher Learning Commission.

Source of information up to 1984: A Gift Renewed, written by Professor Elton D. Higgs.
The University of Michigan, as an Equal Opportunity/Affirmative Action employer, complies with applicable federal and state laws regarding nondiscrimination and affirmative action, including Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973. The University of Michigan is committed to a policy of nondiscrimination and equal opportunity for all persons regardless of race, sex, color, religion, creed, national origin or ancestry, age, marital status, sexual orientation, gender identity, gender expression, disability, or veteran status in employment, educational programs and activities, and admissions. Inquiries or complaints may be directed to the:

Senior Director for Institutional Equity and Title IX/Section 504 Coordinator,
Office of Institutional Equity,
2072 Administrative Services Building,
Arbor, Michigan 48109-1432,
734-763-0235;
TTY 734-647-1388.

University of Michigan-Dearborn inquiries may be addressed to the:

Dearborn Institutional Equity Officer,
Office of Institutional Equity,
1020 Administration Building,
Dearborn, Michigan 48128-2406,
313-593-5320 or 593 -5190,
TTY 313-593-5430,
fax 313-593-3568.

How to Use the Undergraduate Catalog

The Catalog of the University of Michigan-Dearborn is a fundamental source of information concerning academic opportunities, policies, regulations, and procedures. It is each student’s responsibility to become familiar with the information contained herein.

The catalog is divided into sixteen sections:

• General information (p. 16)
• Admissions & Orientation (p. 25)
• Financial Aid and Scholarships (p. 35)
• Registration and Records (p. 40)
• Policies and Procedures (p. 53)
• Campus Services (p. 64)
• Special Programs (p. 70)
• Student Rights and Student Records (p. 71)
• Statement on Academic Integrity (p. 72)
• Statement of Student Rights and Code of Conduct (p. 72)
• Academic Code of Conduct (p. 73)
• Non-Academic Code of Conduct (p. 76)
• College of Arts, Sciences, and Letters (p. 81)
• College of Business (p. 171)
• College of Education, Health, and Human Services (p. 191)
• College of Engineering and Computer Science (p. 239)

The College of Arts, Sciences, and Letters, College of Business, College of Engineering and Computer Science, and College of Education, Health, and Human Services sections contain: specific regulations and procedures which may be unique to that academic unit; information regarding programs, degrees and courses offered; and a plan for electing courses to fulfill undergraduate degree requirements.

Key to Course Listings

The heading for each course listing contains the following information.

Discipline and Course Number

Courses are numbered in accordance with a University-wide numbering system:

Courses numbered 100 to 199 and 1000 to 1999 are introductory to a field or discipline. The courses exert a demand for only such depth of study commensurate with initial work at the college level.

Courses numbered 200 to 299 and 2000 to 2999 are considered intermediate and require student independence in the acquisition of material and mastery of techniques and methods above the introductory-level courses.

Courses numbered 300 to 499 or 3000 to 4999 are considered advanced and are usually confined to the program/major and require a working knowledge of facts, theory, and methods appropriate to the discipline.

Courses numbered 500 to 999 or 5000 to 9999 are intended for a graduate-level program study.

Course Title

The bold face course title follows the course number.

Credit Hours

Credit hours at the University of Michigan-Dearborn are based on semester hours. The number of credit hours for each course is listed below the title.

Prerequisite

Prerequisites to the course normally appear below the title and credit hours, although they may sometimes be included in the course description. They should be completed before the course is elected.
Concurrent Courses
Courses listed in the prerequisite section with an asterisk (*) indicate those that may be taken concurrently with the course listed.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

General Information
The University of Michigan-Dearborn is one of the three campuses of the University of Michigan operating under the policies of the Board of Regents.

The campus, located on the former estate of automotive pioneer Henry Ford, was founded in 1959 as a senior-level institution offering junior, senior and graduate-level courses and degrees. In 1971, UM-Dearborn became a comprehensive university campus offering four-year degree programs in liberal arts and sciences and graduate programs at the master’s degree level.

More than 9,000 highly selective students, representing a wide range of academic interests and diverse backgrounds, are currently enrolled at the UM-Dearborn.

As part of the University of Michigan, UM-Dearborn enjoys an association with a large multi-university and the advantages of moderate size. Through expanded evening course offerings, professional development programs and cooperative education programs, UM-Dearborn continues to respond to the educational needs of commuting students from the Detroit metropolitan community.

Accreditation
The University of Michigan-Dearborn is fully accredited by The Higher Learning Commission. Accreditation has also been awarded to various UM-Dearborn engineering programs by the Accreditation Board of Engineering and Technology, Inc. AACS, the Association to Advance Collegiate Schools of Business has accredited programs in the College of Business. The College of Education, Health, and Human Services is a member of the American Association of Colleges for Teacher Education, the Michigan Association of Colleges for Teacher Education, and the Teacher Education Council of State Colleges and Universities. In 2001 its certification programs were approved through the periodic review of the Michigan Department of Education.

For information regarding the accreditation status of the University, either of the following may be contacted:

The Higher Learning Commission
230 South LaSalle Street, Suite 7-500
Chicago, IL 60604-1413
800-621-7440
ncachigherlearningcommission.org (http://www.ncachigherlearningcommission.org)

or

University of Michigan-Dearborn
Office of the Provost
1080 Administration Building
Dearborn, MI 48128-2406
313-593-5030

Some degree programs are certified by professional organizations.

General Education Program: The Dearborn Discovery Core
The campus-wide general education program at the University of Michigan-Dearborn, known as the Dearborn Discovery Core, is designed to complement work in a student’s chosen area of study. These classes serve as a means of discovery for students, providing a foundation for learning, connecting to potential new areas of interest and building tools for success in whatever field a student pursues. Learning outcomes are guided by the qualities every student should develop as they move toward graduating with a University of Michigan-Dearborn degree.

The Dearborn Discovery Core requirements incorporate the six goals for undergraduate student learning and experience to help ensure that students master the tools and techniques necessary to succeed in college and throughout their lives and careers. The Dearborn Discovery Core is divided into three sections in order to accomplish the six goals for undergraduate student learning: Foundational Studies, Areas of Inquiry, and Capstone Experience.

An overall Grade Point Average of 2.0 is required of students when completing the Dearborn Discovery Core.

A course can only count for a maximum of three categories within the Dearborn Discovery Core.

Foundational Studies [15 credits]
Written and Oral Communication [6 credits]
Students who receive an English Placement score of COMP 106 or higher shall satisfy three credits of the Written and Oral Communication category.

1. Students are able to compose, revise, and edit their own writing for clarity and fluency of expression.
2. Students are able to demonstrate how to prepare and adapt written and oral communication to the needs of multiple audiences across professional, academic, and interpersonal contexts.
3. Students are able to demonstrate an understanding of academic integrity and use research skills including evaluating information, writing from sources, and correctly citing works.
4. Students are able to critically evaluate and use readings and ideas in composing written or oral work.

Writing Intensive Course [3 upper-level credits]
1. Students are able to demonstrate advanced competency by writing for a specific audience and integrating disciplinary ideas and concepts.
2. Students are able to effectively evaluate and use research methods, sources or technology appropriate to the field.

3. Students are able to engage in critical inquiry and thinking to synthesize or create a new rendering or perspective.

Quantitative Thinking and Problem Solving [3 credits]

1. Students are able to interpret information presented in mathematical form (e.g. with functions, equations, graphs, diagrams, tables, words, geometric figures).

2. Students are able to represent information/data in mathematical form as appropriate (e.g. with functions, equations, graphs, diagrams, tables, words, geometric figures).

3. Students are able to carry out mathematical (e.g. algebraic, geometric, logical, statistical) procedures flexibly, accurately, and efficiently to solve problems.

4. Students are able to evaluate the validity of logical or quantitative arguments.

Critical and Creative Thinking [3 credits]

1. Students are able to identify, summarize, and understand the problem, question, and/or issue.

2. Students are able to identify, locate, and critically or creatively evaluate evidence using appropriate sources or technology.
3. Students are able to consider and interpret alternative perspectives to support analysis.

4. Students are able to develop and communicate conclusions and implications by synthesizing technical, aesthetic, conceptual knowledge or supporting evidence.

### Areas of Inquiry [28 credits]

#### Natural Sciences [7 credits including one lab science course]

1. Students are able to demonstrate an understanding of the nature of the scientific method including hands-on practice.
2. Students are able to formulate and interpret testable questions that result in qualitative and quantitative data.
3. Students are able to apply unifying theories and laws to natural science disciplines and are able to explain examples.
4. Students are able to demonstrate the ability to interpret and communicate science and apply its relevance.

Intersections [6 credits]

1. Students are able to describe how ways of knowing and creating knowledge differ across disciplines and cultures. Students are able to demonstrate knowledge, skills, and attributes needed to understand diverse local or global contexts.

2. Students are able to critically evaluate the narratives, values, artifacts, processes, technologies or structures that may create a just and sustainable society.

3. Students are able to creatively integrate theory and practice from across disciplines or from experiences outside of the classroom to address complex questions.

**Capstone Experience [3 credits]**

1. Students are able to identify, obtain, research, and describe major issues associated with a specific topic of inquiry.
2. Students are able to identify and discuss critical questions leading to a deeper engagement in the study of a specific topic of inquiry or technology.
3. Students are able to apply knowledge, skills and abilities in the creation and execution of a concrete project informed by specific topic of inquiry.

**Goals for the Undergraduate Experience**

Undergraduate education at the University of Michigan-Dearborn is based on the belief that the benefits of academic work are enhanced when classroom and intellectual rigor interact with community engagement and experiential learning. The University of Michigan-Dearborn is uniquely situated to address the complex challenges facing the metropolitan region by offering students rigorous academic offerings as well as the opportunity to apply that knowledge in real-world situations. Our goal is to graduate students who are able to apply theoretical and discipline-specific knowledge to discover creative solutions to problems and to successfully communicate those ideas both individually and as a part of a collaborative effort.

Undergraduate programs at UM-Dearborn provide students with the opportunity to develop particular skills and abilities; to think critically and creatively to solve problems; to cultivate an appreciation of aesthetic and ethical values; and to acquire both breadth of knowledge and the depth of understanding gained through the study of one or more academic disciplines. The UM-Dearborn faculty has a common commitment across units to provide students with foundational knowledge through content-specific courses, extra-curricular activities, and community-oriented experiences.

The goals for undergraduate student learning and experiences at UM-Dearborn are:

- Core Knowledge
- Critical Thinking
- Communication
- Collaboration
- Cultural Understanding
- Citizenship

**Goals**

1. **Core Knowledge**

Undergraduate student learning goal #1, “Core Knowledge,” acknowledges that, each discipline at the University of Michigan-Dearborn, requires students to gain knowledge of and experience with their chosen academic discipline. Although the content-area goals within each discipline will likely be unique, all degree programs share fundamental educational values that include:

- acquiring rigorous, discipline-specific inquiry skills.
- learning to apply theories to and construct models for addressing real-world problems.
• discussing and producing intellectual work using discipline-specific conventions for writing, research and communicating.

2. Critical and Creative Thinking
Undergraduate student learning goal #2, “Critical and Creative Thinking,” acknowledges the students’ need to gain experience in problem solving, and to engage in analysis, synthesis and evaluation in creative ways using an ethical framework. Development of such habits of mind will be demonstrated by:
• the ability to seek information and use inquiry to systematically explore situations, collect and analyze evidence, and make informed evaluations.
• the synthesis of knowledge within and across courses and programs and the integration of theory and practice.
• the ability to use qualitative and quantitative reasoning to develop a clear understanding of the problem being studied.
• the generation of creative solutions to problems through original, imaginative, innovative, or artistic effort.
• the ability to use ethical reasoning to generate meaningful solutions to problems.

3. Communication
Undergraduate student learning goal #3, “Communication,” recognizes that there are a wide variety of modes of communication, including written and oral communication that are continually being shaped and expanded through rapid changes in technology. Student mastery of these myriad ways of communicating ideas and intellectual products will be demonstrated through the development of:
• the ability to communicate clearly and effectively to an identified audience both in writing and orally.
• the creation of communication that demonstrates content knowledge, deep reflection, creativity and critical thinking.
• the appropriate use of technology in maximizing the clarity, impact and accessibility of student ideas.

4. Collaboration
Undergraduate student learning goal #4, “Collaboration,” acknowledges that collaborating with peers, faculty and community members is an important part of the learning process in all disciplines. This element in the University’s educational plan for students will be promoted by providing students the opportunity to:
• work actively and effectively as part of a team to answer questions and solve problems.
• develop the ability to critically and effectively evaluate the collaborative products and processes.
• grapple effectively with differences and diversity and resolve conflict that occurs in collaborative efforts.

5. Cultural Understanding
Undergraduate student learning goal #5 “Cultural Understanding,” acknowledges that appreciating global and cultural diversity within historical, artistic, and societal contexts is critical to individual and societal success in both professional and personal areas of life. Student achievement in this realm will be gained through:
• reflecting on experiences with diversity to demonstrate knowledge and sensitivity.
• demonstrating awareness of how diversity emerges within and across cultures.

• developing the ability to collaborate in a global setting through awareness of language and cultural differences.

6. Citizenship
Undergraduate student learning goal #6, “Citizenship,” recognizes that engagement occurs in many ways for students, and manifests itself in different ways for each academic program and discipline. Active meaningful student involvement in course, community and societal affairs will also encourage student lifelong learning by providing the opportunity to use their skills, abilities and knowledge in a variety of roles and environments. Acquisition of these skills will be promoted through:
• engagement in case-study, scenario analyses and problem solving activities.
• participation in curricular and co-curricular work integral to the metropolitan mission of UM-Dearborn.
• exposure to the diversity, strengths and challenges of the metropolitan community.
• experience in engaging in activities that emphasize the habits of lifelong learning.

The Campus
The UM-Dearborn campus was established in 1956 through a gift from the Ford Motor Company. The gift included approximately 196 acres of land, the Henry Ford Estate, and funds for the construction of four buildings totaling 226,770 gross square feet. The campus has grown considerably over the past 57 years and now includes the following facilities:

<table>

Facilities:
The Mardigian Library offers a student-centered environment that fosters learning by providing access to authoritative sources of knowledge and information and by helping students learn critical information literacy skills and concepts. It gives faculty and students access to sources and knowledge via modern information technology, and our librarians teach students how to find their way in the ever-expanding universe of information and knowledge. The four-story Mardigian Library houses a 340,000-volume collection and provides web-based access to a multitude of research resources, including an online journal collection of 18,000 titles, 200 online research databases and over 9,000 online books and approximately 1,200 student study stations. The facility also contains computer, audiovisual, and education laboratories, and a television studio. Librarians are accessible, either online or in person, to help students with their research needs.

The Alfred Berkowitz Gallery, located on the third floor of the Library, features changing exhibitions throughout the academic year. The gallery functions as a program laboratory, extending and supplementing other University programs, and as a showcase for exhibitions with broad public appeal.

Spaces for recreational, intramural, and varsity athletics, as well as health and physical education classes, are provided in the Fieldhouse/Ice Arena and attached Wellness Center.

The Administration Building, the University Center, and the Campus Support Services building currently house support services for the campus.

The Professional Education Center houses professional and continuing education programs.

Campus Visit Opportunities
- **Go Blue Fridays**: A special campus visit for high school students which includes a presentation and campus tour.
- **Transfer Nights**: Designed especially for students interested in transferring.
- **Daily Campus Tours**: Walking tours are given by current students at various times throughout the week. Call 313-593-5100 to make a reservation.
- **Individual Appointments**: If you prefer a one-on-one meeting with an admissions counselor, appointments are available Monday through Friday. Walk-in counseling is available on select Saturdays.
- **Group Visits**: Group visits (10 or more students in 8th grade or above) can be arranged to include an Admissions informational session and a walking tour led by current students. Other campus offices are available to provide information by request. Please request a group visit at least two weeks in advance. A request form is available online at umdearborn.edu/visit.

Degrees & Majors Offered

**Degrees**
- Bachelor of Arts, AB
- Bachelor of Business Administration, BBA
- Bachelor of General Studies, BGS
- Bachelor of Science, BS
- Bachelor of Science in Engineering, BSE

The following undergraduate majors and other fields of concentration offered are shown with the degree designations to which they normally lead:

**Majors**
- Accounting (p. 179), BBA
- African and African American Studies (p. 101), AB
- American Studies (p. 102), AB
- Anthropology (p. 104), AB
- Applied Statistics (p. 105), AB
- Art History (p. 107), AB
- Behavioral and Biological Science (p. 111), AB
- Behavioral Sciences (p. 109), AB
- Biochemistry (p. 112), BS
- Bioengineering (p. 249), BSE
- Biological Sciences (p. 113), BS
- Business Studies (p. 180) (2nd major only), AB
- Chemistry (A.C.S. Certified) (p. 116), BS
- Chemistry (Instructional) (p. 118), BS
- Child Life (p. 199), AB
- CIS Mathematics (p. 251) (2nd degree only), BS

• Microbiology (p. 154), BS
• Philosophy (p. 157), AB
• Physics (p. 158), BS
• Political Science (p. 159), AB
• Psychology (p. 161), AB
• Public Health (p. 224), BS
• Reading (p. 211), AB, Elementary Certification
• Robotics Engineering (p. 267), BSE
• Science Studies (p. 211), AB, BS, Elementary Certification
• Secondary Certification (p. 226), Certification Only
• Social Studies (p. 164), AB (College of Arts, Sciences and Letters)
• Social Studies (p. 212), AB, BS, Elementary or Secondary Certification (College of Education, Health, and Human Services)
• Sociology (p. 166), AB
• Software Engineering (p. 268), BS
• Special Education, (p. 212) AB, BS
• Supply Chain Management (p. 190), BBA
• Urban and Regional Studies (p. 167), AB
• Women’s and Gender Studies (p. 169), AB

Pre-Admission Counseling

Admissions counselors are willing to discuss the educational opportunities available at UM-Dearborn with prospective students. Persons interested in enrollment should arrange a one-on-one appointment by calling the Office of Admissions and Orientation at 313-593#5100. This includes students in high school or college or anyone wishing to return to school.

Degree-Seeking Student

A student who has been admitted as a freshman or transfer into a regular degree program in an academic unit is called a degree-seeking student. After enrolling, a student may change from one degree program to another by following established procedures, as long as he/she is accepted by the new unit.

Freshman Student Admission

Admission Procedures

UM-Dearborn welcomes applications from prospective freshmen. The admission of all students is on a selective basis; admissions officials consider many factors in reaching individual decisions for admission.

Sources of information used in evaluating a candidate's qualifications include the secondary school record (GPA, rigor of curriculum and trend of grades), comments of the secondary school counselor or principal, scores achieved on either the Scholastic Aptitude Test (SAT) or the American College Test (ACT), and any evidence of special abilities. Incoming freshmen are expected to present a final official high school transcript as proof of graduating from an accredited high school or preparatory school. The requirement of high school graduation may be waived for adults, provided there is evidence that they are likely to be successful at the University. This evidence will in most cases take the form of the General Educational Development (GED) test results. The minimum GED test score for admission consideration is 600.

Application Deadline

It is recommended that students apply for admission online and are eligible to do so as soon as they complete their junior year in high school.

The application deadline for priority scholarship consideration is December 15 of the student’s senior year in high school. The official application deadline date for any semester is the first day of class of that semester.

The application fee is $30. If you apply online (umdearborn.edu/apply), the application fee is waived and you can check your application
status online. Paper applications may also be obtained in the Office of Admissions and Orientation or printed from the website. If you submit a paper application, you must include payment (check or money order) for the $30 non-refundable application fee.

Official high school transcripts are needed at the time of application for freshman admission. Students seeking admission to UM-Dearborn that took coursework from other institutions of higher learning must also submit official transcripts from all previous institutions. Official corrections made to transcripts by previous schools, whether high schools, colleges, or universities, must be submitted to the University no later than six months after the first day of classes. Students whose final official transcripts are not received will have a hold placed on their student account which prevents course registration for future semesters.

The Admissions staff welcomes the opportunity to meet prospective students. Appointments should be arranged in advance by calling the Office of Admissions and Orientation at 313-593-5100.

**Admission Requirements**

Students interested in enrolling at UM-Dearborn should have completed the Michigan Merit Curriculum as established by the State of Michigan (or equivalent coursework if outside of Michigan). Students graduating from a high school outside of Michigan should pay close attention to the requirements listed below.

A strong high school background in basic academic subjects is important in a student’s preparation for college study. The following college preparatory high school curriculum should be followed:

- **College Preparatory English:** Minimum four years required.
- **Mathematics:** Minimum four years required (at least two years must be in college preparatory mathematics).
- **Biological and Physical Sciences:** Minimum three years required with four years recommended.
- **History and Social Sciences:** Minimum three years required.
- **Foreign Language:** Minimum two years strongly recommended.
- **Computer Science:** At least one semester is required; one year recommended.
- **Electives:** Additional work in any subjects offered for high school credit to bring the total for the four high school years to the equivalent of at least 15 units.

**Special Recommendations**

Students who intend to pursue their college work in **business administration, computer science, engineering, or physical and natural sciences** are encouraged to include the following subjects in their high school preparation:

- **Mathematics:** Coursework should include two years of algebra, one year of geometry and at least one semester of trigonometry.
- **Biological and Physical Sciences:** Coursework should include one year of chemistry and at least one year of physics or biological science.

Applicants intending to pursue a college program in science or engineering who have not completed the recommended mathematics and chemistry units may still be admitted if they satisfy the general admission requirements. However, they will be expected to establish proficiency in these areas during their freshman year.

**Test Requirements**

UM-Dearborn requires all prospective freshmen to submit scores from at least one standardized test: the Scholastic Aptitude Test (SAT) or the American College Test (ACT). The student should make certain that the test results are forwarded to the UM-Dearborn Office of Admissions and Orientation (SAT code #1861; ACT code #2074).

The results of standardized achievement tests in specific subject areas are not required as part of the application process. However, all new freshmen enrolling at UM-Dearborn, must take the UM-Dearborn English Composition Examination and the Mathematics Placement Examination. These exams are for diagnostic and placement purposes. Placement exams are administered prior a student’s orientation and class registration.

**Advanced Placement (AP)**

A prospective student who has exhibited outstanding performance in a particular subject area and has participated in the College Board’s Advanced Placement Program (AP) may be considered for advanced college placement and credit. Such applicants should arrange to have their Advanced Placement Examination reports sent (use our college code of 1861) to the Office of Admissions and Orientation, where they will be reviewed in accordance with the regulations of the various academic departments. Advanced Placement credit will not be granted when the AP Exam is taken after the student’s official date of high school graduation. For information on the college credit AP practices, visit umdearborn.edu/advancedplacement.

**International Baccalaureate**

UM-Dearborn grants credit to students based on their IB scores. Students who participated in the IB program in high school should request that their scores be provided to the University for evaluation. Scores of 4 and above are considered for credit.

**Enrollment Deposit**

In order to guarantee a space in an incoming class, a $50 enrollment deposit should accompany the student’s affirmative reply on the Admissions Acceptance Form, which is sent to the student at the time of admission. The applicant may confirm at any time. For the fall semester, the deadline for deposit is May 1. Upon registration, this deposit will be applied to tuition/fees for that semester. The $50 enrollment deposit is not refundable after May 1 for fall semester admitted students regardless of when the deposit is submitted.

For the winter semester, the deadline for deposit is December 1. For the summer semester, the deadline for deposit is April 1. The deposit is not refundable after the deadline dates.

Online payment of the deposit can be submitted at umdearborn.edu/deposit.

**Transfer Student Admisison**

**Admission Requirements**

The requirements for admission to UM-Dearborn depend upon the particular program of study to be followed. Admission is based on preparation, ability, and probability of success. All applicants should be in good standing and eligible to return to their previous institution.
Each of the four academic colleges of the University has its own GPA admission criteria:

<table>
<thead>
<tr>
<th>College</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>CASL</td>
<td>2.50</td>
</tr>
<tr>
<td>COB</td>
<td>2.70</td>
</tr>
<tr>
<td>CECS</td>
<td>2.75¹</td>
</tr>
<tr>
<td>CEHHS</td>
<td>2.75²</td>
</tr>
</tbody>
</table>

¹ Students must also have a 2.75 recalculated math, science, and engineering GPA.
² Several select programs within CEHHS have a 2.50 GPA requirement.

Information provided on the Application for Undergraduate Admission and Scholarships must be accurate and complete. Falsification or omission of information or credentials may result in the revocation of admission.

**Admission Procedure**

Prospective transfer students are required to submit an application for admission and an official transcript from each college or university previously attended. Failure to list all schools attended on the application may result in revocation of admission. To be considered, official transcripts must come directly from the previous college/university to UM-Dearborn’s Office of Admissions and Orientation.

The prospective student is responsible for contacting each previous school attended to request that official transcripts be sent. While all transcripts are required for admission, only courses taken at an accredited college or university will be considered for transfer to the University of Michigan-Dearborn. UM-Dearborn uses the Transfer Credit Practices published by the American Association for Collegiate Registrars and Admission Officers (AACRAO) as a guideline to determine transferability of courses based on accreditation status and other criteria. A list of accredited U.S. and Canadian colleges and universities can be obtained from the U.S. Department of Education website at ope.ed.gov/accreditation.

The application fee is $30, however, if you apply online (umdearborn.edu/apply), the application fee is waived and you can check your application status online. The fee is also waived if you apply in person in the Office of Admissions and Orientation or at an on-site event at your school. Paper applications may be obtained in the Office of Admissions and Orientation or printed from the website. If you submit a paper application via U.S. mail, a non-refundable application fee of $30 is required.

When the application and official transcripts have been received, they will be evaluated and the student will be notified regarding admission status.

Transfer students must have completed 24 transferable credits. If applying with fewer than 24 transferable credits, students will be required to submit complete high school records including ACT or SAT scores.

Admission granted while the student is enrolled at another institution is conditional and will become final only when the student meets the conditions set forth in the conditional admission letter and upon receipt by the Office of Admissions and Orientation of the final official transcript from the student’s former institution(s). It is the student’s responsibility to see that the final transcript is provided to the Office of Admissions and Orientation following the completion of all courses. **Students will not be allowed to register for subsequent terms until the final official transcript has been received.**

Official corrections made to transcripts by previous schools, whether high schools, colleges, or universities, must be submitted to the Office of Admissions and Orientation within six months of the first day of classes of the term of admission.

**Test Requirements**

All new transfer students enrolling at UM-Dearborn must take the UM-Dearborn English Composition Examination; the Mathematics Placement Examination must be taken by all new students who plan to take Pre-Calculus or Calculus 1. These exams are for diagnostic and placement purposes. Placement exams are normally administered prior to each registration period.

**Transfer of Credits**

Students transferring to UM-Dearborn from other two- or four-year institutions can use one or more of these resources below to ensure maximum number of transfer credits.

**Course Transfer System**

The Course Transfer System (CTS) (umdearborn.edu/cts) is a valuable resource. While it is not an official credit evaluation, the CTS can serve you in determining the transferability of courses from an accredited community college or four-year school. The information is always current and reflects courses that potentially transfer to UM-Dearborn, but does not necessarily indicate if or how these courses will be used toward your particular degree program.

**Transfer Guides**

Our Transfer Guides from select community colleges in Michigan outline courses that can be applied to specific majors. To view transfer guides by academic college for community colleges, visit the Transfer Hubs (see below).

**Transfer Hubs**

Students transferring to UM-Dearborn from a community college located in the metropolitan southeastern Michigan area should check out the customized websites for each of the community colleges. These sites can be accessed at umdearborn.edu/hubs.

**Transfer Equivalency Worksheet**

Shortly after admission, a transfer student will receive a Transfer Equivalency Worksheet. This worksheet reflects only the overall hours potentially transferable to UM-Dearborn, but does not necessarily reflect the hours that will be used toward a degree program. An academic advisor will inform the student as to which hours actually fulfill program requirements. The number of hours that apply to a particular program will determine the number of additional UM-Dearborn hours necessary for degree completion.

**Maximum Transferable Credits**

<table>

<td></td>
</tr>
</tbody>
</table>
Students transferring to UM-Dearborn who want to take advantage of the MTA must have the “Michigan Transfer Agreement Satisfied” designation posted on their transcript. An Associate's degree is not required to use MTA. Students planning for transfer to UM-Dearborn are strongly encouraged to check with their community college to determine what courses are approved for inclusion in the above MTA categories and to learn the details for obtaining an MTA endorsement on their transcript. During the planning and course selection process at the community college, students are encouraged to refer to UM-Dearborn transfer guides to determine which MTA courses would be the best fit in their intended program. Community colleges will have a website for detailed information including approved courses for completing the MTA. Additional information can be found at umdearborn.edu/mta.

Credit for Education in the Armed Forces

Effective Fall 2015 for new admits, veterans who have served in the armed forces may receive 2-6 general credits toward degree for their recruitment training if an honorable or general discharge was granted. The hours granted vary according to the ACE recommendations for credit based on the military branch of service. Additional Specialist Training credit may be petitioned for credit via a written petition during the first semester on campus. Veterans should meet with their academic unit to discuss possible options, write a petition, and arrange to meet with a discipline representative or department chair to review the military course work and experience. Based on the discussion and ACE recommendations, specific credit would be granted in the first semester after admission by the discipline representative or department chair through the academic unit advising office.

UM-Dearborn has a cap of 62 transfer hours from an accredited community college. The same cap is applied for all ACE credits. This includes the general credit granted for recruitment training for veterans. If a veteran attended the Community College of the Air Force the cap of 62 hours toward degree includes the general credits, attendance at the Community College of the Air Force and all petitioned credit to degree.

Admission to the Honors Program

The Honors Program at UM-Dearborn is designed for qualified, highly-motivated students who want an extra level of challenge and stimulus in their college experience. Honors students take a special sequence of classes that satisfy basic requirements and, at the same time, provide a well-balanced undergraduate education. The program teaches students to think critically and independently, to perceive connections between diverse areas of knowledge, and to express their thoughts clearly and effectively. Honors Program classes are small, enabling students to interact closely with the faculty and each other.

Admission to the program is competitive and is based on the student’s interests and experience as well as the high school record. Students admitted with distinction (at least a 3.50 recalculated GPA and at least a 25 ACT composite score) will be contacted to schedule an interview for the Honors Program.

For more information, visit umdearborn.edu/casl/sp_honorsprog.

Personal Enrichment

Personal Enrichment (PE) is an admission status that enables students to enroll in undergraduate courses for the purpose of personal or professional development.

Eligibility

- Students must have already earned a baccalaureate degree and not be seeking an additional undergraduate degree.

Students in this category are subject to the following policies:

- A PE student may enroll for a maximum of 15 credit hours at the University. There is no limit on the number of semesters, but the total number of completed credit hours for all semesters enrolled may not exceed 15.
- A PE student may apply no more than 15 credit hours accumulated at UM-Dearborn to a degree program. Exception is possible only by written permission of the academic dean of the unit to which the student has applied.
- A PE student is limited to enrolling for nine credit hours (not to exceed three courses) in a single four-month term (four hours per half-term).
- A PE student with a grade point average (GPA) less than 2.0 should visit the Office of Student Success before registering for a subsequent term. The student will normally be put on probation. If academic performance persists below a 2.0 cumulative grade point average (GPA), the student may be required to withdraw from the University.

A Personal Enrichment student will have fees assessed and adjusted by fee regulations identical to those governing regular matriculated students. All courses taken under PE status are considered part of the undergraduate record.

Students who wish to request additional information should call the Office of Admissions and Orientation at 313-593#5100.

Prospective Degree Student

The Prospective Degree Student (PDS) program provides an opportunity for an individual whose previous high school and/or college work does not qualify for admission as a degree-seeking student to enroll in undergraduate courses.
Eligibility

- Students who are at least five years beyond high school graduation (or beyond last high school attendance for applicants with a GED)

or

- Students who have completed some college work, and are at least five years out of high school, and have not been enrolled in college for at least two years

Students in this category are subject to the following policies:

- A student may enroll for a maximum of 15 credits toward degree as a non-degree student. The student may take additive credits with the approval of his/her advisor, but these credits are not used in determining eligibility for degree status, nor will they apply toward a degree.
- The 15 credit hours, GPA requirement, and prerequisite courses (if any) must be completed within two full academic years.
- A PDS student with a grade point average (GPA) less than 2.0 should visit the Office of Student Success before registering for a subsequent term. The student will normally be put on probation.
- Upon completion of no more than 15 credit hours, the student must apply for admission to a degree program.
- Students who earn a GPA less than the academic unit requirement are unable to apply for admission and do not have permission to enroll in any status.
- Students who do not enroll at UM-Dearborn for one year or more and are in good academic standing must reapply by completing a new Prospective Degree Student admission application.
- A PDS student will have fees assessed and adjusted by fee regulations identical to those governing regular matriculated students. All courses taken under PDS status are considered part of the undergraduate record.
- PDS students must take the English and Mathematics placement exams either before or during their first semester of enrollment.

Financial Aid Eligibility Limitations

Prospective Degree Students have a special status at UM-Dearborn and are eligible to be considered for financial aid for up to 12 consecutive months before admission to a regular degree program. If a student is not admitted to a regular degree program at the end of the 12 consecutive months, the student is not eligible for additional financial aid.

Students who wish to request additional information should call the Office of Admissions and Orientation at 313-593-5100.

Alumni Enrichment Program

The Alumni Enrichment Program is an opportunity for UM-Dearborn alumni to enhance their education and to provide additional exposure to a variety of subject areas on a non-credit basis. Each alumni’s selection of courses will be checked to ensure that the educational-broadening objective of this program is being faithfully pursued.

All courses must be taken on a pass/fail basis.

Eligibility

This program is available to UM-Dearborn alumni only. Upon acceptance, students are eligible to elect up to 9 hours per term of undergraduate course work in one or more fields distinctly different from the field in which they earned their bachelor’s degree (major or minor).

Undergraduate and graduate alumni from UM-Dearborn may pursue undergraduate courses. They are eligible to participate in the program one full term after graduation has been confirmed. Alumni participants are not eligible if currently enrolled in a degree or certificate program.

Course enrollments will occur on a space available basis. Alumni in this program will also have to meet the regular prerequisites for any courses they elect. Internship, cooperative education, and online courses are not available to program participants.

Assessment

A discounted per credit hour charge will be levied as an “enrollment fee.” This means that a portion of the tuition will be covered by an Alumni Scholarship. The Alumni Enrichment student will also be expected to pay any fees associated with registration, course elections, and technology.

To Apply

Complete an Alumni Enrichment Application and submit it to Enrollment Services. Applications are available in the Office of Admissions and Orientation or online at umdearborn.edu/otheradmission. Once approved and processed students will be allowed to register for classes. For further information, contact the Office of Admissions and Orientation at 313-593-5100.

Guest Students

A guest student is a regular degree student in good standing at another institution who is admitted to UM-Dearborn for one term only. Work completed under such an arrangement is considered to be a part of the student’s program elected under the jurisdiction of the home institution.

Admission is by means of the Michigan Uniform Guest Application certified by the home institution, and a completed addendum to the application available at umdearborn.edu/guest-addendum. The Guest application deadline for any term is the first day of class of that term.

Guest students are expected to receive academic advising from their home institution, although guest students are subject to all rules governing course prerequisites.

Enrollment is limited to a maximum of four semesters. A new application is required for each semester they wish to enroll. If a guest student has previously taken classes at UM-Dearborn, the admission decision will also be based on the UM-Dearborn GPA.

If there are prerequisites for any courses elected, the student is required to submit a copy of the home college/university’s transcript to verify that all requirements have been fulfilled and receive the necessary overrides prior to registration.

UM-Dearborn students wishing to elect courses at another institution of higher education should see “Coursework at Other Institutions (p. 56)”.
Dual Enrollment Programs

High School Dual Enrollment

Dual enrollment provides an opportunity for high school students with demonstrated academic potential to enroll in selected UM-Dearborn courses while completing their high school graduation requirements.

The purpose of the program is to supplement and enrich the educational experience by allowing students to pursue course work which otherwise would not be available. Admission as a dual enrolled student is a special non-degree status. Students are expected to complete all graduation requirements mandated by his/her high school. Although students are admitted with a special status, they are granted full privileges of UM-Dearborn students, including use of the library and recreational facilities and the opportunity to purchase student tickets to cultural and athletic events at the University of Michigan. After graduation, admission to a degree program at the University will be granted provided they meet the minimum admission criteria. Dual enrollment students may enroll for a maximum of eight credit hours per semester.

Admission Criteria

<table>
<thead>
<tr>
<th>Current Class Standing</th>
<th>Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seniors</td>
<td>3.0+ posted GPA on HS Transcript</td>
</tr>
<tr>
<td>Juniors</td>
<td>3.5+ posted GPA on HS Transcript</td>
</tr>
<tr>
<td>Sophomores and Freshmen</td>
<td>3.75+ posted GPA on HS Transcript</td>
</tr>
<tr>
<td></td>
<td>Personal Interview with Admissions Representative to measure maturity level and preparedness for college coursework.</td>
</tr>
<tr>
<td></td>
<td>Optional: provide any additional assessment scores if available (i.e. Explore, Plan, ACT, Compass, MME, PSAT, SAT, or Accuplacer)</td>
</tr>
</tbody>
</table>

Upon admission, high school freshmen and sophomores must sign a contract with the Office of Student Success which will connect them with additional support services.

To Apply for Admission

Apply as early as possible. The deadline for all documents is June 15 for the fall semester and November 1 for the winter semester. No application will be processed until all of the following have been completed and received:

1. The Dual Enrollment application.
2. Course election worksheet (back of the application). Be sure to select alternatives.
3. Calculation sheet (back of the application) signed by your high school principal.
4. An official transcript (including test scores, if applicable).
Scholarships
The IGNITE Scholarship pays half tuition and fees up to a maximum of eight credit hours per term for the fall and winter semesters only. Students do not have to complete a separate scholarship application; their tuition will automatically be adjusted.

Students may take classes during the summer semester, but are responsible for full tuition and fees; no scholarships are awarded for summer semester.

To Apply for Admission
Apply as early as possible. The deadline for all documents is June 15 for the fall semester and November 1 for the winter semester. No application will be processed until all of the following have been completed and received:

1. The IGNITE application.
2. Course election worksheet (back of the application). Be sure to select alternatives.
3. An official transcript (including test scores, if applicable).

Note: Students must submit a new application for each semester they wish to enroll.

Orientation and Registration
Students will be notified of their admission status by the Office of Admissions and Orientation. Admission to IGNITE dual enrollment status does not guarantee the ability to enroll in the class(es) specified on the application form, but every effort will be made to accommodate the student’s request. Information about orientation and registration will be mailed upon admission.

All dual enrollment applications can be found online at umdearborn.edu/otheradmission/.

Readmit
An undergraduate student (that is, a candidate for a bachelor’s degree) who does not register for any courses at UM-Dearborn during a 12-month period must be formally readmitted in order to resume studies at UM-Dearborn. Such a readmitted student is then governed by the current Catalog.

Some academic units at UM-Dearborn may have more stringent regulations. It is the obligation of students who leave the University for an extended period of time to acquaint themselves with the specific requirements.

Since all I and X marks are permanently changed to IE and XE after four months, a readmit may not petition to make up Fs or Xs on his/her prior record.

Courses taken at other campuses will not count automatically toward graduation. Students should petition their academic unit for credit(s). Maximum transfer hours apply (see “Transfer Equivalency Worksheet” section).

Readmitting students complete a Readmission Form available to download at umdearborn.edu/ddc and submit it directly to the academic unit in which they wish to enroll. Readmitted students are subject to the requirements in effect at the time of readmission. If students want to change their program of study, they should contact the academic unit of the program to which they would like to change.

Deferring Admission
Students who have been admitted but did not enroll may defer admission up to one year. After that, a new admissions application must be submitted.

To defer admission, students complete an Admission Information Change Form available to download at umdearborn.edu/ddc and must disclose if there has been or will be any enrollment at another school prior to the new deferred semester. Failure to disclose this information may result in the revocation of admission.

Teacher Certification
The College of Education, Health, and Human Services at UM-Dearborn can assist qualified persons who hold a bachelor’s degree from an accredited institution to pursue a program of study leading to a recommendation for a Michigan Provisional Teaching Certificate-Elementary (COE) or Secondary (COS). Michigan Tests for Teacher Certification (MTTC) are required for both admission and for certification.

Admission to these programs (COE and COS) requires a cumulative GPA of 2.75 or higher on a 4.0 scale. In addition, a GPA of 2.75 is required in the chosen teaching Major (M) and teaching minor (m) (see Major/Minors for Elementary Certification or Majors/Minors for Secondary Education). Once admitted, the 2.75 must be maintained in all areas.

Applications and additional information are available by calling 313-593-5090.

Second Degree
Applicants pursuing a second Bachelor’s degree must submit the Application for Undergraduate Admission and Scholarships and meet the same admission requirements as transfer students. Each of the four academic schools and colleges of the University have their own admission criteria:

<table>
<thead>
<tr>
<th>CASL</th>
<th>2.50</th>
</tr>
</thead>
<tbody>
<tr>
<td>COB</td>
<td>2.70</td>
</tr>
<tr>
<td>CECS</td>
<td>2.75 (^1)</td>
</tr>
<tr>
<td>CEHHS</td>
<td>2.75 (^2)</td>
</tr>
</tbody>
</table>

\(^1\) Students must also have a 2.75 recalculated math, science, and engineering GPA.

\(^2\) Several select programs within CEHHS have a 2.50 GPA requirement. Contact the Office of Admissions and Orientation for more details.

Refer to the Transfer Student Admission section for additional information.

Retired Persons Scholarship Program
The Retired Persons Scholarship Program (RPSP) offers retirees the opportunity to attend classes alongside traditionally-aged students. The integration of younger students and older students into the mainstream...
academic curriculum bridges the generational gap. A limited number of Retired Persons Scholarships for undergraduate and graduate study are available at UM-Dearborn.

Prospective students are required and expected to:

- have reached their 60th birthday prior to the semester of their first registration under this program.
- have graduated from high school and have the potential to succeed at college-level studies as demonstrated in an interview in the Retired Person Scholarship program (RPSP) Office. Appropriate education, career or life experience will be given special consideration.
- be a "retired person" - to have no current career or employment.
- For more information visit umdearborn.umich.edu/casl/rpsp (http://www.umdearborn.edu/casl/rpsp). Applications are available at umdearborn.edu/ddc, select CASL Campus Options Program, or by writing to:

Retired Persons Scholarship Program
2029 College of Arts, Sciences, and Letters Building
University of Michigan-Dearborn
4901 Evergreen Road
Dearborn, MI 48128
313-593-1183

Provisional Admission

UM-Dearborn offers provisional admission to prospective students who meet the academic requirements but whose English language proficiency does not meet the levels required for regular admission. All applicants whose first language is not English must provide proof of English language proficiency. Provisional status will continue until the minimum language proficiency (for regular admission) is attained. Provisionally admitted students will be provided intensive English language support through the English Language Proficiency Program with a goal of achieving admission into a degree program (see section "Office of International Affairs").

International Admission

Application deadlines for students residing outside the U.S.:

- For the fall semester: July 1
- For the winter semester: November 1
- For the summer semester: March 1

Students from other countries are welcome to apply for admission to the University of Michigan-Dearborn. The following documents must be received before an admissions decision can be made:

Application for Undergraduate Admission

- A $30 application fee is required of all students ($75 for those who will be studying on an F or J visa).
- You may submit your application first, and send additional materials afterwards; however a complete packet with all necessary application components will expedite the admissions decision. All correspondence must be in English, and must contain the full name of the applicant with the family surname underlined. Once the application has arrived, applicants will be notified of any missing items. Applications will not receive a final evaluation until all required materials have been received.
- If you are already in the U.S. studying on an F-1 or J-1 visa, please indicate F-1 or J-1 on the "Type of Visa" section on the Application for Undergraduate Admission.
- Students who plan to obtain an F-1 or J-1 visa from abroad for use in entering the U.S. should write "plan to obtain F-1 or J-1 visa" in the "Type of Visa" section on the Application for Undergraduate Admission.
- If you are currently in the U.S. as a refugee, asylee, or on a temporary visa other than the F-1 student visa (such as F-2, B-2, H-4, etc.), and you wish to change to F-1 status to begin attending UM-Dearborn, please indicate this on your Application for Undergraduate Admission.

Transcripts from previous high schools or colleges attended

Freshmen

All freshmen must submit official transcripts for all years of secondary school work completed (U.S. and abroad). If your secondary school work has been completed in a country which has national standardized examinations, you must also submit official certificates showing results of these examinations (“O” or “A” levels, Baccalaureate, Standard X and XII, etc.).

Transfer Students

Transfers must have official transcripts sent to the Office of Admissions and Orientation from all post-secondary institutions attended. Transfer students must provide proof of secondary school completion (diploma, final transcript, leaving certificate, examination certificate, etc.), but are usually not required to provide records from all years of secondary school. However, you must provide complete records if you have attended college for less than one year of full-time study.

Academic Records from outside of the U.S.

Translations are required for all documents and transcripts not originally in English. These translations are the responsibility of the student and must be complete, word-for-word, and in the same format as the original document. You must submit both the original document and the translation to the Office of Admissions and Orientation.

If you have attended high school or a college/university outside the U.S., you must also submit transcripts from all institutions you have attended outside the U.S. to one of two evaluation services: The evaluated record(s), translation(s) and original transcript(s) in the native language must be sent to the Office of Admissions and Orientation from the official source.

- Educational Credential Evaluators (ECE) for a course-by-course evaluation (ece.org (http://www.ece.org)). Please note: ECE requires that you also submit records from your last year of secondary school along with your college or university records.
- World Education Services (WES) for a course-by-course evaluation (wes.org (http://www.wes.org))

English Language Proficiency Requirements

If you are not a native speaker of English, you must prove an adequate level of English language proficiency to enroll in college credit courses, even if you are currently a U.S. citizen or permanent resident and regardless of how long you have resided or been educated in the U.S.
You must fulfill the English language proficiency requirement in one of the ways described below before regular admission will be granted. Freshmen may prove their English Language Proficiency without additional testing by: If you have not met the conditions described above, you will be required to complete an English proficiency test.

- completing two full years of general track English courses in a U.S. high school with grades of "C" or better and
- achieving an acceptable score on the verbal section of the SAT or ACT. There is no specific SAT/ACT verbal score required, but this score will be used in conjunction with other factors to evaluate your academic English skills.

Transfers may prove their English proficiency without additional testing by:

- presenting acceptable performance as described in the freshmen section above. You must provide records to verify acceptable courses, grades, and SAT/ACT scores, or completing two semesters of regular track, transferable English composition courses, equivalent to UM-Dearborn’s Composition 105 and 106, with grades of "C" or better in both courses ("C" or below is not acceptable for transfer). If you are enrolled in the second semester of English composition when applying and earn a "C" or better in the first semester of English Composition, conditional admission may be possible.

If you have not demonstrated English language proficiency in one of the ways described above, you must take an English language proficiency test. The Office of Admissions and Orientation will accept the Test of English as a Foreign Language (TOEFL), the Michigan English Language Assessment Battery (MELAB), or the International English Language Testing System (IELTS) Examination. You must take one of these tests; it is not necessary to take all of them.

The minimum score required for admission is dependent on the test you take. Achieving the minimum score does not guarantee admission, only consideration.

### Minimum Scores

<table>
<thead>
<tr>
<th>Test Type</th>
<th>Minimum Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>MELAB</td>
<td>76</td>
</tr>
<tr>
<td>TOEFL: Paper-based</td>
<td>550</td>
</tr>
<tr>
<td>TOEFL: Computer-based</td>
<td>213</td>
</tr>
<tr>
<td>3 TOEFL: Internet-based</td>
<td>80</td>
</tr>
<tr>
<td>IELTS</td>
<td>6.5</td>
</tr>
</tbody>
</table>

The TOEFL and IELTS are offered throughout the world. The MELAB is offered in the United States and Canada. You should take a test well in advance of your intended starting term. TOEFL and MELAB scores arrive at UM-Dearborn 6-8 weeks after the test date. IELTS mails results 13 days after the test date.

You may take the MELAB, TOEFL, or IELTS test more than once, and all scores will be considered. Test scores more than two years old will not be accepted for consideration. For testing information and registration materials, please contact:

MELAB
English Language Institute, TCD
3020 North University Building

toefl@ets.org (http://www.toeflgoanywhere.org)

UM-Dearborn offers English as a second language courses. For information, please call the English Language Proficiency Program Office at 313-583-6661. The University also offers provisional admission (see section "Provisional Admission").

Standardized test requirement

All freshmen are required to take a U.S. standardized college entrance examination, regardless of your citizenship/visa status or whether you have attended secondary school in the U.S. or abroad. Transfer students are not required to take this exam if they have earned at least 24 transferable credits. If for any reason, students are unable to provide a standardized exam result, the student should contact the Office of Admissions and Orientation immediately.

- The Office of Admissions and Orientation will accept either the SAT (Scholastic Aptitude Test) or the ACT (American College Test). The student should make certain that the test results are forwarded to the UM-Dearborn Office of Admissions and Orientation (SAT code #1861; ACT code #2074). You must take one of these tests (it is not necessary to take both). These tests are available throughout the world, and should be taken well in advance of the intended starting term. SAT and ACT scores take 6-8 weeks after the test date to arrive at UM-Dearborn. You may take the test(s) more than once, and UM-Dearborn will consider your highest composite score.
- Your score will be used as one factor in the admissions process. If your secondary education has been completed partially or entirely abroad, and if English is not your native language, your individual circumstances will be considered when evaluating your test scores.
- For students with international backgrounds, the score required for admission in each case will depend on various other factors, such as high school courses and grades, and English proficiency test scores (if required).
- For information and registration materials for the SAT or ACT, please contact your high school counselor if you are in the U.S., or contact the testing agencies directly if you are currently living abroad:

ACT
Academic Requirements for International Admission
This section discusses grade-point average (GPA) and course/curriculum requirements.

Freshmen
Freshmen who have attended secondary school abroad are expected to meet the same general admissions requirements as U.S. students.

1. You must have earned a U.S. high school diploma or the equivalent secondary school completion credential in your country, by the time you would enroll at UM-Dearborn. Freshmen usually apply during their last year of secondary school. Any offer of admission is conditional upon successful completion of the secondary school program before enrollment at UM-Dearborn.

2. You must have pursued a general academic (non-vocational) program of study. Solid preparation in the traditional academic college-preparatory subjects is required (English, mathematics, science, social studies).

3. You must have maintained above-average grades throughout your secondary school studies. Admission is competitive, and to be a strong candidate for admission, grades received should be equivalent to an overall GPA of 3.0 on a 4.0 U.S. scale. If you complete your secondary schooling abroad, please contact the Office of Admissions and Orientation for information on the credential and level of performance which would be acceptable for admission.

Transfer Students
The Office of Admissions and Orientation will evaluate transcripts from all institutions attended as well as ECE or WES evaluations for foreign schools.

General academic requirements for each unit are listed below. You should contact the Office of Admissions and Orientation as early as possible in your academic career to be certain that you are completing courses that will not only transfer, but also count toward specific admission and/or graduation requirements at UM-Dearborn. All GPA requirements are given using the 4.0 U.S. scale.

All transfer applications are reviewed on an individual basis, and if you do not meet the stated requirements for your desired unit, it is suggested that you discuss your situation with an admissions counselor. Call 313-593-5100 to schedule an appointment.

- College of Arts, Sciences, and Letters
  Required GPA: 2.50
- College of Business
  Required GPA: 2.70
- College of Engineering and Computer Science
  Required GPA: 2.75
  Other requirements: Students must also have a 2.75 recalculated math, science, and engineering GPA.
- College of Education, Health, and Human Services
  Required GPA: 2.75*

How to obtain I-20 or DS-2019
Please reference the Office of International Affairs website at umdearborn.edu/io_international-undergrad-adm/. All documents received by the Office of Admissions and Orientation will be shared with the Office of International Affairs for the purpose of creating the I-20 or DS-2019.

Admissions Committees
The Admissions Review Committee meets regularly to review borderline admission cases and other unique admission circumstances.

The Conduct Review Committee is comprised of individuals from offices across campus, and reviews applicants with academic or criminal conduct history.

Orientation
The Office of Admissions and Orientation conducts orientation programs for newly admitted freshmen, transfer students, and parents of incoming students. These programs focus on academic expectations, requirements at UM-Dearborn, and various aspects of campus life. The programs also make students aware of existing services available to them: counseling; tutoring; academic advising; life/work planning; and social and cultural activities. Registrations for a student’s first semester of classes takes place at Orientation. The orientation program for parents of new students acquaints them with the organizational and programmatic structure of the University. Once admitted to the University, each student will receive information about Orientation. It is expected that all new students, freshmen and transfers, will attend Orientation. Questions may be directed to the Office of Admissions and Orientation by calling 313-593-5100.

Placement Exams
Newly admitted students may need to take one or more placement exams. Placement exams are used to assess the level of class into which a student should enroll. Placement exams should be taken well in advance of orientation or meeting with academic advisor. Placement exams in English, Mathematics, and Foreign Language are offered. Placement exams are not used as a basis for awarding credit.

Financial Aid & Scholarships
Office of Financial Aid and Scholarships

313-593-5313 [FAX]
umd-ask-ofa@umich.edu
umdearborn.edu/financialaid
Federal Title IV School Code: 002326

It is the goal of the University of Michigan-Dearborn that no student should be denied an education because of limited financial resources. To meet this goal, the university maintains programs of grants, scholarships, loans and part-time employment for eligible students who are accepted
Available Financial Assistance

There are three types of aid available through a single application (the Free Application for Federal Student Aid or FAFSA): grants, loans and employment. Most assistance is offered as a package of two or more kinds of aid. Undergraduates (pursuing their first bachelor’s degree) are considered for grants, loans and work-study employment, according to their eligibility and preference. Students pursuing a second bachelor’s degree are limited to loans and work-study employment.

Admission into an eligible program of study (i.e., a degree-granting program) is a primary criterion to receive financial aid funding. All Personal Enrichment status students are ineligible for financial aid. Most Guest, Prospective Degree status and Alumni Enrichment students are ineligible for financial aid — however, there are limited exceptions which may be applicable to specific situations. Students admitted via Guest, Prospective Degree or Teaching Certificate status should make an appointment with a Financial Aid Officer to discuss their specific admission status and financing options.

Determining Need

Most financial assistance awarded by the Office of Financial Aid & Scholarships (OFAS) is based on financial need as determined by a careful review of the resources of the student and of the student’s family.

Need for financial aid is determined by the following calculation:

Cost of Attendance Budget (COA) - Expected Family Contribution (EFC) = Financial Aid Eligibility (Need)

To determine the Expected Family Contribution (EFC), the calculation formula used is the Federal Methodology as mandated by the U.S. Congress. By completing the Free Application for Federal Student Aid (FAFSA), the student’s family contribution is calculated and reported on the Student Aid Report (SAR) which is emailed or mailed to the student’s home by the federal processor.

Cost of Attendance

[umdearborn.edu/fa_costdetail](http://umdearborn.edu/fa_costdetail)

Each year, the Office of Financial Aid & Scholarships (OFAS) provides an estimated cost of attending UM-Dearborn for students interested in full-time enrollment. The estimated costs reflect a modest but adequate standard of living for the academic year. While there is some allowance for discretionary expenditures, there is no provision for costs not directly related to school attendance.

Tuition and fees are subject to change without notice by action of the Board of Regents. For current tuition and fees, individuals should consult umdearborn.edu/rr_tuition-fees.

How to Apply for Financial Aid

Most assistance is committed at a certain time of the year, so be mindful of application dates. Dates assume entrance for the fall semester.

Freshmen and Transfer Students

1. After January 1, preceding Fall enrollment, complete the Free Application for Federal Student Aid (FAFSA). Students must apply online at fafsa.gov (http://www.fafsa.gov). Include student and parent (if applicable) PIN numbers. Release the FAFSA information to the University of Michigan-Dearborn by entering our Federal Title IV School Code 002326. Students and parents should use their Federal Income Tax Returns (FORM 1040, 1040A or 1040EZ) to complete the FAFSA. FAFSA results received in the Office of Financial Aid & Scholarships (OFAS) by March 1 will receive first priority consideration for funds.

2. Upon review of your FAFSA, the Federal Processor will provide you with a Student Aid Report (SAR). The Federal Processor will forward an electronic SAR to the email address you provided on the FAFSA. The OFAS will receive your information electronically (assuming you have released the information to UM-Dearborn as described in #2 above).

Continuing Students

Students currently enrolled must apply every year at fafsa.gov (https://www.fafsa.gov) after January 1 preceding fall enrollment. Applications, SARs and/or ISIRs (resulting from the FAFSA) must be received in the Office of Financial Aid & Scholarships by March 1 to receive priority consideration for funds.

Summer

Summer is a separate processing period. Applications for Summer aid are available in late March/early April. Funding for the Summer term(s) is dependent upon funding levels after the two regular terms.

Reminders

1. Financial aid applications are processed only after a student has been admitted, but students need not wait until they are admitted to apply for financial aid.

2. Applications submitted after the stated dates will be considered, subject to the availability of funds, but notification may not come until after the term has begun.

3. Students must re-apply for financial aid each year.

4. All correspondence and documents must include the student’s legal name and UMID number.

Award Notification

New Students

Incoming students are notified in writing via U.S. mail of their initial financial aid offer. Thereafter, communication is via email and UM-Dearborn Connect (see below).

Current/Returning Students

Students are encouraged to regularly check their UM-Dearborn Email account and access their UM-Dearborn Connect account for award notification and other communication from the Office of Financial Aid & Scholarships. Email communication sent to student’s UM-Dearborn Email address directs students to recent notices or activity on UM-Dearborn Connect.

Additive Credit

Additive credits are not eligible for financial aid and will not be used to establish enrollment status for financial aid. Additive credits include EDF...
courses and most co-op/internship courses. For more information about Additive Credits, see Policies and Procedures Section.

**Award Procedures**

All financial aid awards are made in accordance with two criteria: **demonstrated financial need** and the student’s ability to maintain **satisfactory academic progress**. Completed files are processed on a first-come, first-served basis. A financial aid file is complete only after the following documents or information have been received:

- A completed FAFSA on file with the U.S. Department of Education. The processed FAFSA must be valid and have the University of Michigan-Dearborn school code (002326) listed so that OFAS can obtain the results electronically.
- The submission of all other information requested by the Office of Financial Aid & Scholarships (required prior to disbursement of federal aid), including verification documents if necessary.

Once a student’s financial aid file has been reviewed and deemed complete by a financial aid counselor, a financial aid package will be processed and an award notification will be mailed or emailed to the student. The initial financial aid package will be based on assumed full-time status for the fall and winter semesters. Awards will be adjusted to **actual enrollment**. Financial aid awards can be viewed on UM-Dearborn Connect.

**Repeating Coursework**

Federal financial aid programs can only pay for one repeat of a passed course (passed meaning grade “D” or higher). For example, if a student enrolls and earns a grade of “D” in a course, the student’s enrollment status for financial aid will include that course attempt. If a student enrolls a second time in the same course, the course will be included in the student's enrollment status for financial aid. If the student enrolls for a third time financial aid will not include the course in the student’s enrollment status. When a course is repeated, the previous enrollment is deducted from the calculation of successfully completed courses; therefore, this will lower your Cumulative Completion Rate. The University of Michigan-Dearborn may allow a successfully-completed course to be repeated (two times, totaling three) beyond financial aid limitations (one time, totaling two). Only the last grade received is counted in the CGPA.

**Types of Financial Aid**

There are three basic categories of financial aid: gift aid (scholarships and grants), loans and part-time employment. Most assistance is offered as a package of two or more kinds of aid. Undergraduates (in pursuit of the **first** bachelor’s degree) who apply to the OFAS are considered for all three types of assistance. Undergraduates in pursuit of a second bachelor’s degree are considered only for loans and work assistance.

**Gift Aid**

Scholarships and grants do not require repayment or work. Gift aid takes the following forms:

**Freshman & Transfer Scholarships**

The University offers a variety of scholarship resources for freshman and incoming students. University scholarship funds for incoming students are the following:

**Federal Pell Grants**

Pell Grant is a federal program with award ranges from approximately $717 to $5,730. An Expected Family Contribution (EFC) of 0 results in an award of $5,730 based on full-time enrollment for the academic year. The Federal Pell Grant Program is considered the foundation grant to which all other sources are added to create a financial aid package. Pell Grant is one of the few programs that permit some students to receive a prorated portion of the award at a less-than-half-time enrollment status.
The Federal Pell Grant Program has lifetime eligibility limitations for all Pell Grant recipients. Pell Grant recipients are eligible to receive a maximum of 12 full-time semesters of this grant. Once a student has used 12 full-time semesters, he/she is no longer eligible for any additional Federal Pell Grant. There is no appeal for this restriction.

Students are able to track their eligibility used on the National Student Loan Data System (http://www.nslds.ed.gov/nslds_SA) (NSLDS). Access is gained using your Federal Student Aid PIN.

The limitations of financial aid eligibility impact financial aid and scholarship programs. It is important to work closely with your academic advisor to stay on track to meet degree requirements to make the best use of financial aid funds.

Federal Supplemental Educational Opportunity Grants (FSEOG)

FSEOG is a federal campus-based program used to supplement the Pell Grant of the neediest Pell Grant recipients. At UM-Dearborn, FSEOG is reserved for students with an Expected Family Contribution (EFC) ranging from $0 – $1,000.

TEACH Grant

*(Teacher Education Assistance for College and Higher Education)*

Funded by the federal government, the TEACH Grant provides up to $3,708 per year for students whose intention is to teach in a “high need field” (subject area), in an elementary or secondary school serving students from low-income families. As a recipient, students agree (in advance of receipt) to teach a “high need field”, full-time, for a minimum of four years within the eight years following program completion (or progress interruption from the program for which the grant was awarded). The FAFSA is required to be considered for a TEACH Grant. However, recipients do not have to demonstrate “need.”

The TEACH Grant will remain a grant if recipients meet the specific criteria. If recipients do not meet the criteria, the TEACH Grant converts to an unsubsidized loan with interest calculated back to the initial disbursement date(s). For this reason, UM-Dearborn has defined our eligibility criteria as cautiously as possible.

The population UM-Dearborn currently considers for the TEACH Grant are: Seniors (at the undergraduate level) and graduate level students, with a high Cumulative Grade Point Average (CGPA), admitted into a degree-granting program of the College of Education, Health, and Human Services and pursuing majors that align with the “high need fields.”

The minimum CGPA requirement for the TEACH Grant is 3.25 (on a 4.0 scale). The undergraduate degree programs currently considered are: Bachelor of Arts and Bachelor of Science. Eligible majors at UM-Dearborn are: Education, General Science, Mathematics, Mathematics Studies, Reading Science Education, Science Studies, Special Education and Teaching.

**Michigan Competitive Scholarship (MCS)**

Funded by the State of Michigan, the Michigan Competitive Scholarships are available to many Michigan high school graduates from the Office of Student Scholarships and Grants, Michigan Department of Treasury. Scholarships are awarded to qualifying undergraduates attending public colleges and universities in Michigan. To qualify for the scholarships, students must demonstrate aptitude based on their performance on the American College Test (ACT) as well as financial need as determined by uniformly applied methodology via information from the FAFSA. Recipients must also meet Michigan residency requirements.

**Children of Veterans’ Tuition Grant Program**

The Children of Veterans’ Tuition Grant Program offers Tuition Grant assistance to the children of Michigan veterans who were killed while in service, died as a result of service-related disabilities, or is considered 100% disabled because of service-connected disabilities. The child must be a Michigan resident between the ages of 16 and 25. Upon admission to a Michigan institution of higher learning, eligible undergraduates may qualify for a Tuition Grant of up to $2800 each academic year for full-time enrollment (amounts are prorated for less than full-time enrollment.) Students must maintain a 2.25 or higher cumulative grade point average. Inquiries may be directed to the State at 888-447-2687.

**University of Michigan-Dearborn Grants**

Funded by the University of Michigan-Dearborn, UM-Dearborn Grants are awarded to help high need students defray tuition costs. The Expected Family Contribution (EFC) is used to determine eligibility for these grants. Some UM-Dearborn Grants are strictly need-based, some are need-and merit-based. Given eligibility and funding, applicants are automatically considered for the appropriate type of grant.

**Loans**

Eligibility for the following Federal loan programs are determined according to demonstration of need (based on the outcome of the FAFSA), availability of funds and also individual, annual and aggregate borrowing parameters. Eligibility requires adherence to Federal fund criteria, maintenance of the University’s Satisfactory Academic Progress guidelines and at minimum enrollment on an at-least-half-time basis. Requirements are subject to change over time. Additional documents may be required (e.g., Promissory Notes and/or Entrance Counseling) prior to disbursement of funds.

**William D. Ford Federal Direct Loan Program**

Federal Direct Loans are available through the William D. Ford Federal Direct Loan Program. Under the Federal Direct Loan Program, funds are lent to student or parent borrowers directly by the U.S. government. There are several types of Direct Loans: the Federal Direct Subsidized Loan (Subsidized FDSL), Federal Direct Unsubsidized Loan (Unsubsidized FDSL), Federal Direct Parent Loan for Undergraduate Students (FDPLUS), Federal Direct PLUS Loans for Graduate and Professional Degree Students and the Federal Direct Consolidation Loan program.

**Federal Direct Subsidized Loans** are awarded on the basis of financial need. No interest will accrue during half-time enrollment or authorized periods of deferment. You can help to remember the term by thinking of the Federal government subsidizing interest during these periods. Subsidized loan are available to only to undergraduate students.

**Federal Direct Unsubsidized loans** are not awarded on the basis of financial need. Interest will accrue from the time of disbursement until the loan is paid in full. While you are not required to make monthly payments during half-time enrollment or authorized periods of deferment, interest will accrue on the loan. Each quarter, unpaid interest will capitalize (interest will become additional loan principal). If you make quarterly interest payments on your unsubsidized loan during periods when no repayment is required, you will reduce the amount that you repay over the life of the loan.
Federal Direct Parent Loans for Undergraduate Students

Federal Direct Parent Loans for Undergraduate Students (FDPLUS) are for parent borrowers of dependent, undergraduate students. FDPLUS loans provide additional funds for educational expenses and, like Subsidized and Unsubsidized FDLSs, are funded by the federal government. FDPLUS enables parents to apply for an amount equal to the cost of education (minus the amount of other financial aid for the loan period). Borrowers should refer to studentloans.gov (http://www.studentloans.gov) for current interest rates. FDPLUS is limited to parent borrowers who do not have adverse credit histories. FDPLUS funds are disbursed via the (dependent) student's tuition account. FDPLUS proceeds (after tuition is paid) are refunded to the parent borrower via check by mail, (unless the parent borrower authorizes post-tuition proceeds to be released to the student).

Repayment of principal and/or interest generally begins 60 days after the loan is disbursed. However, parent borrowers may also opt to schedule repayment to begin six months after their dependent student (on whose behalf the parent borrowed) ceases continual enrollment on an at least a half-time basis. For those choosing the later, interest will be capitalized on to the principal.

Federal Direct PLUS Loans for Graduate or Professional Students

Graduate and professional degree students may also borrow under the PLUS Loan Program. The terms and conditions of the Graduate/Professional PLUS Loan are similar to those of a Parent PLUS Loan, (including the requirement that the applicant does not have an adverse credit history). Applicants are required to complete the FAFSA.

The amount an applicant may borrow is determined by calculating their cost of attendance minus other financial aid. They also must have applied for their annual loan maximum eligibility under the Federal Direct Subsidized and Unsubsidized Loan Programs before applying for a Graduate/Professional PLUS loan. Like the Parent PLUS, applicants may arrange for current or deferred repayment.

Federal Direct Consolidation Loan

Federal Direct Consolidation Loans are designed to help student and parent borrowers simplify loan repayment. This loan allows the borrower to consolidate several types of federal educational loans with various repayment schedules into one loan, requiring only one payment per month. Interest rates, however, may differ depending on the loan category as well as repayment and deferment options for the borrower.

Borrowers in default on a previous federal education loan may be able to obtain a Direct Consolidation Loan as a method of resuming the educational process and regaining eligibility for financial aid funds. (Those in default are ineligible for any and all financial aid while the default status is unresolved).

Those interested may contact the Direct Loan Servicing Center at 800-848-0979 or access their web site studentloans.gov (http://studentloans.gov) for additional information.

Student Employment

Federal Work-Study Program—Federal Work-Study is a Title IV program offering part-time work for students who demonstrate financial need. Students work up to 25 hours per week during the regular semester, depending upon the student’s financial need, availability of federal funds and the student’s class schedule. Seven percent of the school's annual Federal Work-Study allocation will be used to fund community service jobs. Priority is given to those who apply by the March 1 priority deadline. For more information please contact the Office of Career Services.

On-Campus Employment

On-campus employment is funded by UM-Dearborn. There are many part-time and temporary jobs available in the academic departments and in the support offices. Eligibility for Federal financial aid funds is not a factor for University employment. Students may contact the Office of Career Services and inquire about job availability. The departments pay 100 percent of these wages. To locate an on-campus job, visit umdearborn.edu/693914.

Other Sources of Financial Aid

Other sources of financial assistance are available through government agencies such as Vocational Rehabilitation, Veterans Administration and Social Security. Students needing information on these programs should contact the nearest appropriate agency.

Assistance for educational expenses may also come in the form of tax allowances. The Internal Revenue Service publishes Publication 970. Publication 970 provides information on educational benefits allowed within the tax code. Publication 970 may be obtained from the Internal Revenue Service or viewed online at irs.gov/publications/p970 (http://www.irs.gov/publications/p970).

Satisfactory Academic Progress

Federal regulation requires educational institutions that participate in federal financial aid programs to define and enforce Satisfactory Academic Progress (SAP) standards for students receiving financial aid. UM-Dearborn’s Satisfactory Academic Progress policy establishes standards of progress toward a degree. Recipients must achieve and maintain these standards of progress in order to receive funding from the Office of Financial Aid & Scholarships (OFAS). These standards are imposed on all federal and state programs, as well as programs supported by UM-Dearborn’s General Fund and awarded through the OFAS.
The standards of academic progress measure a student’s academic program both qualitatively and quantitatively. These measurements include a Cumulative Grade Point Average (CGPA) requirement, a Cumulative Completion Rate requirement and a Maximum Timeframe requirement. In addition, certain types of courses are limited or excluded from eligibility. The standards apply to all federal financial aid programs and programs funded and administered by the University of Michigan-Dearborn Office of Financial Aid & Scholarships and include degree, (teaching) certificate and consortium guest students who receive financial aid.

SAP is evaluated at the end of each term (Fall, Winter, and Summer). Federal regulations require the University of Michigan-Dearborn to evaluate all students for SAP regardless of whether or not they receive financial aid. SAP is evaluated based on the student’s cumulative academic record, from the date of entry to the university. Students at UM-Dearborn are not required to attend full time in order to receive financial aid or achieve satisfactory academic progress. The complete policy may be found at umdearborn.edu/fa_academicprogress

Return of Title IV Funds

Students receiving financial aid have the responsibility to follow the college’s withdrawal procedures as outlined in the University of Michigan-Dearborn catalog. The Higher Education Act requires the college to calculate a Return to Title IV funds on all federal financial aid students who withdraw (officially or unofficially) from all courses. A schedule is used to determine the percentage of the semester the student attended based on the withdrawal date/last date of attendance. The percentage of the semester the student attended is calculated as follows:

\[
\text{Number of days in attendance} \div \text{Number of days in Payment Period}
\]

The number of days counted includes all calendar days in the Payment Period including weekends and holidays, but excludes college breaks of five or more days. The percentage of the semester the student attended is used to calculate the amount of the student’s earned versus unearned federal aid funds. The unearned portion of federal aid funds received must be returned to the appropriate aid program in accordance with the order of return as mandated by law. The order of return is: Federal Direct Unsubsidized Stafford Student Loan, Federal Direct Subsidized Stafford Student Loan, Federal Direct PLUS Loan, Federal Pell Grant, Federal SEOG Grant, other Title IV aid. The college is responsible for returning the lesser of unearned Title IV aid or unearned institutional charges. Unearned institutional charges are based on the percentage of the semester the student did not attend. The college is responsible for its return of funds first, followed by the student’s return of funds. The student is responsible for returning:

\[
\frac{\text{(Amount of unearned Title IV Aid} - \text{Amount of aid school returns)}}{\text{Amount Student Returns}}
\]

If the student did not receive all of the funds that they earned according to the calculation, they may be due a post-withdrawal disbursement. If the post withdrawal disbursement includes loan funds, the University must get authorization from the student within 14 days before it can disburse the funds. A University may automatically apply all or a portion of the post-withdrawal disbursement of grant funds to an outstanding tuition and fees.

The University must return its portion of unearned Title IV aid (loan and grant) to the appropriate federal program within 45 days of the student’s withdrawal date as determined by the Office of Financial Aid & Scholarships. If the amount the student returns includes a federal loan program, the student is responsible for repayment of the loan in accordance with the terms of the loan program. If the amount the student returns includes grant aid, the student must repay 50% of the grant money received, rather than 100%. The student must return unearned grant aid to the college within 30 days to avoid kate fee assessments. Students who have been reported to ED by another institution for an Overpayment Status should contact the ED to make payment arrangements (http://www2.ed.gov/offices/OSFAP/DCS/ grant.overpayment.html) to repay the necessary grant funds.

Non-Attendance in Courses

Students who stop attending the University of Michigan-Dearborn may not receive further financial aid disbursements, may lose some or all of the aid that has already been disbursed to their account, may be responsible for repayment of unpaid charges, and may be considered in overpayment status with ED. Students who stop attending all classes without officially withdrawing from the college will be subject to a Return to Title IV Funds calculation at the end of the semester, based on their last date of attendance as determined by faculty.

If it is determined that a student has never attended a course(s), a reduction of some or all financial aid may be necessary. At the time the Office determines a non-successful grade, faculty will be contacted to confirm a last date of educational activity. A non-response from faculty requires the Office of Financial Aid & Scholarships to assume the student has never attended course(s).

Student Consumer Rights and Responsibilities

Section 493.A of the Higher Education Act requires post-secondary educational institutions to disseminate relevant, candid information on student financial aid programs available at the college. These rights and responsibilities may be found in the U.S. Department of Education (ED) publication entitled Funding Your Education: The Guide to Federal Student Aid. This guide is available online at edpubs.gov (http://www.edpubs.gov). Any change in a student’s financial situation, address, or school enrollment must be reported to the Office of Financial Aid & Scholarships. Students have the right to request a review of their financial aid package when a change in family or personal circumstances occurs. Students also have a right to review their financial aid records and may do so during counseling hours.

Information Dissemination and Report Disclosure

The U.S. Department of Education requires UM-Dearborn to disseminate information and disclose certain information to students. This information includes, but is not limited to: Voter Registration, Equity in Athletics, Campus Crime and Security, Completion and Transfer-Out Rates, and Drug and Alcohol-Free Campus policies. For further information on the listed topics, please refer to the University website at umdearborn.edu/fa_consumerinformationpolicy.

Registration & Records

Enrollment Services/Registration and Records
4901 Evergreen Road
1169 University Center
Dearborn, MI 48128
313-583-6500
The mission of the University of Michigan-Dearborn Enrollment Services/Registration and Records Office (ES/R&R) is to provide accurate academic record information and policy services to faculty, staff, students, alumni, the administration and external constituencies. The ES/R&R collects and disseminates student, course, and instructional information through processes that ensure the integrity and security of all academic records particularly with regard to the Family Educational Rights and Privacy Act (FERPA) as set forth by the Federal Government.

The Office is responsible for all aspects of student registration and academic records. The Office’s primary functions include schedule preparation, registration, grade processing and custodianship of student records. In addition, we are charged with the responsibility of communicating and administering academic policies, which we endeavor to enforce consistently and fairly. These activities are integral to the educational activities of the University, thereby supporting the primary mission, aspirations, and goals of the University of Michigan-Dearborn.

Auditing

Students are expected to elect courses for credit. The student’s program adviser, however, with the concurrence of the instructor involved, may grant official auditing privileges when they are warranted for educational reasons. A student auditing a course is charged the usual fee for that course. Any specific conditions must be enunciated by the instructor at the time permission is granted for the audit. (Contact your unit office for specific information and instructions.)

Change of Fees and Refunds

When appropriate, a change of fees will be processed by the Office of Registration & Records when a student submits a “Add/ Drop/Registration Form” or “Withdrawal Form” which affects the fee previously assessed. Individuals are also advised to see “Change in Course Elections” in this Catalog.

Refunds of tuition, fees, or student account credit balances are generated automatically. After authentication and processing, the refund is issued to the student.

Adding

A student who increases the number of hours elected will have a new fee assessment prepared by the Office of Registration & Records, which will indicate the appropriate fee to be paid.

Dropping (for Full, Half, and Four-Week Mini Courses)

A student who, during the first two weeks of a full term or the first week of a half term or mini-term reduces the number of hours elected, will have a new fee assessment prepared by the Office of Registration & Records, which will indicate the appropriate fee to be paid. No reduction in fee assessments will be made after the end of the second week of classes (first week of a half-term) except in cases of withdrawal from the University.

Dropping (for less than One-Month Mini Courses)

A student may drop from a less than one-month mini-course on or before the first class meeting of such a course without financial penalty. Thereafter, full tuition will be assessed and the academic record will reflect the symbol for withdrawal ("W").

Withdrawing (for Full, Half, and Four-Week Mini Courses)

A student who withdraws from UM-Dearborn is assessed as follows:

1. Students who withdraw prior to the first day of classes will not be charged any tuition assessments or fees.
2. Students who withdraw during the first week of a half term or mini-term, or during the first two weeks of a full term, will not be charged any tuition assessments or fees.
3. Students who withdraw during the second through third week in a half term or mini-term, or in the third through sixth week of a full term, will be charged 50% of the tuition assessed, as well as the non-refundable registration assessment. In addition, there is no reduction in lab/course fees or technology assessment.
4. Students withdrawing after the time periods indicated in Paragraph "3" will be assessed full tuition and fees.

Withdrawing (For Less Than One-Month Mini Courses)

1. Students who withdraw from a less than one-month mini course before the first class meeting of such a course will not be charged any tuition assessments or fees.
2. Students who withdraw from a less than one-month mini course on the first day of class will not be charged any tuition assessments or fees.
3. Students who withdraw from a less than one-month mini course on the second day of class will be assessed 50% of the tuition assessed, as well as the non-refundable registration assessment. In addition, there will be no reduction in lab/course fees or technology assessment.
4. After the second class meeting of such a course, the student shall pay all fees and assessments.

Change in Course Elections: Add, Drop, Withdrawal

(See Also “Change of Fees And Refunds”)

Changes in course elections include adding a course(s), dropping a course(s), substituting course(s), and withdrawing (discontinuing) all courses. All students will process their add/drop and withdrawals online or at the Enrollment Services Counter (1169 UC, with signatures when appropriate).

Please consult the section on “Change of Fees and Refunds” for the impact on tuition and fees.

Add

A student may add courses or change a standard graded course to Pass/Fail or Audit during the first two weeks of a full term, the first week of
a half term or mini-term, or before the second class meeting of a less than one-month mini-term. Any exceptions for adding courses must be approved by the student’s academic unit.

**Drop**

A student may drop a course(s) during the first two weeks of a full term, the first week of a half term or mini-term, or before the second class meeting of a less than one-month mini-term. No record of the student’s brief enrollment will be recorded.

Courses may be dropped during the third through the ninth week of classes in a full term, during the second through the fourth week of classes in a half term or mini-term, and before the third class meeting in a less than one-month mini-term.

The effective date of the drop is the date the drop form is received and signed at the Enrollment Services Counter.

Permission to drop courses under circumstances other than stated above will require the approval of the student’s academic unit.

**Withdrawal**

A student may discontinue all of his/her courses through the last day of classes (for the term) by withdrawing from the term. The completed form must be presented to the Enrollment Services Counter for processing. The effective date of the withdrawal is the date the withdrawal form is received and signed at the Enrollment Services Counter.

If a student withdraws (drops all courses) from a term during the first two weeks of classes in a full term, the first week of classes in a half term or mini-term, or before the second class meeting in a less than one-month mini-term, no record of the student’s brief enrollment will be recorded. Beyond those deadlines, the mark of W will appear on the transcript.

Permission to withdraw under circumstances other than stated above will require the approval of the student’s academic unit.

**Consecutive Withdrawals**

Every student’s academic record is reviewed for the purpose of observing academic progress at the end of each term in which the student is enrolled. A student who has not enrolled for one calendar year or who has withdrawn for two consecutive terms must apply for readmission and may not re-register without the explicit written permission of the student’s unit office. (PDS/PE students see Academic Support and Outreach Services, 2136 UC.)

**Required Withdrawals**

Unless extenuating circumstances are presented by petition, a student who is required to withdraw from one academic unit may not be admitted to another UM-Dearborn academic unit within the same term as that in which such withdrawal action is taken.

**Refunds and Financial Aid**

Students receiving Title IV financial aid may be required to repay some or all of the financial aid received for a term in which the student withdraws. Students required to repay financial aid funds will have the refunds allocated to financial aid programs in the following order: Federal Direct Loans, Federal Perkins Loans, Pell, SEOG, other Title IV, federal, state, private, and institutional programs and finally, to the student. Students receiving financial aid and considering withdrawal should seek the advice of a Financial Aid Officer prior to taking such action.
Grades associated with transfer credit from other schools or colleges (including other University of Michigan campuses) are neither recorded nor used in computing grade point averages of students.

Students may repeat a course no more than two times. All grades received must appear on the transcript, but only the last grade received is counted in the grade point average (GPA). Please see the Repeat Course Policy for more information.

Grade Notations

The following notations may appear on a transcript to describe special situations in regard to a course.

NC No Credit. No honor points. Not computed in the grade point average. Used only in specially approved courses that are graded A, B, C, No Credit.

I Incomplete. No honor points. A student whose coursework for the term (other than final examination) is incomplete in a minor way may, upon completion and approval of the I Contract Form, be granted the privilege of completing the work within a five-week period for the College of Engineering and Computer Science or the College of Business, and a four-month period for the College of Arts, Sciences, and Letters and College of Education, Health, and Human Services beginning on the first day of classes of the immediately following term. If granted this privilege, a grade of I will be recorded. Failure to complete the required work within the specified time, or the denial of this privilege by the instructor, may result in a grade of E for the final grade. In extenuating circumstances an extension beyond the stated period may be requested by means of a petition that has been endorsed by the instructor and approved by the Academic Standards Committee. However, such arrangements for completing the work must be made within the above stipulated time period. Failure to complete the required work within the specified time may result in a grade of I being automatically treated as an IE and counted in the student’s grade point average. The I will remain on the transcript even after the official final grade is assigned.

X Absent from Final Examination. No honor points. A student who is unavoidably absent from a final examination may be granted the privilege of making up the examination within five weeks beginning from the first day of classes of the immediately following term. If granted this privilege, a mark of X will be recorded. Failure to take the examination within the specified time, or the denial of this privilege by the instructor, will result in a mark of E for the final grade. In extenuating circumstances an extension beyond the stated period may be requested by means of a petition that has been endorsed by the instructor. However, such arrangements for completing the work must be made within the above five-week period. The grade of X will automatically be converted to XE and reflected in the student’s grade point average as a failing grade if the Supplementary Grade Report is not submitted by the end of the five-week period.

Y Course extended beyond term end. No credit. No honor points. A mark of Y indicates that a course extends beyond the end of one term. This mark is only used for courses that have been specially designed and approved to extend beyond the end of one term. A course with a Y mark may not be completed after graduation. If such a course is not completed, the Y will be converted to an E upon graduation.

NR Grade Not Reported. No honor points. Student should consult the Registrar immediately.

W Official Withdrawal. No credit. No honor points. Not computed in the grade point average. Students who drop a course or withdraw from all courses for a term before the deadline for official drops and/or withdrawals will receive for these courses the W notation. This notation may not be removed from the transcript.

S/E. Used only for specially approved courses. If a student passes, an S (satisfactory) is awarded. It is not computed into the grade point average. If a student does not pass, an E is awarded. If a student stops attending, without officially dropping, an UE is awarded. Both the E and the UE are computed in the GPA as failing grades. (Exception: Failing grades in additive credit courses that are graded S/E have no impact on the GPA.)

P/F Pass/Fail Option. No honor points. A student must elect to take a course under the Pass/Fail option. Please check with your college for its policy on electing courses as pass/fail.

UE Unearned Fail. This grade is assigned to any student who has never attended, or stopped attending class during the semester and did not officially drop. It is computed in the GPA the same as an E.

VI Visitor-Official Audit. No credit. No honor points. Not computed into the grade point average. An official audit, or visitor status, allows a student to attend a course but not elect it for credit. The VI notation appears on the transcript. Regular tuition fees are assessed.

Change of Grades

The grade that an instructor records on the final grade sheet and that appears on the student’s subsequent transcript is assumed to be final; that is, the instructor’s official evaluation of all of a student’s performance and work completed by the official end of the term (the last day of the final examination week).

The University permits a change of grade under the following circumstances:

1. Recognizing that mistakes can be made, the University of Michigan-Dearborn permits a student to ask an instructor for a review of a grade within a five week period after the end of the term involved. After the expiration of this deadline, a student may initiate a request for a review only through the petition process involving the student’s college Academic Standards Committee (or comparable group), whose decision shall be final. Such a review is entirely separate and distinct from the circumstances involving an X (Absent from Final Examination), I (Incomplete Coursework), or a Y (Course Extends Beyond Term).

2. A student (or instructor) may initiate a grade change if he/she discovers that a grade has been entered in error due to, but not exclusive to, the following:
   • possible omission by the instructor when computing the final grade, or material submitted by the student before the end of the term;
   • possible error in evaluation by the instructor of work submitted or final examination taken by the student before the end of the term;
   • possible error by the instructor in the computation of the final grade;
   • possible error in the recording of the grade by the instructor or staff; or
   • allegation of bias or prejudice on the part of the instructor in the assignment of the final grade (This rare charge is to be handled according to the procedures established within the academic unit).
Grading Benchmarks

The University of Michigan-Dearborn seeks to provide greater clarification as to the characteristics for each grade level. The descriptions below provide general achievement targets for each grade level.

The grading benchmarks do not establish a campus-wide mandate for faculty grading or grading outcomes. Instructors at the University of Michigan-Dearborn have the autonomy to formulate their own grading standards and system. Students should discuss and confirm with their instructor the grading system and requirements employed within their course(s).

1 The University of Michigan-Dearborn has adopted the "Grade and Marking System" employed by St. Olaf College: catalog.stolaf.edu/academic-regulations-procedures/grades/

---

**Grading Benchmark Achievement Levels**

**Superior Achievement (A level)**

The grade of A recognizes exceptional performance and achievement that exceeds course expectations and consistently demonstrates, where applicable, many of the following characteristics:

- Thorough, deep, and mature understanding.
- Genuine comprehension, insight, and synthesis.
- Significant mastery of challenging topics and issues.
- Extensive familiarity with relevant literature and previous work.
- Highly developed communication skills.
- Thorough preparation and extensive, thoughtful class participation.
- Integration of knowledge, concepts, and principles across disciplines.
- Originality of analysis and interpretation.
- Technical competence in skills and procedures.
- Precision of ideas and clarity of expression.
- Thinking that is independent, creative, and focused.
- Understanding of nuance and subtlety.
- Consistent coherence in argument and discussion.

**Good Achievement (B level)**

The grade of B recognizes work that meets course expectations and typically demonstrates, where applicable, many of the following characteristics:

- Clear understanding without much originality.
- Competent grasp of course materials and subject matter.
- Familiarity with relevant literature.
- Competence in communication skills.
- Regular preparation for and participation in class.
- Integration of course knowledge, concepts and procedures.
- Some evidence of critical and creative thought.
- Clear connections between inferences and evidence.
- Care in the use of evidence and quotations with only occasional thinness in argument, detail, or precision.

**Adequate Achievement (C level)**

The grade of C recognizes work that is sufficient to prepare for continued study in the field and generally demonstrates, where applicable, some of the following characteristics:

- Adequate grasp of course concepts.
- Partial mastery of knowledge and skills required for understanding.
- Incomplete familiarity with relevant readings or references.
- Writing that lists facts rather than develops well-reasoned arguments.
- Frequent neglect of important information.
December.
even though commencement exercises are held only in April (or May) and
Degrees are granted at the end of the fall, winter, and summer terms,
in which the student did not graduate, a new application is necessary.
If an application for a diploma was filed for a previous graduation period
dates. Applications will not be accepted after the published deadlines.
to Graduate Webpage, umdearborn.edu/rr_apply-graduate, for specific
to complete the requirements for degree. Please consult the Applying
the beginning date of classes for the term in which the student expects
Each candidate for a degree must file a Degree/Diploma Application
Limited Achievement (D level)
The grade of D indicates a lack of readiness to continue in the field. Students’
work usually demonstrates, where applicable, some of the following
characteristics:
• Minimal understanding of the subject matter.
• Poorly developed communication skills.
• Inability to apply subject matter understanding in other contexts.
• Little evidence of critical or creative thinking.
• Lack of apparent seriousness.
• Frequent carelessness in fulfilling assignments.
Inadequate Achievement (E)
The grade of E indicates that course work is insufficient to merit academic
credit. Students who receive an E usually demonstrate some of the following
characteristics:
• Inadequate understanding of subject matter.
• Inadequate or inconsistent preparation.
• Frequent failure to complete assignments in a timely manner.
• Little evidence of critical thought.
• Very poor communication skills.
• Frequent misunderstanding of facts or references.
• Little or no analysis.
• Confused or incomprehensible writing.
Little or no work offering evidence that course objectives have been met.
Graduation/Application for Diploma
Each candidate for a degree must file a Degree/Diploma Application
with the Office of Registration & Records, typically within ten days of
the beginning date of classes for the term in which the student expects
to complete the requirements for degree. Please consult the Applying
to Graduate Webpage, umdearborn.edu/rr_apply-graduate, for specific
dates. Applications will not be accepted after the published deadlines.
If an application for a diploma was filed for a previous graduation period
in which the student did not graduate, a new application is necessary.
Degrees are granted at the end of the fall, winter, and summer terms,
even though commencement exercises are held only in April (or May) and
December.
Instructor Requested Drop
A student who is absent from class meetings of a course during the first
week of any term and does not inform the instructor or the instructor’s
department of his/her intention to continue as a class member may
receive a request, by the instructor, to drop the course. The student
is responsible for processing all paperwork to officially drop this or
any course. Please consult the Registration & Records web site for
procedures on how to drop courses.
Registration Information
Academic Advising
Academic advising should be sought from the student’s school, college
or graduate department office prior to registration.
Appointment Time to Register
Continuing students who are eligible to register via the Web can
determine their registration date based on credits earned as listed in
the registration timetable. New students and those participating in non-
traditional programs will receive written information regarding their
registration appointment time. The Registration Timetable is available
on the Office of Registration & Records Website (umdearborn.edu/registration).
Closed Courses
Closed course information will be posted at the Enrollment Services
Counter (1169 UC) and on the Office of Registration & Records Website
(umdearborn.edu/registration).
Course Load
Students may elect a maximum of 18 credit hours in a given semester.
Students should contact their college for policies and procedures
regarding electing hours in excess of the maximum.
Holds
Students will not be allowed to register if they have a hold. A hold could
result from having outstanding financial obligations to the University,
academic probation, mandatory advising or other academic or non-
academic conditions that require resolution prior to registration. Students
can check their holds on UM-Dearborn Connect. See the “View Your
Holds” page located in the secure area under the Student Accounts
menu.
Personal Identification Number (PIN)
The University originally assigns your birth date (mmdyyyy) as your
personal identification number (PIN). For your security (if you have not
already done so), change this number immediately via UM-Dearborn
Connect. Once you have changed the PIN, your new PIN remains in effect
until you change it again. If you forget your PIN, use the ‘Forgot PIN’
button in UM-Dearborn Connect or you must report in person, with picture
identification, to the Enrollment Service Counter to have your PIN reset.
Registration Options
UM-Dearborn offers eligible students two options for registration:
• Walk-in
• Web

1 All students (with the exception of some non-traditional programs) who have been enrolled at least one term within the last year, new graduate students, and readmitted students who do not have financial obligations, holds or other registration restrictions are eligible to register via UM-Dearborn Connect. New transfer and new freshman students will register during New Student Orientation.

Reporting of Grades

The Office of Registration & Records reports term grades to students via a Final Grade Report in UM-Dearborn Connect. Grades are also reported on each student’s Academic Transcript. Updated Academic Transcripts are available to students two weeks following the close of the final examination period. Students requiring more immediate service may contact Enrollment Services for assistance. (Also see “Request for Transcripts”).

University of Michigan Guidelines for Qualifying for In-State Tuition

You may qualify for in-state tuition in any of the following three ways:

1. Residence. By demonstrating that you are a permanent legal resident of the State of Michigan as defined by these Guidelines (see Part I below);
2. Attendance. By demonstrating that you attended an accredited Michigan high school and accredited Michigan middle or junior high school (see Part II below); OR
3. Service. By demonstrating that you or a family member are serving or have served in the U.S. military or Public Health Service (see Part III below).

You may meet the criteria under more than one Part of these Guidelines. However, if you meet the criteria under one of the three Parts, you are not required to determine eligibility under the other two.

I. Establishing Eligibility Through Michigan Residence

You may qualify for in-state tuition by demonstrating that you are a Michigan resident.

A. General Principles

The University of Michigan has autonomous, constitutional authority to establish residency guidelines that apply to the University. The University’s residency guidelines are independent of other state rules or regulations governing residency for other purposes, including income and property tax liability or eligibility to vote or drive.

To qualify for in-state tuition at the University of Michigan on the basis of being a Michigan resident, you must establish that Michigan is your permanent legal residence. In other words, you must establish that the State of Michigan is your home and that you intend to remain in the State permanently. This will depend on, among other things, where you live, work, and attend school; where you have lived, worked, and attended school; where your parents or guardians live; and other evidence that you intend to make Michigan your permanent home.

The Board of Regents of the University of Michigan has charged the Residency Classification Office in the Office of the Registrar on the Ann Arbor campus with determining the residency of current and prospective students for all three University of Michigan campuses. If you are seeking in-state tuition on the basis of residence in the State of Michigan and your application, activities, and circumstances demonstrate that Michigan is your permanent legal residence, you will be classified as a resident. If, however, you seek in-state tuition on the basis of residence but your presence in the State is based on activities or circumstances that are determined to be temporary or indeterminate, you will be classified as a nonresident.

B. Process for Establishing Residency

1. Who Must Submit an Application for Resident Classification?

If you seek to qualify for in-state tuition as a Michigan resident and your application, circumstances, or activities suggest that you may have out-of-state activities or ties (as described below), you will be required to apply to be evaluated and classified as a resident or nonresident. This means completing an Application for Resident Classification truthfully and timely and submitting additional documentation.

Specifically, you must file an Application for Resident Classification if you seek in-state tuition on the basis of Michigan residence and have any of the following out-of-state activities or ties:

• you live outside the State of Michigan for any purpose, including, but not limited to, education, volunteer activities, travel, or employment;
• you attended or graduated from a college outside the State of Michigan;
• you lived or worked outside the State of Michigan at any time within the last three years;
• you are not a U.S. citizen;
• your spouse, partner, or parent is in Michigan as a nonresident student, medical resident, fellow or for military assignment or other temporary employment;
• you are 24 years of age or younger and a parent lives outside the State of Michigan;
• you are 24 years of age or younger and attended or graduated from a high school outside the state of Michigan;
• you attended or graduated from an out-of-state high school and have been involved in educational pursuits for the majority of time since high school graduation;
• you attended any University of Michigan campus (Ann Arbor, Dearborn, or Flint) as a nonresident.

Other circumstances also may require you to file an Application for Resident Classification.

If Michigan is in fact your permanent legal residence, as demonstrated by your admissions application, activities, and circumstances, you have none of the out-of-state activities or ties listed above, and your admissions application truthfully asserts that Michigan is your permanent legal home, you may claim Michigan as your legal residence and will not be required to complete an Application for Resident Classification. The University in its discretion may require you to complete an Application for Resident Classification and submit supporting documentation to determine whether you are a resident or nonresident under the University’s Guidelines. The University also reserves the right to audit your information and re-classify you as a nonresident.
2. **How Will Your Application For Resident Classification Be Evaluated?**

If you are required to file an Application for Resident Classification, the University’s Residency Classification Office will evaluate the information you provide to determine whether you have presented clear and convincing evidence demonstrating that Michigan is your permanent legal residence. The next sections of these Guidelines are designed to explain in greater detail the standards the Residency Classification Office will apply as your Application for Resident Classification is considered.

**a. Circumstances that may demonstrate permanent Michigan residence**

The following circumstances and activities, though not conclusive or exhaustive, may lend support to a claim that Michigan is your permanent legal residence:

- Both of your parents or parents-in-law (or in the case of divorce, one parent or parent-in-law) are permanent legal residents of Michigan as demonstrated by permanent employment in the State, establishment of a primary household in Michigan, and severance of out-of-state ties. You must also show that you have severed all out-of-state ties that suggest another state is your legal residence.
- You are employed in Michigan in a full-time, permanent position, your employment is the primary purpose for your or your family’s presence in the State, and you have severed any out-of-state ties that suggest another state is your legal residence.
- Your spouse or partner is employed in Michigan in a full-time, permanent position, your spouse or partner’s employment is the primary purpose for your family’s presence in the State, and you have severed all out-of-state ties that suggest another state is your legal residence.

**b. Circumstances that do not demonstrate permanent Michigan residence**

The circumstances and activities listed below are most often temporary or indeterminate and do not demonstrate permanent residence in Michigan. Individuals whose claim to Michigan residence is based solely on one or more of the following will generally not be found to be Michigan residents for tuition purposes:

- You are enrolled in a high school, community college, or university in Michigan;
- You are in a medical residency program, fellowship, or internship in Michigan;
- Your employment in Michigan is temporary or short-term or of the type usually considered an internship or apprenticeship;
- Your spouse or partner’s employment in Michigan is temporary or of the type usually considered an internship or apprenticeship;
- Your spouse or partner’s employment in Michigan is permanent but you are in the State for temporary reasons;
- Your employment position in Michigan is normally held by a student;
- You have paid Michigan income tax or filed Michigan resident income tax returns;
- Your relatives (other than parents) live in Michigan;
- You own property or pay Michigan property taxes;
- You possess a Michigan driver’s license or voter’s registration;
- You possess a Permanent Resident Alien visa;
- You have continuous physical presence in Michigan for one year or more;
- You sign a statement of intent to be domiciled in Michigan.

**c. Immigrants and Aliens**

If you are a permanent resident alien, an asylee or refugee, or possess an A, E, G, or I visa, you may be eligible for in-state tuition if you provide official documentation establishing your immigration status and demonstrate that Michigan is your permanent legal residence as defined under these Guidelines. Dependent children who hold an E visa are not eligible to be considered for resident classification. Individuals holding temporary visas, including, but not limited to F, H, J, K, L, Parolee, TN, and TD visas, are not eligible for in-state tuition as a Michigan resident.

**d. Dependent Students**

You are presumed to be a dependent of your parents if you are 24 years of age or younger and (1) have been primarily involved in educational pursuits, or (2) have not been financially self-supporting through employment.

- a. If you are a dependent student, and both your parents are legal residents of another state, you are presumed to be a nonresident.
- b. If you are a dependent, your parents or parents-in-law are divorced, and at least one parent or parent-in-law is a permanent legal resident of the State of Michigan (as defined in these Guidelines), you are presumed to be a resident if you can demonstrate that (a) Michigan is your permanent legal residence and (b) you have severed all out-of-state ties.
- c. If you are a student living in Michigan with your parents and a permanent legal resident of this State as defined by these Guidelines, you are presumed to retain resident status eligibility even if your parents leave the State if all of the following are true: (1) you have completed at least your junior year of high school before your parents’ departure; (2) you remain in Michigan, enrolled full-time in high school or an institution of higher education; and (3) you have not taken steps to establish a legal residence outside Michigan or any other action inconsistent with maintaining a permanent legal residence in Michigan.

**e. Michigan Residents and Absences From the State**

You may be able to retain your eligibility for resident classification under the conditions listed below if you are a permanent legal resident of Michigan under these Guidelines and leave the State for certain types of activities. However, if you have been absent from the State, you must file an Application for Resident Classification by the appropriate filing deadline to request resident classification and demonstrate your eligibility.

- a. **Absence for Active Duty Military Service (U.S. Army, Navy, Air Force, Marines, Coast Guard, Merchant Marine, Officers in the Public Health Service), Non-Administrative Missionary Work, Peace Corps, AmeriCorps, or Similar Philanthropic Work**
  
  If you are a permanent legal resident of Michigan as defined by these Guidelines when you enter active military duty, missionary work, Peace Corps, or similar service, you are presumed to retain your eligibility for resident classification if you (1) are on continuous active duty or in continuous service and (2) continuously claim Michigan as your state of legal residence for income tax purposes. If you are a dependent child of such an individual, you are presumed to be eligible for resident classification if both of the following are true: (1) you are coming to the University of Michigan directly from high school or have been continuously enrolled in college since graduating from...
high school; and (2) you have not claimed residency for tuition purposes elsewhere.

b. Absence Because of Temporary Foreign Assignment
If you are a dependent student and you and your parents are permanent legal residents of Michigan immediately preceding an absence for a temporary foreign assignment with a parent’s Michigan employer, you may retain your eligibility for resident classification if both of the following are true: (1) your family members hold temporary visas in the foreign country, and (2) you return directly to Michigan and remain in the State for educational purposes after leaving the foreign country.

c. Temporary Absence of Less Than One Year
If you are independently a permanent legal resident of Michigan immediately preceding a temporary absence of less than one year, you are presumed to retain eligibility for resident classification provided that, immediately upon your return to Michigan, you sever any out-of-state ties that suggest another state is your legal residence.

3. What Documents Must You Submit With Your Application For Resident Classification?
Along with your completed Application for Resident Classification form, you must submit additional documents.

a. All Applicants. All applicants must submit the following additional documents with an Application for Resident Classification:
   - copies of your driver’s license and the license(s) of the person or persons upon whom you are basing your claim to resident eligibility;
   - copies of the front and signature pages of the most recent year’s federal and state income tax returns and W2 forms for you and the person or persons upon whom you are basing your claim to resident eligibility; and
   - any other documentation that supports your claim to resident eligibility.

b. Dependents. If you are claimed as a dependent on federal or state income tax returns, or are presumed to be a dependent under these Guidelines, you must also submit the following documents:
   - copies of the front and signature pages of your parents’ most recent year’s federal and state income tax returns, along with accompanying W2s (and Schedule C and E if self employed) along with your parents’ most recent pay stubs showing Michigan income taxes being withheld.

c. Applicants Claiming Residency on the Basis of Employment. If you are seeking to establish that you are a Michigan resident on the basis of your permanent employment in the State, or the permanent employment of your parent, spouse, or partner, you must also submit the following documents:
   - a signed letter from the employer, written on letterhead (including phone number), stating the position, status, and dates of employment; and
   - a copy of the most recent pay stub showing that Michigan taxes are being withheld.

d. Applicants Born Outside the United States. All applicants born outside the United States seeking to establish eligibility for in-state tuition based on Michigan residency must also submit documents verifying U.S. citizenship or lawful permanent residence in the U.S.

4. Will You Be Required To Submit Additional Documentation?
In addition to the documentation required above, the Residency Classification Office may request additional documentation after the initial review of your application.

5. What Happens To Materials Submitted With An Application For Resident Classification?
Applications and accompanying documentation will be retained by the University of Michigan in accordance with its policies and procedures. All information will be kept confidential to the extent permitted by law.

6. What Information Does the Residency Classification Office Consider?
In making residency determinations, the University considers all information provided with your Application for Resident Classification and any other available information it determines to be relevant.

7. How Do You File An Application for Resident Classification?
Before filing an Application for Resident Classification, you must read Part VI below. The Application for In-State Tuition is available online at the link at the bottom of this page under the Applications for In-State Tuition section. Please read the instructions carefully before submitting your application.

II. Establishing Eligibility by Attending Michigan Schools
You also may qualify for in-state tuition by demonstrating all of the following: (1) you attended an accredited Michigan high school for at least three years and thereafter (a) graduated from an accredited Michigan High School or (b) received a Michigan General Educational Development High School Equivalency Certificate (GED); (2) you attended an accredited Michigan middle or junior high school for the two years preceding high school; and (3) you are commencing your education at the University within twenty-eight months of graduating from the Michigan high school or receiving your GED.

To establish eligibility by demonstrating attendance at Michigan schools, you must complete the following form truthfully and timely: Application for In-State Tuition on the Basis of Attendance. You do not need to be a legal resident of the State of Michigan or United States to qualify under Part II.

III. Establishing Eligibility Through Service
You also may qualify for in-state tuition, without regard to your legal residence, by demonstrating any of the following:

1. you are serving on active duty in the U.S. Army, Navy, Air Force, Marines, National Guard, Merchant Marine, or Coast Guard;
2. you are a reservist in one of those branches;
3. you were honorably discharged or received a general discharge under honorable conditions from one of those branches or their reserve component;
4. you are serving as an officer in the U.S. Public Health Service;
5. you are the spouse or dependent child of someone living or stationed in Michigan who is serving in the U.S. Army, Navy, Air Force, Marines,
National Guard, Merchant Marine, or Coast Guard, whether on active duty or as a reservist; OR
6. you are the spouse or dependent child of someone living or stationed in Michigan who is serving as an officer in the U.S. Public Health Service.

To establish eligibility by demonstrating service, you must complete the following form: Application for In-State Tuition on the Basis of Service, truthfully and timely.

IV. Deadlines
It is important to file your materials in a timely fashion. You may apply for in-state tuition for any term in which you are enrolled or intend to enroll. Late applications will be assessed a nonrefundable $300 late fee and will be accepted up to the last published day of classes of the term for which you are applying. Late applications received after the last day of classes will be treated as applications for the following term. In all cases, decisions will be based only on those facts that are in place by the original filing deadline for the term under consideration.

- Fall Term: all required materials must be received by 5:00 p.m. on September 30 of that term.
- Winter Term: all required materials must be received by 5:00 p.m. on January 31 of that term.
- Spring, Spring/Summer, and Summer Terms: all required materials must be received by 5:00 p.m. on July 31 of that term.

If the deadline falls on a weekend or University holiday, all required materials must be received by 5:00 p.m. on the next business day.

These deadlines apply to all University of Michigan schools, colleges, and campuses. For the On-Job or On-Campus program only, filing deadlines are 30 calendar days after the first scheduled day of classes of the term for which you are applying.

V. Appeals
If your request for in-state tuition is denied, you may file an appeal as described below.

The Board of Regents has charged the Appeal Committee with reviewing decisions about eligibility for in-state tuition. The Appeal Committee is chaired by the Vice President and Secretary of the University and includes two other University administrators, a faculty member, and a student. Staff of the Residency Classification Office are not members of the Appeal Committee.

Any appeal must be in writing and must be received by the Appeal Committee no later than 5:00 p.m. on the 30th calendar day following the date of the letter denying your request for in-state tuition. If the deadline falls on a weekend or University holiday, your appeal must be received by 5:00 p.m. on the next business day.

The mailing address for the Appeal Committee is as follows: Residency Appeal Committee, c/o 1210 LS&A Bldg., 500 S. State Street, Ann Arbor, MI 48109-1382.

If there is additional information you would like the Appeal Committee to consider beyond the materials you have already submitted, you should submit that additional information, in writing, with appropriate supporting documentation, with your written appeal. The Appeal Committee may consider the appeal letter and additional documentation along with all the information in your original request.

Personal contact with a member of the Appeal Committee about the subject of your appeal could disqualify him or her from participating in the decision regarding your appeal. The Appeal Committee does not meet in person with students, and appearances on behalf of students are not permitted at appeal meetings.

After the Appeal Committee has completed its deliberations, you will receive the Committee’s final decision in writing. This will conclude the appeal process for the term covered by the application. The University will not conduct any further review of the decision.

VI. Misrepresentations, Falsifications, Omissions; Audits; And Adverse Consequences
Individuals who provide false or misleading information or who omit relevant information in an attempt wrongly to obtain in-state tuition will be subject to severe legal and disciplinary measures, including but not limited to expulsion from the University and retroactive tuition charges. The University routinely audits information and documentation submitted with requests for in-state tuition to ensure compliance.

VII. Where Can You Obtain Additional Information?
For questions on in-state tuition, please contact:

Residency Classification Office
Office of the Registrar
1210 LSA Building
500 South State Street
Ann Arbor, MI 48109-1382
Phone: 734-764-1400

Applications for In-State Tuition
The Application for In-State Tuition is available online. Your access to the online application may depend upon your progress and status in the admissions application process, so please read carefully. In order to log in and complete an application for in-state tuition, you will need:

Your University of Michigan issued eight digit UMID number AND:
1. EITHER a University of Michigan issued uniqname and Ann Arbor/Kerberos password,
2. OR a Friend Account.

a. Admitted Students (All campuses) AND all applicants who have previously been issued all of the following: UM ID number, uniqname and Kerberos password, can authenticate using your uniqname and Kerberos password. NOTE: see footnote 1 if you need to reset your password.

b. Applicants not yet admitted, or with no previously issued uniqname or password must apply using a verified Friend Account:
   i Create a Friend Account: (friend.weblogin.umich.edu/friend/ (https://friend.weblogin.umich.edu/friend))
Verify your Friend Account via Wolverine Access: wolverineaccess.umich.edu

Locate the New & Prospective Student Business (N&PS) link under the Students section on the Wolverine Access homepage. After logging in with your Friend Account and password, you will be immediately prompted to complete the one-time only identity verification steps (add University of Michigan ID (UMID) and birthdate). Once done, you will be prompted to sign out; this will bring you back to the Wolverine Access homepage. Navigate back to the N&PS link, and locate the link to the online In-State Tuition Application in the lower right of the page, or, you can log in later using the Application for In-State Tuition link above; this will bring you directly to the application.

1 Ann Arbor/Kerberos Password:
For Flint and Dearborn students, this is NOT the password used to login to your campus’ Banner student information system (SIS). This is unique to the Ann Arbor campus. If you have been admitted and have a uniqname but are unable to login to create an application, you might need to re-set your Ann Arbor/Kerberos password. Password assistance is different for each campus:

- Dearborn campus students click here (https://umdearborn.edu/offices/information-technology-services/accounts-passwords/passwords) for help and instructions for changing your password.
- Flint campus students click here (https://helpdesk.umflint.edu/customer/portal/articles/1627949-umich-password—usage-restrictions-and-how-to-change-it) for help and instructions for changing your password.
- Ann Arbor campus students click here (http://www.itcs.umich.edu/help/faq/uniqnames.php) if you need assistance with your password.

2 Friend Account Information:
Detailed instructions for setting up a Friend Account are provided at this link: itcs.umich.edu/friend

PLEASE BE AWARE: If you originally logged in using a Friend Account and have since been admitted, your uniqname will be issued and the Friend Account log in will be disabled. You should be able to access your in-state tuition application information using your uniqname and password.

Need Help?
Please contact the ITS Service Center (4Help@umich.edu or 734-764-4357) if you encounter any login issues.

If you wish to check the status of an already submitted application, please do so through your Wolverine Access account: Students—Student Business—Residency.

Transcripts

Transcript Information
A transcript is a student’s complete academic record at the University of Michigan-Dearborn. The transcript(s) that were presented for admission have become an integral part of the files of the admitting offices and cannot be released, either directly or for copying purposes. It will be necessary for you to write directly to the institutions concerned to obtain copies of those previous records. In addition, documents such as SAT/ACT scores are not available from Enrollment Services/Registration & Records. Transcripts will be released only upon written request of the student. Requests are processed within three to five business days. Under certain circumstances, such as the end of the term or upon graduation, requests may take longer to process. Requests will not be processed if you have any financial obligation outstanding to the University. No fee is required for standard delivery transcripts.

Types of Transcripts:
Official Transcripts are printed on special paper with the Registrar’s signature. Official transcripts given directly to a student will be stamped Issued to Student and may not be accepted by other universities.

Unofficial Transcripts are printed on plain paper and marked Student Copy.

Rackham Transcript Information
Students who attended Rackham, Winter 1998 through the present may direct the transcript request to the Dearborn campus as indicated above under “Dearborn Transcript Information.”

Students who attended Rackham prior to Winter 1998 or have graduated prior to January 1998 from the Rackham Graduate School must direct the transcript request to:

University of Michigan
 Transcript Department
 555 LSA Building
 Ann Arbor, MI 48109-1382

Fax: 734-764-5556

Rush Transcript Information
Students may request a rush copy of their transcript in person at the Enrollment Services counter. A $10.00 rush fee per transcript (cash or check only) will be required at the time of the request. Requests received prior to 12:00 noon will be ready for pickup on the same day after 4:00 p.m. Requests received after 12:00 noon will be available for pickup the following day after 12 noon.

Web Transcript Information
Students are able to view and request transcripts online via the UMDearborn Connect (http://web-sis.umd.umich.edu) system. Please visit the Online Transcript Instructions (http://umdearborn.edu/rr_trans-instruc) page for more information.

Tuition Assessment and Fee Regulation
Tuition and fees are subject to the approval of the Regents of the University and are subject to change at any time.

Policies Governing Student Tuition and Fees
The Board of Regents shall determine the level of tuition and fees and a schedule of such shall be published. All other student tuition and fees shall be fixed by the Campus Fee Committee.
Payment of Tuition and Fees

All tuition and fees are payable in accordance with regulations established by the University providing only that said regulations may not defer payment beyond the end of the term for which they are assessed.

Payment for tuition and fees may be made in full at the Cashier’s Office, or online, after registration. The laboratory and/or course fees are refundable if the course is dropped during the first two weeks of a full term, the first week of a half term or mini-term, or before the second class meeting of a less than one-month mini-term. The procedure for obtaining a refund is described in the section “Change of Fees and Refunds.”

Application Fees

If you submit a paper application via mail, you must include payment (check or money order payable to UM-Dearborn) for a $30 non-refundable application fee. If you apply online, the application fee is waived and you can check your application status online. The fee is also waived if a paper application is submitted in the Office of Admissions and Orientation or at an on-site admissions appointment.

Applications for undergraduate non-degree or certificate programs do not require a fee.

Course Level Assessment

Undergraduate students electing Graduate course(s) will be assessed at the Graduate Tuition rate for the graduate course(s). Graduate courses are numbered 500 and above. (Effective Winter 2007)

Graduate students electing Undergraduate course(s) will be assessed at the Undergraduate Tuition rate for Undergraduate course(s).

Undergraduate courses are numbered 499 and below. (Effective Fall 2006)

Please note: This tuition assessment is dependent on various factors and a change in tuition may not occur for some students.

Dual Status Tuition and Fees: Graduate And Undergraduate

Seniors who are within six hours of completing the requirements for graduation and who have been admitted to a UM-Dearborn graduate program may, with both undergraduate and graduate advisors’ approval, register simultaneously in a UM-Dearborn undergraduate unit and in a graduate program. Tuition and fees will be assessed at the graduate program level for graduate courses and the undergraduate program level for undergraduate courses.

Dual Enrollment Tuition and Fees: On Two Campuses Of The University

A student electing courses at UM-Dearborn and at another campus of the University, by means of a “Guest Admission,” will pay the appropriate tuition and fees at each campus. The only exception is that the student will not be assessed tuition and fees totaling more than a full program tuition and fees at whichever campus may have the higher full program tuition and fees.

Undergraduate Credit By Examination (CBE)

See the Special Examinations in the Policies section.

Laboratory and/or Course Fees

Students will be assessed a laboratory or course fee if enrolled in any of the courses so designated in the Schedule of Classes (e.g., “Lab fee $50.00”).

Late Registration Assessment

A late registration assessment of up to $45 will be assessed for anyone registering later than two weeks (one week for a half term) after the first day of classes. It should be noted that students are not ordinarily permitted to register after the first two weeks of a full term, the first week of a half term or mini-term, or after the second class meeting of a less than one-month mini-term.

In exceptional cases, a student might be permitted to enroll even after the first two weeks (and be charged a late fee) if the student has obtained the written approval of the dean (or a designated representative) of the college or school. Late registrants not pursuing a degree (PDS/PEs) must have the approval of both the Office of Academic Support and Outreach Services and the Registrar, as well as the approval of any instructors involved.

Fees Included Within Tuition

The tuition and fees assessed by the University include a nominal charge for parking and other transportation-related services, information technology services, the health referral service to the Henry Ford Hospital-Fairlane Clinic, facilities debt service, and support for student activities and organizations.

Exemption From Payment Of Fees

No exemption from the payment of fees shall be granted. Failure to fulfill financial obligations to the University may result in disciplinary action, including the withholding of degrees and transcripts.

New Student Fee

The New Student Fee of $75.00 is charged to all new incoming degree-seeking students at the time of registration. The fee will be automatically posted to the student’s account. This fee covers operational expenses required to deliver high-quality orientation programming for students. It also includes the administration of placement exams, regardless of participation in these activities. The New Student Fee is non-refundable unless a student withdraws from all courses in his/her first term on or before the end of the drop/add period (the first two weeks of the term).

Tuition and Fees

Students should obtain current tuition and fee information from the Office of Registration & Records Tuition & Fees webpage, umdearborn.edu/rr_tuition-fees.

Additional Assessments

Course levels 300 and above are assessed an additional amount per credit hour. For current tuition and fee information, students should consult the Office of Registration & Records Tuition & Fees webpage, umdearborn.edu/rr_tuition-fees.
Technology Assessment
A Technology Assessment is charged to all students. This assessment varies by academic unit. For current tuition and fee information, students should consult the Office of Registration & Records Tuition & Fees webpage, umdearborn.edu/rr_tuition-fees.

Tuition Refund Insurance Plan
The Tuition Refund Insurance Plan is an elective insurance which provides coverage for tuition and fees. If a student withdraws due to illness/injury or psychological/emotional reasons, the Tuition Refund Insurance Plan returns 85% of the insured term tuition and fees when specific insurance company criteria has been met.

For Tuition Refund Insurance Plan information or to enroll online, please refer to the Tuition Refund Insurance Plan website: umdearborn.edu/rr_tuition-fees-refund-plan.

Special Tuition and Fee Adjustments
The Registrar and the Provost for Academic Affairs are authorized to make adjustments in the application of the policy stated above when, in their judgment, unusual circumstances warrant such action.
Circumstances that may warrant special consideration include the death or serious illness of the student. The student who wishes to have his/her case reviewed must petition and submit documentation to the Office of Registration & Records, Room 1169, University Center, either in person or by mail. It is the responsibility of the student to make sure that required documents are submitted.

Except in rare and unusual circumstances, petitions will not be accepted after the last day of classes for the term concerned. Additionally, petitions will not be accepted once an account has been turned over for collection.

Enrollment Verification
Enrollment Verification requests cannot be processed prior to the end of the Change of Election (add/drop) period for the term requested.

When a loan agency, student loan provider, employer, insurance agency, etc. requires proof that a student enrolled at the University of Michigan-Dearborn, the Office of Registration & Records, at the students request, can provide an Enrollment Verification.

Loan Deferments
The University of Michigan-Dearborn uses the National Student Clearinghouse as the service for verifying enrollment for student loans. These verification requests will be processed by that agency within 10 business days of receipt of request at the Office of Registration & Records. Enrollment Verification request forms are available at the Office of Registration & Records, 1169 University Center, during regularly scheduled office hours or via this website. When requesting verification for a student loan, you must submit the official forms sent to you by the loan agency along with your request to the Office of Registration & Records.

All Other Requests
The Office of Registration & Records processes requests for verification, excluding student loan deferments. Requests are accepted via mail, fax, or UM-Dearborn Connect (online). Using the online Enrollment Verification Request Form requires a Personal Identification Number (PIN). Your PIN is used as an electronic signature, allowing us to release the information that you are requesting. For your security you should keep your PIN confidential. If you do not have a PIN or have forgotten it, please mail or fax the Printable Enrollment Verification Request Form. If you are requesting enrollment verification on a document that you have received, use the Printable Enrollment Verification Request Form, complete it, and mail or fax it along with the document to the Office of Registration & Records.

Scale
The following scale is used when verifying student enrollment status at UM-Dearborn:

<table>
<thead>
<tr>
<th>Status</th>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full Time</td>
<td>12 or more hours</td>
<td>8 or more hours</td>
</tr>
<tr>
<td>Three-Quarter Time</td>
<td>9-11 hours</td>
<td>6-7 hours</td>
</tr>
<tr>
<td>Half Time</td>
<td>6 to 8 hours</td>
<td>4-5 hours</td>
</tr>
<tr>
<td>Less Than Half Time</td>
<td>5 or less hours</td>
<td>3 hours or less</td>
</tr>
</tbody>
</table>

Please forward completed Printable Enrollment Verification Request Forms to:

University of Michigan-Dearborn
Office of Registration & Records
1169 UC
4901 Evergreen Road
Dearborn, MI 48128-2406

Or Fax to:

University of Michigan-Dearborn
Office of Registration & Records

Veteran Affairs
The goal of the Office of Veteran Affairs is to provide support to a diverse community of student veterans and enhance the experience of veterans as they move through our academic programs. We accomplish this mission by:

- Providing academic assistance and tutoring
- Coordinating access to Counseling and Disabilities Services
- Providing veteran specific enrollment and certification services
- Maintaining a dialog with our Student Veterans of America Chapter and the Association of Women Veterans
- Retaining points of contact in Financial Aid, Cashiers/Student Accounting, and Enrollment Services/Registration & Records
- Forging partnerships with business, industry, educational institutions, and government agencies.
- Scheduling veteran specific events

The veteran’s office space provides a friendly environment for our active duty military and veterans to study, relax, socialize, converse, or just gain a moment of quiet reflection. Whether you were just discharged from active duty, currently on active duty, in the National Guard or Reserves, or a spouse or dependent of a disabled veteran, we will help you with your transition and academic goals. The Office of Veteran Affairs is located in the University Center in room 2174.
Certification of Educational Benefits

The administration of veteran’s education benefits programs and enrollment certifications are handled by Veteran Affairs Certifying Officials located in the Enrollment Services Office. Our goal is to effectively assist veterans, or the dependents of veterans, with the certification process. Students who are eligible for VA educational benefits are able to apply their respective benefits toward their educational endeavors at UM-Dearborn with assistance from this office.

All students who are eligible for, and elect to receive education and training benefits while attending UM-Dearborn, may address inquiries for information to the:

Enrollment Services/Registration & Records
4901 Evergreen Road
1169 University Center
Dearborn, MI 48128
313-583-6500 or umd-va@umd.umich.edu.

Additional information regarding veteran services, certification, and the policies and procedures for certification of benefits can be found on our website at: umd.umich.edu/rr_va (http://www.umd.umich.edu/rr_va). Questions regarding the eligibility of a veteran or dependent can be answered by calling the St. Louis Regional Office at 1-888-GIBILL1 (442-4551) or connecting to the Department of Veteran Affairs website at: benefits.va.gov/gibill (http://www.benefits.va.gov/gibill).

Academic Standing

Every student’s academic record is reviewed, for the purpose of observing academic progress, at the end of each term in which the student is enrolled at UM-Dearborn. To be in good scholastic standing, a student must have a cumulative grade point average of at least 2.0. Students who fall below 2.0 in their grade point average will be placed on academic probation. After having been placed on academic probation, the student is allowed one more term of coursework on campus in order to attempt to bring the cumulative grade point average up to the required 2.0 level. If the student does not return to good scholastic standing at the completion of that term, the student may not re-register without the explicit written permission of the unit.

This general description of standards must be augmented by the regulations of each individual unit. All students must, therefore, be familiar with the academic requirements and rules of their own college.

Academic Standing Appeals

Students who wish to appeal decisions on their academic status, made by a unit’s committee on academic standing, may do so by addressing a petition to the executive committee (the chief policy body) of the unit in which they are admitted. If a negative decision is rendered at this high level, the student may, under unusual circumstances, appeal the case to the Academic Appeals Board of UM-Dearborn.

1. The UM-Dearborn Academic Appeals Board shall hear cases dealing only with academic matters, excluding matters of academic misconduct, which shall be addressed by the Academic Integrity Board as defined in the UM-Dearborn Statement of Student Rights & Code of Student Conduct.

2. Individuals may seek redress from the Board only after all reasonable efforts have been made to settle the disagreement within the unit. Such an individual may then write to the Vice Chancellor for Academic Affairs, stating the grounds of the complaint, the name(s) of those most immediately involved, and a summary of the relevant information.

3. The Board is empowered to determine which complaints it will review. If a hearing is to occur, all parties shall receive written notice, ordinarily within thirty (30) days after the Vice Chancellor for Academic Affairs has received the written complaint. If, for any reason, a hearing is not to take place, the Board will inform the parties in writing and the reasons for its decision.

4. The Board will consist of the Council of Deans (minus the dean in whose academic unit the case is being contested), plus the Vice Chancellor for Enrollment Management and Student Life, the Registrar, the Academic Affairs “Proceedings Advisor”, and one student representative named by the Student Government Council.

5. The Provost and Vice Chancellor for Academic Affairs will chair the Board, without a vote, except to break a tie. All other members of the Board are regular voting members.

6. Five regular voting members will constitute a quorum to hear appeals. There are no alternates for the eight regular voting members. The term of office is one full academic year for all members.

7. Each side may call upon the assistance of an adviser.

8. An audiotape record of the proceedings will be available to both sides.

9. Since it is the function of the Board to conduct hearings and not court trials, the Chair shall set reasonable limits upon the length of the presentations. The usual format will allow the opposing sides to make opening statements, present evidence, and make closing statements.
Additive Credit
UM-Dearborn Courses
Some courses have an additive credit designation. The course credit hours for additive credit courses do not count toward a student’s degree. Several courses in UM-Dearborn curricula and some co-operative education/internships are reflected on a student’s transcript but do not fulfill requirements for graduation. MATH 080, MATH 090, and COMP 099, for example, bridge the gap between high school and college and are therefore offered only for additive credit. Courses taken for additive credit count in the determination of enrollment certification but not toward a degree or in determining class level.

Additive credits are not eligible for financial aid and will not be used to establish enrollment status for financial aid.

With the exception of remedial courses (MATH 080, MATH 090; COMP 099; CHEM 090), the Department of Veteran Affairs will not pay for courses offered as additive credit.

Additive Courses Taken Elsewhere
Such courses as described above in the paragraph on UM-Dearborn additive credit courses are not transferable from other institutions to UM-Dearborn.

Alcohol and Drug Prevention Program Policy
This policy is intended to educate members of the University community about the health risks associated with the use and abuse of alcohol and other drugs and about the resources available for counseling and therapy. In addition, in order to assure a work and learning environment that promotes the University’s mission and proper function, the University prohibits unlawful possession, use, or distribution of alcohol or illicit drugs by faculty, staff, or students on University property or as a part of any University activity. Federal and state sanctions also apply to such conduct.

Health Risks
The use or abuse of alcohol and other drugs increases the risk for a number of health-related and other medical, behavioral, and social problems. These include acute health problems related to intoxication or overdose (blackouts, convulsions, coma, death); physical and psychological dependence; malnutrition; long-term health problems including cirrhosis of the liver, organic brain damage, high blood pressure, heart diseases, ulcers, and cancer of the liver, mouth, throat, stomach; contracting diseases, such as AIDS; through the sharing of hypodermic needles; pregnancy problems including miscarriages, stillbirths, and learning disabilities; fetal alcohol syndrome (physical and mental birth defects); psychological or psychiatric problems; diminish behavior (hangovers, hallucinations, disorientation, slurred speech); unusual or inappropriate risk-taking that may result in physical or emotional injury or death; violent behavior toward others, such as assaults and rape; accidents caused by operating machinery while impaired; impaired driving resulting in alcohol and drug-related arrests, traffic accidents, injuries, and fatalities; negative effects on academic or work performance; conflicts with co-workers, classmates, families, friends, and others; and conduct problems resulting in disciplinary actions, including loss of employment; and legal problems, including imprisonment.

Counseling and Treatment Programs
The University of Michigan encourages individuals with alcohol- or drug-related problems to seek assistance by contacting Counseling and Support Services, 2157 UC, 313-593-5430. This office can also provide additional information on local, state, and national resources for those seeking assistance.

University Sanctions
Unlawful possession, use, or distribution of alcohol or illicit drugs by faculty, staff, or students on University property or as a part of any University activity may lead to sanctions within the University, the severity of which shall increase as the seriousness of the violation increases.

Sanctions include:

• Verbal or written reprimand;
• Completion of an appropriate rehabilitation program;
• A disciplinary warning, with notice that repetition of the offense or continuation of the offense may result in a more serious sanction;
• Suspension from the University (student) or from employment (employee) from a specified University activity or facility for a fixed period of time or until completion of specified conditions, such as completion of an appropriate rehabilitation program;
• Expulsion from the University (student) or termination of employment (faculty or staff); and/or
• Other appropriate sanctions.

Sanctions for violations by faculty and staff shall be imposed pursuant to existing procedures applicable to acts of misconduct (e.g., Regental
Bylaw 5.09, Standard Practice Guide 201.12, and appropriate collective bargaining agreements). Sanctions for violations by students shall be imposed pursuant to the UM-Dearborn Student Code of Non-Academic Conduct or pursuant to other approved procedures. Copies of the applicable student procedures are available at the Office of Enrollment Management and Student Life, 1060 Administration Building.

**External Sanctions**

Unlawful possession and use or distribution of alcohol or illicit drugs may lead to referral to the appropriate local, state, and/or federal authorities for prosecution for a misdemeanor or a felony, depending on the nature of the offense. The sanctions for such offenses may include fines and/or imprisonment.

For example, under federal laws, trafficking drugs such as heroin or cocaine may result in sanctions up to and including life imprisonment for a first offense involving 100 grams or more. Fines for such an offense can reach $4 million. Offenses involving lesser amounts, 10 grams, may result in sanctions up to and including 20 years of imprisonment and/or fines of up to $2 million. A first offense for trafficking marijuana may lead to sanctions up to life imprisonment for offenses involving 1,000 kilograms or more or up to five years of imprisonment for an offense involving less than 50 kilograms. Such an offense carries with it fines that can reach $4 million for an individual offender. Federal and state sanctions for illegal possession of controlled substances range from up to one year of imprisonment and up to $100,000 in fines to three years of imprisonment and $250,000 in fines for repeat offenders. Under Michigan laws, use of marijuana is a misdemeanor punishable by up to 90 days in jail and a $100 fine. Delivery of marijuana is a felony punishable by up to four years of imprisonment and up to $2,000 in fines. Violations may also lead to forfeiture of personal and real property and denial of federal benefits, such as grants, contracts and student loans.

The State of Michigan may impose a wide range of sanctions for alcohol-related offenses. For example, under federal laws, trafficking drugs such as heroin or cocaine may result in sanctions up to and including life imprisonment for a first offense involving 100 grams or more. Fines for such an offense can reach $4 million. Offenses involving lesser amounts, 10 grams, may result in sanctions up to and including 20 years of imprisonment and/or fines of up to $2 million. A first offense for trafficking marijuana may lead to sanctions up to life imprisonment for offenses involving 1,000 kilograms or more or up to five years of imprisonment for an offense involving less than 50 kilograms. Such an offense carries with it fines that can reach $4 million for an individual offender. Federal and state sanctions for illegal possession of controlled substances range from up to one year of imprisonment and up to $100,000 in fines to three years of imprisonment and $250,000 in fines for repeat offenders. Under Michigan laws, use of marijuana is a misdemeanor punishable by up to 90 days in jail and a $100 fine. Delivery of marijuana is a felony punishable by up to four years of imprisonment and up to $2,000 in fines. Violations may also lead to forfeiture of personal and real property and denial of federal benefits, such as grants, contracts and student loans.

**Employee Reporting Requirement**

Under the Drug-Free Workplace Act of 1988, in addition to the other requirement of this policy, a faculty or staff member who works in any capacity under a federal grant or contract must notify his or her University supervisor or department head, in writing, of his or her conviction for a violation of any criminal drug statute occurring in the workplace no later than five calendar days after such conviction. This applies to direct charge employees and to the indirect charge employees who perform any support of overhead functions related to the grant. The supervisor or department head must then promptly report the violation to the General Counsel’s Office.

**Distribution of Policy**

A copy of this policy statement shall be distributed annually to all faculty, staff and students.

**Review of University Program and Policy**

Biennially, the University shall review its “Alcohol and Drugs Prevention Program Policy on Alcohol and Drugs” to determine the program’s and policy’s effectiveness and implement changes, if needed, and to ensure that the University’s disciplinary sanctions are consistently enforced.

**Alcohol at Campus Events**

**Policy on Serving**

Consumption of beverages containing alcohol is prohibited on the UM-Dearborn campus except under the conditions specified in this policy.

Alcoholic beverages may not be served at events in the Fieldhouse. Alcoholic beverages may be served at events held in other facilities on the UM-Dearborn campus under the conditions described below.

Any event at which alcoholic beverages will be served must have a designated host who is a full-time permanent faculty or staff member of the UM-Dearborn. The host assumes responsibility for implementing these guidelines, supervising servers and intervening if immoderate drinking or other high-risk behaviors are developing.

Beverages containing alcohol must be monitored by a designated server at all times. The designated server may not consume alcohol at the event. Alcoholic beverages may not be carried out of the designated event location.

Serving alcoholic beverages to individuals less than 21 years of age is illegal and expressly prohibited. Events at which the majority of participants will be under age should not include alcoholic beverage.

Under no circumstances may University General Fund accounts, including organization accounts funded with student activity fees, be used to purchase alcoholic beverages.

Any event at which alcohol will be served must be planned in such a way as to respect the preferences of individuals who choose not to drink for religious, personal, or health reasons; and in no case should an event be planned around or advertised to feature the consumption of alcohol. Substantial food and beverages that do not contain alcohol must always be served at an event that includes alcoholic beverages.

Written authorization to serve alcohol at a campus event must be obtained from the University Center Office at least one week before the
planned event. Authorization will specify type of event, participants, location, time, and the responsible host.

Attendance

A student is expected to attend every class and laboratory for which he or she has registered. Each instructor may make known to the student his or her policy with respect to absences in the course. It is the student’s responsibility to be aware of this policy. The instructor makes the final decision to excuse or not to excuse an absence. An instructor is entitled to give a failing grade (E) for excessive absences or an Unofficial Drop (UE) for a student who stops attending class at some point during the semester.

Code Conduct for Student Loans

Although the University of Michigan-Dearborn’s existing conflict of interest policies would already preclude the conduct prohibited by 34 C.F.R. § 668.14(b)(27),1 for clarity, the University of Michigan-Dearborn hereby establishes, as an addendum to the University of Michigan-Dearborn’s Conflict of Interest and Conflicts of Commitment Staff Implementation Guidelines and the Policy on Faculty Conflicts of Interest and Conflicts of Commitment, this code of conduct in regards to private student loans.

The responsibility for the administration of this code of conduct and its enforcement resides with the UM-Dearborn Provost and UM-Dearborn Vice Chancellor for Enrollment Management and Student Life of the University of Michigan-Dearborn.

This code of conduct is applicable to all officers, employees and agents of the University of Michigan-Dearborn and any affiliated organizations with responsibilities (directly or indirectly) with respect to private student loans. UM-Dearborn officers, employees and agents subject to this policy are prohibited from doing any of the following, either on their own behalf or on behalf of the University:

- Participating in a revenue-sharing arrangement with any lender by which the lender pays a fee or provides other material benefits to UM-Dearborn or any officer, employee or agent subject to this policy in exchange for the UM-Dearborn’s recommendation of that lender or its loan products;
- Soliciting or accepting gifts, including reimbursement of expenses or payment of expenses in a manner inconsistent with the requirements set forth in UM-Dearborn's COI/COC Policies as requiring possible conflicts disclosure, from any lender, guarantor, or servicer that provides private education loans to students, unless the item or payment in question meets the exceptions set forth in 34 C.F.R. § 601.21(c)(2)(ii);
- Accepting from any lender or affiliate any fee, payment, or other financial benefit as compensation for any consulting arrangement or other services contract with or on behalf of a lender of private education loans, except that UM-Dearborn officers, employees, or agents subject to this policy who do not work in the Office of Financial Aid & Scholarships may serve on a lender’s board of directors, provided that they recuse themselves from any board decisions relating to private education loans at UM-Dearborn;
- Directing borrowers to particular lenders or delaying loan certifications;
- Requesting or accepting from any lender any offer of funds to be used for private education loans in exchange for UM-Dearborn’s providing the lender with a specified number of, loan volume of, or preferred lender arrangement for, private education loans
- Requesting or accepting any lender’s assistance with call center or Office of Financial Aid & Scholarships staffing, except that UM-Dearborn may request or accept from any lender (a) professional development training for financial aid administrators, educational counseling or other materials to provide to UM-Dearborn’s student borrowers (provided that such materials indicate the lender’s involvement in preparing or providing them), or (b) short-term, nonrecurring staffing assistance with financial aid-related functions during emergencies; and
- Receiving anything of value from any lender, other than reimbursement for reasonable expenses, in exchange for service on an advisory board, commission, or group established by a lender, guarantor, or group of lenders or guarantors.

Any employee who is offered any gift or monetary compensation from a lender should contact the Office of Financial Aid & Scholarships for clarification and guidance before responding favorably to that offer.

Should an employee subject to this policy inadvertently accept a gift or other type of monetary compensation from a lender, that employee must immediately notify the Department’s Director or Dean. The amount received, the name of the employee or agent, a brief description of the activity and the dates of the activity for which the expenses were paid or provided must be reported to the Department’s Director or Dean, who must then share that report with the UM-Dearborn Director of Financial Aid. The Director of Financial Aid is responsible for reporting this information annually to the Secretary of the Department of Education.

The UM-Dearborn Director of Financial Aid is responsible for providing annual notification of these requirements to all employees and agents with responsibilities (directly or indirectly) for administration of private education loans. This notification will be done via email in January of each year. In addition, this code of conduct will be published on the websites of UM-Dearborn’s Office of Financial Aid & Scholarships, Human Resources, Enrollment Management and Student Life, and the Provost’s Office.

1. This regulation requires all institutions that participate in the federal Title IV student loan programs to adopt a code of conduct that meets the requirements of 34 C.F.R. § 601.21.
2. Because the University of Michigan-Dearborn does not participate in the FFEL Program, the regulation cited applies to the University only as it’s terms relate to private education loans.

Completed and Approved 7/1/10

Coursework at Other Institutions

If you are a degree-seeking student at UM-Dearborn and in good academic standing, you may apply as a guest student to another college or university. Although not required, students are encouraged to speak with an advisor prior to taking courses off-campus. To ensure appropriate transferability of a course, you may complete a Transfer Equivalency Request/Verification Form (http://umdearborn.edu/fileadmin/template/emsl/files/R_R/Transfer_Equivalency_Request.pdf) prior to attendance at another school or college. Guest admission is usually valid for only one university semester or session at a time.

It is important that you understand the process of guest attendance and the transferability of courses prior to proceeding. If you are not clear
on how this will affect your financial aid, please consult with a Financial Aid Counselor prior to proceeding. You are responsible for knowing and understanding your financial aid benefits.

When to Apply
You should apply well in advance, and at least one month prior to the start of classes at your chosen school. Please allow 3-5 business days for processing.

How to Apply
• Decide on a school and the course(s) you wish to elect
• Verify that you have not reached the maximum allowable transfer credit hours and that you are within the required number of residency hours.
• If you are not sure about your Financial Aid, please consult with a Financial Aid Counselor prior to proceeding. You are responsible for knowing and understanding your Financial Aid benefits.
• Review the Course Transfer System (CTS) for equivalencies. Complete a Transfer Equivalency Request/Verification Form, if desired.
• Complete a Michigan Uniform Undergraduate Guest Application (You must meet the minimum requirements to attend another school as a guest student.). Once your guest application is completed, sign and then mail, fax, email or deliver in person to UM-Dearborn Enrollment Services/Registration and Records (ES/R&R), 1169 UC.
• Please indicate if you would like ES/R&R to mail your guest application to your chosen school or if you would prefer to pick up your completed form.
• Inquire about course registration procedures at guest school.

Once you have completed your course(s), request that your transcript is sent to your Academic Unit Office for evaluation, transfer approval and recording of credits.

ENROLLING IN COURSES AT A SCHOOL OUTSIDE OF MICHIGAN:
If you plan to take a course at a school outside of Michigan, you may need to have the course evaluated and approved prior to enrolling.

Many out-of-state courses are not evaluated. If a course is not listed in the CTS, please work with your college advising office to check for equivalencies. The advising office may require a course description and possibly a syllabus to determine if the course is transferable to UM-Dearborn. If a course is not listed you will need to complete a Transfer Equivalency Request/Verification Form. This should be done BEFORE you take a course to ensure appropriate transfer.

IMPORTANT NOTES REGARDING COURSES:
Please check the Course Transfer System (CTS) for course equivalencies or have a course(s) evaluated via a Transfer Equivalency Request/Verification Form by your college before registering so that you will know if and how a course will transfer to UM-Dearborn.

• Grades and/or honor points are NOT transferable to UM-Dearborn from the guest school and will not be recorded on your transcript. You must obtain a C or higher for the course to transfer to UM-Dearborn. Please be aware that some programs require a higher grade in specific courses. Please review your Undergraduate Catalog for specific program requirements and consult your Undergraduate Academic Advisor to verify the grade you must earn to allow the credit to transfer.
• You are responsible for having your transcript sent back to UM-Dearborn once you complete your coursework. Contact the Registrar’s Office at your guest school and request that an official copy of your transcript is mailed to your college advising office (http://umdearborn.edu/697496).
• Please allow approximately three (3) weeks for your transcript to be reviewed. Once UM-Dearborn has evaluated and approved your transfer credit, the credit will be posted to your UM-Dearborn transcript. If your course was approved via a Transfer Equivalency Request Form prior to your guest attendance, the time-frame for posting credit to your transcript is reduced.

REQUIREMENTS AND CONDITIONS REGARDING TRANSFER CREDIT:
Please read the following requirements and conditions governing the transfer of course credit to UM-Dearborn.

• Only those undergraduate courses earned at institutions that are regionally accredited or from a foreign university or college approved by the government or the official regulating agency of the country will be considered for transfer credit at UM-Dearborn.
• If you are electing a course already completed at UM-Dearborn, credit may not transfer. Please consult your academic advisor before repeating a course at another school. Transfer courses are not permitted to alter the UM-Dearborn GPA.
• If you are registering for a prerequisite to a course you plan to take at UM-Dearborn, the prerequisite course must be completed and the grade provided to your Academic Unit on an official or unofficial transcript. For final posting, an official transcript is required.
• Course credits taken off-campus cannot exceed the maximum transfer totals.
• Please consult with your academic advisor to verify that taking courses off-campus will not interfere with Residency Requirements.

Dual Degrees
Students may apply for two or more degrees either within the same college or in different colleges. To earn both degrees, students must meet the degree requirements for each degree. Generally, distribution courses taken within the College of Arts, Sciences, and Letters may be used to satisfy both degrees. Students should expect to elect at least 30 more credits to earn both degrees. Students are advised to contact each program to learn the specific requirements that must be met.

Some degrees, such as the degrees in Engineering Mathematics or Computer and Information Science (CIS) Mathematics, are only available as concurrent degrees and must be paired with a primary degree in either engineering or CIS. There are special concurrent degree programs in which a student can earn both a BSE in Electrical Engineering and Computer Engineering or in both Industrial and Systems Engineering and Manufacturing Engineering. Students interested in dual degrees should see their advisor.

Eletronic Communication
(E-Mail) With Students
The UM-Dearborn uses your assigned UM-Dearborn email address for all university email communications. You are responsible for accessing
your UM-Dearborn email account on a frequent and consistent basis to stay informed of important University business such as information regarding your student account, financial aid, registration, grades or correspondence from faculty.

You may choose to forward messages from your UM-Dearborn email address to an alternate personal address. However, doing so may place you at risk of not receiving critical University communications. For additional information on your UM-Dearborn email account (including how to forward your UM-Dearborn email address), go to its.umich.edu/ (http://www.its.umich.edu) and select Accounts.

This policy reflects UM-Dearborn’s commitment to using available technology to communicate among members of the campus community. It recognizes an expanding reliance on electronic communication among students, faculty, and the administration due to the convenience, speed, cost-effectiveness and environmental advantages it provides. This policy will define the proper use of electronic communications between University staff, faculty and students. Electronic communications may include, but are not limited to, electronic mail, electronic bulletin boards, and web sites.

UM-Dearborn authorizes the use of email for official communication between students, staff, faculty, and the administration. All members of the campus community are expected to comply with established guidelines and procedures that define the proper use of electronic communications.

To implement this policy, the following actions and services will be provided:

1. **Provision of University email**
   UM-Dearborn will provide all staff, faculty, and students with an official University email address. This will be the address listed in University directories. All official University email communications will be directed to this address.

2. **Appropriate use of University email**
   Certain University electronic communications may be time-critical. Students, staff, and faculty are responsible for checking their official email address on a frequent and consistent basis in order to stay current with University communications. In general, email is not appropriate for transmitting sensitive or confidential information unless an appropriate level of security matches its use for such purposes.
   Confidentiality regarding student records is protected under the Family Educational Rights and Privacy Act of 1974 (FERPA). All use of email, including use for sensitive or confidential information, must be consistent with FERPA.
   Email shall not be the sole method for notification of any legal action.

3. **Redirecting of University email**
   Members of the campus community may elect to forward University email to an alternate address (e.g., aol.com, hotmail.com, comcast.net). They are responsible for ensuring that the configuration of their email service does not accidentally label University messages as spam. Users who redirect email from their official address to another email address do so at their own risk. The University will not be responsible for the handling of email by outside vendors or by departmental servers. Having email redirected to an alternate service does not absolve students, staff or faculty members from the responsibilities associated with communication sent to their official email address.

4. **Access to University email**

   Students who are not in possession of a home computer, or do not have access to a computer at work, can use computers available in campus labs or in their local library.

5. **Faculty use of University email**
   Faculty may determine how email will be used in their classes. It is highly recommended that if faculty have email requirements and expectations, they specify these requirements in their course syllabus. Faculty may reasonably expect that students are accessing their University email, and may use email for their courses accordingly.

---

**Honors**

**Academic Honors**

**William J. Branstrom (Freshman) Prize**
First-term freshmen who rank in the upper five percent of their class and earn 14 credit hours and at least a 3.50 GPA on any campus and in any unit of the University of Michigan are named recipients of the William J. Branstrom Prize. This distinction is noted on the student’s transcript as “William J. Branstrom Prize.”

**James B. Angell Scholars**
Students who earn straight A’s (A+, A, A-) for two or more consecutive terms with a minimum of 14 elected credit hours each term, 12 of which must be graded, are named James B. Angell scholars. This distinction is noted on the student’s transcript.

**University Honors**
University Honors are awarded to all students who have achieved a 3.50 GPA and 14 credit hours (12 of which must be graded A-E). This distinction is noted on the student’s transcript as “University Honors” after fall and winter terms only.

**Honor Scholars Recognition**
Students who have achieved superior academic performance are invited to and individually recognized at an Honor Scholars Awards Dinner held in late March each year. Those honored include active undergraduate and graduate students, one per degree major, with a specific minimum GPA, a specific minimum number of credit hours, and other criteria deemed appropriate by the School, College, or Department. For further information, contact the Office of the Provost, 1080 Administration Building; telephone 313-593-5030.

**Graduation Honors**

**Chancellor’s Medallion**
The Chancellor’s Medallion is awarded at each Commencement Exercise to UM-Dearborn graduates. The students are selected based on his/her quality of character, vitality, intellect, integrity and academic record. The December awardees are selected from August degree recipients and December degree candidates. The April/May awardees are selected from April/May degree candidates.

**With Distinction**
Students who graduate and have obtained a cumulative GPA of at least 3.2 but less than 3.6 are recommended for graduation "With Distinction". Such distinctions are noted on transcripts and diplomas.
With High Distinction
Students who graduate and have obtained a cumulative GPA of at least 3.6 are recommended for graduation "With High Distinction". Such distinctions are noted on transcripts and diplomas.

Institutional Equity
The University of Michigan, as an Equal Opportunity/Affirmative Action employer, complies with applicable federal and state laws regarding nondiscrimination and affirmative action, including Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973. The University of Michigan is committed to a policy of nondiscrimination and equal opportunity for all persons regardless of race, sex, color, religion, creed, national origin or ancestry, age, marital status, sexual orientation, gender identity, gender expression, disability, or veteran status. Such a policy ensures that age, marital status, disability, individual’s sexual orientation, gender identity, gender expression, disability, or veteran status in employment, educational programs and activities, and admissions.

Inquiries or complaints may be directed to the:

Senior Director for Institutional Equity and Title IX/Section 504 Coordinator, Office of Institutional Equity,
2072 Administrative Services Building,
Arbor, Michigan 48109-1432,
734-763-0235;
TTY 734-647-1388.

University of Michigan-Dearborn inquiries may be addressed to the:

Dearborn Institutional Equity Officer,
Office of Institutional Equity,
1020 Administration Building,
Dearborn, Michigan 48128-2406,
313-593-5320 or 593 -5190,
TTY 313-593-5430,
fax 313-593-3568.

The Office of Institutional Equity aims to ensure that all groups, including racial, ethnic and religious minorities, women, the disabled, senior citizens, gays, lesbians, transgender individuals and veterans all have equal opportunity and receive the support they need to be effective and successful as students, faculty or staff members. The office oversees the University’s compliance with affirmative action/ nondiscrimination legislation, and University policies and procedures. The office is available to provide information and pre-grievance counseling to faculty, staff and students with discrimination or harassments complaints and co-sponsors training and educational programs.

The University of Michigan believes that educational and employment decisions should be based on individuals’ abilities and qualifications and should not be based on irrelevant factors or personal characteristics that have no connection with academic abilities or job performance. It strives to build a diverse community in which opportunity is equal for all persons regardless of race, sex, color, religion, creed, national origin or ancestry, age, marital status, disability, individual’s sexual orientation, gender identity, gender expression or veteran status. Such a policy ensures that only relevant factors are considered and that equitable and consistent standards of conduct and performance are applied. The University exerts its leadership for the achievement of this goal by all parties with which the University transacts business, which it recognizes, or with which students or employees of the University are involved.

Any University of Michigan - Dearborn employee having a complaint of discrimination should notify the:

Institutional Equity Officer,
1020 Administration Building,
313-593-5320,
TTY 313-593-5430,
fax 313-593-3568.

A student should notify either the:

Institutional Equity Officer or the Ombudsman in 2106 University Center,
313-583-6445.

Posting and Handbill Distribution
The posting of any information or advertisement and distribution of handbills (fliers) is governed not only by the policy below, but also by all other applicable University Policies and Procedures:

1. The Posting Approval Log must be completed and signed by a representative of the organization or person responsible for the posted material.
2. All posted literature must be approved and officially stamped with a removal date at the lower left- or right-hand corner by a staff member of the Office for Student Engagement (OSE). Approved literature may be posted for a maximum of thirty days. Extensions to the thirty-day maximum posting period may be granted by the OSE in extenuating circumstances.
3. The indiscriminate distribution (littering) of handbills on the UM-Dearborn campus is strictly prohibited. Offending parties may have their personal and/or organizational rights to distribute handbills on campus revoked and/or may be rebilled for inordinate custodial or plant maintenance cost.
4. Material must be posted on designated Campus News & Activities bulletin boards, tack stripping, and kiosk structures only. Posting on University walls, windows, doors, lighting poles, floors, telephones, restroom facilities, sidewalks, roadways, parking lots, plants, or any vehicle on University property is strictly forbidden.
5. Chalking of University property is prohibited.
6. Fliers or posters partially or fully covering pre-approved material or Campus News & Activities signs will be removed.
7. Standard staples, thumbtacks, and pushpins are the only acceptable methods of affixing posted materials to bulletin boards.
8. Individuals and organizations are limited to posting one (1) flier not to exceed 8-1/2 x 11 inches, or one (1) sign not to exceed 18 x 24 inches per designated bulletin board, except where specified. Individuals or organizations may post four (4) fliers or two (2) signs of the above-noted dimensions on the tack stripping in the University Mall. Fliers or posters with different formats or graphics which essentially provide the same basic advertisement information are considered the same and subject to the above noted one per bulletin board provision.
9. Campus News & Activities bulletin boards may not be covered, amended or cleared without the express permission of OSE.
10. One (1) 3 x 6 foot banner, with official approval, may be posted on the balconies in the CASL Atrium for a period not to exceed twenty-one (21) days and must be appropriately hung as not to result in an obstruction or fire hazard.
   a. Banners used for commercial business gain or commercial advertisement are prohibited from posting.
b. Banners advertising events of an ongoing nature or events not primarily sponsored by a recognized entity from within the UM-Dearborn community are prohibited from posting.

c. The posting representative assumes responsibility for posting banners properly and removing all banners on the date stamped.

11. The content of the posters and signs is the direct responsibility of the posting individual and/or organization. Persons posting information written in a non-English language must provide an exact English translation for OSE records.

12. OSE retains the right to refuse the approval of material that is not in keeping with University policy and procedure.

13. Failure to adhere to the Posting and Handbill Distribution Policy may result in disciplinary action under applicable University of Michigan-Dearborn policies and procedures and/or applicable civil statutes.

Advisory: The Rock Painting Policy, as codified in The Student Clubs and Organizations Information and Policy Manual governs painting on the rock outside the northwest entrance to the University Center.

Privacy and Access to Information

In collecting, utilizing, and releasing information about individuals associated with the University, the University will strive to protect individual privacy, to use information only for the purpose for which it was collected, and to inform individuals of the personal information about them that is being collected, used, or released. The University will not release sensitive information without the consent of the individual involved unless required to do so.

Repeat Course Policy

Guidelines

When a prior grade or mark other than “W” is recorded for a course, or its equivalent, or its cross-listing, a subsequent enrollment (“repeat”) of the course, or its equivalent, or its cross-listing, will result in an adjustment of the grade point average and credits earned.

1. Students may repeat a course up to two times (total of three attempts).

2. Regardless of whether it is higher or lower than the previous grade(s), the last grade assigned in a course will be used in computing the student’s cumulative grade point average and credits earned toward degree.

3. If a student takes a course three times (the maximum allowed), the previous two grades will not be reflected in the GPA.

4. Most courses can be elected only once for credit. The maximum number of credits/elections allowed in courses designed for multiple enrollments are indicated in the Undergraduate Catalog. For information regarding these courses, students may contact their unit Academic Advisor.

This policy applies to all undergraduate degree and non-degree students in all academic units. An exception not to accept the final grade in a repeated course cannot be petitioned.

The policy applies only to courses elected Fall 2005 or later.

Students who have repeated a course two or more times prior to Fall 2005 may repeat the course only one additional time. Only the two most recent previous grades will be affected by the new policy. Other previous grades will continue to be used in computing the grade point average.

Courses taken at institutions other than the University of Michigan-Dearborn do not affect the grade point average.

The use of an Audit Grade Mode or Pass/Fail Grade Mode may not be used to adjust grade point averages for courses previously elected under any other existing grade mode.

For students who earned an undergraduate degree at UM-Dearborn and are now in the process of earning a second undergraduate degree at UM-Dearborn, the following rule will apply: If repeating a course in the second degree that was failed (with a grade of E) in the first degree, both course will be included in the GPA calculation and the course earned hours (assuming the course was passed) will be included in the earned hours of the second degree.

The limitation of the three-course rule will be monitored by the Office of Registration & Records. Students who elect a course more than three times will be dropped from the course and notified of the election change.

Rights and Obligations of Speakers, Audience Members and Protestors at Public Presentations of UM-Dearborn

1. Members of the UM-Dearborn community and their invited guests have the right to set forth their views and opinions and to listen, watch, protest, or otherwise participate in communication.

2. UM-Dearborn has an obligation to insure audience access to public events, to protect the rights of the speaker and those who wish to hear and communicate with the speaker, and to provide all with personal security.

3. Protestors have an obligation not to abuse their rights of free expression by harassing or intimidating speakers in ways that unduly interfere with free expression or communication between a speaker and members of the audience.

4. The prohibition against undue interference does not include suppression of the usual range of human reactions commonly displayed by an audience during heated discussion of controversial topics, so long as such activities are consistent with the continuation of the speech and the communication of its content to the audience.

5. The broadest range of speech and expression will be tolerated in public forums in order to facilitate the discussion and debate of ideas and issues. However, the intentional use of racial, ethnic or sexual invectives, epithets, slurs or utterances directly to attack or injure another individual rather than express or discuss an idea of philosophy are beyond the boundaries of protected speech. Additionally, malicious and intentional verbal threats of violence directed towards an individual, physical violence and destruction of property are misconduct and will be subject to discipline.

6. UM-Dearborn officials have a responsibility to make a judgment when there is a clear and present danger that the rights of free expression and communication will be infringed upon and to take appropriate measure to safeguard these rights.

7. The overall goal of UM-Dearborn officials during a disruption shall be to re-establish an atmosphere conducive to communication between the speaker and the audience in full respect of the rights of all parties.

8. Canceling, stopping an event, adjourning to another time or place, or allowing protracted interruption of a speech or meeting is
inconsistent with full respect for the rights of free expression and communication of those present.

**Sexual Harassment by Faculty and Staff**

**Policy Statement**

It is the policy of the University of Michigan to maintain an academic and work environment free of sexual harassment for students, faculty, and staff. Sexual harassment is contrary to the standards of the University community. It diminishes individual dignity and impedes equal employment and educational opportunities and equal access to freedom of academic inquiry. Sexual harassment is a barrier to fulfilling the University’s scholarly, research, educational, and service missions. It will not be tolerated at the University of Michigan.

Sexual harassment violates the University’s long-standing policy against discrimination on the basis of sex. Sexual harassment is also illegal. It is prohibited in the employment context by Title VII of the 1964 Civil Rights Act, in the education context by Title IX of the Educational Amendments of 1972, and, in both employment and education contexts, by Michigan’s Elliott-Larsen Civil Rights Act, adopted in 1976.

A claim under this policy may be brought by the University or by a faculty, staff or student member of the University community based on the conduct of any University employee. Complaints based on conduct of students who are not also employees of the University are addressed in the Statement of Student Rights and Responsibilities, which is administered by the Office of Student Conflict Resolution. Rackham graduate students may also contact Graduate Student Affairs in the Rackham Graduate School. Persons who lodge sexual harassment complaints or participate in the investigation of such a complaint are protected from retaliation (e.g., adverse action or consequences) for those actions. Retaliation will not be tolerated at the University of Michigan.

Sexual harassment can be a very serious matter having far-reaching effects on the lives and careers of individuals. Intentionally false accusations can have similar impact. A person who knowingly and intentionally files a false complaint under this policy is subject to University discipline. Both a person who sexually harasses another, and a person who knowingly and intentionally files a false complaint under this policy, are subject to University discipline.

An individual may engage in conduct of a sexual nature that may not be sufficiently severe, persistent or pervasive to constitute sexual harassment as described below, but is nonetheless inappropriate. Such conduct also will not be tolerated by the University, is prohibited by the University and is subject to discipline up to and including termination of employment.

**Definition of Sexual Harassment**

For the purposes of determining whether a particular course of conduct constitutes sexual harassment under this policy, the following definition will be used:

Some examples of conduct that may constitute sexual harassment include, but are not limited to:

**Unwanted sexual statements** – sexual or “dirty” jokes, comments on physical attributes, spreading rumors about or rating others as to sexual activity or performance, talking about one’s sexual activity in front of others, and displaying or distributing sexually explicit drawings, pictures and/or written material. Unwanted sexual statements can be made in person, in writing, electronically (email, instant messaging, blogs, web pages, etc.), and otherwise.

**Unwanted personal attention** – letters, telephone calls, visits, pressure for sexual favors, pressure for unnecessary personal interaction, pressure for dates where a sexual/romantic intent appears evident but remains unwanted, and stalking.

**Unwanted physical or sexual advances** – touching, hugging, kissing, fondling, touching oneself sexually for others to view, sexual assault, intercourse, or other sexual activity.

Conduct alleged to be sexual harassment will be evaluated by considering the totality of the particular circumstances, including the nature, frequency, intensity, location, context, and duration of the questioned behavior. Although repeated incidents generally create a stronger claim of sexual harassment, a serious incident, even if isolated, can be sufficient.

This policy addresses intentional conduct. It also addresses conduct which results in negative effects even though such negative effects were unintended. Sexually-related conduct forms the basis of a sexual harassment claim if a reasonable person, in view of all the surrounding circumstances, would consider it sufficiently severe, persistent or pervasive as to interfere unreasonably with academic, other educational, or employment performance or participation in a University activity or living environment.

Sexual harassment most often occurs when one person has actual or apparent power or authority over another; however, it may also occur between individuals of equal status or rank within the University. It is also possible for a person who is not in a position of power or authority over another to sexually harass that person, such as a professor being sexually harassed by a student or a supervisor being sexually harassed by a supervisee. Sexual harassment occurs between persons of the same gender and persons of different genders.

Alleged discriminatory behavior that does not include conduct of a sexual nature is not covered by this policy; however, the discriminatory conduct is addressed by other University policies prohibiting discrimination (http://spg.umich.edu/section/201) (e.g., sex, gender identity, gender expression, sexual orientation, etc.). In some cases, an individual may allege there has been discriminatory action in addition to unwelcome conduct of a sexual nature. In these instances, the matter is assessed under the policy prohibiting the type of discrimination alleged as well as this sexual harassment policy and any other applicable University policy.

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute harassment when:

1. submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment, education, living environment, or participation in a University activity;
2. submission to or rejection of such conduct by an individual is used as the basis for or a factor in decisions affecting that individual’s employment, education, living environment, or participation in a University activity; or
3. such conduct has the purpose or effect of unreasonably interfering with an individual’s employment or educational performance or creating an intimidating, hostile, offensive, or abusive environment...
for that individual’s employment, education, living environment, or participation in a University activity.

Consensual Relationships

In 1986 the University’s Senate Assembly adopted a statement of principle concerning relationships between faculty (including teaching assistants) and students. The University concurs with the Assembly’s position that sexual relationships, even mutually consenting ones, are a basic violation of professional ethics and responsibility when the faculty member has any professional responsibility for the student’s academic performance or professional future. Romantic and/or sexual relationships with students are addressed in SPG 601.22 [http://spg.umich.edu/policy/601.22] – Faculty-Student Relationships and SPG 601.22-1 [http://spg.umich.edu/policy/601.22-1] – Employee-Student Relationships.

The University’s nepotism policy precludes individuals from evaluating the work performance of others with whom they have intimate familial or close personal relationships, or from making hiring, salary, or similar financial decisions concerning such persons, without prior written approval. Issues of nepotism are addressed under SPG 201.23 [http://spg.umich.edu/policy/201.23] – Appointment of Relatives and Others with Close Personal or External Business Relationships.

Romantic or sexual relationships with students which occur outside of the instructional or supervisory context may also lead to difficulties. The Senate Assembly has concluded, and the University concurs, that the asymmetry of the faculty-student relationship means that any sexual relationship between a faculty member and a student is potentially exploitive and should be avoided. Faculty and staff engaged in such relationships should be sensitive to the constant possibility that they may unexpectedly be placed in a position of responsibility for the student’s instruction or evaluation.

In the event of a charge of sexual harassment, the University will in general be unsympathetic to a defense based upon consent when the facts establish that a professional faculty-student, staff-student, or supervisor-employee power differential existed within the relationship.

Response and Procedures

Prevention and Education

The University is committed to preventing and eliminating sexual harassment of students, faculty, and staff. To that end, this policy will be published on the University’s web site. Information regarding sexual harassment and this policy will be included in orientation materials for new students, faculty, and staff and made available in the Office of Institutional Equity and other appropriate locations on each campus. In addition, appropriate educational sessions will be conducted by the University on an ongoing basis to (1) inform students, faculty, and staff about identifying sexual harassment and the problems it causes, (2) advise members of the University community about their rights and responsibilities under this policy, and (3) train personnel in the administration of this policy.

Assistance with Sexual Harassment Problems

The Office of Institutional Equity is responsible for ensuring and monitoring the University’s compliance with federal and state nondiscrimination laws. However, a discrimination-free environment is the responsibility of every member of the community. The University can take corrective action only when it becomes aware of problems. Therefore, the University encourages persons who believe that they have experienced or witnessed sexual harassment to come forward promptly with their inquiries, reports, or complaints and seek assistance within the University. Individuals also have the right to pursue a legal remedy for sexual harassment in addition to or instead of proceeding under this policy.

Confidential Counseling

Information about or assistance with sexual harassment issues may be obtained from a variety of University resources. Prior to or concurrent with lodging a sexual harassment complaint, individuals may find it helpful to consult with a counselor or otherwise seek assistance. The following offices provide advice and support to individuals who believe they are experiencing sexual harassment. All information shared with these offices will remain confidential to the extent permitted by law and University policy. Discussions with representatives of these offices will not be considered a report to the University regarding the problematic behavior and will not, without additional action by the complainant, result in intervention or corrective action.

  - 734-998-9368, umich.edu/~sapac (http://www.umich.edu/~sapac)
- Office of the Ombuds
  - 734-763-3545, umich.edu/~ombuds (http://www.umich.edu/~ombuds)
- University Faculty Ombuds
  - 734-764-0303, umich.edu/~facombud (http://www.umich.edu/~facombud)

Lodging a Complaint

An individual may complain to the University about alleged sexually harassing behavior or retaliation by contacting a University official, such as a supervisor; Dean, Director or department head; the Office of Institutional Equity; the appropriate Human Resources Office; the Dean of Students (for students); the Dean’s Office of the Horace H. Rackham Graduate School (for graduate students); the Center for the Education of Women; and the Department of Public Safety. If an employee is represented by a union and the terms of the collective bargaining agreement provide for a different procedure for pursuing a sexual harassment complaint, the terms of the collective bargaining agreement shall prevail. If the complaint is against a student, the complainant may elect to pursue a formal charge through the appropriate student grievance procedure. In addition, any member of the University community may utilize appropriate University resources for guidance and support during the investigation process (e.g., Center for the Education of Women, Sexual Assault Prevention and Awareness Center, etc.).

Investigation and Investigation Procedures

The University will handle sexual harassment complaints consistently with procedural guidelines developed to ensure prompt and equitable resolution of such complaints. Complainants and Respondents will be
given copies of the procedural guidelines, and the guidelines will also be made readily available to the University community. The matter will then proceed to investigation or other form of effective and fair review. The investigation or review may be performed by the Office of Institutional Equity, or jointly with another office, as determined by OIE.

The purpose of an investigation, which will include interviewing the parties and witnesses, is to gather and assess evidence. During the course of an investigation, the investigating office will work collaboratively with other appropriate University offices. For example, if a faculty member is involved in a complaint, the Office of Institutional Equity would generally work collaboratively with the Office of the Provost; the appropriate Dean, Director or Department Head; and Academic Human Resources. If a staff member is involved in the complaint, the Office of Institutional Equity would work collaboratively with Staff Human Resources, the supervisor, the Unit Human Resources Representative and other appropriate departmental and University officials.

Possible outcomes of an investigation are (1) a finding that the allegations are not warranted or could not be substantiated, (2) a finding that the allegations are substantiated and constitute sexual harassment or inappropriate behavior and, if so, (3) referral to the appropriate administrative authority for corrective action.

Corrective Action
Corrective action could include a requirement not to repeat or continue the harassing or retaliatory conduct, a reprimand, denial of a merit pay increase, reassignment, suspension and termination. The severity of the punishment will depend on the frequency and severity of the offense and any history of past discriminatory or retaliatory conduct. A finding of sexual harassment may be cause for the separation of the offending party from the University, in accordance with University procedures, including, for qualified faculty, the procedures set forth in Regents' Bylaw 5.09. Every effort will be made to assure University-wide uniformity of sanctions for similar offenses.

University Action
The University may assume the role of a complainant and pursue a report or complaint of sexual harassment, either informally or formally. The University may respond to complaints or reports by persons external to the University community about alleged sexually harassing conduct by University employees. If the accused is a faculty member to whom Regents' Bylaw 5.09 applies, the Provost or executive authority of the relevant unit may initiate the procedures of Bylaw 5.09 at any stage in the process, if the circumstances indicate that such action is warranted.

Reporting Requirements
To assure University-wide compliance with this policy and with federal and state law, the Office of Institutional Equity must be advised of all reported incidents of sexual harassment and their resolution. The Office of Institutional Equity will monitor repeated complaints within the same unit or against the same individual, where identified, to assure that such complaints are appropriately handled.

Retaliation
The University will take appropriate steps to assure that a person who in good faith reports, complains about, or participates in an informal resolution or formal investigation of a sexual harassment allegation will not be subjected to retaliation. The University also will take appropriate steps to assure that a person against whom such an allegation is made is treated fairly. The University will also take appropriate follow-up measures to assure the goals of this policy are met. Persons who believe they are experiencing retaliation are strongly encouraged to lodge a complaint with the University using the same procedure for lodging a sexual harassment complaint.

Revisions
This policy and these procedures are subject to revision as determined necessary or desirable in view of experience or changes in the law.

Smoke-Free Policy
Since September 1, 1992, smoking has not been permitted in campus buildings. The success of this policy depends upon the thoughtfulness, consideration, and cooperation of smokers and non-smokers. All faculty, staff, students and visitors share the responsibility for adhering to and enforcing the policy. For the full policy, see the Dearborn Administrative Guide, umdearborn.edu/dag.

In our ongoing effort to create an environment that is healthy for all members of our community, on July 1, 2011 the University of Michigan-Dearborn became a smoke-free university. This created a healthier environment for faculty, staff, students and visitors. For more information, visit umdearborn.edu/smokefree.

Special Examinations
The UM-Dearborn will acknowledge proficiencies gained by students outside the bounds of traditional courses if such proficiency is certified by recognized examinations or departmentally prepared and/or approved alternatives. The University recognizes three types of such special examinations: 1) standardized examinations prepared and evaluated by nationally recognized organizations; 2) placement examinations prepared, administered on campus, and evaluated by UM-Dearborn academic departments; and 3) special examinations for individual courses, prepared, administered, and evaluated by specialists in the various academic departments and approved by the respective department chairs.

The number and nature of credits earned by examination must be approved by the department(s) normally responsible for teaching the subject matter areas for which credit is being granted. Decisions in individual cases related to departmental examinations will be made in light of the general departmentally approved policies that are not inconsistent with those for national examinations.

Departmental Examinations
If a student believes that he/she has the knowledge and/or skill to merit credit for a specific course without attending classes and/or doing any assignments other than a single, comprehensive examination, the student and the academic unit or department must follow certain procedures.

If credit-by-examination is available in the area in which the student is interested, he/she should request permission to take an examination for specific credit in accordance with the unit’s procedures. If the request is granted (it can be denied) and the examination is scheduled, the student will be assessed a $20.00 fee.

All such examinations are graded on a Pass/Fail basis. If the student passes or fails, he/she will receive a written memorandum to that effect from the examiner. If the student passes the examination(s), he/she will be assessed regular University fees per credit hour received minus any fees previously paid.
Also see section on Tuition.

Placement Examinations
Placement examinations are required by certain departments in an effort to determine the best course level for new students. No fee is assessed for the administration of these tests. For more information, telephone the Office of Admissions and Orientation Office at 313-593-5100 or visit umdearborn.edu/plex.

Standardized National Examinations
The Advanced Placement Program (APP) and International Baccalaureate (IB) subject examinations are the chief examples in this category. If the relevant academic units and/or the academic departments award credit, the student is responsible for having the test results sent to the institution (normally, along with the application for admission), and the Office of Registration & Records (current students) or the Office of Admissions and Orientation (for incoming students) will be responsible for the recording of the appropriate credit. The student is not charged a fee for such credit. For more information about AP or IB credit grant practices, visit umdearborn.edu/cas/i/687380/.

Student Organizations
Policies for Student Organizations
In an effort to coordinate the activities of all student organizations, policies were codified into a formal publication issued by Student Government, known as the Student Clubs and Organizations Information and Policies Manual.

The Student Clubs and Organizations Information and Policies Manual is a most useful booklet which contains information on forming an organization, the renewing and revoking of organizational status, office allocations, organizational accounting, the allotting of day sales and evening events, university services, descriptions of recognized organizations, etc.

The Student Organizations Coordinator and the Student Government Director of Student Organizations can assist any student group interested in this area of concern.

Accounting Policies and Procedures
The Office of Student Engagement (OSE) maintains and services the financial accounts for student organizations that have been recognized by the Student Government. Through this student service, OSE:

1. Ensures uniformity of accounting records.
2. Facilitates continuity between business officers and their successors.
3. Aids student organizations in keeping their activities on a sound financial basis.
4. Provides a means for recognized student organizations to use University facilities and services.

The OSE is prepared to offer staff consultation on matters of budgeting, detailed record keeping, and securing various University and outside vendor services and facilities. The information presented in the Student Organizations Accounting Policies and Procedures Manual is intended to assist the financial officers of organizations in conducting their duties and to inform them of the policies, procedures, and benefits associated with sound fiscal policy.

Study Day Policy
At the end of each Fall, Winter, and Summer Semesters, the academic calendar includes a day prior to the beginning of the final examination period as Study Day. Classes do not meet on Study Day, and the student Study Day is not to be used as a date on which papers are to be turned in, examinations are to be given, quizzes are to be scheduled, mandatory review sessions are to be held, or for any other class-related activities, other than office hours. Faculty may conduct voluntary review sessions at which no new material is presented on these days so long as attendance is not required. Study days in summer one-month courses and mini-courses are to be determined by the instructor of record or designee.

Undergraduate Senior Residency Requirement
To qualify for an undergraduate degree, a student must complete through instruction from the University of Michigan-Dearborn faculty, a minimum of 30 of the last 36 credits presented for the degree. Restrictions on maximum transfer credit hours must be observed. Any exceptions to this policy must be approved by petition to the Academic Standards Committee of the student’s college in advance of coursework taken.

Campus Services
UM-Dearborn provides a wide range of campus services for students, faculty and staff. The various campus services provide assistance in support of the university mission and the campus community. The services include:

- Athletics and Recreation (p. 64)
- Bookstore (p. 65)
- Campus Media Services (p. 65)
- Counseling Services (p. 65)
- Information Technology Services (p. 66)
- Institutional Equity Officer (p. 67)
- International Affairs (p. 67)
- Mardigian Library (p. 67)
- Ombuds Services (p. 68)
- On-Campus Dining (p. 68)
- Parking (p. 68)
- Public Safety (p. 69)
- START: Student Advising and Resource Team (p. 69)
- Student Engagement (p. 69)
- Student Success Center (p. 69)
- Talent Gateway (p. 69)
- Transportation (p. 70)
- Women’s Resource Center (p. 70)

Athletics and Recreation
Vision Statement
The University of Michigan-Dearborn of Athletics & Recreation strives to produce a campus community who’s performance in the classroom and
on the fields of competition are reflections of the mission and values of the University.

Core Values

**Excellence**: Be committed to set the bar high, within the department, in the classroom and on the fields of play. Become masters of “attention to detail”, as we achieve our goals.

**Leadership**: Be a role-model for the “Leaders and Best” in academic, athletic, and social environments. Emulate, every day, the values of teamwork.

**Sportsmanship**: Demonstrate the combination of respect and integrity as we embody the Champions of Character program as defined by the National Association of Intercollegiate Athletics (N.A.I.A.).

**Tradition**: Embrace being a Wolverine and all that encompasses, while continuing to enhance the cultures of community service and community outreach.

Varsity Sports

UM-Dearborn Athletics, a member of the NAIA and Wolverine-Hoosier Athletic Conference, participates in eight varsity sports including Men’s and Women’s Basketball, Men’s and Women’s Cross Country, Men’s Soccer and Lacrosse, and Women’s Softball and Volleyball. Home events are played in the Fieldhouse and at various outdoor fields near campus.

Club Sports

The Department of Athletics and Recreation also provides intercollegiate athletic opportunities for student-athletes that are passionate in a sport either not offered at the varsity level or are unable to compete at the varsity level for whatever reason. Club sports report to the department, but are responsible for their own team organization, as well as conference and national affiliations. A list of current club sports include nationally ranked Men’s Ice Hockey, Cheerleading, Women’s Soccer, Cross Country, Men’s and Women’s Bowling, Men’s and Women’s Wrestling, and Men’s and Women’s Tennis.

Intramural Sports

Within the Department of Athletics and Recreation Intramural Sports are offered for all UM-Dearborn students and staff. Currently intramural sport offerings include Broomball, Basketball, Volleyball, Wallyball, Soccer, and Flag Football. All intramural sports are played on campus.

Wellness Center/Fieldhouse/Ice Arena

The Wellness Center is equipped with a variety of cardio machines, weight lifting equipment, and racquetball courts. Instructional classes are offered each semester; a schedule is posted each semester in the Wellness Center. All fitness classes cost $50 for students, members, and non-members. The Fieldhouse is host to 8 volleyball courts or three full-size basketball courts, and home to our Men’s and Women’s Basketball teams as well as the Volleyball team. The weekly schedule for open gym is available at the Fieldhouse, and equipment is available for rent upon entering. The Ice Arena is home to our Men’s D1 Club Hockey team and also holds daily open skates and hockey for the campus community.

Operation Adventure

Operation Adventure is an adventure-based, team building program at the University of Michigan-Dearborn. Programs are custom designed to fit your group’s specific needs and goals using adventure activities as the model. Programs can be completed both in and outdoors on campus as well as at Camp Corwood in Irons, Michigan.

For more information and schedules, please refer to our website at www.athletics.umd.umd.edu or call 313-593-3534.

Football Ticket Distribution Policy

Season tickets to the University of Michigan-Ann Arbor football games are sold by the Ticket Office of the Ann Arbor campus Department of Athletics. UM-Dearborn students are handled by the Ticket Office on the Ann Arbor campus.

A student ticket information flyer outlining procedures to purchase tickets is mailed in March to students enrolled during winter term. The deadline for purchase is mid-April. For more information, contact the ticket office at 734-764-0247.

Bookstore

Located in the University Center, the Barnes & Noble Bookstore has a complete line of textbooks, trade books, and periodicals. The store also has a complete line of supplies, UM and UM-Dearborn souvenirs and sportswear. American Express, Discover, MasterCard and VISA are accepted. Normal bookstore hours: 8:00 am to 6:30 pm (Monday-Thursday); 8:00 am to 4:00 pm on Friday.

**Note**: Special hours are in effect at the start of each semester and during term breaks and holiday periods.

For additional information, telephone 313-593-5551 or visit the website at umd.bncollege.com (http://www.umd.bncollege.com).

Campus Media Services

Campus Media Services (CMS) supports instruction and research by providing facilities and expertise in multimedia. These services include studio and remote video production, video streaming, video editing, audio production, Blue Stream conversion, and equipment repair. Most multimedia support for courses is provided without cost to faculty or the academic unit. CMS provides media production facilities and services for student projects. Production services that support course assignments are provided without charge to students. Production support for work that is not related to instruction may be provided for a fee. Costs vary depending on the nature of the production. All service requests should be made 24 hours in advance. Major productions require production proposals. CMS also supports a room with teleconferencing capability. Please call 313-593-5150 for more details.

Counseling Services

2157 University Center
Phone: 313-593-5430
Fax: 313-593-3263
Email: counseling@umd.umich.edu
Website: umdearborn.edu/campus-life/health-wellness/counseling-services

The mission of Counseling and Disabilities Services is to resolve barriers to the learning process and serve as a vital link in the UM-Dearborn “safety net.” Counseling and Disabilities Services advance the academic mission of the University by enhancing personal development, problem-solving skills, and life skills.
solving, and communication. Our office is located at 2157 University Center.

**Personal Counseling**

We provide short-term therapy (up to 12 sessions per academic year) to all registered UM-Dearborn students. UM-Dearborn faculty and staff are also eligible (FASAP). There is no fee for counseling. Counseling is provided by licensed psychologists. **Note:** We do not prescribe medication. Counseling begins with an assessment of your concerns and leads to a recommendation, which may include individual counseling, couples counseling, group counseling, or referral to a specialist.

**Scheduling an Appointment**

Stop by the C&D Office at 2157 University Center. The first step in arranging an appointment will be to complete a questionnaire, and then an appointment will be scheduled. Please inform our receptionist if your concern is urgent.

**Confidentiality**

Use of counseling and personal information shared with our counselors is confidential in accordance with Michigan Privileged Communication Statutes. There are limits or exceptions identified in these statutes. No information is released without a client’s written permission and no information is entered into a student’s college record.

**Consultation Services**

Consultation Services include faculty and staff support in assisting students in distress, Faculty and Staff Assistance Program (FASAP), career assessment services, and substance use assessment.

**Career Assessment Services**

This service is for students who are undecided or wanting to change their majors and/or career plans and would like some assistance. After an initial interview, a series of personality and career tests may be used to provide students with feedback on work and career preferences that match their interests, values and personality type.

**Outreach Programs**

These programs emphasize personal development topics. Many are designed to respond to the diversity among students and reach students who are less likely to make use of traditional counseling services. To request a program, contact our office at 313-593-5430 or email: counseling@umich.edu.

**Training/Internship Program**

Currently, our training/internship program (clinical or counseling psychology and community counseling) is only available to graduate students. Please contact our training coordinator, Dr. Debra Hutton, for more information.

**Disability Services**

Disability Services offers aid to differently-abled individuals seeking the opportunity for further learning. Some of the services provided, as deemed appropriate after departmental review, are: 1) early registration; 2) course/classroom accommodations; 3) tutorial referral and mentoring services; 4) assistance while using the Computer Center; 5) note-taking; and 6) referral for auxiliary services such as interpreters for the deaf and the tapping of texts for the blind. Staff will train students to use the Adaptive Equipment Lab in the Mardigian Library. Please contact 313-593-5430 if you have any questions.

**Student Health Insurance**

A student group health insurance policy is available to any enrolled student. Information and application forms are available at 2157 UC. It is recommended that all students have health insurance coverage. All international students are required to have such coverage. Students applying for financial aid should be aware that the cost of health insurance could be included as a budget expense.

**Information Technology Services**

**General Purpose Open Computer Labs:** ML 1070, 1st and 2nd floor public computers, SSB 2220

**Department Specific Open Computer Labs:** CECS - HPEC 1180 & 183 ELB, COB - F CN 138, CEHHS - F CS 190

**Lab Hours:** Visit umdearborn.edu/its_location-hours

**Help Desk:** 313-593-HELP (4357) | umd-helpdesk@umich.edu | website: umdearborn.edu/helpdesk (http://umdearborn.edu/helpdesk)

Walk-in locations: ML 1070b and FCS 186a

Information Technology Services (ITS) supports the computing needs of faculty, staff and students. The department has responsibility for: campus network, including Internet access; computer labs and printing across campus; account access for email, computer access, and other student services; HelpDesk support; the Banner student information system.

**Facilities**

Computer labs across campus are supported and maintained by ITS. General purpose open labs are located in the Mardigian Library (ML), other departmental computer labs specialize in department specific software programs to support classwork needs. Together there are over 300 open seats available for students to use for school work. Availability is posted in real-time and can be viewed by visiting labs.umich.edu (https://labs.umich.edu).

**Software**

ITS offers a wide variety of software in the labs it supports including Visual Studio, SPSS, GIS, Minitab, MatLab, and Mathematica. Individual labs may also provide instructional software required for classes. In addition to the standard software products, all lab and classroom computers also have Jaws, ZoomText, and Read & Write Gold installed to assist with accessibility needs.

In addition, the University of Michigan has established a licensing agreement with Microsoft that allows campus members to download Office 365 for free. Additional software and hardware can be purchased at significant discounts by faculty, staff, and students by contacting the Computer showcase. This includes Microsoft Windows, Adobe products, SPSS, Mathematica, Apple & HP hardware, and many other offerings. Visit their website for more information: computershows case.umich.edu (http://computershows case.umich.edu).

**Computer Accounts**

The ITS Accounts Office assigns user accounts and passwords for all university network systems. They process requests for several types of
computer access, and assist with questions and problems with these types of logins. These include uniqnames and UMICH passwords which permit access to wireless, email, classroom and lab computers, Canvas, and your home directory.

**UPrint Student Printing**

UPrint is a networked printing service for students in all UM-Dearborn schools and colleges. Registered students are allocated a 500 page quota free each term (Winter, Fall, Spring/Summer). $25 is credited on the U-Print system and each time you print from a lab or library computer, your account will be debited $0.05 for black/white or $0.30 for color pages. Additional funds can be added quickly online (https://uprint.umd.umich.edu/app) with a credit card or you can add funds at the Cashier’s Office.

**Assistance and Services**

The ITS HelpDesk is the primary point of contact for support. Please call 313-593-HELP (4357) or email the HelpDesk umd-helpdesk@umich.edu for assistance, documentation and information regarding the campus network, software, printing, hardware and other services. Many questions can be answered immediately on the phone. An automated ticket system is also used to keep track of each request that is received and the service that is provided. Computer labs in ML 1070, HPEC 1180, ELB 183, & FCN 138 are staffed with student assistants who can provide answers to most questions or refer you to someone who can. Equipment problems and malfunctions in the labs should be immediately reported to the lab proctor on duty so that the amount of downtime experienced is minimized.

**Hours**

The HelpDesk is available M-Th 8am-8pm, & 8am-5pm F during regular class schedules, during class breaks hours are M-F 8am-5pm. The HelpDesk and computer labs will be closed for holidays or due inclement weather. Computer labs hours are posted on the ITS website and in the computer labs.

**Institutional Equity Officer**

The Institutional Equity Officer (IEO) helps to ensure that the campus promotes equal opportunity for all students, faculty, and staff, including racial, ethnic, and religious minorities, women, the disabled, senior citizens, veterans, and gay, lesbian and transgender individuals. The IEO oversees compliance with Regental by-laws, Presidential policy and legislation regarding nondiscrimination, equal opportunity, and affirmative action and provides information and pre-grievance counseling to faculty, staff, and students with questions or complaints. The office of the OIE is located in 1020 Administration Building, telephone 313-593-5190.

**International Affairs**

Office of International Affairs
760 Town Center Drive
Dearborn MI 48126
Telephone: 313-583-6600
Fax: 313-583-6725
Email: umdoia-international@umich.edu
Web-address: umdearborn.edu/internationaloffice

**Services**

The Office of International Affairs welcomes and has the commitment to provide support services to international and domestic student, faculty and visiting scholars at the University of Michigan-Dearborn. Our campus community is dedicated to providing quality services addressing the following:

- Processing DS-2019 and /or I-20
- Admission Process
- Students Success Assistance
- Faculty Exchange
- Employment
- Community Engagement
- English Language Program
- Overseas Traveling
- Health Insurance – all F1/J1 students are required to have health insurance that meets UM-D standards
- Housing Referrals
- Homeland Security Compliance Advising
- Cross-cultural programs and workshops
- Emergency Assistance

Potential students are afforded assistance to ensure a seamless admissions process. Assistance begins once prospective students express an interest in the university and continues throughout their academic tenure. The OIA Provides information to international students scholars about maintaining F-1 and J-1 status. they are encouraged to explore and integrate within the local and metropolitan communities while being challenged with the rigor of the university’s academic process. The students Success Center offers diverse academic, personal and professional support through blended services that are designed to complement and support the educational track.

As we prepare our students to achieve the “Degree That Makes the Difference,” we encourage and support our students to participate in study abroad, global civic engagement projects and international internships. These opportunities help provide practical applications to what our students are learning within their academic programs. UM-Dearborn offers faculty led study abroad opportunities and assistance to students that participate in non-UM-Dearborn programs.

OIA works with the academic units to explore and support faculty exchange opportunities. Currently, the University of Michigan-Dearborn works with colleges and universities in over ten countries where faculty, students and resources are shared and rich friendships are discovered. The University of Michigan-Dearborn welcomes worldwide intellectual dialogue and exchanges that provide our students with a diverse global perspective and that challenges and prepares them for the Twenty-first Century and beyond.

**Mardigian Library**

The Mardigian Library offers a student-centered environment that fosters learning by providing access to authoritative sources of knowledge and information, and by helping students learn critical information literacy skills and concepts. The library provides access (library.umd.umich.edu) to a multitude of research resources, including over 40,000 online journals, over 500 online research databases, and thousands of online books. The four-story Mardigian Library houses a 315,000-volume collection and offers study space for 1,200 students.
Many computer workstations are available on the main floor to provide access to all online resources, most of which are also accessible from off campus.

Facilities housed in the Mardigian Library include a coffee shop, computer labs, distance learning classroom, the Graduate Research Center, the archives of the University of Michigan-Dearborn, and Office of Metropolitan Impact on the first floor; the Alfred Berkowitz Gallery on the third floor; and the Voice/Vision Holocaust Survivor Oral History Archive on the fourth floor. A group study floor and private study rooms are available, and two floors for silent study.

Students may borrow materials from the library’s collection. Items not owned by the library may be requested from other libraries through the Interlibrary Loan Department or from MelCat, a statewide resource-sharing service of over 400 public and academic libraries. Currently enrolled UM-Dearborn students are eligible to borrow materials directly from most of the libraries in the UM-Ann Arbor University Library system. Additional information regarding this service may be obtained from University Library Circulation Services at the Harlan Hatcher Graduate Library. Call 734-764-0401.

Librarians work with faculty to create research skills sessions and customized online research guides that teach students the research skills they need to be successful. Instruction includes skills such as developing research topics and finding, evaluating, using, and citing sources. Librarians meet with graduate and undergraduate students to work on individual projects, both in the library and in the colleges.

Guides to the use of the library and its resources are available on the library’s website. As of January 2015, the library is open 95 hours per week during the fall and winter semesters, with extended hours during final exams and study days. Library hours of operation can be found on the website.

Ombuds Services

Ombuds Services provides students of the campus community with individual, informal assistance in resolving concerns and addressing issues regarding students’ rights and responsibilities. Ombuds Services is an impartial resource for obtaining:

- Information about university policies;
- Guidance in following university procedures;
- Assistance in resolving concerns and critical situations;
- Help in cutting red tape and in obtaining appropriate and timely answers and information;
- Opportunities to discuss or question university actions;
- Active support for UM-D’s commitment to ensure that students are treated with fundamental fairness and personal dignity.

Ombuds Services is located in 2106 University Center, telephone 313-593-5440, e-mail ombuds-office@umd.umich.edu.

On-Campus Dining

With many fantastic options to choose from, we’ve got you covered. Whether it’s your morning coffee before class, a between-classes lunch, or an evening bite, McKinley Cafe in the University Center, Picasso Cafe in Fairlane Center, and our coffee shop in Mardigian Library offer a wide variety of meals, snacks and beverages to meet your needs.

We offer two options:

- You may purchase a meal card at McKinley Cafe to use at all retail food locations on campus, or
- Purchase a Picasso Restaurant Group (PRG) Meal Plan. The Meal Plan is designed to ensure that your money is well spent by offering tasty combo meals that will fit almost any budget. Ask our culinary team for details.

University Center McKinley Cafe

Picasso Deli, the Grille (serving breakfast, lunch and dinner), the Expo (daily full-meal specials), piping hot pizza, famous mac & cheese, delicious soups, salad bar, grab & go items, assorted beverages, and Starbucks.

Fairlane Center

The Picasso Deli features deli sandwich selections, personal pizzas, quesadillas, delicious soups, salads, fruit cups, vegetable cups, grab & go items, assorted beverages and Starbucks.

Mardigian Library

A newly renovated coffee shop by PRG opened in fall 2015. Drop in to fortify yourself during day or evening study time. Meet up with your friends and enjoy sandwiches, soups, snacks, Starbucks and Jamba Juice Smoothies.

Vending

Conveniently located throughout our campus facilities:

- State-of-the-art soda and snack machines
- All machines equipped with credit card readers
- Wide product variety for students, staff & faculty
- Touchscreen/video monitors on machines-displays nutritional and other information
- Commitment to M-Healthy offerings.

Parking

Parking of all motor vehicles at UM-Dearborn is by permit only. Parking for students, faculty and staff is allowed in designated permit lots only when vehicles are properly registered and display the appropriate parking decal. Student permits are available at the Parking Office in the Campus Support Service Building.

The Monteith Parking Structure provides parking for all visitors. For further information, refer to the UM-Dearborn Parking & Transportation Manual or the Parking Office by telephone at 313-593-5480.

Parking Enforcement

Parking enforcement, including issuance of tickets, is primarily handled by University of Michigan-Dearborn Police Department. There is an $80.00 fine for unauthorized parking in Faculty/Staff lots and in fire lanes, and a $175.00 fine for unauthorized parking in handicap zones. All fines are paid to the 19th District Court in the City of Dearborn.

Although the University of Michigan-Dearborn Police Department and Environmental Health Office provides 24-hour surveillance of all parking lots, UM-Dearborn cannot be held responsible for acts of theft.
or vandalism committed upon vehicles parked in campus lots or in the parking structure.

Public Safety

The Department of Public Safety, located in the Campus Support Services building, provides 24-hour emergency, safety and security services. Services offered include: crime prevention, emergency assistance, health/safety/crime reporting, escort service, patrol of buildings, grounds and parking lots, administration of the lost & found program, and safety programs.

For immediate response to any campus emergency, DIAL 911 from a campus phone or 313-593-5333 from a cell phone. There are 53 direct-dial emergency phones strategically placed around campus. For emergency medical assistance, DIAL 911 from a campus phone or 313-593-5333 from a cell phone. For minor injuries, transportation from campus to the Henry Ford Hospital-Fairlane may be provided.

For additional information telephone 313-593-9953 (department office), or 313-593-5333 (dispatch center).

START: Student Advising & Resource Team

The Student Advising & Resource Team is a campus-wide advising office. The START Office is dedicated to helping students make a seamless transition to the University of Michigan-Dearborn. All new students, both freshmen and transfer (with the exception of College of Business transfers) begin working with START at orientation. Students are then assigned to START for advising in their first term on campus. Students will transition from START to their academic unit advising office on an individual basis depending on their academic progress.

The START Office serves incoming students to the University by providing academic advising and resources. The office provides student support as students transition from orientation to their academic unit advising office. START is comprised of professional advisors from each of the four academic units (College of Business, College of Education, Health and Human Services, College of Arts, Sciences and Letters and the College of Engineering and Computer Science). Each advisor works closely with their academic unit advising offices to ensure that students receive accurate information related to their academic programs.

Student Engagement

In support of the mission and goals of the University of Michigan-Dearborn and Enrollment Management and Student Life, the Office for Student Engagement works to:

- Foster an inclusive living and learning community through innovative programs and services designed to build global leaders and citizens
- Provide support and resources to assist students in their personal, professional and academic development
- Advance engagement through strategic collaborations with academic affairs, University and community partners

This mission is accomplished through a variety of programs and services that complement students’ academic experience including student organizations, leadership programs, civic engagement opportunities, volunteer experiences, inclusion programming and much more!

The Office for Student Engagement is located in 2136 University Center, (313) 593-5990. They can also be reached at student_engagement@umich.edu. For more information about Office for Student Engagement programs and services, please visit umdearborn.edu/studentengagement.

Student Success Center

The mission of the Office for Student Success is to prepare and educate students to succeed. Students are encouraged to stop by Student Success whenever they need help. Student Success can help students manage and succeed academically, personally, and professionally.

Student Success offers counseling, training, workshops, and resources to help students achieve success today and tomorrow. Whether it’s tutoring in math, learning to set goals or making good choices, the Office of Student Success helps students gain the confidence needed to reach their full potential.

Our office provides students with the support resources and connections to be successful. We offer a wide range of services as well as coaches to ensure students get the help they need in their educational journey.

The Office for Student Success is located in 2170 UC. Telephone: 313-593-5340.

Talent Gateway

The worlds of work are changing as rapidly as the economic conditions that create them. Are there ways you, as a student, can prepare to adapt productively to such change? How do you—as a future member of the workforce—develop the ability to reinvent yourself so you are ready to successfully take on the challenges change presents?

Talent Gateway is a process that puts you in control and complements the excellent, faculty-driven education in which you are engaged. Talent Gateway is your studio where, along with a community of fellow students, you can take initiative, explore interests, exercise curiosity, reflect on passions, strengths, and weaknesses, venture outside your comfort zone, engage in projects, make mistakes, fail, learn from failure, and succeed, all the while practicing creative ways for working through both problems and opportunities.

The purpose of Talent Gateway is to support you being an agent of change...self-motivating, agile, resilient, flexible, and able to re-invent yourself, as needed, to successfully respond to the changing world of work. The program connects you to resources, experiences, and people tailored to help you realize what you have to offer through real world application.

As a member of the Talent Gateway, you will participate in an online virtual community with peers, faculty, staff, and alumni where you can explore your interests and discover opportunities for personal, academic, and career growth.

If you want a more enriching Talent Gateway experience, you can be connected with a Talent Ambassador. A Talent Ambassador serves as a peer mentor, helping you navigate the wealth of exceptional academic, experiential learning, and leadership opportunities available both on and off campus. With a Talent Ambassador, you will also be included in a close-knit, peer-mentoring group of approximately 10 other students, who may be going through similar experiences to you.
To join the Talent Gateway, sign up at our website (http://catalog.umd.umich.edu/undergraduate/campus-services/career/). Location: Fairlane Center North, Suite 285

Transportation

Access to the campus is available on bus routes operated by the Suburban Mobility Authority for Regional Transportation (SMART). Connecting service is available on routes operated by the Detroit Department of Transportation (DDOT).

Direct service is available for most Detroit and western Wayne County residents, with transfer service available for Oakland and Macomb County commuters. Additional information may be obtained by telephoning SMART at 313-962-5515.

UM-Dearborn provides a shuttle service between the main campus and Fairlane Center for students, staff and faculty. A valid ID card is required to board the shuttle. The shuttle will pick up and drop off passengers at the University Center turnaround, the Fairlane Center South turnaround and the Administration Building turnaround. For times of operation consult the Parking website: umdearborn.edu/parking.

Women's Resource Center

The Women's Resource Center (WRC), located in 2106 University Center, offers assistance with self-advocacy, work/life balance, returning student support, and personal safety through programming and individual appointments. The overall mission of the center is to increase the empowerment of all women by offering quality programs; providing personal, professional, and academic coaching; encouraging students to reach their academic and post-graduate goals; linking women to current campus and community resources; and partnering with academic units and other women's agencies to address gender and diversity issues.

In support of its mission the WRC provides quality programming and activities, extensive resources, a meeting place, volunteer opportunities, and a commitment to collaborations. Visitors will find a variety of written materials for their use. A lending library offers books and magazines on issues of interest to women. A resource shelf offers pamphlets on diverse topics including scholarships, childcare, and domestic violence. An on-line resource guide contains community resources and referrals. The WRC's Impact Grant provides small, emergency grants for students. These one-time grants, typically between $50 and $150, are meant to address serious unanticipated emergencies that could delay or halt the education of students. Grants may not be used for tuition.

For more information about these services and programs contact the Women's Resource Center at 313-583-6445 or WomensResourceCenter@umd.umich.edu or visit the WRC website at umdearborn.edu/womenscenter/.

Special Programs

Officer Education Programs

Students at UM-Dearborn may apply for admission to the two-year and four-year programs of Army or Air Force officer training. These programs include some scholarship options and may lead to a commission either in the Army or the Air Force.

These officer training programs are based in Ann Arbor. Interested students may get further information by visiting the Office of Registration & Records in Dearborn (1169 UC) or by telephoning Ann Arbor: for Air Force information, telephone (734) 764-2403; for Army information, telephone (734) 764-2400.

Army Officer Education Program (ROTC) (Not a Concentration)

Upon graduation from the University and successful completion of the program, students enrolled in the Army Officer Education Program receive a commission as second lieutenant in the United States Army Reserve or in the Regular Army. Many students enroll for the first two years in order to sample career opportunities. No military obligation is incurred for the first two years.

Air Force Officer Education Program

The program offers studies designed to prepare and commission selected individuals to serve in the United States Air Force. Both a four-year and a two-year program leading to a commission as a second lieutenant are offered. The four-year plan comprises eight terms of courses in aerospace studies plus a four-week field training course at an Air Force base, between the sophomore and junior years. The two-year plan comprises an initial six-week field training course followed by four terms of aerospace studies (AS 310 through AS 411 series). Cadets may enroll in either the four-year or two-year program by permission of the chairman.

Military Obligation

After being commissioned, graduates of the program are called to active duty with the Air Force in a field usually related to their academic degree program. The period of service is four years for non-flying officers, five years for navigators after navigator training, and eight years for pilots after flight training. A contractual obligation is established for non-scholarship students when they attend the first Professional Officer Course (POC). Scholarship students in the four-year program incur a contractual obligation upon entering the sophomore year of AFROTC, whereas those in the two-year program incur one on entering the POC.

UM-Dearborn Credit for Military Officer Education

College of Arts, Sciences, and Letters

Up to six credit hours of Military Science / Aerospace Studies / ROTC coursework may count as elective credit toward degree.

College of Business

Up to six semester credit hours will be granted to a student for successful completion of advanced military science courses towards the BBA degree requirements.

College of Engineering and Computer Science

Students who satisfactorily complete the requirements as established by the Military Officer Education Program Chairman for a commission and satisfactorily complete the engineering program of studies may count a maximum of four credit hours of advanced military science courses (300 and 400 level) as meeting program elective hours for an engineering degree at the discretion of the academic department.

College of Education, Health, and Human Services

Courses do not carry credit toward degree requirements.
The University of Michigan Student Rights and Student Records

It is the policy of the University of Michigan to comply with the Family Education Rights and Privacy Act (FERPA), the Federal law that governs release of and access to student education records.

Definitions

A student is an individual for whom the University maintains education records and who is or has been enrolled in and attended credit bearing courses at the University.

Education records include those records which contain information directly related to a student and which are maintained by the University or by a person acting for the University. The following are not education records: records kept in the sole possession of the maker, law enforcement records, records relating to individuals employed by the University, records related to treatment provided by a health professional when maintained solely for treatment purposes, records that contain information about an individual after that person is no longer a student, i.e. alumni records.

Directory information may appear in public documents and may otherwise be released to individuals outside the University without the student’s specific consent. The University of Michigan has designated the following items as directory information: name, address, e-mail address, telephone number, UM school or college, class level, major field, dates of attendance at the University of Michigan, current enrollment status, degree(s) received and date(s) awarded, honors and awards received, participation in recognized activities, previous school(s) attended, height and weight of members of intercollegiate athletic teams.

Non-disclosure of directory information may be requested by currently enrolled students. Non-disclosure means the University may not release any directory information about the student, except as permitted under the provisions of FERPA. The University may not even acknowledge to third parties that the person is a student.

Legitimate educational interest is the need to review an education record in order for a University official to carry out his or her responsibilities in regard to performing an administrative task outlined in the official’s duties, or performing a supervisory or instructional task directly related to the student’s education.

A University official is any person employed by the University in an administrative, supervisory, academic, research, or support position; a person elected to the Board of Regents; a student or a University graduate serving on an official University committee or assisting another University official in performing his or her tasks; or a person employed by or under contract to, or serving as the agent of, the University to perform a specific task.

Authorized disclosures without the student’s prior written consent may include but are not limited to information necessary to the health or safety of the student or other individuals if the University determines that there is an articulable and significant threat to the health or safety of a student or other individuals, internal disclosures for a legitimate educational reason, information returned to the author/sender of the information, to parents of a student regarding the student’s violation of any federal, state, or local law, or of any rule or policy of the University, governing the use or possession of alcohol or a controlled substance if the University determines the student committed a disciplinary violation and the student is under the age of 21, information forwarded to schools where the student plans to enroll or transfer. The University of Michigan does not routinely disclose information without the student’s consent to parents of federal tax dependents. State and Local Education Authorities may allow access to your records to third parties with written agreement in conjunction with the evaluation of federal or state supported education programs; including early childhood education, elementary and secondary education, postsecondary education, special education, job training, career and technical education, and adult education.

Student Rights

Beginning the first day of class, you have the following rights concerning your student records:

1. The right to inspect and review all material in your file(s) except:
   a. Professional mental health treatment records to the extent necessary, in the judgment of the attending physician or professional counselor, to avoid detrimental effects to the mental health of the student or others. These records may, however, be reviewed by a physician or other appropriate professional of your choice.
   b. Financial information furnished by your parents in support of an application for financial aid.
   c. Confidential letters of recommendation that were placed in your file prior to January 1, 1975.
   d. Confidential letters of recommendation concerning admission, employment, or honorary recognition, for which you have waived access. (The University may not require you to sign a waiver in order to obtain services, but a person writing a recommendation may insist on a waiver as a condition for his or her writing it.)
   e. Personal notes made by a faculty member or counselor that are accessible only to that person and are not shared with others.
   f. Materials in any admissions files, until you have been admitted to, and have attended the U-M school or college for which the materials were submitted.
   g. All other records which are excluded from the FERPA definition of education records.

Education records are maintained in a number of University offices. Requests to review records must be made in writing to the responsible official of each office that maintains the records. The responsible office will comply with the request within 45 days of its receipt.

2. The right to request an amendment of your education records if you believe it is inaccurate or misleading. If you believe there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed, and why you believe it is inaccurate or misleading. That office will notify you of the decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right in most instances to control access to information in your records by persons or agencies outside the University. With respect to University officials, information from your records will be made available only if the University official can demonstrate a legitimate educational interest consistent with their official functions for the University and consistent with normal professional and legal practices. Except for directory information, however, persons outside the University - including your parents and/or spouse - will be given information from your records only (a.) when you authorize it in
writing, or (b.) in connection with your application for or receipt of financial aid, or (c.) in connection with studies conducted for the purpose of accreditation, development and validation of predictive tests, administration of student aid programs, or improvement of instruction, or (d.) when disclosure is necessary in a health or safety emergency, (e.) or as required by federal or state law or by judicial order or lawfully issued subpoena, or (f.) to parents of a student regarding the student’s violation of any federal, state, or local law, or of any rule or policy of the University, governing the use or possession of alcohol or a controlled substance if the University determines the student committed a disciplinary violation and the student is under the age of 21. If information from your record is subpoenaed or required by judicial order, a reasonable attempt to notify you will be made as quickly as possible unless the order or subpoena prohibits such notice. In addition, the results of a disciplinary hearing conducted by the institution against the alleged perpetrator of a crime of violence will be made available to the alleged victim of that crime.

4. The right to limit disclosure of your directory information. If you do not want the University to release those items designated as directory information, you must file a written request to that effect with the Office of the Registrar. However, you should carefully consider the consequences of that action before making the decision to do so. Information is not withheld selectively. If you choose to have directory information withheld, all items designated as directory information will be withheld from everyone who inquires. If you have requested non-disclosure of directory information and wish to repeal that request, you must file a written request to that effect with the Office of the Registrar.

5. The right to a hearing if you believe that you have been improperly denied access to your records, your records contain information that is inaccurate or misleading, or information from your records has been improperly released to third parties. If you believe one or more of these situations has occurred, contact the head of the office responsible for the record or send an e-mail to ro.ferpa.request@umich.edu detailing the specifics of the situation including the office(s) and records involved. If the head of the office involved agrees with your contention, he or she will see to it that the necessary corrective action is taken. If the head of the office does not agree with your contention, you may request a hearing by a hearing panel or hearing officer designated by the Office of the Registrar’s procedures. If the decision of the hearing panel or hearing officer agrees with you, the necessary corrective action will be taken. If the decision of the hearing panel or hearing officer disagrees with you, you have the right to submit an explanatory statement, which must be included as a permanent part of your record.

6. The right to file a complaint to federal officials if you believe that there has been a violation of the rights afforded you under the Family Educational Rights and Privacy Act of 1974. The complaint must be submitted in writing within 180 days of the alleged violation to:

   U. S. Department of Education
   The Family Policy Compliance Office
   600 Independence Avenue SW
   Washington, D. C. 20202-4605
   Phone: 202.260.3887

Questions about the policies and procedures of any unit should be directed to the head of that unit. Questions about the University’s "Policies on Student Rights and Student Records" or about the Family Educational Rights and Privacy Act of 1974 should be directed to:

Vice Chancellor for Enrollment Management and Student Life
1060 Administration Building
Telephone: 313-593-5151

Revised June 2015

Statement on Academic Integrity

The University of Michigan-Dearborn values academic honesty and integrity. Each student has a responsibility to understand, accept, and comply with the University's standards of academic conduct as set forth by the Code of Academic Conduct, as well as policies established by the schools and colleges. Cheating, collusion, misconduct, fabrication, and plagiarism are considered serious offenses. Violations will not be tolerated and may result in penalties up to and including expulsion from the University.

Statement of Student Rights and Code of Student Conduct

A. Introduction

When students choose to accept admission to the University of Michigan-Dearborn ("the University"), they accept the rights and responsibilities of membership in the University's academic and social community.

The primary purpose of the Statement of Student Rights and Code of Student Conduct ("the Code") is to assist the University in providing an environment which supports the educational process and the well-being of the campus community. The responsibility for maintaining such an environment is shared by all members of the campus community. The Code was written by students, faculty, and staff of the University of Michigan-Dearborn.

Free inquiry and free expression are essential attributes of the University community. As members of the community, students are encouraged to develop the capacity for critical judgment and to engage in a substantial independent search for truth. The freedom to learn depends upon the opportunities and conditions in the classroom, the campus, and in the larger community. The responsibility to secure and respect general conditions conducive to the freedom to learn should be shared by all members of the academic community.

As members of the University community, students are expected to uphold its values by maintaining a high standard of conduct. Such values include, but are not limited to, civility, dignity, diversity, education, equality, freedom, honesty, and safety. The Code is an articulation of the University’s commitment to recognize and support the rights of its students and to provide a guide for defining behaviors the University considers inappropriate. It is not, however, meant to be an exhaustive list of all rights supported by the University or of all actions which may be considered misconduct. The Code defines student rights and conduct standards in order to give general notice of conduct expectations, to identify sanctions that will be imposed when misconduct occurs, and to ensure that students are treated with fundamental fairness and personal dignity.

Disciplinary proceedings initiated in response to a charge of violation will be the responsibility of the Code Process and will be undertaken according to the provisions and procedures articulated by the Code.
focus of inquiry in disciplinary proceedings will be on the question of responsibility of those charged with violating the Code.

Members of the University community are accountable to both civil authorities and to the University for acts which violate the law and this Code. Disciplinary action at the University will, normally, proceed during the pendency of external civil or criminal proceedings and will not be subject to challenge on the grounds that external civil or criminal charges involving the same incident are pending or have been invoked, dismissed, or reduced.

Within the University, entities (such as schools and colleges, business units and student organizations) have developed policies that outline standards of conduct governing their constituents and that sometimes provide procedures for sanctioning violations of those standards. This Code does not replace those standards; nor does it constrain the procedures or sanctions provided by those policies. The Code will be used to address violations of other University policies when the violation warrants a process or sanction beyond what is available in those policies. In such cases, the policy administrator may take intermediate action regarding a violation of their individual policy; however, final resolution will occur under the procedures outlined in this Code.

Nothing in this document should be construed so as to limit the Chancellor’s authority to maintain health, diligence, and order among students under Regents' Bylaw 2.02.

B. Academic Rights
1. Protection of Freedom of Expression. Students are responsible for learning thoroughly the content of any course of study, but are free to take exception to the data or views presented and to reserve judgment about matters of opinion.

2. Protection Against Improper Disclosure. Protection against improper disclosure of information regarding student views, beliefs, and political associations which instructors acquire in the course of their work as instructors, advisors, and counselors is considered a professional obligation.

3. Protection Against Improper Academic Evaluation. Students can expect protection, through orderly procedures, against prejudice, arbitrary or capricious evaluation. Students are also expected to respect the academic freedom of faculty and their rights and responsibilities to determine curriculum and evaluate academic performance.

4. Academic Policies. If any student has a grievance regarding academic practices and policies, there are established procedures within each college and school of the University for resolving such problems. See the appropriate school or college section of the Catalog for a statement of the academic grievance procedure to be followed.

5. For conflicts involving a faculty or staff member, students are encouraged to try to resolve the matter through consultation with that individual. If the conflict relates to unlawful discrimination or harassment, the student should consult with the Office of Institutional Equity. Formal complaints must be filed with the Office of Institutional Equity.

C. Student Rights

Students at the University have the same rights and protections under the Constitutions of the United States and the State of Michigan as other citizens. These rights include freedom of expression, press, religion, and assembly. Higher education has a long tradition of student activism and values freedom of expression, which includes voicing unpopular views and dissent. As members of our University community, students have the right to express their own views, but must also take responsibility for granting the same right to others.

Students have the right to be treated fairly and with dignity regardless of race, color, national origin, age, marital status, sex, sexual orientation, gender identity, gender expression, disability, religion, height, weight, or veteran status, and as revised in the University of Michigan Nondiscrimination Policy. The University has a long-standing tradition of commitment to pluralistic education. Accordingly, the University, through this Code, will not unlawfully discriminate on the basis of protected group status.

Students have the right to be protected from capricious decision-making by the University and to have access to University policies which affect them. The University has an enduring commitment to provide students with a balanced and fair system of dispute resolution. Accordingly, this Code will not deprive students of the appropriate due process protections to which they are entitled. This Code is one of the University’s administrative procedures and should not be equated with procedures used in civil or criminal courts.

Students and student organizations are free to discuss questions of interest to them and to express opinions publicly and privately without penalty. In conveying the ideas and opinions of students, the student press is free from censorship and the need of advance approval.

Editors, managers, and writers must subscribe to the standards of responsible journalism. At the same time, they are protected from arbitrary suspension and removal because of student, faculty, administrative, or public disapproval of editorial policy or content. Students have the right to privacy of personal possessions. Searches and seizures may be conducted by appropriate University officials, but only for specific reasons of probable cause and not freely at will. The student(s) being searched must be notified of the object of the search, unless there is immediate danger to person or property.

D. Student Conduct

Along with rights come certain responsibilities. Students are expected to conduct themselves in a manner conducive to an environment of academic integrity and of respect for the educational process and the safety and well-being of all members of the campus community. Students are also expected to comply with published University policies.

Academic Code of Conduct

I. General Principles

The Academic Code of Conduct (ACC) for the University of Michigan-Dearborn is based on the premise that students will perform honestly and ethically on all tests, projects, and assignments. Students are expected to conduct themselves in a manner conducive to an environment of academic integrity and of respect for the educational process. Therefore, an individual should realize that deception for the purpose of individual gain is an offense against the members of the community.

To ensure that the ACC functions properly, all UM-Dearborn faculty should include in their syllabus the following statement:

“The University of Michigan-Dearborn values academic honesty and integrity. Each student has a responsibility to understand, accept, and
comply with the University’s standards of academic conduct as set forth by the Code of Academic Conduct, as well as policies established by the schools and colleges. Cheating, collusion, misconduct, fabrication, and plagiarism are considered serious offenses. Violations will not be tolerated and may result in penalties up to and including expulsion from the University.” (Failure of faculty to include the statement does not absolve students from adherence to the ACC.)

All students and faculty members are required to familiarize themselves with the ACC, its implications and effects. Unfamiliarity with the ACC could result in ineffective enforcement or the violation of student rights. It is recommended that department chairs and program directors discuss the ACC with their instructional faculty at periodic intervals.

Any violation of the ACC by students will be dealt with in accordance with the procedures described below.

II. Prohibited Academic Conduct

The actions cited as prohibited conduct should be used as a guide rather than an exhaustive list of behaviors that the University considers misconduct and subject to disciplinary action.

1. Plagiarism: includes representing the words, ideas, or work of others as one’s own in writing or presentations, and failing to give full and proper credit to the original source. Failing to properly acknowledge and cite language from another source, including paraphrased text. Failing to properly cite any ideas, images, technical work, creative content, or other material taken from published or unpublished sources in any medium, including online material or oral presentations, and including the author’s own previous work.

2. Cheating: includes Copying from another’s exam or other evaluative assignment. Using notes, books, digital devices or resources, or other materials for an exam or other evaluative assignment without explicit permission of the instructor. Submitting work that was previously used for another class without the informed permission of the instructor. Discussing or sharing information about questions or answers on an exam or other evaluative assignment without explicit permission of the instructor. Giving, taking, or receiving a copy of an exam without explicit permission of the instructor. Allowing another person to take an exam or complete an assignment for the student. Attempting to change the result of an exam or other evaluation.

3. Fabrication: includes alterations to transcripts, grades, letters of recommendation, or other evaluations by or for any current or former student.

4. Aiding and Abetting Dishonesty: altering documents affecting academic records; aiding others to commit any act prohibited by the ACC; forging a signature of authorization or falsifying information on an official academic document, election form, grade report, letter of permission, petition, or any document designed to meet or exempt a student from an established University or unit academic regulation.

5. Interference: obstructing or hindering the work or study of a member of the faculty, or staff, or a student at the University.

III. Disciplinary Actions

Faculty members have the authority to impose penalties with respect to her or his class. These penalties include, but are not limited to, reducing a student’s course grade or failing a student in the course(s).

For first time offender cases that are appealed, the Academic Integrity Board shall have the authority to sustain or overturn the faculty member’s determination of an ACC violation. For repeat offenders, the Board shall make a recommendation to the dean calling for one or more of the sanctions provided in section G of the Code of Conduct.

IV. Reporting a Violation

Alleging a prohibited academic conduct is the responsibility of the faculty member. It is recommended that the faculty member make every attempt to resolve the case promptly between him/herself and the student. The student has the right to appeal a faculty member’s allegation and/or sanctions to the Academic Integrity Board.

When a faculty member believes a student has violated the University’s ACC, s/he will communicate with the student in order to discuss the case in detail. The faculty member shall inform the student of the nature of the ACC charges; explain the sanctions imposed as a result of the charges; provide the student a copy of the Academic Code of Conduct Violation Report; and provide him/her an opportunity to refute the allegations. The instructor should also inform the student of the following: 1) s/he has the right to appeal through the Academic Integrity Board within fifteen (15) academic calendar days (Includes only the Fall and Winter semesters, excluding weekends and University recognized holidays.) of receiving the notification letter (The charging unit’s associate dean shall send the notification letter with a guaranteed delivery receipt.) from the charging unit’s associate dean, and 2) that the case will be reported to the College’s associate dean designated with monitoring for repeat offenses.

After meeting with the student (or arranging for an alternative communication if the meeting is not feasible, such as in the case of an online class or when the student avoids/does not respond to a faculty member’s request for a meeting), the faculty member shall submit to his/her dean’s office and to his/her department chair a copy of the Academic Code of Conduct Violation Report (hereafter Violation Report), including supporting documents if necessary, within three (3) academic calendar days. The associate dean responsible for ACC violations shall send a letter to the student within three (3) academic calendar days of receiving the Violations Report with the following information: 1) confirmation that the allegation and the sanction from the instructor is a matter of record; 2) clarification of the appeal process through the Academic Integrity Board; 3) notification that the record of the incident is in a confidential University academic integrity database, and 4) explanation of the services and support provided by the Ombuds Services Office in Enrollment Management & Student Life in relation to ACC violations.

The associate dean of the charging unit shall ensure that all ACC violations received shall be entered into the University database and s/he shall conduct a search of the database for prior ACC violations by the student. If the student has a prior ACC violation then a hearing of the Academic Integrity Board shall be automatically convened.

V. Academic Integrity Board Jurisdiction, Composition, and Conflict of Interest

Each college shall create its own Academic Integrity Board which shall be a permanent standing committee of the college and have jurisdiction over alleged violations of the ACC. The Board shall consist of three (3) full-time tenured faculty members of the college serving two-year terms and two (2) nonvoting students of the college serving one-year terms assisted by the Ombuds Services Office director or designee as an exofficio, non-voting, advisory member. The faculty members shall be appointed by the college’s executive committee and the Student Government President shall select the student members who shall have no record or pending
VI. Academic Integrity Board Procedures

1. A hearing of the Academic Integrity Board shall be called by the associate dean if a student: 1) contests the accusation(s) against her/him within fifteen (15) academic calendar days of receiving the letter from the charging unit’s associate dean, or 2) has an existing ACC violation on record. A student shall initiate an appeal by completing and submitting to the charging unit’s associate dean a copy of the Academic Appeal Form. If a student decides to appeal there shall be no risk of an additional sanction or penalty being imposed.

2. Within fifteen (15) academic calendar days after referral, the Board shall meet to discuss the case. The Board shall take no longer than ten (10) academic calendar days after its initial meeting to make its decision/recommendation and convey the information to the appropriate parties.

3. The Board’s decision/recommendation shall be based on a preponderance of the evidence standard of proof. (A “preponderance of the evidence” shall mean evidence which is of greater weight or more convincing than evidence to the contrary; evidence which shows that something more likely than not is true.)

4. The Board shall examine and evaluate all documents within the files submitted. The Board has the authority, but is under no obligation, to meet with the instructor and student. If the Board meets with one party they shall provide the opposing side an opportunity to appear. Either party may call for the appearance of no more than three witnesses. University students, faculty, and employees are required to comply with the requests to appear as witnesses. For all other matters the Board shall promulgate its own policies.

5. For first-time offender cases, the Board shall have the authority to sustain or overturn a faculty member’s accusation and sanction of an ACC violation. Upon making its decision the Board’s chair shall inform in writing the associate dean who shall in turn notify the student and faculty member. If the Board overturns a faculty member’s decision then all records of the ACC violation shall be removed from the University academic integrity database.

6. For repeat offenders, the Board shall first meet and make a determination of a violation. (The Board members shall not be told of the student’s potential repeat-offender status. Only after the Board finds the student in fault shall the associate dean inform its members and schedule the penalty-phase hearing.) If the student is found to have violated the ACC then the Board will reconvene to decide the proper penalty. Before the second hearing the student and faculty member may submit evidence or a statement concerning the appropriate sanctions to be imposed.

Factors that may be considered in determining the nature of sanctions to be imposed include: 1) the intent of the student; 2) the effect of the conduct on the University community; 3) past disciplinary record of the student; and 4) any mitigating factors presented by the complainant (i.e., stress, personal illness, illness/death of family members, cultural misunderstandings, etc.). Upon reviewing the submitted materials the Board shall make a recommendation to the dean calling for one or more of the sanctions provided in section G of the Code of Conduct (included at the end of this document). The Board’s chair shall notify the dean of the recommendation.

7. When a student presents details that would suggest that the challenged action stemmed from conduct violating a nonacademic policy, such as sexual harassment and other forms of discrimination, then no further action will be taken pending the completion of the Office of Institutional Equity proceedings.

VII. Final Decision

For repeat offender cases the dean shall make the final decision within ten (10) academic calendar days of the Board issuing its recommendation(s). The dean will decide the case on the basis of the records of the proceedings of the Academic Integrity Board, the written materials submitted by the student, and the results of his or her consultation with the parties, if any.

The dean’s decision shall be written and contain the dean’s finding of fact and may (at the discretion of the author) include reasons for the decision. It shall be provided to the student, the student’s dean (if applicable), the department chair/program head, the faculty member, and the chair of the Academic Integrity Board, and placed in the student’s file.

If the student is from another unit then the charging college’s dean along with the student’s home-unit dean shall review the records and other materials together and issue a joint-decision. If the two deans cannot come to an agreement then the Provost shall make the final decision according to the procedures laid out in paragraphs one and two of section VII.

VIII. Automatic Procedural Review

The Office of the Provost for Academic Affairs shall conduct an automatic review to ensure no material procedural error in the process occurred. If the Provost Office determines there was a material procedural error then the case shall be remanded to a reconstituted Board for a new hearing.

IX. Maintenance of Records

All records related to ACC violations shall be maintained by each unit in accordance with the Family Education Rights and Privacy Act.

X. Responsible Administrator

The Provost and Vice Chancellor for Academic Affairs or designee is responsible for the annual and ad hoc review of this policy and its procedures. The Faculty Senate is responsible for the approval of this policy.

Sanctions (Section G.)

The sanctions to be imposed should be commensurate with the offending conduct. Because education may be the most effective and appropriate means of addressing behavior that violates the standards of a university community, the University encourages fashioning sanctions to include an educational element which may help students understand their behavior in the context of the academic community. Although it is inappropriate for the University to try to change a student’s convictions, it is appropriate for the University to ask a student to change behavior.
Regrettably, some conduct is so harmful to members of the University community or deleterious to the educational process that more severe sanctions may be required.

The sanctions imposed under these standards do not diminish or replace the penalties which may be invoked under generally applicable civil or criminal laws. Students are reminded that many violations of the standards, including harassment and other discriminatory behavior, may violate various local, State and federal laws and, therefore, also be subject to legal action.

A combination of the sanctions described below may be imposed. The range of potential sanctions is as follows:

1. **Suspension from Specific Course or Activity**. The student is removed from a specific course or activity.
2. **Class/Workshop Attendance**. The student enrolls in and completes a class that may help improve the student’s understanding of why the conduct engaged in is inappropriate.
3. **Community Service**. The student performs an appropriate amount of service that is both beneficial to the community and likely to assist the student in understanding the harm caused by the student’s misconduct.
4. **Restitution**. Compensation for loss, damage, or injury to the appropriate party or to the University in the form of service, money or material replacement.
5. **Restriction from Employment at the University**. Prohibition or limitation on University employment.
6. **Educational Project**. Completion of a project specifically designed to help the student understand why the student’s behavior was inappropriate.
7. **No contact**. A directive not to have any contact with a particular person, office or activity.
8. **Disciplinary Reprimand**. The student receives a formal reprimand for violating the standards of behavior and a warning that future violations may result in more severe disciplinary action. The student, however, does not lose University privileges.
9. **Disciplinary Probation**. A designated period of time during which the student is not in good standing with the University. The terms of probation may involve restrictions on student privileges, such as engaging in any extracurricular activity, running for or holding office in any student group or organization, serving on any University committees or participation on varsity or club sports. The terms of probation may also involve specific behavioral expectations. The appropriate University units will be notified of the student’s probationary status.
10. **Suspension in Abeyance**. A designated period of time during which the student is not in good standing with the University and is subject to automatic suspension. The student remains enrolled; however, any violation of the Code or other conditions of the suspension, during the period of Suspension in Abeyance will, after a determination of responsibility, result in automatic suspension.
11. **Suspension**. The student is temporarily separated from the University for a specified period of time. Conditions may be stipulated for the readmission of a student. When a student is suspended during a term, the student is still responsible for payment of tuition and fees for that term.
12. **Academic Dismissal**. The student is permanently dismissed from a school or college of the University.
13. **Expulsion in Abeyance**. A designated period of time during which the student is not in good standing with the University and is subject to automatic expulsion. The student remains in enrolled; however, any violation of the Code or other conditions of the expulsion in abeyance, during the Expulsion in Abeyance, will, after a determination of responsibility, result in automatic expulsion.
14. **Expulsion**. The student is permanently separated from the University. This penalty may also include the student being barred from University premises and activities. When a student is expelled during a term the student is still responsible for payment of tuition and fees for that term.
15. **Other Disciplinary Actions**. In addition to or in place of any of the above sanctions, the student may be subject to other penalties commensurate with the offending conduct. This may include but is not limited to degree and/or transcript actions, such as rescission of a degree, withholding of course credit, loss of credit for an assignment/ exam, assignment of additional work, loss of special privileges, behavioral intervention, or a behavioral contract.

**Revised: March 2015**

**Non-Academic Code of Conduct**

The following behaviors, for example, contradict the behavioral standards of the University community and are subject to disciplinary action under this Code. The prohibited conduct listed below should be used as a guide rather than viewed as an exhaustive list of all behaviors that the University considers misconduct and subject to disciplinary action.

1. Causing or threatening to cause physical harm to another person, including acts such as killing, assaulting or battering.
2. Perpetrating intimate partner violence.
3. Sexual misconduct as defined in the University’s Student Sexual Misconduct Policy (http://www.umd.umich.edu/697250).
4. Stalking
5. Discrimination or harassment in violation of the University’s Nondiscrimination and harassment policy.
6. Hazing.
7. Disrupting University business operations or University sponsored activities. This includes but is not limited to studying, teaching, research, University administration, or campus safety, fire, police, or emergency services (except for behavior that is protected by the University’s policy on Freedom of Speech and Artistic Expression).
8. Interfering with the freedom of expression or rights of individuals on University premises or at University sponsored activities.
9. Furnishing false information to the University.
10. Failing to comply with directions of University officials, including campus safety, acting in performance of their duties.
11. Initiating or causing to be initiated any false report, warning, or threat of fire, explosion, or other emergency on University premises or at University sponsored activities.
12. Theft of University property or funds; possession of stolen University property; theft or possession of stolen property on University premises.
13. Destroying, defacing, damaging, or misusing any University funds, equipment, materials, services or property or the funds, equipment, materials, services or property of others.
14. Possessing, using, or storing firearms, explosives, or weapons on University-controlled property or at University events or programs.
Section 1. Purpose

The University provides a uniform, fair and impartial process for reporting and adjudicating the alleged violation of the Code. The responsibility for administering the Code rests with the Vice Chancellor for Enrollment Management and Student Life ("VC EMSL") who may delegate certain administrative responsibilities. The resolution and appeal processes outlined herein are administrative functions and are not subject to the same rules of civil or criminal proceedings. Because some violations of these standards are also violations of law, students may be accountable to both the legal system and the University.

Section 2. Initiating the Resolution Process

Any University student, faculty member, or staff member may submit a complaint alleging a violation of the Code. A student, faculty member, or staff member may also submit a complaint based upon information reported to that person. All complaints must be submitted to the Student Conduct Advisor in writing, within 180 calendar days after the incident(s) alleged in the complaint. The VC EMSL may waive the limitation period when a late submission is reasonable. If the Student Conduct Advisor determines, based on an initial review, that the alleged behavior may be a violation of the Code, the Student Conduct Advisor will notify the respondent in writing and schedule a meeting to describe the resolution process. If the Student Conduct Advisor determines, based on the initial review of the complaint, that the alleged behavior is not a violation of the Code or that the matter would be better handled through another process or office, the Student Conduct Advisor will notify the complainant in writing that matter will not proceed pursuant to the Code process.

Section 3. Procedures for Handling Discrimination and Unlawful Harassment Complaints

When a student is accused of engaging in unlawful discrimination or harassment, including, but not limited to sexual misconduct in violation of the University’s Student Sexual Misconduct Policy, the following procedures will apply. First, the Student Conduct Advisor will refer the matter to the Office of Institutional Equity for review and investigation, if necessary. Next, the Office of Institutional Equity will conduct all investigations in consultation with the Student Conduct Advisor. If a student is found responsible for engaging in unlawful discrimination or harassment, the matter will be referred to the Student Conduct Advisor for sanctioning. The complainant or the responsible student then has the option to file an appeal of the sanction only consistent with the procedures outlined in Section F5-Appeals and the grounds for review outlined in the Student Sexual Misconduct Policy.

Section 4. Resolution Process

The Student Conduct Advisor will meet with the respondent to explain the complaint and the resolution process. The students may be accompanied by an advisor. The student will have the opportunity to ask questions and make a statement. The Student Conduct Advisor will inform the respondent (1) that statements the student makes to the Student Conduct Advisor may be considered at any hearing, (2) that the student does not have to make a statement at the initial meeting, (3) that all disciplinary records are confidential to the extent permitted by law, and (4) that the student has a right to know the potential sanctions before admitting responsibility (but may not appeal if he accepts responsibility without asking about sanctions). The respondent has a choice of informal or formal dispute resolution, as described herein. Both parties may choose to avoid the Code process and engage in alternative conflict resolution procedures.
resolution methods that may include mediation or facilitated dialogue, for example.

A. Informal Resolution Process
The respondent has the option of accepting responsibility for the charges and accepting the sanction chosen by the Student Conduct Advisor. Upon request, the respondent has the right to know the potential sanctions before accepting responsibility; however, the respondent may not appeal if he accepts responsibility without asking about sanctions. The respondent also has the option of accepting responsibility for the charges and requesting a hearing on the sanctions under the procedures outlined in Section 3FB. The respondent may not appeal an informal resolution.

B. Formal Resolution Process
Standard of Proof. The standard of proof is the preponderance of the evidence standard. This standard requires that the information supporting each finding be more convincing than the information offered in opposition to it. Under this standard, individuals are presumed not to have engaged in the conduct described unless a preponderance of the evidence supports a finding of responsibility if the matter cannot be appropriately or satisfactorily resolved through informal resolution, it will be referred for a hearing. The Student Conduct Advisor shall refer the matter to the Hearing Board chair within fifteen (15) University business days after initiated by either party. The Student Conduct Advisor will be in charge of preparing and submitting information submitted by the parties to the Hearing Board Chair. The procedures for conducting a formal hearing are outlined in Appendix B.

Section 5. Appeals
An appeals process is an essential safeguard for an imperfect human process that makes every effort to be fair. The complainant and the respondent may appeal a decision of the Hearing Board to the Provost who will convene and chair the Code of Appeals Board. An appeal must be submitted in writing to the Provost’s Office within ten (10) University business days from the date of receipt of the letters notifying the respondent and the complainant of the final decision of the Hearing Board. Failure to appeal within the allotted time will render the original decision final and conclusive. Appeals will be decided upon the record of the original hearing and upon the written statements on appeal submitted by the parties, the Hearing Board Chair and/or the Student Conduct Advisor. Grounds for appeal are limited to one or more of the following reasons: 1. There is a material deviation from the procedures followed in the outcome of the case; or 2. There is new and relevant information that was unavailable at the time of the investigation and resolution that could reasonably affect the matter of the outcome; or 3. The sanctions are not appropriate and proportionate to the determined violation(s); or 4. The evidence clearly does not support the finding(s). The Code Appeals Board may take one of the following actions: confirm the decision made through the hearing process, alter the sanction(s), or recommend a rehearing. The decision of The Code Appeals Board is final. The imposition of sanctions may be deferred during the pendency of an appeal proceeding at the sole discretion of the VC ESML.

G. Sanctions
The sanctions to be imposed should be commensurate with the offending conduct. Because education may be the most effective and appropriate means of addressing behavior that violates the standards of a university community, the University encourages fashioning sanctions to include an educational element which may help students understand their behavior in the context of the academic community. Although it is inappropriate for the University to try to change a student’s convictions, it is appropriate for the University to ask a student to change behavior. Regrettably, some conduct is so harmful to members of the University community or deleterious to the educational process that more severe sanctions may be required.

The sanctions imposed under these standards do not diminish or replace the penalties which may be invoked under generally applicable civil or criminal laws. Students are reminded that many violations of the standards, including harassment and other discriminatory behavior, may violate various local, State and federal laws and, therefore, also be subject to legal action.

A combination of the sanctions described below may be imposed. The range of potential sanctions is as follows:

1. Suspension from Specific Course or Activity. The student is removed from a specific course or activity.
2. Class/Workshop Attendance. The student enrolls in and completes a class that may help improve the student’s understanding of why the conduct engaged in is inappropriate.
3. Community Service. The student performs an appropriate amount of service that is both beneficial to the community and likely to assist the student in understanding the harm caused by the student’s misconduct.
4. Restitution. Compensation for loss, damage, or injury to the appropriate party or to the University in the form of service, money or material replacement.
5. Restriction from Employment at the University. Prohibition or limitation on University employment.
6. Educational Project. Completion of a project specifically designed to help the student understand why the student’s behavior was inappropriate.
7. No contact. A directive not to have any contact with a particular person, office or activity.
8. Disciplinary Reprimand. The student receives a formal reprimand for violating the standards of behavior and a warning that future violations may result in more severe disciplinary action. The student, however, does not lose University privileges.
9. Disciplinary Probation. A designated period of time during which the student is not in good standing with the University. The terms of probation may involve restrictions on student privileges, such as engaging in any extracurricular activity, running for or holding office in any student group or organization, serving on any University committees or participation on varsity or club sports. The terms of probation may also involve specific behavioral expectations. The appropriate University units will be notified of the student’s probationary status.
10. Suspension in Abeyance. A designated period of time during which the student is not in good standing with the University and is subject to automatic suspension. The student remains enrolled; however, any violation of the Code or other conditions of the suspension, during the period of Suspension in Abeyance will, after a determination of responsibility, result in automatic suspension.
11. Suspension. The student is temporarily separated from the University for a specified period of time. Conditions may be stipulated for the readmission of a student. When a student is suspended during a term, the student is still responsible for payment of tuition and fees for that term.
12. Academic Dismissal. The student is permanently dismissed from a school or college of the University.

13. Expulsion in Abeyance. A designated period of time during which the student is not in good standing with the University and is subject to automatic expulsion. The student remains in enrolled; however, any violation of the Code or other conditions of the expulsion in abeyance, during the Expulsion in Abeyance, will, after a determination of responsibility, result in automatic expulsion.

14. Expulsion. The student is permanently separated from the University. This penalty may also include the student being barred from University premises and activities. When a student is expelled during a term the student is still responsible for payment of tuition and fees for that term.

15. Other Disciplinary Actions. In addition to or in place of any of the above sanctions, the student may be subject to other penalties commensurate with the offending conduct. This may include but is not limited to degree and/or transcript actions, such as rescission of a degree, withholding of course credit, loss of credit for an assignment/ exam, assignment of additional work, loss of special privileges, behavioral intervention, or a behavioral contract.

H. Interim Suspension or Specified Restrictions

The Vice Chancellor for Enrollment Management and Student Life or a designee may suspend a student for an interim period pending disciplinary proceedings. Interim suspensions are effective immediately without prior notice, whenever there is evidence that (1) the continued presence of the student on the University campus poses a substantial threat to the student or to others; or (2) the continued presence of the student on the University campus poses a substantial threat to the stability and continuance of normal University function. Within two University business days after being suspended on an interim basis, the student is entitled to a meeting with the VC EMSL to be informed of the nature of the alleged violation, to be presented with available evidence and to be given an opportunity to make a statement and present evidence. If the interim suspension is continued, the student will be offered a formal hearing within five (5) University business days. The Vice Chancellor for Enrollment Management and Student Life or a designee may appoint an ad hoc hearing board to hear the case, if necessary. The Vice Chancellor for Enrollment Management and Student Life or a designee may institute specific restrictions on the student during the period of interim suspension.

I. Related Procedures

Section 1. Clemency

The Chancellor of the University has the power of executive clemency.

Section 2. Time Limits

For good cause, any time limit in these procedures may be extended by the Vice Chancellor for Enrollment Management and Student Life (VC EMSL).

Section 3. Procedural And Interpretive Questions

All procedural and interpretive questions concerning the Code will be resolved by the Vice Chancellor for Enrollment Management and Student Life (VC EMSL) or a designee. At any time, the VC EMSL, Student Conduct Advisor and Hearing Board Chair may consult the Office of General Counsel about a case or procedures.

Section 4. Records Of Resolution Actions

Records will be maintained by the VC EMSL or designee with regard to all actions taken under the Code. Accordingly, records will be maintained of complaints, hearings, findings, and sanctions. For each case in which a complaint is issued, including cases where the student accepts responsibility, the record will recite the facts of all conduct found or admitted to be in violation of the Code with sufficient specificity to indicate that a violation of the Code occurred. Confidentiality of records will be maintained to the extent permitted by law and the University of Michigan-Dearborn Student Rights and Records Policy. If a student is suspended or expelled, a notation will be made on the student’s official academic record. The notation of suspension will be removed at the time the student is readmitted to the University.

Section 5. Official Transcripts

The Student Conduct Advisor may place a hold on a student’s transcript that will prevent the student from receiving an official transcript or registering for future terms, if the student fails to participate in or comply with the sanctions issued through the Code process.

Section 6. Student Access To Records

Records and documents that will be considered during a hearing will be made available in advance to all parties but may be redacted to protect the privacy rights of individuals not directly involved in the resolution process.

Section 7. Reports Of Actions

Statistical reports of actions taken through the Code will be published annually. These data will cover the number of complaints and the types of violations, resolutions, and sanctions.

Section 8. Concurrent Legal And Code Proceedings

To ensure the educational potential of the process and in fairness to a complainant, the University should provide a prompt response to behavior which goes against the values of the University as defined by the Code. In the interest of fairness to a respondent, however, a student undergoing civil or criminal action for the same behavior, which forms the basis of a complaint under this Code, may request a reasonable delay of the Code resolution process until external proceedings are resolved. In determining whether a request is reasonable, the Student Conduct Advisor will evaluate the unique circumstances of the case, including the length of the delay and the impact of delay on the complainant and community, in addition to protecting the integrity of the resolution process. In granting a request for a delay, Student Conduct Advisor may implement conditions on continued enrollment, as appropriate. If a respondent’s request for delay is denied and the student does want to proceed with the Code resolution process, the student may withdraw from enrollment and may not re-enroll until authorized by the VC EMSL or his/her designee.

Section 9. Amendment Process

The Vice Chancellor for Enrollment Management and Student Life is responsible for administering and updating the Code. The VC EMSL may make amendments as necessary but will facilitate a full campus review of the Code at least every five (5) years.

Appendix A. Definition of Roles

Student Conduct Advisor. The role of the Student Conduct Advisor is to provide guidance regarding the Code and its procedures. The Student Conduct Advisor is responsible for the following: monitoring the structure
and process of Hearing Boards; providing training for Hearing Board Members; determining the appropriate venue for any cases in which the type(s) of violation(s) are not clearly or solely either nonacademic or academic misconduct, or in which the academic misconduct may fall within the purview of more than one academic unit; and maintaining all reports of all case resolutions, providing relevant sanction information to the appropriate Dean and/or administrator(s), and producing an annual, statistical summary of all informal and formal adjudication actions.

Hearing Board Chair. The role of the Hearing Board Chair is to manage the formal hearing process. The Hearing Board chair is responsible for the following: scheduling hearings; receiving and providing all relevant documents to hearing board members, and parties, conducting hearings; and drafting the final report. The Hearing Board Chair is a non-voting member of the Hearing Board but may vote only in the case of a tie. Hearing Board Chairs are appointed on an annual basis by the VC EMSL. The VC EMSL may revoke or extend appointments.

Hearing Board. The role of the Hearing Board is to determine whether a student is responsible for a violation of the Code. The Hearing Boards consist of four (4) members who are appointed on an annual basis by the VC EMSL. The Hearing Board consists of one faculty member, one staff member and two students. The VC EMSL will appoint a pool of panelists on an annual basis. The VC EMSL may revoke or extend appointments. At least one-half of the members of the Hearing Board must be students currently enrolled at the University of Michigan-Dearborn.

Appeals Board. The role of the Appeals Board is to review all appeals submitted. The Appeals Board is chaired by the Provost or the Provost’s designee. The Appeals Board is comprised of five voting members: two students, two faculty, and one staff. A quorum shall consist of four voting members with the Chair voting only to resolve a tie-vote by the members.

Student Board members are appointed by the VC ESML, in consultation with Student Government, for one year terms. Appointees need not be members of Student Government but must be enrolled as students. To be eligible for Board membership, the student must be in good academic standing, and be under no current restrictions as a result of Code violation.

Faculty Board members are appointed by the Faculty Senate for staggered three year Appointees need not be members of the Faculty Senate, but they must hold tenured positions as associate or full professors. The Staff Board member is appointed by the Staff Senate for a three year term. The appointee need not be a member of the Staff Senate but must be a permanent employee in a staff position.

Appendix B. Formal Hearing Procedures

The following procedures will apply to formal hearings:

1. In cases that involve more than one respondent, the students will have the option of choosing whether they have a joint or separate hearing. If the students cannot agree, the hearings will be separate.

2. The Hearing Board chair will provide the parties at least five (5) University business days advance notice of the hearing. The hearing should take place no later than twenty (20) University business days after referral from the Student Conduct Advisor.

3. If any party fails to appear after proper notice, the hearing may proceed and findings may be made. In addition, sanctions may be imposed without the respondent’s participation.

4. The Hearing Board Chair may request the appearance of University faculty, staff or student upon his/her initiative, or upon the request of any Board member or the respondent, or the complainant. University students and employees are required to comply with requests to appear as witnesses.

5. Both parties may have access to all written or other information that will be considered by the Hearing Board before the hearing. Both parties have the right to the names of witnesses who will testify at the hearing before the hearing.

6. Each party may be accompanied at the hearing by a personal advisor, who may be an attorney; however, the advisor may not participate directly in the proceedings. For example, the advisor may not question witnesses or make presentations.

7. The respondent, complainant, and Student Conduct Advisor may also present written statements to the Hearing Board. The respondent and complainant may make statements at the beginning and end of the hearing.

8. During the hearing, the Student Conduct Advisor, the respondent, the complainant and the Hearing Board members have the right to question all participants giving testimony.

9. The Hearing Board Chair shall exercise control over the hearing to avoid needless consumption of time and to prevent the harassment or intimidation of witnesses. Unduly repetitious or irrelevant evidence may be excluded.

10. Formal rules of evidence do not apply. The Hearing Board Chair may, at his/her discretion, admit all matters into evidence that reasonable persons would accept as having probative value in the conducting a fair hearing.

11. Any person who disrupts a hearing or who fails to adhere to rulings of the Hearing Board Chair may be immediately removed from the proceedings. If he/she continues to be disruptive, the Hearing Board Chair has the right to remove that person for the duration of the hearing and to continue and conclude the hearing.

12. Witnesses will be asked to affirm that their testimony is truthful. They may be subject to sanctions by the Board with respect to charges of intentionally furnishing false information to the University. Witnesses may be present in the hearing room only when they are presenting information.

13. Respondents have the right to remain silent during the hearing. Silence by the accused will not be used as evidence of responsibility for a charge.

14. To ensure the privacy of the parties and to maximize the educational potential of the process, both parties must agree to the admission of any other people (except witnesses or advisors) to the hearing.

15. The ensure fairness and consistency, and to maximize the educational potential of the process, panelists may have access to details, rationales, and results of past cases.

16. A recording will be made of hearings, and will be made available to the complainant or respondent upon request during the period in which an appeal may be filed or is pending.

17. After completion of the hearing, the Board will meet privately to determine responsibility and sanctions, by a majority of the Hearing Board Members. The Hearing Board Chair may vote in the case of a tie. A respondent is presumed not responsible unless the preponderance of all the information presented indicates that a violation of the Code has occurred.

18. In all cases, the Hearing Board Chair will issue a written decision containing findings of fact, conclusions as to responsibility, and rationales for all sanctions imposed, within ten (10) business days after the completion of the hearing to the parties, the Student
The College of Arts, Sciences, and Letters (CASL) is the liberal arts college at UM-Dearborn. Following the long-standing University of Michigan tradition of a sound liberal arts education, the College emphasizes the breadth and depth of learning and creative thinking. The programs of the College are designed to prepare students who can communicate clearly, reason and make critical judgments, distinguish facts from values, and understand their own and others’ cultural and artistic heritage. Individuals who are educated in this manner will be able to adapt successfully not only to their first jobs but also to a rapidly changing world. With a sound liberal arts education, our students are equipped to provide leadership, direction, and vision.

With a full-time faculty of over 150, the College offers 35 liberal arts degree programs and over 1000 courses to its 4500+ undergraduates, who represent nearly half of the total student enrollment at UM-Dearborn. In addition, the College provides the liberal arts foundation for all degree programs on campus and is the academic unit on campus that reflects in itself the diversity essential to and inherent in a modern comprehensive university. The College is the largest academic unit at UM-Dearborn and the third largest of all academic units on the three campuses of the University of Michigan.

The programs of the College are designed to prepare students who can communicate clearly, reason and make critical judgments, distinguish facts from values, and understand their own and others’ cultural and artistic heritage. Individuals who are educated in this manner will be able to adapt successfully not only to their first jobs but also to a rapidly changing world. With a sound liberal arts education, our students are equipped to provide leadership, direction, and vision.

In addition, the College provides the liberal arts foundation for all degree programs on campus and is the academic unit on campus that reflects in itself the diversity essential to and inherent in a modern comprehensive university. The College is the largest academic unit at UM-Dearborn and the third largest of all academic units on the three campuses of the University of Michigan.

History of the College

From the beginning of the Dearborn Center of the University of Michigan, as it was first called, there was “an intent to provide a full schedule of daytime courses in Engineering, Business Administration, and the Liberal Arts and Sciences” (Report by the University’s Dean of Statewide Education, January 1957). On January 10, 1958, the Regents approved the creation of the Division of Literature, Science, and the Arts (LSA) as an official academic division. Full programs in the liberal arts began in Fall, 1960; and in Fall, 1965, the LSA Division became the largest academic unit on the Dearborn Campus, a distinction which continues to the present.

When it became a four-year undergraduate institution in 1971, the Campus was designated the University of MichiganDearborn (UM-Dearborn). Two years later, the Regents approved a new set of UM-Dearborn Bylaws, in which the Department of Education became a separate division, and the LSA Division became the College of Arts, Sciences, and Letters (CASL), administered by a Dean. Since then, CASL has evolved to comprise six multidisciplinary departments: Behavioral Sciences; Mathematics and Statistics; Language, Culture and Communication (LCC); Literature, Philosophy and the Arts (LPA); Natural Sciences; and Social Sciences. CASL is also home to ten college wide programs: African and American African Studies (AAAS); American Studies; Arab American Studies; Criminal Justice Studies; General Studies; Law and Society; Liberal Studies; Religious Studies; Science and Technology Studies; and Women and Gender Studies.

Mission of the College

As was true in Paris and Bologna in the fourteenth century and as is true in Cambridge, Ann Arbor, and Dearborn in the twenty-first, liberal arts colleges are the sine qua non of universities. The pre-eminence of the College of Literature, Science, and the Arts at Ann Arbor is mirrored in the status of the College of Arts, Sciences, and Letters at Dearborn. The reason for this preeminence of liberal arts colleges is not difficult to ascertain. Together, they share an ideal, a goal: the cultivation of students’ intellectual abilities, the refining of their sensibilities, and the enlargement and deepening of their awareness and knowledge.

CASL is the intellectual core of the campus. In the College, a distinguished faculty of teacher-scholars aims to cultivate the intellectual abilities of a diverse and talented student body and to enlarge, refine, and deepen their awareness and knowledge. Through traditional degrees and such distinctive programs as cooperative education, undergraduate research and interdisciplinary honors, the College emphasizes both the practical and the intellectual side of the liberal arts. In collaboration with the professional schools, it prepares students for the professions while helping them toward an understanding of human values and ethics. In partnership with the broader academic community, its faculty contribute significantly to the creation, application, and dissemination of knowledge. In addition, it provides significant service to the University and the wider community.

In mathematics and the natural sciences, emphasis is placed on rational, analytical, conceptual thinking and on mastery of precise methods of inquiry, especially experimentation, that produces results that may be replicated.

In the humanities, methodology is equally important, but it is less exclusively rational, because the study of art, literature, and music depends on the manner – partly emotional, partly imaginative – in which these are experienced.

The social and behavioral sciences offer a political, social, economic, psychological, and cultural storehouse from which students can draw in order to understand the past, cope with the present, and design the future.

In CASL, emphasis is not placed exclusively on specific preparation for a narrow career track, but rather on providing a broad-based liberal arts background which offers an ethical and moral foundation from which graduates may grow. Basic core knowledge will aid graduates in their career choices, but facts in many occupations may have a life of less than a decade. By contrast, values endure for a lifetime.

Organization of the College

Among the three liberal arts colleges on the University of Michigan campuses (Ann Arbor, Dearborn and Flint), our College stands out because it is organized in a unique manner. Instead of being fragmented into many traditional single-discipline departments, the College is mainly organized into six multidisciplinary departments: Behavioral Sciences; Mathematics and Statistics; Language, Culture and Communication; Literature, Philosophy and the Arts; Natural Sciences; and Social Sciences.

The Behavioral Sciences Department houses and offers degree programs in three disciplines: anthropology, psychology, and sociology. The Department also offers an interdisciplinary degree program in behavioral
sciences and a graduate program in Health Psychology. The office of the Behavioral Sciences Department is located in Room 4012, CB.

The Language, Culture and Communication (LCC) Department houses six disciplines: Comparative Literature, Composition and Rhetoric, Journalism and Screen Studies, Linguistics, Modern and Classical Languages (including Arabic, French, German and Spanish), and Public Communication and Culture Studies (including Speech). It offers degree programs in French Studies, Communication, and Hispanic Studies. It also offers an interdisciplinary degree in International Studies. In addition, the Department offers minors in Arabic Studies, Comparative Literature, Film Studies, German, Global Cultures, and Linguistics. To support its programs in Modern languages, the Department houses the Kocoff Foreign Language Media Laboratory (3065 CB) with extensive resources for language learning such as audio and video course materials, foreign language writing assistant programs, and foreign language TV programs via satellite. To support its programs in Communications, the department houses a TV studio, an audio lab, and video editing facilities with state-of-the-art software, as well as a dedicated computer classroom (3034 CB) with 24 workstations. The office of the Language, Culture and Communication department is located in Room 3016, CB. The phone number is 313-593-4778.

The Literature, Philosophy, and the Arts Department (LPA) houses degree programs in three disciplines: art history, English literature, and philosophy. It offers an interdisciplinary degree program in humanities, a minor in medieval and renaissance studies, as well as courses in applied art, applied music, and music history. The Literature, Philosophy, and the Arts Visual Resources and Music Collections (VRMC) supports the instructional needs of the department, especially art history, applied art (studio art), and English literature. The collection contains over 95,000 analog slides, 1500 compact discs and phonograph records, 200 videocassettes and other instructional materials. Digital images from the VRMC collection are available from the Image Collections supported and maintained by Digital Library Platform Service (DLPS) (https://www.lib.umich.edu/digital-library-platform-services-dlps). The office of the Literature, Philosophy, and the Arts Department is located in Room 3011, CB.

The Mathematics and Statistics Department offers a degree program in the discipline of mathematics, with an emphasis on either pure or applied mathematics. In addition, the Department offers minors in Applied Statistics, Computer and Computational Mathematics, and Mathematics. The Mathematics Placement Exam and the Mathematics Learning Center are both administered by the Department. The office of the Mathematics and Statistics Department is located in Room 2014 CB.

The Natural Sciences Department houses and offers degree programs in three disciplines: biological sciences, chemistry, and physics. The Department also offers interdisciplinary degree programs in biochemistry, chemistry instruction, earth sciences, environmental science, environmental studies, integrated science, and microbiology; geology and astronomy are available as minors. Also available are the GIS and MEDS certificate programs. The Science Learning Center, the greenhouse, and the observatory are administered by the Department. The office of the Natural Sciences Department is located in Room 125, Science Building.

The Social Sciences Department houses and offers degree programs in Economics, Geography, History, Political Science, Social Studies and Urban and Regional Studies, as well as graduate degrees in Public Policy and Public Administration and a minor in Geography. The office of the Social Sciences Department is located in Room 2140 Social Sciences Building.

The College supports several interdepartmental programs, some administered directly by the College and some administered by departments. These include degree programs in African African American Studies, American Studies, Criminal Justice Studies, General Studies, Liberal Studies, and Women’s and Gender Studies, and minors in African and African American Studies, Law and Society, Leadership and Communication in Organizations, Medieval/Renaissance Studies, Organizational Change in a Global Environment, Religious Studies, Science and Technology Studies, Social Science Research Methodology, and Society and Technological Change. The College also supports the Honors Program, coursework in Arab and Arab American Studies, a program for study in Japan, and the Cooperative Education Program.

Degrees Offered

Students may obtain a Bachelor of Arts (AB), Bachelor of Science (BS), or Bachelor of General Studies (BGS) from CASL. The BGS degree, reserved for students transferring from a community college with an associate degree, is discussed under Degree Requirements.

A liberal arts degree program affords a student both breadth and depth of learning. The course requirements for a degree may be divided into types: courses that give a broad, general education, those that provide depth in a specialization, and those that offer the tools needed for success in college and life.

Dearborn Discovery Core (DDC) and Foreign Language

Freshmen to the College follow the Dearborn Discovery Core curriculum to meet their general education requirements (see General Information Section). Newly admitted transfers and readmits Fall 2016 and Winter 2017 follow different distribution requirements. Consult a CASL advisor or Degree Works. Students meeting MTA should also consult a CASL Advisor for review of their remaining distribution requirements.

Foreign Language (8 hrs)

All BA and BS students are required to take a two-course sequence in one language.

</table>

Total Credit Hours: 8

The foreign language distribution requirement can be met by:
• Successfully completing a two-semester beginning language sequence at UM-Dearborn, or
• Transferring the equivalent of 8 semester hours of a beginning language sequence from another college or university, or
• Successfully completing a 3- or 4-semester hour foreign language course (this course cannot be taught in English) at the 102 level or higher, or
• Having completed at least 3 years (in the same language) of foreign language in high school with a grade of C or better in the final course, or
• Having completed the equivalent of a high school diploma at a school that used a language other than English for instruction. (Appropriate documentation attesting to the language of instruction and graduation from the high school program is necessary, and official English translations of foreign transcripts must be provided), or
• Passing an oral and written proficiency exam.

A student with prior knowledge of Arabic, French, German or Spanish should take a placement examination before registering for a course in that language. Placement/proficiency exams in French, German, and Spanish are administered by the Office of Admissions and Orientation; call 313-593-5100. Placement/proficiency exams in Arabic are administered by faculty in the Language, Culture, and Communication Department; call 313-593-4778. A student wishing to take a proficiency exam in a language not mentioned above or not taught at UM-Dearborn should consult a CASL advisor; call 313-593-4778. A student wishing to waive the foreign language requirement must officially submit a request in writing via a petition form. Please note that when the requirement is waived, or proficiency is demonstrated by exam, credit will not be awarded for courses not taken.

Majors

What is a Major?

A college degree experience includes depth as well as breadth. Each student in an AB or BS degree program must choose a field in which to specialize, which is called a major.* A major is a program of specialized study that normally consists of a minimum of 30 credit hours of work at the upper-level level (courses numbered 300 through 499 and 3000-4999) taken mainly during the student’s final two years. A major allows a student to develop independence and discrimination of thought and judgment and to learn to appreciate, assimilate, and apply a coherent body of knowledge.

The College offers the following majors that normally lead to the degree (AB, BGS, or BS) listed.

* Liberal Studies offers the student an opportunity to design an AB or BS degree program from three 12 or 15 credit hour fields of study called Areas of Focus.

Major Requirements

Certain introductory courses, designated prerequisites, are designed to give students the knowledge and skills needed in the advanced courses. Undecided students will find these courses helpful in making a decision about majoring in the field.

A program of study in a major should be planned in consultation with the faculty program advisor. The advisor must approve the content of the major and can help the student achieve a sound and harmonious program.

The following rules apply to most majors:

1. Generally in most single discipline majors, at least 30 upper-level credit hours are required. At least 24 credit hours must be taken in the field of the major and at least 6 credit hours of cognate courses are required. A cognate course is in a related field.
2. The courses used to fulfill the 30 or more upper-level credit hours must be numbered 300-499 or 3000-4999. Note that courses taken at community colleges and lower division courses taken at other four-year institutions may not be used to fulfill this requirement.
3. Courses taken as major prerequisites may not be counted in the major.
4. Students not on DDC may not use major requirements to satisfy distribution requirements with the exception of the diversity requirement.

5. A minimum grade point average (GPA) of 2.00 must be achieved in both major courses and cognate courses.

6. At the minimum, students must complete between 12 and 15 of the 30 credit hours at UM-Dearborn. Students transferring upper-level credits from other institutions should check with their major advisor for specifics of this residency requirement.

7. Students who have been off campus for one full year must complete the degree requirements in effect when they return.

8. Courses used in the major cannot dually be used in a minor.

9. Courses used in the major cannot be taken P/F (Pass/Fail)

**Double Major (Optional)**

Students who want a double major must meet all requirements in two fields and must officially declare, and be approved for, both majors, in the CASL Office of Advising and Student Records, Room 1039 CB. Courses that satisfy major and/or cognate requirements for more than one field can be applied simultaneously to both fields. The business study major may only be a second major.

**Areas of Focus**

Instead of a traditional major, students in the General Studies or Liberal Studies degree programs elect three Areas of Focus which can be in single disciplinary areas or in multi-disciplinary areas. A single disciplinary focus requires 12 hours at the 300 level or above. Multi-disciplinary areas of focus require 15 hours. At least two areas of focus must be within CASL. One area of focus may be in Business or CIS. Students interested in these programs should contact CASL Advising and Records in 1039 CB or call 313-593-5293 for additional information.

**Recognition of A Minor (Optional)**

A student in an AB or BS degree program (other than Liberal Studies) may apply for recognition of a minor. A student may declare a minor (completed or not) by filing the appropriate form at the CASL Office of Advising and Student Records. A final audit will be conducted at the time of graduation. Any posted minor that has not been successfully completed will be deleted from the student’s transcript.

A minor generally consists of a minimum of 12 or 15 credit hours of upper-level (300-499 and 3000-4999) coursework in a particular field of study. A minimum grade point average (GPA) of 2.00 is required in the courses applied to a minor. For minors offered by CASL, the grades (including E’s) in all upper-level courses in the discipline of the minor will be reflected in the minor GPA. Courses elected pass/fail (P/F) cannot be used in a minor. Courses used in a minor cannot dually be used in a major.

A single disciplinary minor requires a minimum of 12 credit hours of upper-level coursework. No more than three credit hours of transfer credit, field placements, internships, seminars, S/E-graded courses, and independent study/research may be applied to any 12 credit hour minor.

Note that a few interdisciplinary majors do not offer minors. A minor may be obtained in the following fields of study even though there is no major offered: Applied Art; Applied Statistics, Arabic Studies; Astronomy, Comparative Literature; Computer and Computational Mathematics; Geology; German; Linguistics; and Music. In these fields, 12 credit hours of upper-level coursework are required.

An interdisciplinary minor consists of a minimum of 15 credit hours of upper-level coursework. Interdisciplinary minors are available in African and African American Studies; Arab American Studies; Communication; Community Change; Environmental Studies; Film Studies; Geography; Global Cultures; Journalism and Screen Studies; Law and Society, Leadership and Communication in Organizations; Medieval and Renaissance Studies; Organizational Change in a Global Environment; Religious Studies; Science and Technology Studies; Social Science Research Methodology; Society and Technological Change; Urban and Regional Studies and Women's and Gender Studies. There is no minor in International Studies, American Studies, Behavioral Sciences, General Studies, Liberal Studies, Chemistry/Institutional Track, or Social Studies.

In addition, there are several non-CASL minors available – Computer and Information Science (CIS), CIS-Game Design Option, Digital Marketing, Finance, Health Policy Studies, Human Resources, Information Technology Management, Management, Marketing, Public Health, and Supply Chain Management. The GPA for the CIS minor is based on CIS 150, CIS 200, CIS 275, and all upper-level CIS coursework. The GPA for the Business minors is based on all courses taken for the minor in the College of Business. Students who are not in the College of Business must complete at least 30 credit hours in courses offered by the College of Business. A minimum of six credit hours of transfer credit, field placement, internships, seminars, S/E-graded courses, and independent study/research may be applied to any interdisciplinary or non-CASL minor.

**Other Requirements**

**Total Credit Hours**

A minimum of 120 credit hours with an overall average of C (2.00) or better is required for graduation.

**Upper-Level Coursework**

A minimum of 48 hours of upper-level (courses numbered 300-499 and 3000-4999) coursework must be completed by each student.

**Undergraduate Residency**

To qualify for an undergraduate degree, a student must complete through instruction from the University of Michigan-Dearborn faculty, a minimum of 30 of the last 36 credits presented for the degree. Restrictions on maximum transfer credit hours must be observed. Any exceptions to this policy must be approved by petition to the Academic Standards Committee of the student’s college in advance of coursework taken.

**Credit Hour Limitation**

There are maximum credit hours in any one discipline which may be applied toward the 120 credit hours needed for graduation. See major requirements for specific rules.

**Degree Requirements: Summary**

**Bachelor of Arts (AB)**

To be recommended for the AB degree a student must have satisfied the DDC and Foreign Language requirements, residency, credit hours, grade point average, and upper-level work. For all programs except Liberal Studies, the student must also complete the requirements for the major. The AB degree in Liberal Studies does not involve a major, but three fields of study called Areas of Focus. Minors are not available in Liberal Studies.
Bachelors of Science (BS)

To be recommended for the BS degree a student must have satisfied all the requirements for the AB degree and must have majored in one of the following programs: biochemistry, biological sciences, chemistry (ACS certified), chemistry/instructional, earth science, environmental science, microbiology, or physics. Alternatively, a student who earns 60 or more credit hours (at least 20 credit hours of which are in upper division courses 300 or above) in mathematics (including CCM and CIS courses 150 and above, and statistics courses) and/or the physical and biological sciences may, upon petition to the CASL Office of Advising and Student Records, Room 1039 CB, be granted the BS degree.

Bachelor of General Studies: Two Plus Two (BGS) Requirements

The Bachelor of General Studies degree is reserved for students who have earned an associate degree from a community college that has a "two-plus-two" articulation agreement with UM-Dearborn. Students with associate degrees from other appropriately accredited institutions may also be used to satisfy area of focus requirements. Courses elected focus and to develop a rationale for their individualized BGS curriculum.

"two-plus-two" articulation agreement with UM-Dearborn. Students with requirements (with the exception of the diversity requirement) may not be used to fulfill the 12-15 credit hour requirement in an area of focus. No more than three hours in a 15-hour area of focus can count in the 120 hours required for graduation. Students not in the BBA program of the College of Business cannot elect courses in the behavioral and/or social sciences; two courses in the humanities; courses equivalent to two semesters of COMP 105 and COMP 106.

1. one course in mathematics; one course in the natural sciences; two courses in the behavioral and/or social sciences; two courses in the humanities; courses equivalent to two semesters of COMP 105 and COMP 106
2. 12-15 upper division (300 or above) credit hours in each of three areas of focus with a GPA of at least 2.00 (exception: the GPA for the CIS area of focus is based on CIS 150, CIS 200, CIS 275 and all upper-level CIS courses)
3. one approved diversity course
4. a minimum of 48 upper division credit hours
5. a minimum of 120 credit hours with an overall GPA of at least 2.00.

Note: No more than 30 credit hours of upper-level coursework in any one discipline or area of focus can count in the 120 hours required for graduation. Students not in the BBA program of the College of Business cannot elect more than 30 credit hours in courses offered by the College of Business.

Only one area of focus may be outside CASL. At least 30 upper-level credit hours must be in courses taken in CASL. All courses used to satisfy area of focus requirements must be upper-level. No credit hours transferred from a community college or lower-division courses taken in a four-year institution may be included. Courses used to satisfy distribution requirements (with the exception of the diversity requirement) may not also be used to satisfy area of focus requirements. Courses elected on a Pass/Fail (P/F) basis may not be used to fulfill the 12-15 credit hour requirement in an area of focus. No more than three hours in a 12-hour area of focus, or six hours in a 15-hour area of focus, may be transfer, independent study/research, internship, or S/E graded. Students should be aware that upper-level courses, particularly in the sciences, mathematics, and CCM, may have substantial prerequisite requirements. Minors are not available with the BGS degree. The BGS cannot be a dual degree with a Bachelor of Arts or Bachelor of Science.

Students should consult with a professional staff advisor in the CASL Office of Advising and Student Records, 1039 CB, to discuss areas of focus and to develop a rationale for their individualized BGS curriculum.

Other Degree Options

Second Bachelor Degree

A student who has already earned a bachelor degree from UM-Dearborn or any other accredited collegiate institution may apply to pursue a second bachelor degree through the Admissions Office (1145 University Center). If accepted, the student must complete at UM-Dearborn at least an additional 30 credit hours (regardless of the number of credit hours completed for the first degree), if the first degree was earned at UM-Dearborn; or 45 credit hours, if the first degree was earned elsewhere; and must satisfy all the requirements for the second degree program. The GPA for the second degree will be based on the cumulative academic records of all courses taken at UM-Dearborn. For further information, contact the CASL Office of Advising and Student Records, 1039 CB.

Dual Degrees

Students may apply for two or more degrees either within CASL or in CASL and another unit at UM-Dearborn. To earn both degrees, students must meet the degree requirements for each degree. Generally, distribution courses taken within CASL may be used to satisfy both degrees. Students should expect to elect at least 30 more credits to earn both degrees. Students are advised to contact a representative from each program to learn the specific requirements that must be met.

Some degrees, such as the degrees in Engineering Mathematics or CIS Mathematics, are only available as concurrent degrees and must be paired with a primary degree in either engineering or CIS. Students interested in dual degrees should see an advisor.

Joint Degrees

Students can get an early start in the graduate degree programs of the University's Ann Arbor Campus School of Natural Resources and still be awarded a liberal arts degree from UM-Dearborn. Students must have a GPA of at least 3.00 and have completed the requirements for graduation and earned a minimum of 45 of the required 105 credit hours in residence at UM-Dearborn. A maximum of 15 credit hours of appropriate required courses in the first two years of the graduate/professional degree program may count toward both the bachelor and the graduate degrees. For more information, contact the CASL Office of Advising and Student Records, Room 1039 CB.

AMPP-IP. An Accelerated Master of Public Policy-International Policy Concentration (AMPP-IP) provides political science or economics undergraduate majors the opportunity to earn an MPP degree in as little as one year after completing their BA in Political Science or Economics. Students enrolled in the program take up to five graduate public policy courses in their junior or senior year that they apply towards both their BA in Political Science or Economics and the MPP. We also waive one of the core MPP courses, so once you earn your BA, you have as little as 24 credits of graduate courses in international policy or international economics left to complete the MPP.

AMPP-EP. An Accelerated Master of Public Policy-Economic Policy Concentration (AMPP-EP) provides economics undergraduate majors the opportunity to earn an MPP degree in as little as one year after completing their BA in Economics. Students enrolled in the program take up to five graduate public policy courses in their junior or senior year that they apply towards both their BA in Economics and the MPP. We also waive one of the core MPP courses, so once you earn your BA, you have as little as 24 credits of graduate courses in economic policy left to complete the MPP.
Required for Transfer Students

Admission Requirements

A student who applies to UM-Dearborn with 24 or more semester hours of transferable credit (excluding advanced placement credit) is considered a transfer student. Students with fewer hours of college credit are considered freshmen for admission purposes. For freshman admission requirements, see the General Information section of this Undergraduate Catalog.

Admission to the College as a transfer student is based on the quality and content of both the high school and the college academic records. Standards of evaluation are designed to ensure that each student admitted has the intellectual capacity and the preparation to pursue advanced undergraduate work successfully. Admission criteria are not based on race, sex, color, religion, national origin or ancestry, age, marital status, handicap or veteran status.

The process of determining equivalent UM-Dearborn course and appropriate credit hours for a course taken at another institution is called credit certification. A student who believes that a course was not certified correctly should immediately contact the CASL Office of Advising and Student Records, Room 1039 CB. Any request for re-evaluation of credit must be petitioned in writing within six months.

Courses will not be transferable if completed with a grade lower than C. The College reserves the right to place students on registration hold if they have not provided an official transcript of their studies taken at another institution.

General Requirements

Students entering the College with junior status will be expected to have completed most of the distribution requirements and, if applicable, major prerequisites. Deficiencies in either of these areas must be made up with all deliberate speed. Check with your major advisor for limits on the number of transfer credits that will be accepted toward degree requirements. Courses taken at other four-year institutions may be used in some cases to satisfy upper-level requirements in the major. Courses transferring from community colleges or other two-year institutions will be considered lower level or general elective credit only. They will not be considered upper level in the College of Arts, Sciences, and Letters.

Reminder: All students are required to declare a major when they reach 60 credit hours. Students transferring 62 hours or more are not required to declare a major before admission, but must do so during their first term at UM-Dearborn.

Residency Requirements

Transfer students must complete at UM-Dearborn the last 30 to 58 credit hours before graduation. The precise number depends on the previously attended institution(s) and the maximum number of transferable credits. Institutions are classified into three categories: (2Y) includes all two-year institutions, (4Y) includes all four-year institutions other than the schools and colleges of the University of Michigan, (UM) includes only the schools and colleges of the University of Michigan. The table below gives the maximum transferable credits and minimum residency requirements.

Notes: The transferable credit hours listed below are maximums. The exact number of transferable hours is determined upon official evaluation and may vary depending on the students program.

Advanced Placement, International Baccalaureate and A level coursework is treated the same as coursework from a four-year institution.

Normally a student must complete his/her last 36 semester hours at UM-Dearborn. Under certain circumstances, if approved by petition, a senior may elect the last 30 credit hours of coursework at another UM campus or six of the last 36 credit hours at an institution other than the University of Michigan.

(not necessarily in this sequence)

Other Programs

Graduate Programs

The College offers a Master of Public Administration, a Master of Science in Applied and Computational Mathematics, a Master of Science in Environmental Science, Master of Science in Psychology with tracks in Health Psychology and Clinical Health Psychology, and a Master of Public Policy. See the UM-Dearborn Graduate Catalog for admission requirements, complete program descriptions and a listing of graduate courses.

Certificates

The College offers three certificates: Geographic Information Systems (GIS), Public Relations (PR), and Writing (WRIT).

Consult the program description in this Catalog for additional information and requirements.

Administration
Martin J. Hershock, PhD, Dean
Gabriella Eschrich, PhD, Associate Dean
Michael Lachance, PhD, Associate Dean
Sharie Beard, Administrative Coordinator
Susan Cushnier, MA, Program Manager, Academic Outreach
Susan Gedert, AB, Communications Editor Alumni Affiliate Coordinator
Chalina Hillson, MA, Financial Specialist
Ellen Judge-Gonzalez, MA, Director, Student Outreach and Academic Resources (SOAR Program)
Carol Ligienza, BGS, Coordinator, Graduate Programs and Retired Persons Scholarship Program
Patricia Martin, MPA, Cooperative Program Manager
Marlene Pruitt, BA, Business Administrator
Maureen Sytsma, BS, Secretary to the Dean
Karen Wittkopp, Director, Advising and Student Records

Chairs and Directors
Suzanne Bergeron, Director, Women’s and Gender Studies
David Chatkoff, Director, Psychology
William DeGenaro, Director, Writing Program and Writing Center
Paul Draus, Director, Public Policy and Public Administration
Ivy Forsyth-Brown, Co-Director, African American and African Studies
Claude Jacobs, Director, Religion and Society
Michelle Jarenski, Director, American Studies
Joe Lunn, Co-Director, African American and African Studies
Gerald Moran, Director, Honors Program
Troy Murphy, Chair, Language, Culture, and Communication
Bruce Pietykowski, Director, Urban and Regional Studies Program
Ara Sanjian, Director, Center for Armenian Studies
Donald Shelton, Director, Criminology and Criminal Justice
Jonathan Smith, Chair, Behavioral Studies
Deborah Smith Pollard, Interim Chair, Literature, Philosophy, and the Arts
Tom Snabb, Director, Applied and Computational Mathematics
David Susko, Director, Environmental Interpretative Center
John Thomas, Chair, Natural Science
Dale Thomson, Chair, Natural Science
Sonia Tiquia, Director, Environmental Sciences
Roger Verhey, Director, Center for Mathematics and Education
Jamie Wraight, Program Advisor, Liberal Studies
Jennifer Zhao, Chair, Mathematics and Statistics

Professors Emeriti
Akiyama, Michael, PhD, Professor Emeritus of Psychology
Anderson, Donald F., PhD, Professor Emeritus of Political Science
Axsom, Richard, PhD, Professor Emeritus of Art History
Berkove, Lawrence, PhD, Professor Emeritus of English Language and Literature
Bjorn, Lars, PhD, Professor Emeritus of Sociology
Bogin, Barry A., PhD, Professor Emeritus of Anthropology
Brown, James W., PhD, Professor Emeritus of Mathematics
Clark, Elaine G., PhD, Professor Emerita of History
Constant, John G., PhD, Associate Professor Emeritus of Music
Dahlke, Richard M., PhD, Professor Emeritus of Mathematics and Mathematics Education
DeCamp, Mark, PhD, Associate Professor Emeritus of Chemistry
Emery, Allan, PhD, Professor Emeritus of Chemistry
Fakler, Robert, PhD, Professor Emeritus of Mathematics
Flax, Neil M., PhD, Associate Professor Emeritus of Comparative Literature and German
Gardner, Gerald, PhD, Professor Emeritus of Psychology
Garland, Frank, PhD, Associate Professor Emeritus of Chemistry
Grewe, Eugene, PhD, Professor Emeritus of Rhetoric and English Composition
Gruber, James, PhD, Professor Emeritus of Sociology
Heady, Judith, PhD, Associate Professor Emerita of Biology
Higgs, Elton, PhD, Professor Emeritus of English Language and Literature
House, Gloria, PhD, Professor Emerita of African and African American Studies and Humanities
Höft, Margret, PhD, Professor Emerita of Mathematics
Kamachi, Noriko, PhD, Professor Emerita of History
Klein, Bernard W., PhD, Professor Emeritus of Political Science
Kotre, John, PhD, Professor Emeritus of Psychology
Lee, Dorothy A., PhD, Professor Emeritus of Comparative Literature and English
Lempert, Lora Bex, PhD, Professor Emerita of Sociology
Lyjak, Robert, PhD, Professor Emeritus of Mathematics and Computer Science
Milles, Stephen, PhD, Associate Professor Emeritus of Mathematics and Mathematics Education
Moerman, Daniel, PhD, Professor Emeritus of Anthropology
Morash, Ronald P., PhD, Professor Emeritus of Mathematics
Mostafapour, Kazem, PhD, Associate Professor Emeritus of Biochemistry and Chemistry
Nadasen, Arunajallam, PhD, Professor Emeritus of Physics
Norman, Richard, PhD, Associate Professor Emeritus of Biology
Otto, Charlotte, PhD, Professor Emerita of Chemistry
Papazian, Dennis, PhD, Professor Emeritus of History
Papp, F.-J., PhD, Professor Emeritus of Mathematics
Pearson, Sheryl S., PhD, Professor Emerita of English Literature
Pebworth, Ted-Larry, PhD, Professor Emeritus of English Language and Literature
Perlove, Shelley K., PhD, Professor Emerita of Art History
Peter, Philip H., PhD, Associate Professor Emeritus of Music
Proctor, Donald, PhD, Professor Emeritus of History
Radine, Lawrence, PhD, Professor Emeritus of Sociology
Roehl, Richard, PhD, Professor Emeritus of Economics
Sayles, Edward, PhD, Professor Emeritus of Philosophy
Schaum, Melita, PhD, Professor Emeritus of English Literature
Schneider, Michael J., PhD, Professor Emeritus of Biology
Simpson, Robert, PhD, Professor Emeritus of Biology and Environmental Science
Spinelli, Emily L., PhD, Professor Emerita of Spanish
Stern, Jeffrey, PhD, Professor Emeritus of Psychology
Summers, Claude, PhD, Professor Emeritus of English Language and Literature
Tai, Julia C., PhD, Professor Emerita of Chemistry
Tentler, Leslie W., PhD, Professor Emerita of History
Thomson, William, PhD, Associate Professor Emeritus of Psychology
Twomey, Michael, PhD, Professor Emeritus of Economics
Verhey, Roger, PhD, Professor Emeritus of Mathematics
Woodward, Wayne, PhD, Associate Professor Emeritus of Communication

Faculty
Department of Behavioral Science
Aronson, Pamela, PhD, University of Minnesota, Associate Professor of Sociology
Banner, Francine, JD, PhD

</table>
Declaring a Major
Students are required to declare a major formally and officially by the time they have earned 60 credit hours. A student who does not comply with this policy is placed on registration hold. As a result, the student will not be allowed to register for the next term until a major has been declared.

Senior Degree Audits
A senior audit gives the student a list of requirements remaining to be fulfilled for graduation. During the term in which a student will complete 85 credit hours, an email will be sent from the Office of Advising and Student Records that a senior audit is about to be prepared. The student will be asked to confirm his or her major and respond to the email for the audit to be completed. When it is done, the student will be notified and instructed to schedule an advising appointment, during which the audit will be reviewed. If a student fails to respond to the email, the senior audit may be requested at a later date. A final audit will be conducted automatically for students who have applied for graduation and are on the Degree Candidate List.

Dropping and Adding Courses
Changes in course elections, including dropping or adding a course, and substituting another course for one already elected, may be made during the official “drop/add period.” To make a change in course election, a student may change open courses on line via UM-Dearborn Connect during regular registration periods and during the first two weeks of a full term or the first week of a half-term.

Students also have the option of obtaining an Add/Drop Form from the CASL Office of Advising and Student Records, Room 1039 CB, with faculty signatures, if required, and submit it to the Enrollment Services Counter (1169 UC) by the established Add or Drop deadline. A limited number of classes require faculty permission to add after one week in a full-term and two days in a half-term.

Courses may be selectively (drop one or more course, but stay enrolled in at least one course) dropped through the ninth week of a full term or the fourth week of a half-term, but a W notation will be entered on the transcript. A student may completely withdraw from any semester through the official last day of classes for that particular semester. Consult Enrollment Services (1169 UC; 313-583-6500) for more information about exact dates, signature requirements, and fee assessments.

ELECTING MORE THAN 18 CREDIT HOURS
Students must have written permission from the Office of Advising and Student Records to elect more than 18 credit hours a term. Students whose GPA is below 3.00 are not allowed to elect more than the normal maximum of 18 hours.

Coursework at Other Institutions
Once admitted and registered at UM-Dearborn, a student may apply to be a guest at another institution. The guest application is available at Enrollment Services, 1169 UC, or online. Keep in mind there is a undergraduate residency policy and the maximum transfer credit hours policy applies.

It is recommended that students meet with an academic advisor before registering as a guest. A “C” grade or above and an official transcript is required for credit to be posted to the UM-Dearborn transcript. Courses that are in progress at the time of admission and are so reported in writing to the Office of Admissions and Orientation may be transferred.

CASL students are encouraged to study abroad. In order for the credit earned overseas to be transferred back, the student must 1) receive a pre-approval of coursework from the CASL Office of Advising and Student Records before departing for the program, and 2) bring back an official transcript from an accredited institution for the work completed. In general, the pre-approval of coursework can only grant the transferrable credit be counted as either lower level or upper level elective credit. In order for the credit to be counted toward a major/minor, the student needs to bring back a course syllabus and all graded written work for a full assessment by the corresponding discipline representative.

Credit for CO-OP, Independent Study and Other Experiential Courses
In addition to the Cooperative Education Program with its paid work experience, independent studies, independent research, internships, and field experience courses are offered by various departments.

No more than 18 hours of credit may be counted toward graduation for cooperative education, independent/directed research, independent/ directed studies, internships, and field experiences. There may be more specific limits on the number of independent study, reading, and research courses that may be applied to a major; see the faculty advisor in the major area for more specifics on this matter. Credit for laboratory/off-campus experiences must be arranged prior to the experiences; credits may not be arranged retroactively, after the experiences are completed.

Registering after Withdrawals
A CASL student who first registers and then totally withdraws from two consecutive terms may be placed on academic probation and may not register without the explicit written permission of the Associate Dean or the Associate Dean’s representative.

A student who is required to withdraw from one academic unit may not be admitted to another UM-Dearborn academic unit within the same term that the withdrawal action was taken.

Petitions
A petition is an official written request by the student to review information related to the student’s academic record or to ask for approval of exceptions to policies or procedures. Petition forms are available in the CASL Office of Advising and Student Records, and must be filed in that office.

Grading System

B- 2.70
C+ 2.40
C  2.00
C- 1.70
D+ 1.40
D   1.00
D- 0.07 (Minimum passing grade)
E   0.00

Grade Notations
The following notations may appear on a transcript to describe special situations in regard to a course.

NC No Credit. No honor points. Not computed in the grade point average. Used only in specially approved courses that are graded A, B, C, No Credit.

I Incomplete. No honor points. A student who cannot complete the work of a course before the end of the term must request permission to receive an incomplete grade. A contract form, obtained from the CASL Office of Advising and Student Records, Room 1039 CB, must be discussed with and approved by the instructor before the end of the term. If the work is not completed within either four months, or an earlier deadline specified by the instructor, the grade will be converted to an E. Incompletes may not be completed after graduation. An I notation will remain on the transcript, followed by the letter grade earned. In cases where an I is granted, but no contract is submitted, an IE will appear on the transcript.

X Absent from Final Examination. No honor points. An instructor may assign an X if a student has completed all the coursework except for the final examination. The final exam must be taken within five weeks of the end of the term. If the exam is not completed in the required time frame, an E grade will be recorded. The X notation will remain on the transcript, followed by the letter grade earned. A course with an X mark may not be completed after graduation.

Y Course extended beyond term end. No credit. No honor points. Used only for courses that have been specially designed and approved to extend beyond the end of one term. A course with a Y mark may not be completed after graduation. If such a course is not completed, the Y will be converted to an E upon graduation.

NR Grade Not Reported. No honor points. Student should consult the Registrar immediately.

W Official Withdrawal. No credit. No honor points. Not computed in the grade point average. Students who selectively drop a course or withdraw from all courses for a term prior to the deadline for selective drops and/or withdrawals will receive for these courses the W notation. This notation may not be removed from the transcript.

S/E Used only for specially approved courses. If a student passes, an S (satisfactory) is awarded. It is not computed into the grade point average. If a student does not pass, an E is awarded. If a student stops attending, without officially dropping, a UE is awarded. Both the E and the UE are computed in the GPA as failing grades.

P/F Pass/Fail Option. No honor points. A student must elect to take a course under the Pass/Fail option. The instructor reports a letter grade (A through E), except in courses where the notation No Credit is acceptable. Enrollment Services/Registration & Records converts the student’s letter grade according to the following procedure:

1. Grades A through C are posted on a transcript as P (Pass); counts toward residency requirement and credit hours toward graduation.
2. Grades D through E are posted on a transcript as F (Fail); no degree credit is earned.
3. A grade of UE is not converted to an F and is computed in the GPA the same as an E.

Neither a P nor an F is computed in the grade point average. This grading option applies only to courses offered by CASL. Students enrolled in degree programs in other units should check the pass/fail regulations in those units. The option is subject to the following conditions:

The pass/fail option is open only to students who are not on academic probation.

Courses taken under the pass/fail option may not be used to fulfill requirements for majors, minors, areas of focus, cognates, and/or teacher certification.

Students in the Honors Program must take all Honors Program requirements (including distribution) for a grade.

Courses taken under the pass/fail option must be specified on the registration form or added as such within the usual add period.

Such courses may be dropped within the usual drop period.

1. Changing from the pass/fail option to a letter grade or vice versa is not permitted after the first two weeks of a full term or after the first week of a half term.
2. A student is limited to, at most, four courses taken under the pass/fail option. Courses specifically designated as "S/E only" are not counted in this limitation.

UE Unearned Fail. This grade is assigned to any student who has never attended, or stopped attending class during the semester and did not officially drop. It is computed in the GPA the same as an E.

V Visitor-Official Audit. No credit. No honor points. Not computed into the grade point average. An official audit, or visitor status, allows a student to attend a course but not elect it for credit. The V notation appears on the transcript. Regular tuition fees are assessed.

Changing Grades
The grade that an instructor records on the final grade sheet which appears on the student’s subsequent transcript based on the instructor’s official evaluation of all of a student’s performance and work completed by the end of the term is considered final. Recognizing grading mistakes is permitted. However, an instructor is only allowed to change a grade within five weeks after the end of the term in which the course was taken. CASL instructors must complete a Supplementary Grade Report form and submit it to the CASL Office of Advising and Student Records, Room 1039 CB. A grade change after the five week period following the semester the course was taken is not permitted except for extenuating circumstances which requires an approval from the CASL Dean’s Office.

Term and Cumulative Grade Point Average (GPA)
The cumulative GPA is determined by dividing the total number of credit hours into the total number of quality points earned. The term GPA is determined by dividing the number of credit hours elected during a term into the number of quality points earned during the same term.

The number of credit hours excludes 1) courses in which a student received an NC; 2) courses taken on a pass/fail basis in which a P or an F
is recorded; 3) S/E graded courses in which the student receives an S; 4) additive credit courses.

Grades associated with transferred courses are neither recorded nor used in computing the cumulative GPA. Past grades, however, may be reviewed for admission to specific units within UM-Dearborn.

Effective Fall 2005, for any course repeated in Fall 2005, or thereafter, grades earned in all attempts of a course will appear on the transcript, however, only the most recently earned grade will be reflected in the cumulative GPA. Some restrictions apply. For more details, please see a CASL advisor.

Note: Prior to Fall 2005, grades earned in all attempts of a course appeared on the transcript and were reflected in the cumulative GPA.

Academic Honors

Dean's List
A student is honored by inclusion in the Dean’s List if he or she meets two conditions: (1) has completed during the term at least 12 credit hours of graded coursework toward degree, and (2) has achieved a 3.50 or better term GPA. The Dean’s List is compiled three times a year, after the Fall, Winter, and Summer terms. Students who have I, X, NC, or Y notations are not eligible to be included. Students who receive Academic Sanctions against them lose the opportunity to be on the Dean’s List ever again. Upon completion of all courses for the term, eligible students will be contacted via their UM-D email account with an official Dean’s List letter by the CASL Office of Advising and Student Records.

A second Dean’s List is generated for part-time students who have enrolled and completed 12 or more credit hours of graded (A-E) coursework toward degree in the Fall and Winter semesters (of a given academic year) combined, and earned a minimum 3.50 GPA in each term.

Eligibility is based exclusively upon coursework completed at UM-Dearborn. The list is posted prominently in a display case in the CASL Building.

For information about other institution-wide honors and awards, please consult the General Information section in this Catalog.

Academic Performance
The goal of the College is to assist its students in making satisfactory and expeditious progress toward their degrees. In order to be graduated, the student must achieve not only a cumulative GPA of 2.00 or better, but also a 2.00 or better in his/her major, cognates, minor, or each area of focus. Steady achievement at this level is not always possible. From time to time students might perform at a level below 2.00 and still be permitted to register and thus to continue to make progress toward their degrees. The scholastic records of all students are examined at the end of each term during which they took courses.

Probation
If a student’s cumulative GPA should fall below 2.00 at the end of a term, the student will be placed on "probation. If the student’s cumulative GPA reaches 2.00 or better at the end of this probationary term, the student is removed from probation. On the other hand, if the cumulative GPA is even lower at the end of the probationary term, the student would normally move to “required to withdraw” (RW) status and would not be allowed to reregister for the duration of at least one year. A student with a cumulative GPA substantially below 2.00 may be required to demonstrate his or her potential for readmission. Finally, if the cumulative GPA should show significant improvement but not yet reach 2.00 at the end of the probationary term, the student may be placed in "probation continued" status for one term.

Probation Continued
A student in "probation continued" status has an academic hold placed on registration. This means that the student may not register again until all grades for the probation continued term have been recorded and reviewed favorably. If the student on probation continued achieves a cumulative GPA of 2.00 or better at the end of this term, the student is removed from the academic hold and from probation. If the student should fail to achieve a cumulative GPA of 2.00 or better, the student would normally be required to withdraw (RW) and would not be permitted to register for the duration of at least one year. A student with a cumulative GPA substantially below 2.00 may be required to demonstrate his or her potential for readmission. Normally, a student may be in the probation-continued category for only one regular term.

Further information may be obtained from the CASL Office of Advising and Student Records, Room 1039 CB.

Code of Academic Conduct
In order to maintain the high academic standards subscribed to by UM-Dearborn, the College has adopted a Code of Academic Conduct that defines academic misconduct and outlines report and appeals procedures.

The College, like all communities, functions best when its members treat one another with honesty, fairness, respect, and trust. Therefore, an individual should realize that deception for the purpose of individual gain is an offense against the community. Such dishonesty includes:

Plagiarism
Submitting a piece of work (for example, an essay, research paper, assignment, laboratory report) which in part or in whole is not entirely the student’s own work without attributing those same portions to their correct source(s)

Cheating
Using unauthorized notes, or study aids, or information from another student or student’s paper on an examination; altering graded work after it has been returned, then submitting the work for re-grading; and allowing another person to do one’s work and to submit the work under one’s own name.

Fabrication
Presenting data in a piece of work which were not gathered in accordance with the guidelines defining the appropriate methods for collecting or generating data and failing to include a substantially accurate account of the method by which the data were gathered or collected.

Aiding and Abetting Dishonesty
Altering documents affecting academic records; forging signatures of authorization or falsifying information on an official document, election form, grade report, letter of permission, petition, or any document designed to meet or exempt a student from an established CASL or University academic regulation.

A faculty member has the responsibility to inform the students that academic dishonesty is not acceptable. Students are responsible for discovering the sort of conduct that would be viewed as unacceptable
by reviewing the Code of Academic Conduct and by asking individual instructors for the standards of their respective disciplines.

**Report**

Upon detecting a violation of academic integrity, a CASL faculty member is required to report it under all circumstances. The reports help CASL and the other units on campus to track repeat offenders of academic integrity who should be punished according to guidelines approved in each unit.

To file a report of a violation involving a CASL course, the faculty member needs to fill out a CASL Academic Integrity Violation Report Form (the "Report") and files it with the CASL Associate Dean for Curriculum and Enrollment Management. The faculty member is also required to give a copy of the Report to the involved student.

**Rights of Parties**

A faculty member shall have the right to assign penalties, including lowered grades for coursework or an entire course, for any violation of the CASL Code of Academic Conduct.

Upon receiving a copy of the Report, the student has seven business days to make a decision on whether to appeal it or not. If the student decides to appeal, he or she should notify the CASL Associate Dean for Curriculum and Enrollment Management within seven business days after receiving a copy of the Report.

**Appeal**

After receiving an official notification for an appeal to a Report, the CASL Associate Dean for Curriculum and Enrollment Management works with the student to follow CASL approved and established appeal procedures to conduct the appeal.

**Policy Changes**

All policies, procedures, and requirements are subject to change. These changes do not always coincide with the printing of a new Catalog. The most current information regarding CASL programs may be obtained from the CASL Office of Advising and Student Records, Room 1039 CB.

**Special Programs**

**Honors Program**

The College offers an Honors Program for students from all units of the campus who are highly motivated and qualified academically. The program provides them with an opportunity to broaden and enrich their undergraduate education by offering an alternate route for satisfying the course distribution requirements while retaining the concentration requirements. The program emphasizes general education grounded in the traditional liberal arts. It includes special honors courses, a tutorial and seminar, reduced class size, close student-professor relationships, and interaction with other honors students.

Students in the Honors Program participate in an interdisciplinary curriculum of the most stimulating courses on campus in a relaxed, intimate learning environment geared to heightening their perceptions and deepening their knowledge. The curriculum is organized to produce a cumulative effect: students who reach their junior year in the program share a common core of literature, language, and methodology upon which they can build. By their senior year, honors students have gained the skills needed for rigorous, independent critical thinking.

The Honors Program is a repository of "quality" education. This implies commitment from teachers, advisors, and students, a coherent and unified curriculum that moves toward specific goals, and a carefully monitored series of courses. It is understood that the curriculum is demanding, and that the program makes as few compromises as possible in order to maintain its integrity.

Special features of the Honors Program include:

1. A freshman seminar which focuses on a particular topic but emphasizes examination of method: critical analysis of both primary and secondary texts; historical, interpretive approaches, research techniques and comparison of how different disciplines pose questions of a wide variety of texts.

2. Four lower-division interdisciplinary honors courses, at least one per term during the first two years. Each course deals with the evolution and content of Western culture from the vantage points of several academic disciplines: anthropology, art, economics, history, literature, music, political science, psychology, sociology, and the sciences. The four courses provide honors students with a common body of knowledge, language, and literature. They foster critical thinking, help students gain a perspective on the traditions and problems of Western civilization, and equip them with a well-rounded background so that they may more intelligently construct their lives in the modern world. Honors students are also required to take six hours in non-Western culture chosen from a wide variety of courses.

3. The tutorial, a crucial part of the Honors Program, is one of its main features. Tutorials enroll between five and ten students. They create a sense of collegiality that is frequently lacking on a commuter campus. The tutorials provide an opportunity for intensive concentration, study, and discussion. In most cases a major writing assignment will be required.

Students are automatically qualified to apply to the Honors Program if they have a 3.5 high school GPA, have an ACT composite score of 25 or higher, or have an SAT score of at least 1150. Other incoming freshmen, transfer students, and freshmen or sophomores at UM-Dearborn who are genuinely interested in the Honors Program are encouraged to apply.

For information, contact the Honors Program Office at 313-593-5183.

**Writing Program**

The Writing Program offers introductory and intermediate courses and other academic support to all UM-Dearborn students in CASL, COB, CEHHS and CECs. The Writing Program oversees the UM-Dearborn Writing Center, the campus Writing Awards competition, and the Composition Placement Examination. One important aspect of the Program’s work is supporting innovative teaching approaches across the disciplines for improving students’ abilities with writing and research.

Writing Program courses include the first-year writing sequence, with special sections devoted to multi-media, community-based and cross-cultural writing, and intermediate courses focused on creative and expository writing and writing in professional settings. First-year writing courses at UM-Dearborn provide a basis for both upper-level writing classes including the Upper-Level Writing-Intensive Requirement. Courses support students as they learn to write effectively, think critically, and develop rhetorical awareness about print, visual, and digital texts, and to write for academic, civic and workplace audiences. Writing Program courses stress inquiry-based research, critical reflection, revision, collaboration, and active learning.
Placement Into Introductory Writing Courses
Depending on score on the Placement Exam, most students take COMP 105 and COMP 106 (Writing & Rhetoric I & II). Engineering students substitute COMP 270 (Technical Writing for Engineers) for COMP 106, taking the course during the second semester of their sophomore year. College of Business, Public Health, and Community Health Education students take COMP 280 (Business Writing & Rhetoric) in place of COMP 106.

Each entering student should make every effort to complete the composition sequence during his or her first year on campus, since it is designed to acquaint students with expectations and strategies of university writing. Placement in the appropriate introductory course is determined by the Composition Placement Examination. No student may enroll in an introductory composition course before taking the Composition Placement Examination.

Students who place into COMP 099 must first pass COMP 099, which carries additive degree credit, with a grade of C or better before enrolling in COMP 105. Transfer students who score below the COMP 105 level will be required to take COMP 227 (which carries degree credit) even if their previous writing courses have been accepted for transfer credit. Students who did not take the Placement Examination during the orientation session should contact the Orientation Office or Writing Program Office to schedule an examination. Students may submit a portfolio of written work to appeal a placement decision, but no degree credit is given for courses exempted via portfolio.

Students in the Honors Program fulfill their six-hour composition requirement by taking COMP 110 and COMP 220 (Honors Writing & Rhetoric I & II). Transfer students admitted with credit in composition from other institutions of higher education will be placed in an appropriate composition course based on their transfer credit and performance on the Composition Placement Examination, as determined by the Director of the Writing Program. Only courses judged equivalent to COMP 105 and COMP 106 may be substituted for the required courses. Students are urged to take their composition courses at UM-Dearborn. UM-Dearborn does not accept hours earned in composition through placement examinations at other universities.

For more information, contact the Writing Program office at 313-593-5238.

First Year Seminars
First Year Seminars are special classes designed for entering first-year students to ease the transition from high school to college. These are small, welcoming classes developed by dedicated UM-Dearborn faculty who have made a special commitment to helping students master important college skills. In a First Year Seminar, students find it much easier to get acquainted with college life and explore the university’s academic resources.

Each First Year Seminar benefits new students in the following ways:

• Exposure to exciting ideas on a special topic
• Linkage between the First Year Seminar and a related Composition course
• Special attention to college-level reading, writing, discussion and research skills
• Extra-curricular activities and opportunities, such as field trips, tours and projects

For many students (especially in CASL), the First Year Seminar experience automatically fulfills two requirements: a required Composition course and a general education requirement.

A few of the many seminar topics that have been developed include the following:

• “Car Culture”: the history of the automobile in American life and imagination
• “Fast Food Nation”: a look at the fast food industry through various lenses (economics, anthropology, sociology, environmental studies, politics, history and more)
• “To Infinity and Beyond”: an exploration of the concept of infinity using very creative learning techniques
• “Shakespeare on Stage, Page, & Screen”: this seminar incorporates films, texts and a trip to the Shakespeare Festival in Stratford, Ontario, to explore variations on Shakespeare plays based on different media, cultural contexts, and different artistic and ideological agendas.
• “Bad Decisions and Why We Love Them”: This course is based on a popular book by a Nobel-prize winning psychologist that shows how we can recognize common fallacies, to which we are all susceptible, and so improve our understanding of the way we think.

All First Year Seminars are listed as Liberal Studies (LIBS) courses under “College-Wide Offerings” in the Schedule. For further information, contact the CASL Dean’s Office, 2002 CB, or view the First Year Seminar page on the CASL website: umdearborn.edu/673401.

Cooperative Education Program
Cooperative Education in CASL is an academic program founded on UM-Dearborn’s commitment to “excellence in teaching and learning.” It promotes liberal arts learning and career/personal development through student participation in paid, professional employment. Expected learning outcomes include clarification of values, development of problem-solving and career-related skills, and enhancement of academic knowledge.

Students work one or more terms in part-time or full-time positions paying $8-15.00/hour. They also earn upper-level academic credit for their co-op experiences and attend a co-op seminar. To be eligible for the co-op program, students must be admitted to an undergraduate major in the college and must have completed 30 credit hours with a minimum 2.25 GPA. Transfer students must complete 12 credit hours at UM-Dearborn before they are eligible.

Students compete for open co-op positions offered by area employers. After being hired by a co-op employer, students register for co-op and are required to submit academic learning objectives and a critical evaluation essay for approval by the Faculty Director, who determines the awarding of credit. The Co-op Office reviews requests for student arranged co-ops. Contact the Co-op Office in Room 1038 CB for more information.

CASL Online: Online and Blended Courses
Regular credit-bearing courses are offered via online and blended formats to UM-Dearborn students (and guest students) who can benefit from the flexibility and convenience of online course delivery. Students who want to pursue a university education but have special constraints such as job demands, childcare or eldercare responsibilities, pregnancy or
medical limitations may also find that online learning helps them stay on track. Online learning classes are taught by UM-Dearborn's distinguished faculty and are equivalent in academic depth and rigor to face-to-face versions taught in the traditional classroom. New courses are added to the online repertoire each year. A few courses are in blended format; that is, the classes meet on campus for one or two class periods and online for the remainder.

Regularly enrolled students may elect online learning courses as part of the registration process. Guest students must submit the Michigan Uniform Guest Application, available in our Admissions/Registrar's offices or in the Registrar's office of the student's home institution, and complete the admissions process before registering for classes.

Online Learning courses usually require regular participation in online discussion groups established for the class. Required materials may be made available in various formats, including conventional textbooks and online resources, including video and/or audio recordings. Some online courses may require attendance on campus at an orientation session and/or for exams, though special proctoring arrangements can be made, especially for non-local students.

For further information about the CASL Online program, the Online BGS, and currently offered courses, consult the program website: umdearborn.edu/casl/caslonline or the OL staff. The CASL Online program office is located in 1150 Social Sciences Building, 313-593-1392, email caslonline@umd.umich.edu. The Director and the OL staff are available for program information, and general student support in online education.

Internships and Field Experiences

In addition to the paid work experience offered in the cooperative education program, non-paying off-campus educational opportunities for academic credit are offered by various departments in the College. For specifics, see the course description for each discipline's offering in Programs and Courses beginning on page 90.

Criminal Justice Studies Internship

Criminal justice internships are available through the disciplines of political science, psychology, sociology, and women's and gender studies. Internships provide students with practical experience in law enforcement-related placements at the state, local, and federal levels of government and also in the non-profit sector. Placements are available through the Departments of Social and Behavioral Sciences. Internships vary from three credit hour programs to six credit hours. Students may elect CRJ 478 Social Work/Criminal Justice Internship; CRJ 479 Women's Studies Internship; CRJ 485 Psychology Internship; or CRJ 494-CRJ 495 Political Science Internship. For more information about internships, contact the Director of Criminal Justice Studies in the Department of Behavioral Sciences, 313-593-5520; email: criminal_justice@umd.umich.edu

Economics Internship

The economics internship offers students field experiences with businesses, non-profit organizations and government agencies. The placement allows students to get hands-on experience applying the tools of economic analysis to specific job and project assignments. Student interns spend either eight or 16 hours per week in unpaid work at their placement site, for which they earn either three or six academic credits. Only three credit hours may be used to satisfy the concentration requirements in economics. All interns are assigned to an economics faculty advisor. This program is open to all declared economics majors, who, by the start of the internship, have completed at least two upper-level economics courses in addition to two of the following core courses: ECON 301, ECON 302 and ECON 305. Permission of the Internship Coordinator is required. To inquire, call the Economics Internship Faculty Coordinator in the Department of Social Sciences at 313-593-5096.

Environmental Studies Internship

The environmental studies internship, which is required of all environmental studies concentrations, involves students in a wide variety of positions with government organizations (Department of Environmental Quality, departments of health, city and county agencies), consulting firms, and non-governmental organizations as field assistants and researchers. Students work a prescribed number of hours per week as arranged by the advisor and employer, typically earning three credit hours. Written permission of instructor is required to participate. To inquire, contact the Department of Natural Sciences at 313-593-5277.

Health Policies Studies Internship

In the health policies studies internship, students volunteer eight hours a week for a semester in a health care delivery setting, to develop an understanding of health care system issues and problems. An internship paper describes the setting and discusses the student's project and its relationship to an organizational or health system issue. Students may enroll for one semester or for two consecutive semesters. Permission of program director and senior standing are required to participate. To inquire, contact the Department of Behavioral Sciences, at 313-593-5520.

History and Humanities Internship

The history and humanities internship offers practical experience to students in art history, communication, English, foreign languages, history, humanities, music, and philosophy. Students develop job-entry experiences in humanities and history-related careers. The internship includes a required seminar. Although, in general, the internship is offered for elective credit, it may be used to satisfy the following concentration requirements: Three credit hours may be applied towards a Communication major/minor or toward an Art History/Museum Studies degree and six credit hours may be applied towards a Journalism concentration. For students with a foreign language focus, three credit hours may be used within the International Studies Support Studies component or toward the cognate requirement of the French or Hispanic Studies concentrations. Prerequisites are junior or senior standing. Students earn three to six credit hours per semester. The maximum total credit hours are 12. To inquire, contact the History/Humanities Internship Office, 3028 CB, 313-593-5136.

Psychology Internship

Psychology internship placements offer work experiences in a wide variety of human services organizations. These include programs related to child abuse, criminal rehabilitation, crisis intervention, geriatrics, human resources, mental illness, organizational development, special education, substance abuse, and women's issues. Students spend six or 12 hours per week at their field placement and attend a weekly seminar involving training in listening and helping skills. Students may register for three or six credits. Prerequisites are PSYC 171 and permission of instructor. To inquire, contact the Department of Behavioral Sciences at 313-593-5520.

Public Affairs Internship

The public affairs internship program allows students to participate in the political process through placements in a variety of governmental offices. Students in the local internship program work for state and local elected officials, law firms, and interest groups. Students in the Washington, D.C. program have worked in the White House, the Pentagon, and for Members of Congress. Students in the Ottawa, Canada program work in
For their two electives, students may choose from the wide variety of courses offered by the Women's and Gender Studies program. In addition to fulfilling these curricular requirements, WILL students spend a minimum of 15 hours per semester engaged in co-curricular activities related to gender equity and community building. Among their other activities, the WILL student group engages in volunteer opportunities with social service agencies in metropolitan Detroit. In addition, they have the opportunity to meet with locally and nationally known gender equity leaders for casual “fireside chats” and are offered annual training seminars by local women leaders. They organize speaker and film series on topics such as leadership for global gender justice, eating disorders and body image, and violence awareness on campus. They also run an innovative and successful mentoring program for middle school girls in Southwest Detroit. WILL students’ internship placements have allowed them to work with women in the criminal justice system, in programs for at-risk youth, in an oral history project interviewing Arab-American women, and in a variety of positions in legal, medical, business and education fields with women leaders as mentors.

The program recruits in April every academic year for acceptance into the program the following Fall term. Students accepted into the program have a minimum of a 3.0 grade point average, demonstrated leadership ability, and an interest in fostering gender equity.

For more information, contact the Director of WILL at 313-593-1391 or visit 2040 CB.

Japan Center for Michigan Universities
Since 1989, the fifteen Michigan public universities have operated a unique program in Japanese language and culture in our sister state in Japan, the Shiga prefecture. The Japan Center for Michigan Universities is in Hikone, a beautiful, medium-sized, non-westernized city in central Japan. The $15 million facility, built by the Shiga government, includes classrooms, offices, and apartments with cooking facilities for student occupancy; home stays, of varying duration, may also be arranged. The full academic program runs from September through the end of April; students may also select a one-semester program, or the Summer Intensive Program in the Japanese language. UM-Dearborn students receive 26 hours of credit for UM-Dearborn courses in Japanese language (see course descriptions under Japanese in this Catalog for the following: JPN 128-JPN 129, JPN 178-JPN 225, or JPN 228-JPN 229), Japanese Culture and Society (JPN 395, JPN 396), and two other courses taught by visiting professors. These have included Japanese art and painting, Japanese technology and business, energy and environment in Japan, modern Japanese history, and mass media.

For current information on program fees and housing, visit the Japan Center for Michigan Universities (http://jcmu.isp.msu.edu) website. Applicants need not know Japanese, but they should have studied another foreign language and have had some foreign travel experience. They must have sophomore standing by the end of Winter term and a 2.5 or higher GPA. Students should contact the: International Office, 2136 UC, 313-593-6600, for further information.

Study Abroad
Students interested in other study abroad programs should consult faculty in Modern and Classical Languages, their major advisor, or the Office of International Affairs (Room 108 in The Union at Dearborn) for additional information.
Special Centers, Facilities and Services

Office of Advising and Student Records

The Office of Advising and Student Records helps students make informed decisions about their course of study and the liberal arts. To provide this help, the Office offers students current and accurate information regarding CASL academic policies and procedures, coordinates academic advising between students and faculty advisors, provides necessary College forms and materials, and reviews students’ academic progress and performance at specified intervals.

The Office offers a systematic program of guidance and advising that attempts to support students from registration through graduation. Advising occurs in many forms and at various levels. For new students, an orientation program is available for academic testing and advising. The initial advising is done by professional staff and faculty who work through the Office.

The Office also provides expert academic help of a general nature. Its staff is specifically trained to work with the undecided student. It also oversees the AB and BS degree programs in Liberal Studies and the BGS degree program. Traditional majors also have faculty advisors. A list of these advisors is available in the Office, 1039 CB, 313-593-5293, and online at casl-advising@umd.umich.edu.

University of Michigan-Dearborn Writing Center

The University Writing Center, staffed by experienced student peer consultants under the supervision of full-time faculty in composition, provides support for all UM-Dearborn students wishing to improve their writing. Students needing regular one-on-one help in developing basic writing skills, as well as more advanced students wishing to improve their writing, will find the Writing Center useful.

The Writing Center is open five days a week during Fall and Winter terms and on a more limited basis during the summer term. It is strongly recommended that students make an appointment should they wish to work with a peer consultant. The center is equipped with personal computers and software for student use including word processing software, grammar programs and Internet access and research. For further information, contact the Writing Program Office, 3018 CB, or telephone 313-593-5238.

The center is located in 3035 CB with smaller satellite locations around campus. The center tries to accommodate walk-ins but prefers students make appointments online at umdearborn.edu/casl/writ_center.

Center for Arab American Studies

The Center for Arab American Studies focuses on scholarship, research, and engagement with the Arab-American community in Dearborn and Metropolitan Detroit. Faculty in Arab American Studies are actively engaged in research and scholarship on current issues facing Arab Americans as well as Arab American history and culture. As teachers, they seek to help all students understand the role of Arabs in American society, the role of America in Arab society, and the vibrant interplay between them. For additional information contact the Center in Room 1080 SSB or call 313-593-4925.

Center for Armenian Research

The Armenian Research Center (ARC) was established for the documentation and the publication of materials in the field of Armenian studies and affairs. The ARC accomplishes this work in a variety of ways. It provides access to a computerized database of books, periodical articles, audiovisual material, and other items concerning Armenians. This database is gradually also becoming accessible through the on line catalog of the Mardigian Library. The ARC also regularly publishes scholarly books on Armenian topics. It supports both academic and public outreach by participating in forums, sponsoring conferences, exhibitions, public lectures and answering questions from scholars, students and the public media. Finally, the ARC sponsors and supports the teaching of Armenian language instruction courses on the University of Michigan, Dearborn campus. For additional information call 313-593-5181.

Center for Mathematics Education

The Center for Mathematics Education is dedicated to improving the quality of teacher preparation for prospective teachers and to making continuous professional development available for current teachers. The goal is to strengthen the teaching of mathematics and improve student learning. The professional development programs offered by the Center seek to deepen teachers’ understanding of the mathematics they teach and emphasize best teaching practices through the study and use of current research and standards-based curriculum resources. These professional development activities are offered at school district sites and at regional intermediate school districts, and carry at least 3 SB-CEU credits. It is also possible for classroom teachers to enroll for graduate credit. These credits can be applied towards the degree requirements for the Specialty in Middle Grades Mathematics program that is part of the College of Education, Health, and Human Services’ Master of Arts in Education degree. Additional information can be obtained at umdearborn.edu/673701.

Center for the Study of Religion and Society

Established in 2001, the Center for the Study of Religion and Society (CSRS) provides a focus for interdisciplinary scholarly research and teaching on religion and its relationship to American society. It is home to four interrelated programs: the interdisciplinary minor in Religious Studies; the Worldviews Seminar; the Pluralism Project at UM-Dearborn, and the Metropolitan Detroit Digital Music Archive of religious music, chant, and recitation. The Center sponsors lectures and colloquia on campus and is a link between the university and area religious centers and inter-religious organizations. CSRS is located in Room 2038 CB. Contact the Center staff at 313-583-6329 or csrs_rs@umd.umich.edu.

Mathematics Learning Center (MCL)

The Department of Mathematics and Statistics supports a peer tutoring program for UM-Dearborn students needing assistance with their work in pre-calculus, calculus, differential equations, linear algebra, statistics, and mathematics education courses. Peer tutors, who are carefully vetted, trained, and supervised by the Director of the Center, are available during posted hours throughout the week. Computer tutorials and videos are also available to assist students in their preparation for the Mathematics Placement Exam and in certain mathematics courses. Please call the MLC 313-583-6351 or visit our website at umdearborn.edu/casl/math for a current list of programs available for student support. The MLC is located in Room 2076 CB. The department provides auxiliary tutorial support for developmental algebra courses (MATH 080 and MATH 090). Instructors for these courses will have information for students regarding the tutoring hours and location at the beginning of each semester.

Science Learning Center

The Department of Natural Sciences operates a Science Learning Center (SLC) for students enrolled in a variety of science courses. The SLC program ensures that all science students have adequate preparation
for high achievement in science by providing self-paced, individualized instruction in essential mathematical, conceptual, and laboratory skills. Instructional modules are presented in one of several formats, including printed material and digital or multimedia tutorials that may be accompanied by specific laboratory instruments. All instructional modules are available online at umdearborn.edu/casl/685031. Mastery of the subject matter is assessed by a short post test that is administered in the SLC. Students are encouraged to make advance reservations for post tests for instrument-based modules. Signup sheets are available in the SLC which is located in Room 1126 CW. It is open Monday through Friday during all academic terms. Current hours of operation are listed on the SLC website.

SLC staff also manage a Supplemental Instruction (SI) Program for students in the natural sciences. Supplemental instruction is an academic assistance program that utilizes peer-assisted study sessions. The SI sessions are regularly-scheduled informal review sessions in which students compare their class notes, discuss assigned readings, practice problem solving, develop organizational tools, and predict test items. The participants learn how to integrate course content and study skills while working together. The sessions are facilitated by “SI leaders”, students who have previously taken the courses and done well in them. The SI leaders also attend all the lectures, take notes, and are model students. The main purpose of this program is to improve students’ grades and increase student retention and graduation rates.

African and African American Studies

African and African American Studies (AAAS) is an interdisciplinary program housed in the College of Arts, Sciences, and Letters at the UM-Dearborn. The program offers a flexible, challenging and stimulating course of studies for students who wish to pursue a major that will allow them to:

- Acquire knowledge of the history and cultural legacies of Africans and African Americans throughout the Diaspora.
- Ground themselves in the intellectual contributions of major African and African American scholars, political leaders, and artists.
- Gain informed perspectives on crucial issues confronting African and African American communities throughout the world.
- Refine their skills in analysis, discourse, and writing.
- Apply their university learning as knowledgeable, engaged members of their home communities.

The Bachelor’s Degree in African and African American Studies offers students a working knowledge of the history of African Americans in the United States, the cultural continuities in philosophy, religion and the arts linking African Americans to the African continent, as well as the critical social, political and developmental issues facing African communities on the continent and throughout the diaspora. Students will have a grasp of the critical movements for change in African and African American history, as well as the contributions of outstanding political leaders, intellectuals and artists. Knowledge of the struggles of African and African descendants throughout the diaspora for greater human rights and a higher quality of life is a central feature of the major. These pedagogical objectives are facilitated by a commitment to interdisciplinary scholarship and approaches that emphasize the value of an internationalist perspective. The major will consist of 30 credit hours, 24 of which must be at the upper level. This course of study prepares students to pursue a wide spectrum of professional studies, including law, social work, K-12 education, and civic leadership, public policy, communication, journalism, or to pursue the doctorate degree for a career in college level teaching and research.

Many of the courses offered in the African and African American Studies Program are cross listed with other disciplines, such as Anthropology, Communications, Economics, English, History, Music History, Psychology and Sociology.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement

Complete a two-semester beginning language sequence.

Major Requirements

30 hrs (24 hrs must be upper level):

Introduction to Africana Studies
AAAS 300 Introduction to AAAS 3

Principles of African Worldview
Select 3 hours from the following:
AAAS 345 West Africa Since 1800 3

University of Michigan-Dearborn
AAAS 371 African Exper in the Americas
AAAS 477 African American English
AAAS 491C Topics in AAAS

African American History (17th-19th Centuries)
AAAS 316 African American History
or AAAS 368 Black Exp in U.S.-1865-Present

Contemporary African American History
Select 3 hours from the following:
AAAS 304 Detroit History and Culture
AAAS 322 Psychology of Prejudice
AAAS 369 Civil Rights Movement in Amer
AAAS 403 Minority Groups
AAAS 473 Race, Crime, and Justice

African American Intellectual History
AAAS 340 Race and Evolution

Literature, Visual and Performing Arts
Select 3 hours from the following:
MHIS 120 History of Jazz
AAAS 239 Intro to Lit: African American
AAAS 320 African-American Music History
AAAS 333 Intro to Gospel Music
AAAS 385 Black Cinema
AAAS 388 W. African Music: Trad.&Glob.
AAAS 469 Contemporary African Amer Lit
AAAS 470 Black Women / Lit, Film, Music

African American Institutions
Select 3 hours from the following:
AAAS 304 Detroit History and Culture
AAAS 313 African American Religions
AAAS 3634 History of Islam in the US
AAAS 389 Odyssey of Black Men in Amer
AAAS 393 Black Women, Rel & Spirituality
AAAS 449 Black Family in Contemp Amer

Economics & Politics of the Black Experience
Must Petition – See Program Director

Research, Writing & Discourse in African/African American Studies
Must Petition – See Program Director

Independent Study Project or Thesis in Critical Contemporary Issues
Total Credit Hours 27

Notes: At least 15 of the upper level hours in the AAAS major must be elected at UM-Dearborn

Minor or BGS/LIBS Concentration Requirements
To fulfill a minor or BGS/LIBS concentration in African and African American Studies, a student must complete 15 credit hours of coursework (6 credit hours must be exclusively African/African-American in content – CAGF) in the program as outlined below.

Required courses
AAAS 300 Introduction to AAAS
Select 12 hrs of 300/400; 3000/4000 level courses: 12

AAAS 300 introduces students to important issues and debates within African and African American Studies. The course will always incorporate both African and African-American themes; however, the emphasis may vary to reflect the specialties of the professor(s) at a given time.

Each term, AAAS offers a wide variety of 300/3000 and 400/4000 level courses that are designed to fulfill the core requirements of the AAAS minor or concentration. See the listing of AAAS course offerings below. Successful completion of the program requires that a student complete at least six of the required 15 credit hours in courses that are exclusively African and African-American in content (CAGF), AAAS 313, AAAS 316, AAAS 322, AAAS 325, AAAS 333, AAAS 340, AAAS 345, AAAS 368, AAAS 369 AAAS 371, AAAS 385, AAAS 386, AAAS 388, AAAS 389, AAAS 390, AAAS 393, AAAS 403, AAAS 404, AAAS 449, AAAS 469, AAAS 470, AAAS 473, AAAS 477, AAAS 491, AAAS 498, AAAS 499).

Students pursuing a minor or concentration in AAAS may choose to complete their coursework with a final thesis project (AAAS 498) that reflects particular interests developed during their course of study. The thesis option can be used to fulfill three hours of the required 15 hours of upper-level coursework. The AAAS thesis project will be completed under the direction of a faculty member whose scholarly interests are compatible with the research interests of the student.

For more information about the African and African American Studies program, please contact the CASL College Wide Programs Coordinator in 2036 CB, 313-593-4925.

American Studies
American Studies is a field of study which examines the core values and ideas that define American culture, while at the same time emphasizing the diversity of its expressions in past and contemporary times. This scholarly inquiry draws upon the content of several disciplines and capitalizes also on the interdisciplinary content already common in courses offered on campus under English, History, Political Science, Sociology, Anthropology and other disciplines. Students in American Studies will not only come to a deeper understanding of their own culture, but will gain an appreciation for the challenges involved in the understanding of any culture. This course of study thus provides a thorough training in the liberal arts and is an excellent preparation for the job market or graduate study in a variety of fields, such as: state, local, and federal policy, writing and editing, cultural resource management and historic preservation, curation, library science, banking, insurance, and stock analysis.

Prerequisites to the Major
For the American Studies major, students are required to complete 4 prerequisite courses for a total of 12 credit hours from the following:

Select 12 hrs from the following:

**Dearborn Discovery Core Requirement**
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**
Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

**Intersections (GEIN) – 6 Credits (p. 21)**

**Capstone**
Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**
Complete a two-semester beginning language sequence.

**Language**
- Ancient Greek I and II
- Arabic I and II
- Armenian I and II
- French I and II
- German I and II
- Latin I and II
- Spanish I and II

**Courses**
- MCL 105 and MCL 106
- ARBC 101 and ARBC 102
- MCL 111 and MCL 112
- FREN 101 and FREN 102
- GER 101 and GER 102
- LAT 101 and LAT 102
- SPAN 101 and SPAN 102

**Major Requirements**

**Upper Level**
At the upper level, students must complete 9 courses (a total of 27 credit hours), beginning with AMST 300, the gateway course, which provides an introduction to the subject matter and methods of American Studies.

The remaining 8 courses must be chosen from the tracks listed below. An American Studies advisor will provide guidance to students in their choice of courses, as there are other courses that may be relevant to the American Studies major. Students may be able to count these courses in the major with approval of the faculty advisor by petition. Students are also strongly encouraged to take an internship or independent study course in their senior year.

**Track 1. Comparative American Identities**
One of the distinctive features of American culture is the multiplicity of subcultures it includes. This makes the process of finding a personal and social identity a more complex process than in other more homogeneous societies. A number of courses can give a further understanding of the historical development and intersection of the variety of racial, ethnic, gender, or class identities in American life. Some representative courses for this track are:

**SOC 423** American Social Classes 3
**ENGL 445** 20C/21C Women Authors 3
**ENGL 4705** Black Women / Lit, Film, Music 3
**HIST 368** Black Exp in U.S.:1865-Present 3
**HIST 370** Women in Am-Hist Perspective 3
**HIST 384** Immigration in America 3

**Track 2. Work, Technology and Globalization**
This track encourages an understanding of American Studies through the world of work and technological innovation. Students will study how work and technology define and shape American culture — both in historic and in contemporary contexts. Students will explore how technology in America shapes both work identities and work environments. They will also consider how the American workforce is affected by the globalization of labor and other resources. Some representative courses for this track are:

**STS 300** Intro to Sci & Technol Studies 3
**ECON 321** Labor in the American Economy 3
**WGST 481** Gender and Globalization 3
**SOC 460** America in a Global Society 3

**Track 3. Literature, Arts and Culture**
This track provides an interdisciplinary approach to the study of literature, music, the visual and performing arts, popular culture, architecture and the environment, with the objective of understanding the arts in relation to major issues and themes in American social, political and historical development. In this track, exploration of the arts offers opportunities to further engage questions central to the American Studies field, such as, what is “American” about this novel, this school of painting, this music? What has been the role of the arts in the evolution of an American national identity? How has art inspired or reflected various American identities? The courses offered under this rubric feature a variety of historical periods as well as a diversity of gender, racial and ethnic special interests. Some representative courses for this track are:

**ARTH 361** American Art 3
**ARTH 375** Urban Design Perspectives 3
**ENGL 452** Major 20C/21C American Authors 3
**ENGL 469** Contemporary African Amer Lit 3
**JASS 457** American Cinema 3
**MHIS 331** Music of America 3
**MHIS 120** History of Jazz 3
**SOC 304** Studies in Det.Hist. & Culture 3
Track 4. Society, Religion and Politics
This track examines the ways in which both personal and national identity are shaped through a dynamic process of interaction between American citizens and the broad array of civic, religious, and cultural institutions in American society. Within this framework, students will study competing ideas of citizenship and nationhood as they operate in a variety of historical and contemporary contexts. In addition, this same perspective affords students the opportunity to explore regional topics of interest such as Detroit culture, the history and sociology of the auto industry, and the diversity of religious experience in Southeastern Michigan. Some representative courses for this track are:

SOC 441 Sociology of the Auto Industry 3
HIST 363 Rel in Amer Hist:1607-1865 3
HIST 3695 American City 3
POL 304 American Political Thought 3
POL 360 American Policy Process 3

Notes:
1. At least 15 of the 27 upper level hours in the American Studies major must be elected at UM-Dearborn.
2. Some upper level courses may require additional prerequisites.
3. Other courses may be relevant to the American Studies major. Students may be able to count these courses in the major with approval of the faculty advisor by petition.

Advising
American Studies majors are required to consult with an American Studies advisor. To inquire, contact the CASL College-Wide Programs office, 2036 CB, 313-593-4925.

Anthropology
Anthropology, the comparative study of human culture and biology, seeks to explain both diversity and similarity in human behavior around the world. All aspects of the human experience are considered through anthropology.

The University of Michigan-Dearborn program emphasizes anthropology’s unique concern with the inter-dependence of human biology and culture, but also explores material culture in the past and present (through archeology), the varied experience of religion, race and gender, communication and language (through linguistic anthropology), and the critical evaluation of one’s own culture in the context of a globalized world. Many courses apply anthropological concepts to real-world problems and solutions.

A major or minor in anthropology opens doors in many fields, including law, medicine, public health, education, social work, criminal justice, international development, diplomacy, social justice work, communications, management, and various types of non-profit work. Anthropology prepares students for graduate work in anthropology, museum studies, and other social science fields. Anthropology is both a STEM science, which introduces students to multiple perspectives on the scientific method, improves scientific literacy, and develops critical thinking, as well as an interpretive endeavor in which the human experience is understood through multiple lines of evidence.

Anthropology also prepares students with the skills necessary in the modern workplace, including communication and cultural awareness, teamwork, problem solving, planning and organization, and both qualitative and quantitative analysis. The holistic approach to culture and biology is especially useful for careers in the medical sciences, while the cross-cultural exposure is essential preparation for students going into professions such as education, business, human services, or international development.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Major Requirements

Required Courses
- ANTH 101 Introduction to Anthropology 3
- ANTH 202 World Cultures 3

Additional 24 hrs of anthropology courses numbered 300 or above 1 24

Cognates

1. Refer to the General Education Program for details.
Students will elect six hours in upper-level courses from the following disciplines: geography, psychology, sociology, linguistics, biology, economics, philosophy, history, English, art history, and music history.

Total Credit Hours 36

1. Three courses emphasizing the interaction of culture and biology (CAAN) (ANTH 325, ANTH 331, ANTH 336, ANTH 340, ANTH 341, ANTH 345, ANTH 406, ANTH 409, ANTH 415, ANTH 430, ANTH 435, ANTH 459 and ANTH 482) must be included among these 24 hours. Students are encouraged to take ANTH 331 prior to enrolling in the courses with the strongest biological emphasis (i.e., ANTH 336, ANTH 340, ANTH 341, and ANTH 409).

2. Courses from other disciplines may be considered by petition.

Field School and Field School Scholarship
Field schools teaching anthropological research methods can be life-changing experiences that provide essential training for careers in anthropology as well as practical field research experience applicable to other professions. Field schools take place all over the world and provide students with training in anthropological methods in archeology, human paleontology, bioarcheology, ethnology, linguistics, and primatology. UM-Dearborn students have attended field schools in Australia, Jordan, Kenya, Peru, Guatemala, Costa Rica, Mexico, Spain, France, Ireland, and various sites in the United States.

UM-Dearborn’s anthropology program helps provide these experiences in two ways. We offer a field school scholarship that helps students subsidize the cost of attending a field school in their chosen area. The scholarship program is competitive, and preference is given to students majoring or minoring in anthropology. Anthropology faculty also run their own field schools that can be elected for UM-Dearborn credit.

Notes:
1. At least 15 of the 24 upper level hours in ANTH must be elected at UM-Dearborn.
2. No more than 6 hours of independent study and no more than 6 hours of independent readings within the Behavioral Sciences may be counted in the 120 hours required for graduation.

Minor or BGS/LIBS Concentration
A minor or concentration consists of ANTH 101 and 12 credit hours of upper-level credit in anthropology.

Applied Statistics
Students who desire to specialize in applied statistics may be broadly classified into four groups:

1. Those whose interest lie primarily in the study of mathematical statistics as a science, the purpose of such students being usually to continue their studies at the graduate level in order to become teachers at the college level, or persons otherwise engaged in an occupation in which knowledge of advanced statistics is required;
2. Those whose interests lie in the fields of engineering, biology, chemistry, economics, or physics, with emphasis on applied statistics;
3. Those who wish to integrate their program between statistics and related fields of public health, and the health and social sciences;
4. Those whose interests lie in the field of economics and the actuarial sciences;

There are two points of entry to the program with respect to prerequisite core courses. Each requires Calculus I & II, and linear algebra. Students intending to pursue further study beyond the undergraduate degree are advised to consider the more advanced math sequence.

Prerequisites to the Major
Students majoring in Applied Statistics must take the following prerequisites:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113 or MATH 115</td>
<td>Calc I for Biology &amp; Life Sci</td>

Major Requirements
24 credit hours at the 300+ level is required.

Mathematics Core
MATH 325 Probability 3
MATH 425 Mathematical Statistics 3

Applied Statistics Core
Select 12 hours from the following: 12
STAT 301 Biostatistics I
STAT 325 Applied Statistics I
STAT 326 Applied Statistics II
STAT 430 Applied Regression Analysis
STAT 440 Design and Analysis of Expermt

Electives in Statistics
Select any two 300+ STAT courses: 6

Cognates
Select 6 credit hours from the following: 6
DS 300 Quantitative Model and Anlys I
DS 350 Quantitative Model and Anly II
ECON 335 Experimental Economics
ECON 4015 Introduction to Econometrics
IMSE 4675 Six Sigma & Stat Proc Improv
MATH 413 Linear Algebra
MATH 420 Stochastic Processes
MATH 451 Advanced Calculus I
Other courses by Petition. See the Applied Statistics Program Advisor.

Total Credit Hours 30

Notes:
1. At least 12 of the 24 upper level hours in Statistics must be elected at UM-Dearborn
2. Students cannot receive credit for both STAT 301 and STAT 325.
3. Students wishing to use graduate level courses (STAT 500+) as part of the 24 credit hours required for the major must submit a Petition to obtain the approval of the Statistics Program Advisor.

Arabic Studies

Minor or BGS/LIBS Concentration Only
A minor or concentration consists of 12 hours of upper level coursework including AAST 3150 and 12 additional credits of any 300/400; 3000/4000 level AAST courses. Other disciplines offer courses relevant to the AAST minor. Students will be able to count one such course toward the minor with approval of the AAST faculty advisor by petition.

Prerequisites to the Minor/Concentration
Non-native speakers of Arabic must successfully complete ARBC 202: Intermediate Arabic II (at or outside UM-Dearborn) or demonstrate equivalent Arabic Proficiency Exam offered by LCC Department.

Armenian
(not a field of concentration, see Modern and Classical Languages (http://catalog.umd.umich.edu/undergraduate/college-arts-sciences-letters/modern-classical-languages))

Art Applied

Minor or BGS/LIBS Concentration Only
Prerequisites:

And one class from (CAPD):
ART 201 Beginning Painting
ART 202 Beginning Drawing
ART 204 Beginning Watercolor
ART 210 Beginning Digital Design
ART 220 Intro to Digital Photography

Required Courses:

12 credits in upper-level courses from (CAAA):
ART 306 Intermediate Design-Color
ART 321 Intermediate Painting
ART 322 Intermediate Drawing
ART 323 Figure Drawing
ART 324 Intermediate Watercolor
ART 332 Creating the Graphic Novel
ART 360 Introduction to Printmaking
ART 399 Independent Studies in App Art
Art History

Art History may be elected as a major program within the Department of Literature, Philosophy, and the Arts. The art history program offers the student practical, critical, and historical studies in architecture, sculpture, painting, the decorative arts, printmaking, and photography. Each art is considered a creative process which, like language, has developed as an expression of human ideas, emotions, and life conditions. The history of these arts is presented as a visual record of the evolution of human societies, which can give the student a valuable introduction to the various world civilizations.

Students may elect one of two major tracks in Art History: Track A – Art History, or Track B – Museum Studies. The major programs offer the student a broad humanistic education within the context of an undergraduate degree and prepare the student for graduate work in academic, museum, or commercial fields.

Prerequisites to the Major

Students majoring in Art History (Track A) or Museum Studies (Track B) are required to take the following Prerequisites:

<table>
<thead>
<tr>

Track A: Art History

Required Courses

Select one course from each of the five following areas: 15

- Asian/Non-Western (CAAS):
  - ARTH 311 Art of China
  - ARTH 312 Art of Japan
- Ancient/Classical (CAAC):
  - ARTH 319 Egyptian Art
  - ARTH 321 Greek Art
  - ARTH 322 Roman Art
- Medieval (CAME):
  - ARTH 331 Early Christian Byzant Art
  - ARTH 332 Early Med and Romanesque Art
  - ARTH 333 Gothic Art and Architecture
- Renaissance/Baroque (CARB):
  - ARTH 341 Art & Arch in Early Ren Florence
  - ARTH 342 High Renaissance and Mannerism
  - ARTH 343 Northern Renaissance Art
  - ARTH 344 Italian Renaissance Sculpture
  - ARTH 351 Southern Baroque Art
  - ARTH 352 Northern Baroque Art
  - ARTH 434 Renaissance and Baroque Rome
  - ARTH 454 Rembrandt

Modern (CAMA):

- ARTH 305 The Arts & Culture of Detroit
- ARTH 360 Art of Glass
- ARTH 361 American Art
- ARTH 362 Impressionism and Post-Impress
- ARTH 363 Arts of the Twentieth Century
- ARTH 364 Picasso

**Total Credit Hours** 33

**Track B: Museum Studies**

**Required Courses**
Select one course from each of the following four areas: 12

- Asian/Non-Western (CAAS):
  - ARTH 311 Art of China
  - ARTH 312 Art of Japan
  - ARTH 313 Chinese Painting
  - ARTH 315 Early Chinese Art and Archaeol
  - ARTH 384 Islamic Architecture
  - ARTH 385 Islamic Decorative Arts
  - ARTH 416 Early Mod Jpn Paint&Wood Prnts

- Medieval/Classical (CAMC):
  - ARTH 319 Egyptian Art
  - ARTH 321 Greek Art
  - ARTH 322 Roman Art
  - ARTH 327 Myth & Ritual in Classical Art
  - ARTH 331 Early Christian Byzan Art
  - ARTH 332 Early Med and Romanesque Art
  - ARTH 333 Gothic Art and Architecture
  - ARTH 334 The 14th Century

- Modern (CAMA):
  - ARTH 305 The Arts & Culture of Detroit
  - ARTH 360 Art of Glass
  - ARTH 361 American Art
  - ARTH 362 Impressionism and Post-Impress
  - ARTH 363 Arts of the Twentieth Century
  - ARTH 364 Picasso
  - ARTH 365 Modern Architecture
  - ARTH 366 The Modern Print
  - ARTH 367 Contemporary Art
  - ARTH 368 American Photography
  - ARTH 375 Urban Design Perspectives
  - ARTH 469 Collage, Montage, Assemblage

Select one upper-level course from the following disciplines: ARBC, ART, COMM, ENGL, FREN, GER, GLOC, HIST, HUM, JASS, LING, MCL, MHIS, PHIL, POL, SPAN, SPEE, WGST (excluding POL 494, POL 495, POL 496, POL 497): 3

**Total Credit Hours** 33

**Portfolio Requirement**
A portfolio is required for Art History (Track A) or Museum Studies (Track B). The portfolio must be approved by the faculty advisor and will consist of one paper from ARTH 400, one paper from ARTH 410, and one additional paper from another upper level ARTH course taken at UM-Dearborn. Students must also complete an exit interview questionnaire. See the faculty advisor for more details.
Foreign Languages
Although competency in a foreign language is not required for the major, a reading proficiency in French and/or German is extremely important for anyone planning to pursue the study of Art History. Most graduate programs in Art History require at least two foreign languages.

Notes:
1. At least 15 of the 27 upper level hours in ARTH must be elected at UM-Dearborn.
2. ARTH 399 cannot be used in the major.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours of upper-level credit in art history.

Astronomy
Minor or BGS/LIBS Concentration Only
A minor or concentration consists of 12 hours of upper-level courses from the following:

Gateway courses: Three (3) to six (6) credit hours from 300 level ASTR or PHYS 305.

Advanced courses: Six (6) to nine (9) credit hours from 400 level ASTR including up to 3 credit hours in independent study or directed research, ASTR 495, 498 and/or 499 may be applied to the completion of the minor or concentration.

Behavioral Sciences
The major in Behavioral Sciences is an interdisciplinary program primarily encompassing the disciplines of anthropology, psychology, and sociology, as well as several courses from criminal justice studies, health policy studies and women and gender studies. It is designed as a general preparation for a career in human services such as social work, counseling, criminology, or prevention/treatment programs in mental health. The idea for combining the three primary fields is based on the belief that it is important for an individual who plans to work with people to understand human beings as individuals (psychologically) who function in groups (social psychologically) within a social context (sociologically) which varies across cultures (anthropologically). These disciplinary perspectives offer different but complementary views of people. In order to understand, predict, or influence human behavior, one needs some comprehension of how humans develop, the problems they confront, the organization or structure in which they function, and how and why these go awry. It is also critical to have some exposure to the methods employed by behavioral scientists and some actual experience in the working world of the human services.

To enroll in this program, a student must develop a list of courses which are appropriate for her/his career goals or interests and which satisfy the requirements listed below. This list should be prepared in consultation with, and approved by, the Behavioral Sciences advisor, Roger Loeb. The major encourages specific vocational tracks shaped to the student’s career goals. Specific career and appropriate course selection advice is available as follows: Administrative/Management (McKenna, Waung), Adulthood and Aging (Aronson, Setheraman, Whitehead), Children and Families (Aronson, Forsythe-Brown, Setheram an, Sheldon), Community Organizations (Draus, Hymes, McKenna, Price, Reppond), Clinical/ Counseling (Chatkoff, Leonard, Loeb, Siefert, Wrobel), Health (Chatkoff, Draus, McAuslan, Martin, Straub), Individuals in Society (Brainer, Draus, Forsythe-Brown, Gruber, Hubbard, Price).

Prerequisites to the Major
The major requires the student to take three introductory-courses, one in each of the primary disciplines:

<table>

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
  • Lecture/Lab Science Course
  • Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement
Complete a two-semester beginning language sequence.

## Major Requirements

The major also requires a minimum of 39 upper-level (300/400; 3000/4000 level) credits in the Behavioral Sciences including at least three courses in psychology, three in sociology, and two in anthropology. These courses must include one course from each of the following categories and additional elective courses from this list to complete 39 credits:

### Methods (CABM):
- **ANTH 470**: Doing Anthropology 3
- **PSYC 415**: Lab in Developmental Psych 3
- **PSYC 425**: Lab in Social Psychology 4
- **PSYC 4445**: Personality Assessment Lab 4
- **SOC 410**: Quantitative Research 4
- **SOC 411**: Program Evaluation 3
- **SOC 413**: Qualitative Research 3

### Normal/Abnormal Personality (CANA):
- **ANTH 482**: Psychological Anthropology 3
- **PSYC 440**: Abnormal Psychology 3
- **PSYC 441**: Intro to Clinical Psychology 3
- **PSYC 442**: Child Psychopathology 3
- **PSYC 450**: Personality Theory 3
- **SOC 436**: Personality and Society 3
- **SOC 465**: Deviant Behavior/Soc Disorganz 3

### Human Development (CAHD):
- **ANTH 415**: Nutrition and Health 3
- **PSYC 300**: Life-Span Developmental Psych 3
- **PSYC 301**: Psych of Infant Development 3
- **PSYC 302**: Psych of Child Development 3
- **PSYC 315**: Personality Development 3
- **PSYC 407**: Psychology of Adolescence 3
- **PSYC 412**: Psychology of Aging 3
- **SOC 426**: Society and Aging 3
- **SOC 445**: The Family 3

### Health/Biological (CABH):
- **ANTH 325**: Anth of Health and Environment 3
- **ANTH 409**: Human Body, Growth & Health 3
- **ANTH 430**: Medical Anthropology 3
- **ANTH 435**: Human Genetics 3
- **ANTH 459**: Human Osteology 3
- **HPS 336**: Perspectives in Women’s Health 3
- **HPS 412**: Principles of Epidemiology 3
- **HPS 430**: Health Behavior & Health Educ 3
- **HPS 435**: Obesity and the Lifecourse 3
- **PSYC 446**: Human Sexual Behavior 3
- **PSYC 455**: Health Psychology 3
- **SOC 440**: Medical Sociology 3

### Gender (CAGR):
- **ANTH 303**: Intro To Women’s & Gender Stud 3
- **ANTH 412**: Men and Masculinities 3
- **ANTH 481**: Gender and Globalization 3
- **HPS 336**: Perspectives in Women’s Health 3
- **PSYC 405**: Gender Roles 3

### Social Class/Economics (CACE):
- **ANTH 376**: Power & Privilege in SE Mich 3
- **SOC 350**: Poverty and Inequality 3
- **SOC 423**: American Social Classes 3
- **SOC 435**: Urban Sociology 3
- **SOC 450**: Political Sociology 3
- **SOC 477**: Social Welfare 3

### Race/Ethnicity/Culture (CARE):
- **ANTH 340**: Race and Evolution 3
- **ANTH 370**: Indians of North America 3
- **ANTH 371**: African Exp in the Americas 3
- **ANTH 372**: Anthropology of Latin America 3
- **ANTH 373**: Anth Persp on the Middle East 3
- **ANTH 420**: Kinship and Marriage 3
- **ANTH 421**: Education and Culture 3
- **ANTH 425**: Language and Society 3
- **ANTH 440**: Religion and Culture 3
- **PSYC 322**: Psychology of Prejudice 3
- **PSYC 3955**: Diversity and the Workplace 3
- **SOC 403**: Minority Groups 3
- **SOC 449**: Black Family in Contemp Amer 3
- **SOC 455**: Sociology of Religion 3
- **SOC 4045**: Dissed: Differ, Power, Discrim 3

### Groups and Interpersonal Relationships (CAGT):
- **PSYC 320**: Social Psychology 3
- **PSYC 322**: Psychology of Prejudice 3
- **PSYC 325**: Psyc of Interpersonal Relation 3
- **PSYC 421**: Group Processes 3
- **PSYC 3955**: Diversity and the Workplace 3
- **SOC 446**: Marriage and Family Problems 3
- **SOC 447**: Family Violence 3
- **SOC 451**: Family, Sexuality, Rights 3
- **SOC 4045**: Dissed: Differ, Power, Discrim 3

### Societal Issues (CASI):
- **ANTH 421**: Education and Culture 3
- **PSYC 4305**: Psychology in the Workplace 3
- **SOC 350**: Poverty and Inequality 3
- **SOC 445**: The Family 3
- **SOC 446**: Marriage and Family Problems 3
- **SOC 447**: Family Violence 3
- **SOC 466**: Drugs, Alcohol, and Society 3
- **SOC 469**: Juvenile Delinquency 3

### Social Structure (CASO):
- **ANTH 376**: Power & Privilege in SE Mich 3
- **ANTH 420**: Kinship and Marriage 3
- **CRJ 468**: Criminology 3
- **SOC 423**: American Social Classes 3
- **SOC 426**: Society and Aging 3
- **SOC 457**: Family, Aging and the Law 3
SOC 460  America in a Global Society 3
SOC 467  Drugs, Crime, and Justice 3
SOC 473  Race, Crime and Justice 3
SOC 477  Social Welfare 3
SOC 483  Images of Organizations 3

Internship:
PSYC 485  Psychology Internship 3,6
CRJ 478  Criminal Justice Internship 3-6

Electives
Select 6 credits of additional upper level courses from ANTH, PSYC and SOC: 6

Total Credit Hours 324-330

Notes:
1. PSYC 485 or CRJ 478 must be elected at UM-Dearborn.
2. At least 24 of the 39 upper level hours in ANTH, PSYC, and SOC for the Behavioral Science major must be elected at UM-Dearborn.
3. Many courses are cross listed between the ANTH, PSYC and SOC disciplines. Be sure to consult the Schedule of Classes for cross listed classes.
4. Any one course may be used to satisfy only one requirement within the major.
5. A maximum of 48 credit hours in any one discipline (ANTH, PSYC, SOC) is allowed toward degree.

Honors Program in Behavioral Sciences
Behvioral Science students are eligible for the Honors Program which provides special opportunities for outstanding students, including a research training seminar, followed by independent research conducted in collaboration with faculty members. Students are accepted into the Honors Program early in their junior year. Prospective students should plan on completing the statistics and methods requirements by their junior year. Requirements for entrance are 1) GPA of 3.2 or higher in behavioral science courses and overall UM-Dearborn courses, and 2) informal evidence of being a superior student, such as high motivation and ability to work independently. Requirements for graduation with honors in behavioral science are the successful completion of the following:
- Fulfillment of all requirements for Behavioral Sciences major
- PSYC 381 Principles of Statistics and Experimental Design
- PSYC 481 Computers in Psychology, normally taken Fall term, senior year
- PSYC 498 (Honors Seminars) normally taken Winter Term, junior year
- PSYC 499 (Honors Research) normally completed during senior year
- Research Proposal meeting, normally completed early in senior year
- Final Oral Defense, completed at least one month prior to graduation

Behavioral and Biological Sciences
The study of Behavioral and Biological Sciences investigates the intersections between biochemistry, psychology, genetics, neurobiology, behavior, immunology and anthropology. Students choosing this major will learn the foundations of both biological and psychological sciences as they apply to the study of human and animal behavior, as well as ethical considerations and implications of research. The student experience will include a selection of lectures and laboratory courses to develop foundational understanding, hands-on experimental understanding and critical thinking skills. Students trained in these areas will be prepared for research positions, or for pursuing advanced degrees in medical school, pharmacy or graduate programs.

PRE-MAJOR Requirements-Required courses
Not counted in the minimum 40 hrs. required for the major.
- PSYC 101  Introduction to Psychology 3
- BIOL 130  Intro Org and Environ Biology 0,4
- BIOL 140  Intro Molec & Cellular Biology 4
- CHEM 134  General Chemistry IA 4
- CHEM 136  General Chemistry II 4
- CHEM 225  Organic Chemistry I 3
- CHEM 226  Organic Chemistry II 3

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

Capstone
- Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement
Complete a two-semester beginning language sequence.

BIOL 357 Human Physiology
PSYC 370 Physiological Psychology

SENSATION & PERCEPTION
PSYC 463 Sensation and Perception

COGNITION/LANGUAGE DEVELOPMENT: One class from:
PSYC 363 Cognitive Psychology
PSYC 375 Psychology of Language
PSYC 461 Learning and Memory

EPIDEMIOLOGY/HEALTH PSYCHOLOGY: One class from:
BIOL 380 Epidemiology
HPS 412 Principles of Epidemiology
PSYC 455 Health Psychology

ETHICS IN RESEARCH
BBS 451 Ethics in Research 1

STATISTICS: One class from:
PSYC 381 Prin of Stat and Exper Design
STAT 301 Biostatistics I

EXPERIMENTAL PSYCHOLOGY:
PSYC 465 Experimental Psychology 3

COMPUTER IN PSYCHOLOGY
PSYC 481 Computers in Psychological Res 3

CAPSTONE
BBS 490 Bio and Beh Science Capstone 3

NOTE:
At least 21 of the 40 upper level hrs. must be elected at UM-Dearborn.

Biochemistry
Biochemistry bridges the biological sciences and chemistry. This degree program is thus designed to provide the student with an understanding of the structural and functional relationships between the chemical constituents of cells and their role in life processes. The requirements for the major include courses in biological sciences and chemistry, and appropriate courses in mathematics and physics. The degree in biochemistry prepares a student for careers in teaching, medicine, and research in industry or academia.

Prerequisites to the Major
A solid background in mathematics is essential to success in any of the scientific disciplines. Incoming students who intend to choose a major in Biochemistry should have completed at least three years of high school mathematics. First year students should plan to enroll in MATH 105, MATH 115 or MATH 116 based on the results of their math placement tests. The CHEM 134 and CHEM 136 or CHEM 144 and CHEM 146 sequence is a prerequisite to many other courses in the Natural Sciences Department; students should complete this sequence as early as possible.

Select one of the following: 8
CHEM 134 General Chemistry IA
& CHEM 136 and General Chemistry IIA
CHEM 144 Gen Chemistry IB
& CHEM 146 and General Chemistry IIB
CHEM 225 Organic Chemistry I
& CHEM 226 and Organic Chemistry II
& CHEM 227 and Organic Chemistry Laboratory
MATH 115 Calculus I
& MATH 116 and Calculus II
Select one of the following: 8
PHYS 150 General Physics I
& PHYS 151 and General Physics II
PHYS 125 Introductory Physics I
& PHYS 126 and Introductory Physics II

Total Credit Hours 40

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Related sciences
Select a minimum of 7 credit hours in upper level Biochemistry, Biology or Chemistry.¹
Computational Skills (minimum of 3 credit hours). An upper level course in MATH (excluding MATH 385, MATH 386, MATH 387), STAT or CIS.

Total Credit Hours: 30

¹ At least one credit must be a laboratory (either lecture with lab, or stand-alone lab course, or a maximum of one credit hour of independent research (BCHM 495 or BCHM 499; or BIOL 495 or BIOL 499; or CHEM 495 or CHEM 499)

Notes:
1. A maximum of 65 hrs. in BCHM, BIOL, CHEM may count towards the 120 hours for degree.
2. At least 12 of the 30 upper level hours must be elected at UM-Dearborn.
3. A maximum of 6 hrs. of independent study/research in any Dept. of Natural Sciences discipline may count towards the 120 hours required to graduate.

Honors Degree in Biochemistry
To qualify for this honor, a student must maintain an overall grade point average of 3.5. The honors degree candidate must take six credit hours of independent study under BCHM 495, BCHM 498 or BCHM 499. Such a study will culminate in an oral and/or written presentation of the results. The Biochemistry Program Committee will evaluate the student’s presentation. The intention to pursue an Honors Degree must be declared with the academic advisor no later than two semesters prior to graduation.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours of upper-level credit in biochemistry. A maximum of 3 credit hours of independent study (BCHM 495, 498, or 499) can be applied to meet the requirements of the minor or concentration.

Biological Sciences
Biology is an extensive field that covers biochemistry, molecular biology, cell biology, microbiology, genetics, anatomy, physiology, embryology, ecology, evolution, field biology, and animal behavior. The program is recommended for students who wish to study biology as part of an undergraduate liberal arts degree, to prepare for graduate study in biology or any of the health professions, or to study for a secondary teaching certificate in biology.

BIOL 130 and BIOL 140 are prerequisites for almost all upper-level biology courses and should be completed by students who intend to continue in biology. Other students should consider BIOL 100 or NSCI 120.

Total Credit Hours: 39-40
Mathematics and chemistry are essential to success in biology and should be taken as early as possible. Chemistry and mathematics course serve as prerequisites for many biology courses.

**Dearborn Discovery Core Requirement**
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**
- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**
- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**
- Capstone (GECE) – 3 Credits (p. 22)

**Major Requirements**
At least 30 credit hours of 300/400; 3000/4000 level biological sciences courses.

**Foundation Courses**
- Genetics: BIOL 306 General Genetics 3
- Ecology: BIOL 304 Ecology 4
- Evolution: BIOL 360 Population Genetics & Evolutn 3
- Physiology: Select one of the following: 4
  - BIOL 303 Comparative Animal Physiology
  - BIOL 305 Anatomy and Physiology IIB
  - BIOL 335 Plant Physiology
- Cell & Molecular: Select one of the following: 3-4
  - BIOL 301 Cell Biology
  - BIOL 370 Principles of Biochemistry
  - BIOL 385 Microbiology

**Capstone Experience**
Consisting of one of the following to be completed during the senior year: 3
- BIOL 491 Capstone Course in Biology
- BIOL 492 Capstone Research Experience
- BIOL 493 Capstone Teaching Experience
- One of the following courses by Petition if taken senior year:
  - BIOL 402 Physiology of Excitable Cells
  - BIOL 404 Mech. Chronic Human Disease
  - BIOL 405 Applied & Environ Microbiology
  - BIOL 412 Vertebrates
  - BIOL 419 Behavior and Evolution
  - BIOL 422 Conservation Biology
  - BIOL 452 Med & Env Toxicology
  - BIOL 476 Cancer Cell Biology
  - BIOL 508 Invasive Species Ecology
  - BIOL 514 Applied Ecology

**Additional Upper Level (300+) Biology Courses** 2
Students with interests in specific areas of biology are encouraged to consider the following options as they select the additional upper level (300+) biology courses needed to complete the major:

- Animal Biology and Behavior:
  - BIOL 303 Comparative Animal Physiology
  - BIOL 320 Field Biology
  - BIOL 324 Invertebrate Zoology
  - BIOL 353 Ornithology
  - BIOL 412 Vertebrates
  - BIOL 419 Behavior and Evolution
  - BIOL 424 Biology of Spiders
  - BIOL 456 Behavioral Biology

- Ecology and Evolution:
  - BIOL 315 Aquatic Ecosystems
  - BIOL 320 Field Biology
  - BIOL 361 Population Genetics & Evol Lab
  - BIOL 337 Plant Ecology
  - BIOL 405 Applied & Environ Microbiology
  - BIOL 414 Limnology
  - BIOL 419 Behavior and Evolution

- Microbiology:
  - BIOL 381 Biotechnology & Bioprocessing
  - BIOL 385 Microbiology
  - BIOL 405 Applied & Environ Microbiology
  - BIOL 406 Microbial Genetics
  - BIOL 430 Medical Virology
  - BIOL 440 Micro Genetics & Physi Lab
  - BIOL 450 Virology
  - BIOL 459 Pathogenic Microbiology
  - BIOL 485 Physiology of Micro-organisms

- Molecular Biology:
  - BIOL 301 Cell Biology
  - BIOL 370 Principles of Biochemistry
  - BIOL 381 Biotechnology & Bioprocessing
  - BIOL 470 Biochemistry I
  - BIOL 471 Biochemistry II

**Business Studies as a Secondary Major**

The Business Studies major combines foundational courses in business with the liberal arts. A Business Studies Major will provide CASL students flexibility in the job market by providing them with alternate career paths and widen their employment opportunities after graduation. The Business Studies Major will prepare students for the job market by providing students with foundational knowledge in the basic business disciplines. Students can supplement this knowledge with elective courses from several disciplines or extend and deepen career preparation with more advanced work in a particular area of administration or analysis. By making rational use of general electives and distribution requirements, students may design programs to achieve their career goals. Students cannot pursue this major either on its own or in conjunction with a business major. It must be taken in conjunction with a primary major within CASL.

Total Credit Hours 9

Notes:

1. At least 15 of the 30 credits required in the major must be elected at UM-Dearborn.
2. A maximum of 4 classes may share with the primary CASL major.

Chemistry (ACS Certified)

The major program in chemistry at the UM-Dearborn is approved by the American Chemical Society. This program is designed primarily for students who intend to go into Chemistry as a profession or who plan to continue their studies at the graduate level. A student may earn a BS degree in chemistry by completing the prerequisite, major, and cognate courses listed below and by fulfilling the CASL distribution and graduation requirements.

Prerequisites to the Major

A solid background in mathematics is essential to success in any of the scientific disciplines. Incoming students who intend to major in Chemistry should have completed at least three years of high school mathematics. First year students should plan to enroll in MATH 105, MATH 115, or MATH 116 based on the results of their math placement tests. The CHEM 134 - CHEM 136 or CHEM 144 - CHEM 146 sequence is a prerequisite to many other courses in the Natural Sciences Department; students should complete this sequence as soon as possible.

Chemistry majors must complete the following 39-40 credit hours of prerequisite courses. These courses should be completed early in the student’s four-year curriculum.

Total Credit Hours 9

Notes:

1. At least 15 of the 30 credits required in the major must be elected at UM-Dearborn.
2. A maximum of 4 classes may share with the primary CASL major.
University of Michigan-Dearborn

CHEM 144 & CHEM 146
Gen Chemistry IB and General Chemistry IIB
CHEM 225 & CHEM 226 & CHEM 227
Organic Chemistry I and Organic Chemistry II and Organic Chemistry Laboratory
Biol 140
Intro Molec & Cellular Biology
Phys 150 & Phys 151
General Physics I and General Physics II
Math 115
Calculus I
Math 116
Calculus II
Math 205
Calc III for Engin Students or Math 215

Total Credit Hours 8

1 The physics prerequisite may also be satisfied by completing Phys 125 and Phys 126 and an upper-level physics course, such as Phys 305. The upper level Phys course used in this substitution cannot be used toward the cognate requirement.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement
Complete a two-semester beginning language sequence.

Language Courses
Ancient Greek I and II MCL 105 and MCL 106
Arabic I and II ARBC 101 and ARBC 102
Armenian I and II MCL 111 and MCL 112
French I and II FREN 101 and FREN 102
German I and II GER 101 and GER 102

Major Requirements

Required Courses
CHEM 303 Inorganic Chemistry I 3
CHEM 344 Quantitative Analysis 4
CHEM 368 Physical Chemistry I 3
CHEM 370 Principles of Biochemistry 3
CHEM 403 Inorganic Chemistry II 3
CHEM 447 Instrumental Methods of Analysis 0.4
CHEM 450 Adv Org Syn & Character Lab 1
CHEM 452 Adv Inorg Synth & Char Lab 1
CHEM 469 Physical Chemistry II 3
CHEM 481 Physicochemical Measurements 2
CHEM 493 Presentations in Chemistry 1

Elective Courses
Select Three elective credits from: 1-3
CHEM 348 Environmental Chemistry
CHEM 352 Introduction to Toxicology
CHEM 390 Current Topics in Chemistry
CHEM 426 Advanced Organic Chemistry
CHEM 430 Bioinorganic Chemistry
CHEM 435 Green Chemistry
CHEM 436 Polymer Chemistry
CHEM 437 Nano-Biotechnology
CHEM 472 Biochemistry Laboratory I
CHEM 473 Biochemistry Laboratory II
CHEM 490 Topics in Chemistry

Cognates
Students must complete at least six credit hours from courses numbered 300 and above in Biology, Biochemistry, Environmental Science, Geology, Mathematics, Microbiology, Statistics, or Physics. The six credit hours need not be from a single discipline. 2

Total Credit Hours 31-37

1 Chemistry 493 is a capstone portfolio course that requires data from various courses throughout the CACS curriculum. Students should be aware of the benchmarks of the CHEM 493 course so that requirements will be completed by their final semester when they will register for CHEM 493.
2 Excluding MATH 385, MATH 386, MATH 387, MATH 391, MATH 442, MATH 443, MATH 444, MATH 445, MATH 446, MATH 447, MATH 449, MATH 486.

Notes:
1. A maximum of 44 hrs. in CHEM (excluding CHEM 134, CHEM 136, CHEM 144, CHEM 146) may count in the 120 required for graduation.
2. At least 12 of the 29 upper level hours in CHEM must be elected at UM-Dearborn.
3. CHEM 470 and CHEM 471 can be used in place of CHEM 370, however, CHEM 470 alone cannot be used for this substitution. Students cannot take both CHEM 370 and CHEM 470 or CHEM 471 or any combination to fulfill major, cognate or minor requirements.
4. A maximum of 6 hrs. of independent study/research in any Dept. of Natural Sciences discipline may count towards the 120 hours required to graduate.

**Minor or BGS/LIBS Concentration**
A minor or concentration consists of 12 hours of upper-level credit in chemistry. A maximum of one credit hour of independent research may be used to fulfill the requirement (CHEM 495, CHEM 498, CHEM 499)

**Chemistry (Instructional track)**
The Chemistry/Instructional Track major is an interdisciplinary program for students who wish to teach chemistry and other science courses at the secondary school level. The program meets State of Michigan requirements as well as American Chemical Society recommendations for teaching chemistry in high school. A student may earn a BS degree in Chemistry and qualify for a Michigan Provisional Secondary Teaching Certificate by completing the professional sequence of education courses including one semester of directed teaching; by completing the prerequisite, major, and cognate requirements listed below; and by fulfilling the CASL distribution and graduation requirements. Students must also complete at least 100 credit hours of non-education courses; have a minimum 2.75 overall GPA; have a 2.75 or better GPA in their teaching major and in education courses; and have a 2.75 in their teaching minor. Students must take the Michigan Test for Teacher Certification (MTTC) prior to being recommended for a Michigan teaching certificate.

**Major Prerequisites**
Chemistry/Instructional Track majors must complete 40 credit hours of prerequisite courses. These courses should be completed early in the student's curriculum.

**Major Requirements**
Students must complete 20 credit hours of upper-level chemistry courses as indicated:

**Required Courses**
- CHEM 303 Inorganic Chemistry I 3
- CHEM 344 Quantitative Analysis 4
- CHEM 368 Physical Chemistry I 3
- Select one of the following: 3-4
  - CHEM 403 Inorganic Chemistry II
  - CHEM 447 Instrumental Methods of Analysis
  - CHEM 469 Physical Chemistry II
- Select one laboratory course from the following: 1-2
  - CHEM 450 Adv Org Syn & Character Lab
  - CHEM 452 Adv Inorg Synth & Char Lab
Electives
Select additional courses to bring the upper-level chemistry total to 20 hours, from the following:

Cognates
Chemistry/Instructional Track majors must complete at least six credit hours of courses numbered 300 or above offered in Biochemistry, Biological Sciences, Environmental Science, Geology, Mathematics, Microbiology, Physics, or Statistics. The six credit hours need not be from a single discipline. Courses taken to fulfill the teaching minor requirement usually fulfill the cognate requirement as well.

Total Credit Hours 20-22

Notes:
1. Excluding MATH 385, MATH 386, MATH 387, MATH 442, MATH 443, MATH 444, MATH 447, MATH 448, MATH 486.

Requirements for the Teaching Minor
In order to obtain teaching certification, a student must complete the requirements for a teaching minor. Courses used to satisfy requirements for the minor and prerequisite may not be used to satisfy cognate or major requirements.

Teaching minors are available in mathematics, physical science, physics, and biology. Students should consult the College of Education, Health, and Human Services section of this Catalog for coursework requirements to complete the teaching minor.

Communication
The communication major emphasizes three interrelated areas of public relations and organizational cultures, public advocacy and democratic cultures, and intercultural/international communication and global cultures. Each area has a practical focus in which written and oral communication skills and interpersonal awareness are developed; in addition the communication degree is designed to emphasize the intellectual, historical, and critical perspectives emerging from the intersections between and among these larger areas of communication inquiry. This "triadic" approach presents communication as a challenging, creative skill to be mastered, and, moreover, as an integral process through which democratic and professional possibilities are shaped and social realities constructed.

A prominent emphasis on culture and community connects disciplinary work in communication with the integrative understanding of people’s needs and interests that characterizes the best work in anthropology, sociology, psychology, economics, and political science. The program combines this strong theoretical foundation with the practical skills training to prepare students for any number of opportunities in our globalized multicultural and highly technological environment.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

**Required Core Area II**

Select 2 courses from each of the following focus areas: 18

- **Public Relations and Organizational Culture Focus (CAPR):**
  - COMM 260: Public Relations Principles
  - COMM 300: Communication Research Methods
  - COMM 340: Professional Communication
  - COMM 360: Social Media for PR
  - COMM 365: Health Communication
  - COMM 390: Topics in Communication
  - COMM 450: Principle of Organization Comm
  - COMM 460: Public Relations Campaigns
  - COMM 477: Prof Communication Ethics

- **International/Intercultural Communication and Global Culture Focus (CAIG):**
  - COMM 300: Communication Research Methods
  - COMM 390: Topics in Communication
  - COMM 420: Critical Media Studies
  - COMM 430: International Communications
  - COMM 455: Gender and Media Studies
  - COMM 481: Gender and Globalization
  - SPEE 310: Interpersonal Communication

- **Public Advocacy and Democratic Culture Focus (CAPA):**
  - COMM 306: Comparat. American Identities
  - COMM 365: Health Communication
  - COMM 420: Critical Media Studies
  - COMM 455: Gender and Media Studies
  - JASS 380: History of American Journalism
  - SPEE 320: Public Argument and Advocacy
  - SPEE 330: Argumentation and Debate

**Focus Area Specialization/Production Specialization**

The remaining hours can be taken in either Option A or Option B below:

- **Option A – Focus Area Specialization:**
  - Select two additional courses from any of the focus areas above ¹

- **Option B – Media Tools Specialization (CAMP):**
  - Select two courses in the area of media production:
    - JASS 303: Media Design & Animation
    - JASS 307: Copy Editing
    - JASS 312: Media Performance
    - JASS 315: Media Productn for Metro Comm
    - JASS 330: Feature Writing
    - JASS 331: Online Reptng,Rsrch,Writing
    - JASS 345: Audio Production
    - JASS 350: Digital Film & Television
    - JASS 401: Interpretive Journalism
    - JASS 402: Investigative Reporting
    - JASS 405: New and Emerging Media
    - JASS 406: History&Theory of Documentary
    - JASS 410: Advanced Media Production
    - JASS 423: Comm Design for Web & Mobile
    - JASS 467: Script-Writing Workshop

**Cognate**

Must be an upper level course from any CASL discipline (excluding Communication and Speech, and MATH 385, MATH 386, MATH 387). 3

**Required Experiential Education**

- Humanities Internship, Co-Op, or Senior Thesis ² 3

**Total Credit Hours**

39

¹ (i.e., Public Relations and Organizational Culture CAPR); International/Intercultural Communication and Global Culture (CAIG); Public Advocacy and Democratic Culture (CAPA)). These can be taken in a particular focus area or distributed across focus areas.

² On-the-job experience gained through an internship or co-op is invaluable for students of any major. Because of this, all Communications students are required to participate in an internship, co-op or senior thesis. Many new college graduates lack the "soft skills" that employers seek. Communications graduates at the University of Michigan-Dearborn will have a distinct advantage. There is a seminar component to both the internship and the co-op. The senior thesis is for students who have prior communications industry experience and would like to relate their experience to the theory and practice of communications without having to spend time in the field.

**Notes:**

1. A maximum of 63 hrs of COMM and SPEE may count toward the 120 hrs required for graduation.
2. At least 15 of the 27 upper level hours in the COMM major must be elected at UM-D.
Minor or BGS/LIBS Concentration

A minor or concentration in Communication consists of fifteen hours of approved upper-level courses in COMM/SPEE. Of the fifteen hours, three hours must be in a Speech course. In addition, students must complete the two prerequisites listed below to obtain a minor or area of focus in Communication.

Prerequisites

<table>
<thead>
<tr>
<th>Course</th>

<td>18</td>
</tr>
</tbody>
</table>

Notes Regarding PR Certificate Program:

1. A minimum 2.0 cumulative GPA and a minimum of twelve earned hours completed at UM-Dearborn are required for admission to the program.
2. A maximum of nine credit hours may simultaneously count toward the PR certificate and toward the Communication major.
3. A maximum of two transfer courses (six credit hours) may count toward the PR program.
4. A minimum 2.0 GPA in the courses counting toward the PR certificate and minimum 2.0 cumulative GPA are required at the time of graduation and/or posting of the certificate.

Comparative Literature

Minor or BGS/LIBS Concentration

A minor or concentration consists of 12 hours of upper-level credit in comparative literature (COML).

Computer and Computational Mathematics

See College of Engineering and Computer Science for a major in Computer and Information Science. (p. 253)

Minor or BGS/LIBS Concentration Only

The courses in Computer and Computational Mathematics (CCM) develop skills in applying mathematical algorithms in ways useful in real world situations. A minor or concentration consists of 12 hours of upper-level credit in courses specifically selected as CCM courses.

Cooperative Education Program

(not a field of concentration)

Cooperative Education is a nationally recognized educational plan that integrates academic study with paid, real world work experience. UM-Dearborn cooperates with business, industry, government and other private and public agencies to offer work assignments related to students’ educational programs and career objectives.

Students may earn a maximum of 10 S/E credit hours through co-op work assignments of one to three credit hours each, and a mandatory one credit-hour seminar. Students should be aware that applying for co-op does not guarantee job placement. Liberal arts students are advised to use curriculum electives to acquire the technical skills needed to improve their marketability and to avail themselves of career counseling available through the Career Services Office.

For eligibility information, see Cooperative Education in Special Programs, or contact the Cooperative Education Office, Room 1038 CB, 313-593-5188.
Criminology and Criminal Justice

Criminology and Criminal Justice is a field that focuses on the study of criminal behavior and society’s response to it. The field draws upon the insights of the social and behavioral sciences, the physical sciences, statistics, and the humanities to illuminate the issues of maintaining social order in a constitutional democracy committed to individual freedom, equality, and justice. More specifically, the field focuses on the causes and prevention of criminal behavior. The criminal justice system is composed of the police agencies, prosecutors, the legal profession, the courts, and correctional agencies, among others. The system is part of a larger social system which invariably influences the effectiveness and fairness of our justice system. Criminal justice analyzes system responses to the changes in social values and law enforcement. The program in Criminology and Criminal Justice at UM-Dearborn prepares students for diverse careers in law, justice, public administration, policy analysis, public security, and for graduate work in the social and behavioral sciences.

Prerequisites:

CRJ 200 Intro to Criminal Justice

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Political Analysis
CRJ 410
Quantitative Research
CRJ 425
Lab in Social Psychology

Total Credit Hours 18-19

Internship/Co-op Experience
An internship or co-op experience of 3 credit hours is required. The CRJ internship provides supervised field experience in a variety of occupational agencies focusing on criminal justice and law enforcement. Each intern spends a minimum of 80 hours on site and attends a weekly seminar. Currently employed sworn federal, state, and local officers or agents may waive, through petition, the internship field experience. All students are required to register for and attend the weekly seminar.

Notes:
1. Any one course may be used to satisfy only one requirement within the major.
2. A maximum of 61 hrs. of CRJ can count toward the 120 hrs. required for graduation.
3. A maximum of 6 hrs. of internship (CRJ 478) credit may count in the minimum 33 hours for the major.
4. At least 15 of the upper level hours in CRJ must be elected at UM-D.
5. Some upper level CRJ courses will require SOC 200 or SOC 201, or PSYC.
6. Only 6 hours of academic transfer credit will be accepted for completion of police academy training programs meeting the standards of the Michigan Commission on Law Enforcement.

Minor or BGS/LIBS Concentration
Concentration consists of the following courses:
CRJ 200
Intro to Criminal Justice
CRJ 416
Criminal Law
CRJ 468
Criminology
Select two courses from the following:
CRJ 363
Crim Justice Syst and Policy

CRJ 488
Criminal Procedure
CRJ 489
Law, Crime, and Society

Total Credit Hours 3

Evening and Saturday Offerings
The criminology and criminal justice program is committed to offering both a day and evening/weekend program. Evening/weekend students should watch for infrequently offered courses and take them when available. If a required course is not offered during a reasonable period, a full-time evening student may petition to substitute another course.

Economics
Economics is a social science that studies how a society can best use its resources – how do we get the most from our limited resources? Firms, non-profits, governments, households, and individuals all face this question, so understanding economics is useful in a wide variety of professional and personal situations. Economics helps us think critically about a diverse array of problems ranging from domestic and international public policy issues to personal choices about careers, spending, and investments. Thus, a sound knowledge of economics is vital for understanding the contemporary world and its problems.

The Economics major also offers useful training for those interested in pursuing a business career, and provides excellent preparation for post-graduate work in Economics, Law, Business, Public Policy and other professional fields. For students seeking a comprehensive introduction to economic principles and problems, ECON 201 and ECON 202 are offered each term. For economics majors a well-balanced offering of courses is designed to equip the student with an understanding of basic economic relationships, the essential tools of economic analysis, and a store of factual knowledge.

Economics Honors Designation
To be recognized as graduating with honors in economics, students must (1) complete all the requirements for the economics major at UM-Dearborn; (2) earn a B+ or higher in each of at least two capstone 4000-level economics courses; (3) complete an Honors research paper as part of a 3 credit hour Directed Research (ECON 499); and (4) graduate with an overall 3.25 GPA at UM-Dearborn and a 3.5 GPA in upper level economics courses.

Students are expected to apply for candidate status for the Honors Award during or before the first term of their senior year at UM-Dearborn. Requirements for candidate status include being an Economics major, having a cumulative 3.25 GPA at UM-Dearborn, having successfully completed at least one core theory course (ECON 301/ECON 302/ECON 305), and earning a 3.5 GPA average in upper level Economic classes.

Prerequisites to the Major
ECON 201
Prin: Macroeconomics 3
ECON 202
Prin: Microeconomics 3
MATH 104
College Algebra 1
or
MATH 105
Pre-Calculus 4

Total Credit Hours 10

1 MATH 113 or MATH 115 can be substituted but cannot also be used in the Cognate area.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours
within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Any 300/400 level courses 3000/4000 level courses (excluding internships and independent studies) in anthropology, geography, history, political science, sociology, urban and regional studies.

Total Credit Hours 30

1. MATH 104, MATH 105, MATH 113, MATH 115, or equivalent are prerequisites to these courses.
2. ECON 301 and ECON 302 should be taken no later than the junior year.
3. Only one of the three courses may be transferred to UM-D.
4. Only 3 credits of economics internship, ECON 398, can be applied to the major requirement. At least one of these five additional courses must be a 4000 level capstone course.

**Note:** Students considering graduate study in economics are advised to take one year of calculus (MATH 113 & MATH 114 or MATH 115 & MATH 116), MATH 217 Introduction to Matrix Algebra, ECON 4015 Introduction to Econometrics and ECON 4065 History of Economic Theory.

**Notes:**

1. At least 15 of the 24 upper level hours of Economics must be elected at UM-D.
2. A maximum of 3 hours of internship (ECON 398) may count in the 24 hours of requirements for the major.

**Minor or BGS/LIBS Concentration**

A minor or concentration consists of 12 hours of upper-level (300- and 400/4000-level courses) credit in Economics.

**English**

A major in English at UM-Dearborn focuses on the dynamic intersection of language, literature and society as well as the identities and communities shaped by this intersection. Majors in the English discipline have the opportunity to explore the relationships between reading and writing printed text by becoming familiar with the strategies that writers use to shape conceptions of truth.

The primary goal of the English discipline is to help students develop a sensitivity to the ways spoken and printed language frame how we conceive and discuss our identities throughout history. The UM-Dearborn English Faculty is committed to this goal by offering rigorous, comprehensive courses that contextualize language in terms of the various traditions and genres of English and American literature, the history of the English language and the critical skills necessary to craft effective expository and creative writing.

Acknowledging the unique perspective provided by studying English language and literature in a part of urban America that offers vibrant multi-cultural experiences, the UM-Dearborn English major also exposes students to the future of English language and literature in the context of a global community both in — and beyond — Detroit. Therefore, majors in the English discipline may expect to develop a close relationship to the social ramifications of the written word and its potential for incorporating
both communities and individuals into a larger, more internationally aware reading and listening audience.

**Humanities Internship Program**

The Humanities Internship Program offers practical experience to students concentrating in English and other humanistic fields and those interested in journalism. Students gain and demonstrate skills desired by employers, make important contacts, and explore a field of work before graduation. For more information on the Humanities Internship, see the Internship Coordinator, 3028 CB, 313-593-5136, or inquire at the Literature, Philosophy, and The Arts Department office in 3011 CB, 313-593-5433.

**Independent Study**

Independent Study (ENGL 399) provides an opportunity for students to extend the work of existing courses or to explore areas not included in the current course offerings. Consult the Literature, Philosophy, and the Arts Department Guidelines for Independent Study, available in the Department Office, 3011 CB, 313-593-5433. To enroll in an independent research project, students must have a prior, written contract with their instructor and prior, written permission of the Department Chair. One to three credit hours available.

**Prerequisites to the Major**

Students are required to complete the following as a prerequisite:

ENGL 200 Intro to English Studies 3

This course serves as the “gateway” to the major with enrollment limited to 20 students per section. ENGL 200 exposes students to the terms of English Studies, literary criticism and literary theory, knowledge essential to higher-level English courses.

Virtually all 300/3000 and 400/4000-level English courses require as prerequisites ENGL 200 and COMP 106 or equivalent. In addition, other prerequisites for a specific upper-level English course may be introduced by the instructor in the term in which the course is offered. Students are advised to consult the current Schedule of Classes for prerequisites each term. If a student has not satisfied the prerequisites of a course, the student may be enrolled by permission of the instructor, provided that there are other relevant qualifications.

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GEB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

**Major Requirements**

All students majoring in English must complete 30 hours of course work on the 300/3000- and 400/4000-levels. Four of these courses are required upper-level surveys:

ENGL 311 British Lit: Beowulf to Milton 3

ENGL 312 British Lit: Milton to 1900 3

ENGL 313 American Lit: Colonial to 1900 3

ENGL 314 Brit & Amer Lit: 1900-Present 3

Students are encouraged to take these surveys early in their careers so that they acquire an overview of literary history before taking more specialized upper-level courses. Students are required to take all four, but they can be taken at any time after ENGL 200 and are not prerequisites for other courses.

In addition to taking the four required survey courses listed above, students are required to complete at least six upper-level electives. Students may wish to group some of these electives in the tracks listed below. Please note that students are not required to select a track for these remaining courses. However, if they wish, students may designate a “track” by taking three of their six electives in one of the four following tracks:

- British Literature and Culture
- American Literature and Culture
- Writing
- World English Language and Literature (WELL)

English majors, whether they elect a track or not, must also fulfill the following requirements:
The English Discipline’s “Diversity Requirement (CAED)”**: English majors must elect one course with substantial inclusion of literature in English that expands the traditional Anglo-American literary curriculum. This literature may represent various national groups, ethnic groups, genders, and subcultures. The following courses satisfy the English “Diversity Requirement”:

- ENGL 239 Intro to Lit: African American 3
- ENGL 389 The Odyssey of Blk Men in Amer 3
- ENGL 443 Anglo-Irish Literature 3
- ENGL 445 20C/21C Women Authors 3
- ENGL 471 Sexual Subcultures in Lit 3
- ENGL 4705 Black Women / Lit, Film, Music 3

Or other options that may be available on a semester by semester basis.

Courses that satisfy the English Diversity Requirement will be noted in the Schedule of Classes for any particular semester.

The "Historical Requirement (CAEH)”: English majors must elect one courses which addresses literature prior to 1800. Choose from:

- ENGL 346 Bible and Western Tradition 3
- ENGL 347 Classicl Lit/Engl Translation 3
- ENGL 349 The Bible In/As Literature 2-3
- ENGL 371 Eng Lit from Begin-1500 2-3
- ENGL 372 Eng Lit: 1500 to 1600 2-3
- ENGL 373 English Lit 1600-1660 3
- ENGL 374 Restoration and Early Eighteenth-Century Literature 3
- ENGL 375 The Age of Johnson and Burney 3
- ENGL 400 Maj Engl Auth of the Mid Ages 3
- ENGL 401 Lit of Anglo-Saxon England 2-3
- ENGL 404 Medieval Mystical Writers 3
- ENGL 405 Chaucer 3
- ENGL 406 Studies in Medieval Lit/Cult 3
- ENGL 408 Shakespeare I: Earlier Works 3
- ENGL 409 Shakespeare II: Later Works 3
- ENGL 410 Maj Engl Authors of the Renais 2-3
- ENGL 412 Milton 3
- ENGL 413 Shakespeare’s Contemporaries 2-3
- ENGL 420 Maj Engl 18th-Century Authors 2-3
- ENGL 423 Restoration Drama 3
- ENGL 424 18th-Century English Novel 3
- ENGL 434 The Victorian Novel 3
- ENGL 440 Major 20C/21C Engl/Amer Auths 3
- ENGL 443 Anglo-Irish Literature 3
- ENGL 445 Maj Am Auth to the Civ War 3
- ENGL 453 Contemporary American Novel 3
- ENGL 455 Stud in 19th-Cent Amer Lit 3
- ENGL 456 Teaching Fiction 3

Or an "Independent Studies in English" (ENGL 399) 1-3

Cognates

English majors must also complete at least six hours of cognate courses which are to be selected from upper-level offerings in art history, comparative literature, communication, history, humanities (excluding ENGL 323), journalism and screen studies, linguistics, music history or philosophy. Other courses that can be shown to be specifically complementary to the study of literature are sometimes approved by petition as cognates. Cross listed comparative literature, communication, journalism and screen studies, linguistics, and humanities courses may be elected either for major or for cognate credit, but not for both.

Notes:

1. A maximum of 54 hrs. in ENGL may count in the 120 hrs. required for graduation.
2. At least 15 of the 30 upper level hrs. in English must be elected at UM-D.
3. All English majors must complete an English Diversity requirement course, a English Historical requirement course, and a English Research Intensive/Independent Study course. Upper level courses used to fulfill the above requirements may also be counted in the 18 hrs. required in English Electives for the major.

Elective "Tracks" in the English Curriculum

Students may choose to elect a “track” by taking at least 3 of their upper-level courses from one of the following four areas:

- British Literature and Culture
- American Literature and Culture
- Writing
- World English Language and Literature (WELL)

E lecting a track is optional, but tracks give students the ability to focus their electives if they so desire. The courses for the four tracks are as follows. The following list is subject to change. Consult the current Schedule of Classes or contact the English Discipline representative for future additions to the tracks, including Topics courses offered on a semester basis.

British Literature and Culture Track

- ENGL 346 Bible and Western Tradition 3
- ENGL 356 Reading Urban Monstrosity 3
- ENGL 368 20C/21C British/Amer Poetry 3

**Secondary Certification Supplement**

One of the following supplements is required for students seeking certification for high school teaching in English. A major consists
of 30 hours, including one upper-level writing course (ENGL 323 or
ENGL 327) and two linguistics courses (LING 280 or LING 281 and
ENGL 461/ENGL 461). The balance of the thirty hours for the major
must be selected with the approval of the degree and certification
advisors in accordance with the English major and certification
requirements.

A minor in English for certification consists of 20 hours, including
the same required courses in writing and linguistics, with the balance
to be selected with the approval of degree and certification advisors.

Both the major and the minor have as a supplementary requirement, not
included in the 30 or 20 hours, LIBR 470 Literature for Young People.

**CASL Minor or BGS/LIBS Concentration**

A minor or concentration consists of 12 hours of upper-level credit in
English.

English majors may find a minor in business administration, computer
sciences, foreign languages, women and gender studies, humanities, art
or music history a valuable supplement to the major. Students should
consult with an academic advisor before deciding to pursue a minor.

**Environmental Science**

The environmental science major provides students with a strong
background in areas of science related to environmental concerns and
with an opportunity to study environmental problems from a scientific
point of view that integrates biology, chemistry, earth science, and
physics. The major leads to a BS degree and prepares students for
careers in waste management, environmental consultation, teaching,
environmental health and resource management.

Total Credit Hours: 47

1 Beyond courses applied to other portions of the major requirements
**Specialization (16-24 hrs)**

One of the following tracks:

### Environmental Biology Track

- **BIOL 140** Intro Molec & Cellular Biology
- Select twelve credit hours in upper-level (300+) Biological Sciences courses (other than BIOL 304) including at least seven credit hours selected from:
  - BIOL 360 Population Genetics & Evolution
  - BIOL 361 Population Genetics & Evol Lab
  - BIOL 390 Topics in Biology
  - BIOL 490 Sem in Biology/Microbiology
  - BIOL 497 Seminar in Biology
  - ESCI 315 Aquatic Ecosystems
  - ESCI 320 Field Biology
  - ESCI 337 Plant Ecology
  - ESCI 414 Limnology
  - ESCI 420 Advanced Field Ecology
  - ESCI 497 Seminar in Environmental Sci.

**Total Credit Hours**: 16

1. Acceptable when topic is environmentally oriented.

### Environmental Chemistry Track

Select one of the following:

- **BIOL 140** Intro Molec & Cellular Biology
- **PHYS 126** Introductory Physics II
- **PHYS 151** General Physics II
- **CHEM 225** Organic Chemistry I
- **CHEM 226** Organic Chemistry II
- **CHEM 227** Organic Chemistry Laboratory
- **ESCI 348** Environmental Chemistry
- **ESCI 349** Environmental Chemistry Lab

At least eight additional credit hours selected from:

- **BCHM 370** Principles of Biochemistry
- **BCHM 470** Biochemistry I
- **BCHM 471** Biochemistry II
- **BCHM 472** Biochemistry Laboratory I
- **BCHM 473** Biochemistry Laboratory II
- **CHEM 352** Introduction to Toxicology
- **CHEM 368** Physical Chemistry I
- **CHEM 390** Current Topics in Chemistry
- **CHEM 447** Instrumental Methods of Analysis
- **CHEM 469** Physical Chemistry II
- **CHEM 490** Topics in Chemistry
- **CHEM 497** Seminar in Chemistry
- **CHEM 498** Readings in Chemistry
- **CHEM 499** Laboratory Research in Chem
- **ESCI 352** Introduction to Toxicology

**Total Credit Hours**: 24

1. Acceptable when topic is environmentally oriented.

### Earth Science Track

Select one of the following:

- **BIOL 140** Intro Molec & Cellular Biology
- **PHYS 126** Introductory Physics II
- **PHYS 151** General Physics II
- **GEOL 377** Field Methods

At least eleven additional credit hours in upper-level (300+) Geology (GEOL) and physical geography courses.

**Total Credit Hours**: 16

1. Physical geography offerings include GEOG 310 and ESCI 330.

### Individualized Track

This track is a highly selective program for qualified students with well-conceived academic goals.

Select one of the following:

- **BIOL 140** Intro Molec & Cellular Biology
- **PHYS 126** Introductory Physics II
- **PHYS 151** General Physics II

A minimum of 12 upper-level (300+) credit hours in natural sciences courses that address a common theme.

**Total Credit Hours**: 16

1. Individualized specializations must be developed in consultation with the Environmental Science program advisor, and the proposed coursework must be approved by the Environmental Science Program Committee before the student achieves senior standing.

### Notes:

1. A maximum of 72 hrs. in courses offered by the Department of Natural Sciences (ASTR, BCHM, BIOL, CHEM, ESCI, ENST, GEOL, MICH, NSCI, PHYS) may count in the 120 hrs. required for graduation.
2. At least 12 of the 37 upper level hours in the major must be elected at UM-D.
3. Students cannot take both CHEM 370 and CHEM 470 and/or CHEM 471 for any combination of major or minor requirements.
4. A maximum of 6 hrs. of independent study/research in any Dept. of Natural Sciences discipline may count towards the 120 hours required to graduate.

### Minor or BGS/LIBS Concentration

A minor or concentration consists of 12 hours of upper-level credit in Environmental Science (ESCI) courses.

### Environmental Studies

The solutions to the current environmental problems are complex and require teamwork and understanding between specialists and generalists in many disciplines. The AB in Environmental Studies degree program focuses on the interdisciplinary nature of environmental problem solving at the local, regional and international level. Students can choose from among four (4) focus areas. Throughout their academic studies, students in this program interact with students in the Environmental Science program.
Career Opportunities
Upon completion of this program, the graduates have a great variety of career opportunities available in both the public and private sector. For example, recent graduates hold such positions as teacher, national park naturalist, resource policy planner, Regional Director of International Joint Commission, Director of Environmental Programs for SEMCOG, regional land use planner, public health officer, and director of a public interest group. All students who qualify for graduate school should seriously consider working toward an advanced degree, which is required for most leadership positions.

Internship Program
An important feature of this program is the internship requirement that allows the students to examine possible professional positions in an area of their interest through on-the-job experience. Some of the internships which environmental studies students have had are field analyst for the Michigan Department of Environmental Quality, hazardous waste analyst, marine safety inspector with the U.S. Coast Guard, public health sanitarian, researcher for a public interest group, national park naturalist, assistant to a state legislator, director of a community organic garden, summer camp nature director, and assistant analyst in a remote sensing operation.

1. MATH 104, MATH 105, MATH 113 or MATH 115 is a required prerequisite for CHEM 134.
2. Other computer literacy courses may substitute for CIS 112 by petition.

Other lower-level prerequisite courses vary according to upper-level courses students elect to take. Review the list of courses in the Environmental Core Courses and the Focus Areas to determine the proper prerequisites. Some of the prerequisites may be fulfilled through the CAS&L Distribution Requirements.

Environmental Core Courses (27-29 hrs)
The graduate in Environmental Studies requires a broad background of knowledge in the Natural Sciences, the Humanities, the Social Sciences, and the Behavioral Sciences as well as interdisciplinary courses which provide a synthesis among disciplines. Students in the program will also have an opportunity to interact with a variety of environmental professionals through seminars and an internship.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement
Complete a two-semester beginning language sequence.

Major Requirements

A minimum of 18 hours of courses chosen from one of the following four Focus Areas:

Concentration A: Land Resources

Required Courses
- ENST 330 Land Use Planning and Mgmt 4
- ENST 340 Remote Sensing 3
- ENST 445 Environmental Law 3

Electives (CALR)
Select from the following:
- ANTH 350 Prehistoric Archaeology
- BIOL 304 Ecology
- ENST 203 Weather and Climate
- ENST 204 Landforms
- ENST 310 Economic Geography
- ENST 340 Remote Sensing
- ENST 325 Environmental Politics
- ENST 332 Hazardous Waste Management
- GEOL 305 Intro to GIS
- GEOL 350 Geomorphology
- GEOL 370 Environmental Geology
- GEOL 377 Field Methods

Total Credit Hours 19

1 Can be taken up to three times.

Concentration B: Naturalist

Required Courses
- BIOL 304 Ecology 4
- ENST 474 Environmental Education 2
- ENST 486 Environmental Interpretation 2

Electives (CANT)
Select from the following:
- ANTH 350 Prehistoric Archaeology
- ANTH 370 Indians of North America
- ANTH 430 Medical Anthropology
- BIOL 337 Plant Ecology
- BIOL 353 Ornithology
- BIOL 424 Biology of Spiders
- ENST 326 Anth of Health and Environment
- ENST 340 Remote Sensing
- ENST 488 Env Lit & Reps of Nature
- ESCI 305 Intro to GIS
- ESCI 315 Aquatic Ecosystems
- GEOG 203 Weather and Climate
- GEOG 204 Landforms
- GEOL 350 Geomorphology
- GEOL 377 Field Methods
- OB 354 Behavior in Organization

Total Credit Hours 18

Concentration C: Resources Policy and Management

Prerequisite Courses
- ECON 202 Prin: Microeconomics 3

Required Courses
- ENST 325 Environmental Politics 3
- ENST 445 Environmental Law 3
- ENST 351 Environmental Economics 3
- ENST 456 Ecological Economics 3
- ESCI 304 Ecology 4

Electives (CARP)
Select from the following:
- ECON 372 Economic Demography
- ENST 310 Economic Geography
- ENST 456 Ecological Economics
- ENST 467 Food Politics and Policy
- ENST 483 Justice, Crime and Environment
- ESCI 305 Intro to GIS
- ESCI 332 Hazardous Waste Management
- ESCI 372 Energy Resources
- STAT 301 Biostatistics I
- POL 300 Political Analysis
- POL 312 Legislative Process
- POL 487 Comparative Enviro Policy
- PADM 527 PR for Nonprofit/Public Sector

Total Credit Hours 21

Concentration D: Urban Services

Prerequisite Courses
- ECON 201 Prin: Macroeconomics 3
- ECON 202 Prin: Microeconomics 3
- POL 101 Intro to American Government 3
- SOC 200 Understanding Society 3

Required Courses
- EXPS 410 Multicult in School and Soc 3
- GEOG 300 Urban Geography 3
- POL 323 Urban Politics 3
- SOC 304 Studies in Det.Hist. & Culture 3
- SOC 435 Urban Sociology
- ECON 483 Urban Economics 3

Electives (CAUR)
Select from the following:
- ANTH 340 Race and Evolution
- ANTH 455 Immigrant Cultures and Gender
- ECON 351 Environmental Economics
- or ENST 456 Ecological Economics
- ENST 445 Environmental Law
- ENST 467 Food Politics and Policy
- ENST 483 Justice, Crime and Environment
- ESCI 304 Ecology
ESCI 332 Hazardous Waste Management
GEO 305 Intro to GIS
POL 300 Political Analysis
PADM 527 PR for Nonprofit/Public Sector
SOC 350 Poverty and Inequality
SOC 410 Quantitative Research

Total Credit Hours 30

Notes:
1. Some upper level courses in concentrations A, B, C, and D may require additional prerequisites.
2. Courses used to satisfy ENST core area can also be used to satisfy focus area requirements.
3. A maximum of 6 hrs. of independent study/research in any Dept. of Natural Sciences discipline may count towards the 120 hours required to graduate.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 15 hours of upper-level credit in Environmental Studies (ENST).

Film Studies
Designed as an interdisciplinary program, the minor provides an intellectually challenging and cross-culturally oriented approach to the study of cinema.

Minor or BGS/LIBS Concentration only
In order to minor in Film Studies, a student must fulfill the following requirements:

Prerequisite
JASS 248 Introduction to Screen Studies 3

Total Credit Hours 3

Required Courses
15 credits in upper-level courses from the list below (CAGL).

Select five of the following: 15

JASS 332 Creating the Graphic Novel
JASS 336 Film and Music
JASS 357 National Cinemas
JASS 370 Narratives of Film and Lit
JASS 385 Black Cinema
JASS 387 Gender, Sex, Power Screen Studies
JASS 398 Independent Study in JASS
JASS 403 Issues in Cyberspace
JASS 404 Video Game Studies & Criticism
JASS 406 History & Theory of Documentary
JASS 413 Photojournalism
JASS 436 Memoir and Travel Writing
JASS 457 American Cinema
JASS 467 Script-Writing Workshop

JASS 477 Ethnographic Film
Total Credit Hours 15

French/French Studies
(See also International Studies (p. 144) Major)
UM-Dearborn offers undergraduates two degree programs involving French: International Studies and French Studies. Both are designed to enable majors to take practical advantage of the study of one of the world’s leading languages and cultures. As they complete their degree requirements, International and French Studies majors acquire knowledge and skills that prepare them for careers in numerous fields, both in the United States and abroad.

Students who do not major in International Studies or French Studies may wish to choose French as a minor or an area of focus.

French Studies Major
The major in French Studies offers students a thorough training in the language and culture of the more than 200 million people who live in France and other Francophone areas in the world. In so doing, it familiarizes them with a vital and influential tradition in literature and the arts which spans twelve centuries and a language of importance in the realms of business, politics, science and technology.

French Studies recognizes the need to provide today’s students with a much broader education in French than that afforded by traditional degrees devoted primarily to literature. Consequently, it requires majors to complete coursework in four general areas: language (including the specialized language of business) culture/civilization, film, as well as literature. For the same reason, French Studies takes as its purview the French-speaking world as a whole. Although it places emphasis on France, the concentration also provides an introduction to the other French-speaking countries of Europe, Asia, Africa, and North and South America which are playing roles of increasing prominence in global affairs.

As designed, the French Studies Program offers graduates a wide variety of educational and employment possibilities. It prepares them for careers in government service, in print and electronic journalism, and in language-related professions such as translating and interpreting. It also enables them to enter the teaching profession and to pursue advanced study in French at the master’s and doctoral level. With supplementary training in areas such as political science, law, and management, graduates of the program could embark on careers in international affairs, law, and business.

Prerequisites to the Major
Students majoring in French Studies must successfully complete FREN 202 or demonstrate equivalent French language proficiency.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.
Foundational Studies

</table>

Major Requirements
A minimum of 24 credit hours in upper-level French classes must be completed as outlined below.

Required Courses
- FREN 301 Advanced Conversation and Comp
- FREN 302 Advanced Conversation and Comp

Specialized Language Course (CAFS)
Select one of the following: 3
- FREN 305 Language of Business
- FREN 306 Cult Intro to French Business
- FREN 308 Advanced Writing
- FREN 408 Writing and Translating

Civilization/Culture Course (CAFC)
Select one of the following: 3
- FREN 336 French Civilization of Past
- FREN 337 France in the 20th Century
- FREN 338 France of Today
- FREN 339 Francophone Lit and Civil
- FREN 375 Parisian Itineraries
- FREN 388 Socio-Ctrl Iss Contemp France
- FREN 392 French Cinema

Literature Course (CAFL)
Select one of the following: 3
- FREN 330 Franch Lit: Md Ages-18 Century
- FREN 331 French Lit: 19th-20th Century
- FREN 334 Workshop in French Theater
- FREN 339 Francophone Lit and Civil
- FREN 375 Parisian Itineraries

Select two additional upper-level French courses 6

Cognates
Select upper level courses from the following disciplines: ANTH, ARBC, ARTH, COMM, COML, ECON, ENGL, ENST, GEOG, GER, GLOC, HIST, HUM, JASS, LIBS (excluding LIBS 300, 395, 396), MCL, PHIL, POL, RELS, SOC, SPAN, WGST.

Total Credit Hours 21

Majors are encouraged to strengthen their knowledge of French language and culture by participating in any of the approved study-abroad programs.

Notes:
1. FREN 339 and FREN 375 can be used as a literature or civilization/culture requirement, but not both.
2. A maximum of 54 hours in FREN may count in the 120 hours required for graduation.
3. At least 15 of the 24 upper level hours in French must be elected at UM-D.
4. A maximum of 3 credits of HUM 485 internship can be used in the cognate area.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours of upper-level credit in French.

General Studies
Students must complete:
1. One course in mathematics; one course in the natural sciences; two courses in the behavioral and/or social sciences; two courses in the humanities; courses equivalent to two semesters of English Composition 105 and 106.
2. 12-15 upper division (300 or above) credit hours in each of three areas of focus with a GPA of at least 2.00 (exception: the GPA for the CIS area of focus is based on CIS 150, 200, 275 and all upper-level CIS courses)
3. One approved diversity course
4. A minimum of 48 upper division credit hours
5. A minimum of 120 credit hours with an overall GPA of at least 2.00

Note: No more than 30 credit hours of upper-level coursework in any one discipline or area of focus can count in the 120 hours required for graduation. Students not in the BBA program of the College of Business cannot elect more than 30 credit hours in courses offered by the College of Business.

Only one area of focus may be outside CASL. At least 30 upperlevel credit hours must be in courses taken in CASL. All courses used to satisfy area of focus requirements must be upper-level. No credit hours transferred from a community college or lower-division courses taken in a four-
year institution may be included. Courses used to satisfy distribution requirements (with the exception of the diversity requirement) may not also be used to satisfy area of focus requirements. Courses elected on a Pass/Fail (P/F) basis may not be used to fulfill the 12-15 credit hour requirement in an area of focus. No more than three hours in a 12-hour area of focus, or six hours in a 15-hour area of focus, may be transfer, independent study/research, internship, or S/E graded. Students should be aware that upper-level courses, particularly in the sciences, mathematics, and CCM, may have substantial prerequisite requirements. Minors are not available with the BGS degree. The BGS cannot be a dual degree with a Bachelor of Arts or Bachelor of Science.

Students should consult with a professional staff advisor in the CASL Office of Advising and Student Records, 1039 CB, to discuss areas of focus and to develop a rationale for their individualized BGS curriculum.

Geographic Information Systems

The GIS Certificate provides students with experience and knowledge in the theory and application of GIS. Students learn the basic components of GIS and spatial data, understand problems that arise in data acquisition and analysis, and develop a sound background in cartographic principles.

The courses required for the program are "hands-on", balancing the development of skill and confidence with the knowledge to solve complex spatial and temporal problems. Most of the courses are project-based, where students use GIS, or develop tools, to solve real world problems; thus, when finished, students have a portfolio of deliverables that reflect newly acquired technical and critical thinking skills.

Our Alumni

Students who have participated in this program have received internships/employment at Michigan Department of Transportation (MDOT), Michigan Tech Research Institute, numerous consulting firms (i.e. FTC&H), municipalities (i.e. Livonia, Novi), and private organizations. Additionally, several graduates have continued their GIS education in reputable postgraduate programs throughout the U.S.

Contact us

Please contact the GAM Program Director with any questions:

Dr. Jacob Napiersalski
University of Michigan - Dearborn
Department of Natural Sciences
4901 Evergreen Road
Dearborn, MI 48128

Program requirements

The GIS certificate comprises 16 credit hours, of which 7 are allowed to count towards an undergraduate major/minor. Required courses include Mapping our World (Fall/Winter), Introduction to GIS (Fall/Winter), and Advanced GIS Applications (Fall).

Electives include Remote Sensing, Spatial Analysis and GIS, and research/internship opportunities.

Most courses are offered in the evening, such that non-degree seeking students can attend; several are also hybrid in design with online lecture and laboratory sessions on campus.

Students of any UM-Dearborn major with a GPA of 2.5 or higher can apply for this program (as a minor). Non-degree seeking postgraduates must apply through the CASL Campus Option Program.

Required Coure courses (10 credit hours)

NOTES REGARDING GIS CERTIFICATE PROGRAM:
1. A minimum 2.5 cumulative GPA and sophomore standing are required for admission to the program.
2. A maximum of two courses (totaling up to seven credit hours) used toward a student’s major may count toward the minimum 16 credit hours required for the program.
3. A maximum of seven credit hours of transfer coursework may counted (upon approval of the program director) toward the minimum 16 credit hours required for the program.
4. 498 and 499 credits can be taken in any discipline but must be approved by the GIS program director by petition.
5. A minimum 2.0 GPA in the UM-Dearborn courses counting toward the GIS certificate is required at the time of graduation and/or awarding of the certificate

Geography

Minor or BGS/LIBS Concentration only

In order to minor or complete the concentration in geography, a student must fulfill the following requirements:

Total Credit Hours 6

Required courses

Select 12 credit hours in upper level courses including GEOG 302 12
Select nine credit hours from any of the following (CAGY):

**Physical Geography courses:**
- GEOG 320 Global Climate Change
- GEOL 350 Geomorphology
- GEOL 377 Field Methods
- ESCI 301 Environmental Science
- ESCI 375 Groundwater Hydrology

**Human Geography courses:**
- ECON 483 Urban Economics
- GEOG 300 Urban Geography
- GEOG 310 Economic Geography
- HIST 3695 American City
- POL 323 Urban Politics

**Regional Geography courses:**
- GEOG 307 Geography of Western Europe
- GEOG 327 Michigan Geography

**Geospatial Techniques courses:**
- GEOG 305 Intro to GIS
- GEOL 340 Remote Sensing
- GEOL 440 Advanced GIS Applications

**Other courses:**
- GEOG 390 Topics in Geography
- GEOG 399 Independent Study

**Total Credit Hours** 21

---

**Geological Science**

The Geological Sciences major is designed to provide students with a strong background in the areas of science that seek to understand Earth and its neighbors in space, including geology, GIS, oceanography, meteorology, and astronomy. The major leads to a BS degree that prepares students for graduate study in any of the geological sciences, for students who wish to qualify for a teaching certificate in Earth Science, or for students interested in the study of geology or astronomy as part of an undergraduate liberal arts education.

**Prerequisites to the Major**

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

**Geology**

(see Geological Sciences (p. 135) for major)

**Geographic Information Systems (GIS) Certificate**

The Certificate in GIS provides students with the experience and knowledge in the theory and application of GIS and remote sensing. Students learn the basic components of GIS and spatial data, understand problems that arise in the data acquisition and analysis, and develop a sound background in cartographic principles. Many students could increase their marketability with a certificate in GIS. This includes (but is not limited to) careers in public health, criminal justice, sociology, economics, social and natural science education, computer engineering, Earth and environmental science or studies, urban and regional studies, and anthropology/archeology.

**Required Core**

Courses must be taken in order:

<table>
<thead>
<tr>

</tbody>
</table>

**Total Credit Hours**

16

1 498 (Independent Study) credits can be taken in any discipline but to count toward the certificate, it must be approved by GIS program director by petition.

2 499 (Laboratory and Field Research) credits can be taken in any discipline but to count toward the certificate, it must be approved by GIS program director by petition.

**Notes Regarding the GIS Certificate Program:**

1. A minimum of 2.5 cumulative GPA and sophomore standing are required for admission to the program.
2. A maximum of two courses (totaling up to 7 credit hours) used toward a student’s major may count toward the minimum 16 credits required for the program.
3. A maximum of 7 credit hours of transfer coursework may be counted (upon approval of the program director) toward the minimum 16 credits required for the program.
4. A minimum 2.0 GPA in the UM-Dearborn courses counting toward the GIS certificate is required at the time of graduation and/or posting of the certificate.

**German**

(minor or concentration only, but see International Studies (p. 144) major)

**Minor or BGS/LIBS Concentration only**

A minor or concentration consists of 12 hours of upper-level credit in German.

**Global Cultures**

**Minor or BGS/LIBS Concentration Only**

The minor concentration in Global Cultures helps students understand global systems and processes in different world regions. Deeper understanding of global change and the interdependence of the United States with the rest of the world is important to students who wish to be well informed about the contemporary world and prepared for jobs that are affected by global dynamics.

A minor in Global Cultures provides a useful complement to students majoring in a number of different areas in any of the four colleges on campus. Students wishing to study or work abroad, students working with populations from different parts of the world, and students simply wishing to expand their horizons to a more global scale, will all benefit from combining their area of study with the Global Cultures minor.

A minor or concentration consists of 15 hours of upper-level credits from the following:
Core Area I

GLOC 301 Intro to Global Cultures  3
or COMM 430 International Communications

Core Area II

Choose four courses from at least two groups:  12

Group 1: Global Mediated Cultures (CAGG):
ANTH 320 Culture and Int'l Business
ANTH 372 Anthropology of Latin America
ANTH 373 Anth Persp on the Middle East
ANTH 374 Anthropology of Europe
ANTH 425 Language and Society
ANTH 440 Religion and Culture
COMM 366 Public Comm and Culture Stdies
COMM 430 International Communications
COMM 455 Gender and Media Studies
COMM 481 Gender and Globalization
GEOG 302 Mapping Our World
HIST 321 Late Imperial China
HIST 322 Traditional China
HIST 323 History of Modern China
HIST 326 Modern Japan
HIST 336 The Contmp World, 1945-Present
HIST 3511 Modern Middle East, 1918-1945
JASS 381 Postwar European Cinema
JASS 387 Gender,Sex,Powr Screen Studies
LING 484 World Englishes
MCL 353 Italian Culture Civilization
MCL 401 Images of Women in Germany

Group 2: Gender and Multicultural Issues (CAGD):
ANTH 320 Culture and Int'l Business
ANTH 372 Anthropology of Latin America
ANTH 373 Anth Persp on the Middle East
ANTH 374 Anthropology of Europe
ANTH 425 Language and Society
ANTH 440 Religion and Culture
ANTH 455 Immigrant Cultures and Gender
COML 355 Urban Voices: France and Italy
COMM 366 Public Comm and Culture Stdies
COMM 481 Gender and Globalization
ENGL 445 20C/21C Women Authors
GEOG 302 Mapping Our World
HIST 321 Late Imperial China
HIST 322 Traditional China
HIST 323 History of Modern China
HIST 326 Modern Japan
HIST 336 The Contmp World, 1945-Present
HIST 338 Women&Islam Mid East to 1900
HIST 362 Eur and Intern'l Econ History

Group 3: Migration and Diasporas (CAGN):
AAAS 491C Topics in AAAS
AAST 381 Intro to Postcolonial Studies
ANTH 455 Immigrant Cultures and Gender
COML 355 Urban Voices: France and Italy
ENGL 445 20C/21C Women Authors
GEOG 302 Mapping Our World
HIST 321 Late Imperial China
HIST 322 Traditional China
HIST 323 History of Modern China
HIST 326 Modern Japan
HIST 336 The Contmp World, 1945-Present
HIST 338 Women&Islam Mid East to 1900
HIST 362 Eur and Intern'l Econ History

Group 4: American Studies in the Global Age (CAGO):
BA 400 Corporate Responsibility
COMM 306 Comparat. American Identities
COMM 366 Public Comm and Culture Stdies
COMP 327 Advanced Exposition
COMP 390 Topics in Composition
ECON 351 Environmental Economics
ENST 300 Urban Geography
ENST 320 Global Climate Change
EXPS 410 Multicult in School and Soc
HIST 384 Immigration in America
HIST 3632 The US in the Middle East
IB 486 Seminar: International Bus
LING 383 American English
LING 484 World Englishes
MCL 455 This American Life
MKT 457 Glbl Mrkting&Consumr Cultre
SOC 402 Genocide
SOC 460 America in a Global Society

Total Credit Hours 15

Note:

1. The same course cannot be used in more than one group.
2. Students studying a foreign language can include up to two of the following upper level courses in the four courses required for Core Area II (however, as noted above, courses from at least two different groups 1-4 above must be included as well).

**ARBC (CAAG)**

- ARBC 305 Language of Business 3
- ARBC 331 Survey of Arabic Literature 3
- ARBC 332 Arabic Cinema 3
- ARBC 335 Arabic Civilization 3
- ARBC 350 Arabic Literature and Culture 3
- ARBC 351 Contemporary Arabic Literature 3

**FREN (CAFG)**

- FREN 305 Language of Business 3
- FREN 306 Cult Intro to French Business 3
- FREN 332 French Cinema 3
- FREN 336 French Civilization of Past 3
- FREN 337 France in the 20th Century 3
- FREN 338 France of Today 3
- FREN 339 Francophone Lit and Civil 3
- FREN 375 Parisian Itineraries 3
- FREN 388 Socio-Ctrl Iss Contemp France 3

**GER (CARG)**

- GER 305 German for the Professions 3
- GER 306 Cross-Cult Comptncy & Professns 3
- GER 374 The History of German Cinema 3
- GER 376 Contemporary German Cultures 3
- GER 377 German Culture & Civilization 3
- GER 390 Topics in German 3
- GER 399 Ind Studies in German Lit 1-3
- GER 490 Topics in German Lit and Civ 3-4

**SPAN (CASG)**

- SPAN 305 Language of Business 3
- SPAN 356 Spanish Civilization and Cult 3
- SPAN 357 Latin American Civiliztn Cult 3
- SPAN 358 Spain in the Twentieth Century 3
- SPAN 450 Hispanic Cinema 3
- SPAN 465 Contemporary Spanish Lit 3

---

### Greek

(not a field of concentration, see Modern and Classical Languages (http://catalog.umd.umich.edu/undergraduate/college-arts-sciences-letters/modern-classical-languages))

### Hispanic Studies

Of the thousands of languages in the world today, Spanish ranks among the top five in the number of speakers. Spanish is the native language of some 300,000,000 persons who live in Spain, Mexico, and eighteen other countries of the Caribbean and Central and South America. In addition, there are some 36,000,000 native Spanish-speakers in the United States. The study of the Spanish language and its cultures is quite practical. Given the Hispanic presence in the United States and the proximity of our Spanish-speaking neighbors in Latin America, proficiency in Spanish is increasingly advantageous and even necessary for numerous professions and careers.

Students interested in pursuing the study of Spanish language and culture for professional and career reasons, for teaching, or for graduate studies can enroll in one of two majors: Hispanic Studies or International Studies (see International Studies major). Students may also use Spanish as a minor or area of focus.

### Prerequisites to the Major

Students desiring to major in Hispanic Studies must successfully complete SPAN 202 or exhibit equivalent Spanish language proficiency.

### Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

### Foundational Studies

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

### Areas of Inquiry

- Natural Science (GENS) – 7 Credits (p. 19)
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

### Capstone

- Capstone (GECE) – 3 Credits (p. 22)

### Foreign Language Requirement

Complete a two-semester beginning language sequence.

Cognates

Select upper level courses from the following disciplines: AAAS, ANTH, ARBC, ARTH, COMM, COML, ECON, ENGL, ENST, FREN, GEOG, GER, GLOC, HIST, HUM, JASS, LIBS (excluding LIBS 395, LIBS 396, LIBS 397), MCL, PHIL, POL, RELS, SOC, WGST.

Total Credit Hours

Notes:

Majors must take at least one course that deals specifically with Spanish (peninsular - CAPH) topics such as SPAN 321, SPAN 351, SPAN 356, SPAN 358, or SPAN 465 and at least one course that deals specifically with Latin American topics (CALA) such as SPAN 350, SPAN 353, or SPAN 357.

Majors are encouraged to spend a semester or year in one of the many approved study-abroad programs.

1. A maximum of 54 hours in SPAN may count in the 120 hours required for graduation.
2. At least 18 of the 24 upper level hours in French must be elected at UM-D.
3. A maximum of 3 credits of HUM 485 internship can be used in the cognate area.

Minor or BGS/LIBS Concentration

A minor or concentration consists of 12 hours of upper-level credit in Spanish.

History

History is the art and science of understanding humanity in time; it seeks to recreate the context of changing human activities, be they cultural, economic, political, or social. Because of its special concern for time, history is a valuable field of study for those who want an understanding of where humanity has been and where it is going, and of the world and their own place in it. Furthermore, this field provides a solid background for those who seek a career in teaching, government work, law, or business, honing skills of critical thinking and analysis. In its role bridging disciplines of the social sciences and the humanities, history also enriches an individual's personal life and environment.

Advising

History majors should consult with an adviser before the beginning of each semester.

Prerequisites to the Major

Students desiring to concentrate in history are required to elect three of the following courses as prerequisites. The faculty strongly advises that students take these courses during their freshman or sophomore year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 101</td>
<td>The World to 1500 CE</td>
<td>3</td>
</tr>
<tr>
<td>HIST 102</td>
<td>Medieval and Renaissance World</td>
<td>3</td>
</tr>
<tr>
<td>HIST 103</td>
<td>The World Since 1500 CE</td>
<td>3</td>
</tr>
<tr>
<td>HIST 104</td>
<td>Chinese Civilization</td>
<td>3</td>
</tr>
<tr>
<td>HIST 105</td>
<td>Japanese Society and Culture</td>
<td>3</td>
</tr>
<tr>
<td>HIST 106</td>
<td>An Intro to the African Past</td>
<td>3</td>
</tr>
<tr>
<td>HIST 108</td>
<td>Latin America: The Colonial Era</td>
<td>3</td>
</tr>
<tr>
<td>HIST 109</td>
<td>Latin America: The Modern Era</td>
<td>3</td>
</tr>
<tr>
<td>HIST 111</td>
<td>The American Past I</td>
<td>3</td>
</tr>
<tr>
<td>HIST 112</td>
<td>The American Past II</td>
<td>3</td>
</tr>
</tbody>
</table>

Current or former CASL Honors students may use HIST 261, HIST 262, HIST 263 and/or HIST 264 to fulfill these requirements.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement

Complete a two-semester beginning language sequence.

Major Requirements

For a major in history, students are required to complete 27 hours in history from the following:

Required Courses

HIST 300 The Study of History 3

U.S. History (CAUS)

Select two courses from the following: 6

- HIST 304 Studies in Det. Hist & Culture
- HIST 305 The Arts & Culture of Detroit
- HIST 316 African American History
- HIST 318 Early American Republic
- HIST 319 Civil War & Reconstruction
- HIST 349 Thomas Edison and his Era
- HIST 354 The United States and Vietnam 1
- HIST 355 Eng Colonies in Amer,1607-1763
- HIST 356 American Revolution, 1763-1815
- HIST 358 Emerg of Modern U.S.,1876-1916
- HIST 359 Era of World Wars:1916-1946
- HIST 360 The U.S. Since 1946
- HIST 3601 Michigan History
- HIST 3602 Comparat. American Identities
- HIST 361 United States Economic History
- HIST 363 Rel in Amer Hist:1607-1865
- HIST 3632 The US in the Middle East 1
- HIST 3634 History of Islam in the US
- HIST 3635 The 1960s in America
- HIST 364 Rel in Am Hist II:1865-Present
- HIST 3651 Women Leadership/Social Change
- HIST 3665 Automobile in American Life
- HIST 3666 Henry Ford and His Place
- HIST 3671 Intro to Arab American Studies
- HIST 3676 Arab Americans Since 1890 1
- HIST 368 Black Exp in U.S.:1865-Present
- HIST 369 Civil Rights Movement in Amer
- HIST 3695 American City
- HIST 370 Women in Am-Hist Perspective
- HIST 371 American Ideas, 1607-1865
- HIST 374 History of Industrial Technlg 1
- HIST 3750 Modern Warfare 1
- HIST 383 Labor in America
- HIST 384 Immigration in America
- HIST 386 Compar History of Technology
- HIST 465 The Family in History
- HIST 4600 U.S. Cultural History
- HIST 4650 Sem in US Women's History
- HIST 4677 Arab American Identities
- HIST 4678 Middle Eastern Diasporas 1

Non-U.S. History (CANU)

Select three courses from the following: 9

- HIST 302 Russian Intellectual History
- HIST 303 The Birth of Civilization
- HIST 306 20th-C Russian Intel History
- HIST 307 Early Russian History
- HIST 308 Imperial Russia
- HIST 309 The Russian Revolutions
- HIST 3121 Polish History Since 1800
- HIST 3122 Poland - Study Abroad
- HIST 3125 Modern East-Central Europe
- HIST 3130 Armenia Ancient Medieval World
- HIST 3131 Armenia in the Soviet Period
- HIST 3132 Armenians in the Modern World
- HIST 314 England: Tudors and Stuarts
- HIST 315 Modern Britain
- HIST 321 Late Imperial China
- HIST 322 Traditional China
- HIST 323 History of Modern China
- HIST 325 Traditional Japan
- HIST 326 Modern Japan
- HIST 329 Medieval Society
- HIST 3368 Germany Since 1945
- HIST 3380 The European City, 1750-2000
- HIST 3390 20th c European Women's Hist
- HIST 330 The Renaissance
- HIST 331 The Reformation Era: 1500-1648
- HIST 333 Europe in Age of Rev:1750-1815
- HIST 334 Europe in Age of Imp:1815-1914
- HIST 335 20th-Century Europe, 1890-1945
- HIST 336 The Contmp World, 1945-Present
- HIST 337 Islamic Movemnts Mid East Hist
- HIST 338 Women&Islam Mid East to 1900
- HIST 339 Ottoman Empire in 19th Century
- HIST 340 Freud's Vienna: 1866-1920
- HIST 341 Hist, Lit, & 20th Century Iran
- HIST 343 Germany Before Hitler
- HIST 345 West Africa Since 1800
HIST 3502 The Middle East 570 to 1800 CE
HIST 3511 Modern Middle East, 1918-1945
HIST 3512 Modern Middle East, 1945-1991
HIST 3520 Lebanon in Modern Middle East
HIST 354 The United States and Vietnam
HIST 362 Eur and Intern'l Econ History
HIST 3632 The US in the Middle East
HIST 365 Honors Seminar
HIST 3676 Arab Americans Since 1890
HIST 3730 Bible in History
HIST 374 History of Industrial Technlg
HIST 3750 Modern Warfare
HIST 376 Arab Americans Since 1890
HIST 378 History of Consciousness
HIST 379 Language, Myth & Dreams
HIST 381 Intell Hist of Modern Europe
HIST 382 Modern France
HIST 386 Compar History of Technology
HIST 387 Aspects of the Holocaust
HIST 389 Nazi Germany

Capstone
Select six hours of courses at the 400 or 4000 level.

Upper Level Electives in History
Select 3 hours

Cognates
Six hours upper level courses in anthropology, art history, economics, geography, English, music history, philosophy, political science, psychology, sociology and urban and regional studies.

Total Credit Hours 33

1. May count as U.S. or Non U.S., but not both.
2. May include HIST 4999 (Senior Research Seminar), HIST 498 (Senior Honors Thesis), HIST 499 (Advanced Independent Studies in History), and any of the 400 or 4000 level advanced seminar courses.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours of upper-level credit in history (at least six credit hours of U.S. history (CAUS) and six credit hours of non-U.S. history (CANU))

Humanities
The Humanities major is an interdisciplinary program. Students design an individualized course of study combining several disciplines in the Language, Culture, and Communications Department and in the Literature, Philosophy and the Arts Department, as well as History and other college-wide programs.

The major allows students to explore a variety of fields that cannot be covered within the confines of a single major, as the Humanities major has a strong interdisciplinary focus. Students follow a rigorous course of study while enjoying the stimulus of a program tailored to their special interests and goals.

Prerequisites to the Major

Required Courses
Select 8 hours of the following:

- FREN 201 Intermediate French I
- FREN 202 and Intermediate French II
- GER 201 Intermediate German I
- GER 202 and Intermediate German II
- SPAN 201 Intermediate Spanish I
- SPAN 202 and Intermediate Spanish II
- MCL 201 Intermediate Ancient Greek
- MCL 206 and Intermediate Ancient Greek II

Four courses, from two different disciplines, 100-200 level, from the following areas: Art History, Communication, Comparative Literature, English, Journalism and Screen Studies, History, Linguistics, Music History, Philosophy

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)
Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Notes:
1. At least 15 of the 27 upper level hours in History must be elected at UM-D.
2. A maximum of 3 hours of History Internship (HIST 3085) may count in the major.

Portfolio
In order to graduate with a degree in history, students must compile a portfolio of papers written in history courses. Students beginning a portfolio on or after September 1, 2013 must complete an electronic portfolio. The Portfolio is an archive of at least four significant papers from upper-division history courses taken at UM-Dearborn. It must include the HIST 300 paper and at least one paper from a capstone (400/4000 level) course, along with a capstone reflection essay that highlights those papers that best demonstrate mastery of learning outcomes for history concentrators.
Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

**Major Requirements**

Select 9 hours (upper level) each in any three of the following areas: 27

- African American Studies
- Art History
- Communication
- Comparative Literature
- English
- Journalism
- Screen Studies
- French Studies
- German
- Hispanic Studies (Spanish)
- History
- Linguistics
- Music History
- Philosophy
- Women’s studies

Select 9 additional hours in one of the two following tracks: 9

**Track A:**
- HUM 3975 Humanities Thesis/Project

One Humanities Upper Level Course

**Track B:**
- HUM 399 Independent Studies in Hum

Two Humanities Upper Level Courses

**Total Credit Hours** 36

**Notes:**

1. A maximum of 44 hours in any single discipline may count in the 120 hours required for graduation.
2. At least 15 of the 36 upper level hours in History must be elected at UM-D.
3. HUM 485/HIST 485 Internship cannot be used to fulfill major requirements.

**Minor or BGS/LIBS Concentration**

A minor or concentration consists of 12 hours of upper-level credit in the courses labeled "Humanities" (HUM).

**Individual Program of Study**

The Individual Program of Study (IPS) is an option for first year students at UM-Dearborn under the new Dearborn Discovery Core general education requirements. The Individual Program may not duplicate an already existing major in the College of Arts, Sciences, and Letters and it is recommended that an interdisciplinary curriculum, in the true spirit of a Liberal Arts education, be created.

- **Example 1:** German Studies; language and culture, as well as the history of German speaking countries. An interdisciplinary major could be created including course work in language, philosophy, history, art history, music history, global studies and environmental science at the 300 and above level.

- **Example 2:** Middle Eastern History; Arabic culture and literature as well as early civilization history courses. An interdisciplinary major could be created including course work in Islamic Art History and Philosophy, along with Middle East Economics and Political Science at the 300 and above level.

After completing 30 hours at UM-Dearborn with a 3.25 or higher GPA, a rising sophomore would seek out a Professor on a tenure track faculty appointment to propose their individual major idea. Anyone interested should plan to write up the proposal before meeting with the possible faculty advisor, or if meetings have already occurred, frame the discussions that have occurred in the written proposal with a possible title.

A minimum of 24 hours of 300 level or above course work is required. Keep in mind the title will go on the official transcript at graduation. If the proposed faculty advisor is an Assistant Professor, an Associate or Full Professor must also be brought into the plan before approval will be granted.

**Approval requires:**

- A title
- A formal program of study, unlike any other taught in the College
- The student rationale
- The faculty rationale
- A proposed regular advising schedule so student and faculty member will remain in regular communication

Once written up, the proposal must move to the Department Executive Committees from which curriculum has been pulled for approval. Followed by approval from the IPS Committee and UCDC.

For more information, contact the CASL Office of Advising and Student Records: casl-advising@umd.umich.edu or 313-593-5293.

**Integrated Science**

Integrated Science is a degree designed for students seeking to teach science in high schools. The sixty credit hour degree meets the State of Michigan’s requirements for 12 credit hours each in Biology, Chemistry, Earth Science and Physics. An additional 12 credit hours in any one of these areas provides the required minor in science. Students successful completing this program and passing the Michigan Test for Teacher Certification in Integrated Science (secondary) will meet the standards for the ‘highly qualified’ designation. This degree is only for those students who are also seeking a certificate in secondary education from the College of Education, Health, and Human Services. It is also a degree intended for students who wish to teach in smaller school districts.

Students seeking employment in large districts should consider majoring in Biology, Chemistry, Earth Science or Physics and minoring in another of these 4 areas.

The degree requires that certain courses in each of the four areas be taken. The remaining hours will consist of electives from the list of courses below. Other courses may be possible. Students should consult with their advisor about course selection. In addition to regularly offered courses in Natural Sciences, students must also elect at least one of the
NSCI 331, NSCI 332 or NSCI 333 courses. These latter courses will also count towards the 12 hrs for the minor.

Students will need to consult with advisors in the College of Education, Health, and Human Services in order to meet the certification requirements for teaching in secondary schools.

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

**Minor in One of the Four Areas Above**

Students will select 12 additional upper level credit hours in one of the four areas listed above: 12

**Total Credit Hours**

60-63

**Notes:**
Up to three credit hours of independent study in one of the four areas listed above may be applied towards the minor.

1. At least one course from NSCI 331, NSCI 332, or NSCI 333 must be elected.
2. The credits for NSCI 331 can be attributed to both Chemistry and Physics.
3. Any upper division courses accepted for credit towards a degree in the area will meet this requirement.

**International Studies**

The interdisciplinary major in International Studies combines foreign language and cultural studies with a thorough grounding in a professional area such as business and management, economics, computer programming, communication, or political science. The major is designed to prepare students for careers in international relations and business or other fields with an international dimension.

The major consists of three components at the 300/3000, 400/4000 level:

I. Foreign Language and Cultural Component (18 hours) devoted to foreign language, culture, and civilization (including optional study abroad)
II. Professional Component (generally 15 hours plus lower division prerequisites) devoted to the basic skills of art administration, business and management, communications, computer and information science, economics, engineering environmental studies, natural sciences, or political science (international affairs)
III. Cognates (nine hours) devoted to studies (and optional internship experiences) which will provide the larger international context and additional useful skills to coordinate the subjects of Components I and II.

This program is also eminently suitable as a second major for students who want to add a strong international component to their major field of interest. In this case, courses taken for their first major may also fulfill "Professional Component" requirements in International Studies, e.g., students majoring in art administration, business and management, communications, computer and information science, economics, engineering environmental studies, natural sciences, or political science (international affairs) can add International Studies as a second major by fulfilling requirements of Components I (Foreign Languages and Culture) and III (Cognates) and counting their first major as Component II (Professional).

**Advising**

International Studies majors are urged to consult with faculty in the foreign languages, management, and the other professional areas before the beginning of each semester.

Students with a high school background of three to four years study of Arabic, French, German or Spanish would be able to begin their studies of the same foreign language at UM-Dearborn with the 201, 202, or even 301 foreign language class. The curriculum for such students would be more flexible than that previously described. Students with a high school foreign language background would have an additional 8-11 hours for electives in areas of their special interests.

**Prerequisites to the Major**

For prerequisites check Components I and II under requirements for major.

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESA) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

Twelve credits of additional upper-level courses in the chosen language 12
Total Credit Hours 18

A literature course in the chosen language is highly encouraged.

Notes
Students are encouraged to spend a semester or year in one of the many approved study-abroad programs.

Students who wish to study two foreign languages within the framework of the International Studies Program should see the International Studies Director to design an acceptable balanced curriculum.

Normally students will not be permitted to count the Humanities Internship (HUM 485) as a part of the above concentration requirements. They are encouraged to elect an internship as part of their Cognates.

Component II. Professional Studies
Option A. Business and Management
Prerequisites
ACC 298  Financial Accounting 3
ECON 201  Prin: Macroeconomics 3
ECON 202  Prin: Microeconomics 3
ITM 310  Info Systems in Management 3
MATH 104  College Algebra 4
or MATH 105  Pre-Calculus 4

Required Courses
BE 401  Managerial Economics 3
MKT 352  Mkgt Principles and Policies 3
OB 354  Behavior in Organization 3
Select two courses from (CAIB): 6
BA 330  Managerial Communication 3
BA 400  Corporate Responsibility 3
COMM 340  Professional Communication 3
COMM 430  International Communications 3
IB 486  Seminar: International Bus 3
MKT 457  Glbl Mrkting&Consumr Cultre 3

Total Credit Hours 31

Option B. Computer and Information Science
Prerequisites
MATH 115  Calculus I 4
CIS 150  Computer Science I 4
or CCM 150  Computer Science I 4
CIS 275  Discrete Structures I 4
CIS 200  Computer Science II 4

Required Courses
CIS 350  Data Struc and Algorithm Anlys 4
Select three additional CIS upper-level courses (300-level or above excluding CIS 399 and CIS 499) 9

Total Credit Hours 29

Option C. Economics
Prerequisites
ACC 298  Financial Accounting 3
ECON 201  Prin: Macroeconomics 3

ECON 202  Prin: Microeconomics 3
MATH 104  College Algebra 4
or MATH 105  Pre-Calculus 4

Required Courses
ECON 447  International Finance 3
ECON 448  International Trade 3
Select one additional course from the following: 3
ECON 442  Economic Development 3
ECON 444  Economics of the Middle East 3
ECON 362  Eur and Intl Economic Hist 3
Select two additional courses from the following (CAIE): 6
ECON 301  Intermediate Macroeconomics 3
ECON 302  Intermediate Microeconomics 3
ECON 305  Economic Statistics 3
ECON 442  Economic Development 3
ECON 362  Eur and Intl Economic Hist 3
ECON 4015  Introduction to Econometrics 3

Total Credit Hours 28

1 MATH 113 or MATH 115 can be substituted.

Option D. Museum Studies
Prerequisites
ARTH 101  Western Art to 1400 3
ARTH 102  Western Art from 1400 3
ARTH 103  Arts of Asia 3
or ARTH 106  History of Western Architect 3

Required Courses
Select four courses from four different areas: 12
Asian/Non-Western (CAAS):
ARTH 311  Art of China 3
ARTH 312  Art of Japan 3
ARTH 313  Chinese Painting 3
ARTH 315  Early Chinese Art and Archaeol 3
ARTH 384  Islamic Architecture 3
ARTH 385  Islamic Decorative Arts 3
ARTH 416  Ear Mod Jpn Paint&Wood Prnts 3

Ancient and Classical (CAAC):
ARTH 319  Egyptian Art 3
ARTH 321  Greek Art 3
ARTH 322  Roman Art 3
ARTH 327  Myth & Ritual in Classical Art 3
ARTH 425  Women in Classical Antiquity 3
ARTH 426  City of Ancient Rome 3
ARTH 427  Greek Architecture 3
ARTH 428  Roman Art and Memory 3

Medieval (CAME):
ARTH 331  Erly Christian Byzant Art 3
ARTH 332  Early Med and Romanesque Art 3
ARTH 333  Gothic Art and Architecture 3
ARTH 334  The 14th Century 3
ARTH 335  Women in Medieval Art 3

Renaissance & Baroque (CARB):

**Liberal Arts Core:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>LIBS 364</td>
<td>The European Union</td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 27

**Note:** Normally, students will not be permitted to count a Political Science Internship (POL 494-POL 497) as part of the above concentration requirements. They are encouraged to elect an internship as part of their Support Studies.

### Option F. Environmental Studies

**Prerequisites**

Select 3 courses to be chosen from at least two of the following areas: 9

- ESCI 275 Intro to Environmental Science
- or ESCI 301 Environmental Science
- ENST 201 Cultural Geography
- ENST 203 Weather and Climate
- ENST 204 Landforms
- GEOL 118 Physical Geology

One computing course from the following: CIS (or other CIS course by petition)

**Required Courses**

ENST 301 Concepts of Environmentalism 3
ENST 305 Env Instrumentation and Analys 3

Select three additional courses from the following (CAIV): 9

- ENST 300 Urban Geography
- ENST 325 Environmental Politics
- ENST 330 Land Use Planning and Mgmt
- ENST 340 Remote Sensing
- ENST 351 Environmental Economics
- ENST 366 Environmental Psychology
- ENST 385 Environmental Internship
- ENST 390 Topics in Environmental Stds
- ENST 474 Environmental Education
- ENST 486 Environmental Interpretation

**Total Credit Hours:** 24

**Note:** By petition, courses in Environmental Science (some of which have additional prerequisites) may be substituted.

### Option G. Natural Sciences

**Required courses**

Select one of the following: 15

- A minimum of 15 hours 300-4999 level in any one Dept. of Natural Science discipline: ASTR, BIOL, BCHM, CHEM, ESCI, GEOL, MICR, PHYS (plus all lower level prerequisites).

Fulfillment of all major requirements in any natural science discipline.

**Total Credit Hours:** 15

### Option H. Engineering

**Required Courses**

Fulfillment of all requirements for a degree in any of the Engineering disciplines will satisfy all Component II (Professional) requirements for the International Studies major.
Due to the high number of prerequisites needed to get into upper-level engineering classes, there is no regular 15-hour (professional) component for the various engineering disciplines.

**Option I. Communication**

**Prerequisites**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 220</td>
<td>Survey of Mass Communication</td>
<td>3</td>
</tr>
<tr>
<td>SPEE 101</td>
<td>Principles of Speech Comm</td>
<td>3</td>
</tr>
</tbody>
</table>

**Required Courses**

Five upper-level courses in COMM/SPEE. Of the five courses, one course must be in a Speech (SPEE) upper level course.

Total Credit Hours 21

**Option J. Journalism and Screen Studies**

**Prerequisites**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JASS 2015</td>
<td>Fundamentals of Journalism</td>
<td>3</td>
</tr>

JASS 413  Photojournalism
JASS 436  Memoir and Travel Writing
JASS 457  American Cinema
JASS 477  Ethnographic Film
COMM 430  International Communications

The remaining one course (3 credits) may be any upper level JASS course

Total Credit Hours 18

**Component III. Cognates**

This component is designed to enhance the international dimension of the major and to coordinate the language and culture studies with professional preparation. Students will take three courses (9 hours, 300+ level) in fields such as anthropology, art history, business and management, economics, foreign cultures, history, and political science. Courses should be selected in accordance with students' particular needs. See CASL Advising website for the approved list of courses.

**Notes:**

1. Majors should obtain from the INST Program Director information on courses that are especially recommended for the Cognates Component.
2. Students may elect the Humanities Internship (HUM 485) for a maximum of three hours and avail themselves of on-the-job experience in a business, governmental, or cultural institution. See the INST Program Director for Internship Guidelines.
3. Students with appropriate background in political science may elect one of the various political science internships POL 494-POL 497) for a maximum of three hours.
4. Students may use upper-level courses, especially culture/civilization, literature, or film courses, in another foreign language for Cognate credit. Students may not use courses in the same foreign language designated as Component I for Cognates credit.
5. Students may not use identical areas for both Components II and III, e.g., students with Professional Studies (Component II) in Business and Management may not select Business and Management courses for Cognates (Component III) credit.
6. Students’ course choice in Components II and III must include a minimum total of two courses with a clearly international dimension; a greater number is highly desirable.
7. Students may transfer no more than 9 upper level hours in Components I, 50% of credits in Component II and 3 credits in Component III (Cognates).

**Journalism and Screen Studies**

The Journalism and Screen Studies (JASS) discipline is dedicated to storytelling—its forms, techniques, and technologies. We offer individual courses on the genres, including news, features and photojournalism; narrative journalism/creative nonfiction; documentary and feature film. In all courses, JASS stresses convergent media, interdisciplinary, and the underlying research and writing skills that connect us as journalists, documentarians and filmmakers. The program looks at storytelling as a means to both inform and entertain.

The ability to analyze and interpret work in a specific medium and to view it within a variety of interpretive contexts provides a foundation for all forms of storytelling, from news reportage to feature films. While we offer individual courses in each medium, all courses include analytical
components and assignments, and all stress the interdependency of theory and practice, form and content.

JASS makes current and emerging technologies available to all its students, emphasizing these technologies, not as ends in themselves but as tools of intellectual and creative expression.

**Experiential Education (Internship, Co-op, or Senior Thesis)**

All JASS students are required to participate in an internship, co-op or senior thesis. There is a seminar component to both the internship and the co-op.

The senior thesis is available only to students who have prior JASS industry experience.

**Required Prerequisites**

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

- Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

- JASS 406 History&Theory of Documentary
- JASS 413 Photojournalism
- JASS 436 Memoir and Travel Writing
- JASS 457 American Cinema
- JASS 477 Ethnographic Film
- JASS 497 JASS Thesis

**Total Credit Hours**

- 21

**Notes:**

1. A maximum of 63 hrs of JASS may count toward the 120 hrs required for graduation.
2. At least 15 of the 27 upper level hours in the COMM major must be elected at UM-D.
3. The Thesis option (JASS 497) is only available to students who have significant professional experience in their area of specialization within Journalism or Screen Studies and requires the approval of the JASS faculty advisor.
4. Students wishing to undertake an independent study (JASS 398) must first secure the approval of the JASS faculty member willing to serve as advisor.
5. A maximum of 6 credits of internship (HUM 485) or co-op (LIBS 395, LIBS 396, LIBS 397) may count toward the major (3 credits to fulfill the experiential education requirement and 3 credits as a second internship/co-op taken in a term separate from the first internship/co-op and may apply toward the Genres, Modes, and Contexts area II.

### Minor or BGS/LIBS Concentration

A minor or concentration in Journalism and Screen Studies consists of fifteen hours of approved upper-level courses. At least two of the courses (6 credits) must be in the “Media Tools” area and at least two courses (6 credits) must be in the “Genres, Modes and Contexts of Storytelling” area. The remaining course (3 credits) may be any 300+ level JASS course.

**Prerequisites**

- JASS 2015 Fundamentals of Journalism
- JASS 248 Introduction to Screen Studies

**Media Tools (CAJB)**

Choose two from:

- JASS 303 Media Design & Animation
- JASS 307 Copy Editing
- JASS 315 Media Productn for Metro Comm
- JASS 330 Feature Writing
- JASS 331 Online Reprtng,Rsrch,Writing
- JASS 345 Audio Production
- JASS 350 Digital Film & Television
- JASS 398 Independent Study in JASS

**Genres, Modes, and Contexts of Storytelling (CAJM)**

Choose two from:

- JASS 302 Media Law and Ethics
- JASS 332 Creating the Graphic Novel
- JASS 333 Sports Reporting and Writing
- JASS 334 Science and Environmental Jour
- JASS 335 Multimedia and Music
- JASS 338 Business/Automotive Reporting
- JASS 357 National Cinemas
- JASS 370 Narratives of Film and Lit
- JASS 378 History of U.S. Broadcasting
- JASS 380 History of American Journalism
- JASS 381 Postwar European Cinema
- JASS 385 Black Cinema
- JASS 387 Gender,Sex,Powr Screen Studies
- JASS 390 Topics in JASS
- JASS 398 Independent Study in JASS
- JASS 406 History&Theory of Documentary
- JASS 413 Photojournalism
- JASS 436 Memoir and Travel Writing
- JASS 457 American Cinema
- JASS 477 Ethnographic Film
Law and Society

Minor or BGS/LIBS Concentration only

Law and Society is a program of study that is intended for the understanding of law in its historical and social contexts. Through study of the evolution of law from ancient societies to our contemporary day, students are encouraged to see law as a dynamic institution shaped by historical forces and social values. Substantively, emphasis is given to the study of such contemporary legal issues as human freedoms and civil rights, social responsibility and the treatment of criminals, constitutional interpretation and the enunciation of citizen rights.

The Law and Society field takes up studies of the legal environment of various institutional sectors in our society. The health care, the family, and mental health systems all have detailed legal environments setting standards for professional conduct, responsibilities of various participants and enabling legislation of various kinds. Other fields, such as communications media, business enterprises, and the military also have fully elaborated legal environments.

In addition to its role as a source of research into the field of Law and Society, the Program offers an undergraduate CASL-wide minor. The Law and Society Minor/Concentration is structured as follows:

Two Prerequisites
Select one course from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 233</td>
<td>Critical Thinking</td>
</tr>
<tr>

---

**Liberal Studies**

Whereas to major in a traditional field of study implies, among other things, that a student must take at least 24 upper-level credit hours in the field of study chosen and at least six upper-division credit hours of cognates in related fields, a major in Liberal Studies permits the student to choose three concentrations which, together, form a coherent and academically sound program that best responds to the interests, needs, and goals of the student.

This program is designed primarily for students who wish to receive a AB or BS but who prefer a program that offers a higher degree of flexibility than the more structured standard concentrations. The AB in Liberal Studies may also appeal to pre-law and pre-business students.

To meet the requirements for this program, a student must complete at least 48 credit hours in courses numbered 300 or above, of which at least 30 credit hours must be completed in CASL. A student must also choose and officially declare three concentrations, after consultation with and approval of an adviser at the CASL Office of Advising and Student Records, Room 1039, CB. At least two concentrations must be from CASL. No credit hours transferred from a community college and no lower-division courses from a four-year institution may be included in the credit hours required for any concentration. Courses used to satisfy distribution requirements may not be employed to satisfy upper-level concentration requirements. Further, a student may not select a course on a Pass/Fail basis to fulfill the initial 12 or 15 credit hours in any of the three concentrations.

For additional information regarding the Liberal Studies major, please contact the CASL Advising Office, 1039 CB.

Note: There may be prerequisites for the upper-level courses. This is especially true for concentrations in the sciences, mathematics, computer science, and engineering. Consult course descriptions.

---

**Linguistics**

*(minor only)*

---

**Language Arts Education or English with Secondary Education Majors**

Students majoring in Language Arts Education and English with Secondary Education are required to take:

**Prerequisite**

LING 280 Introduction to Linguistics 1 3

**Required**

LING/ENGL 461 Modern English Grammar 3

LING/ENGL 482 History of the English Lang 3

One additional linguistics elective 3

**Total Credit Hours** 12

---

1 Is the prerequisite for both of these courses and covers material examined in the Michigan State Teacher Certification Examination.

**Minor or BGS/LIBS Concentration Only**

Students may earn a minor in LING and use Linguistics as a concentration for the General Studies or Liberal Studies major by completing 12 hours of upper-level credit in Linguistics.

**ESL Endorsement Certificate**

Students in the English as a Second Language (ESL) Endorsement Program are required to take 15 credit hours of linguistics courses, including three required and two electives.

**Prerequisite**

LING 480/580 Concepts in Linguistics 3

**Required**

LING 476/576 Sociolinguistics 3

LING/ENGL 474/574 Second Lang Acquisition: Engl 3

**Electives**

Select two from the following: 6

LING 461/561 Modern English Grammar

LING 482/582 History of the English Lang

LING 484/584 World Englishes

LING 425/ANTH 525 Language and Society

**Total Credit Hours** 15

---

**Mathematics**

Students who desire to major or minor in mathematics do so for a number of reasons. Some of these include

1. those who wish specifically to become teachers of mathematics in high school;
2. those whose interests lie primarily in the study of mathematics as a science, the purpose of such students being usually to continue their studies at the graduate level;
3. those whose interests lie in the field of engineering and/or physics, with emphasis on applied mathematics;
4. those whose interests lie in the fields of biology, chemistry, or economics;
5. those who wish to study mathematical statistics;
6. those whose interests lie primarily in computers and computational mathematics.

**Prerequisites to the Major**

Students desiring to major in mathematics are required to have successfully completed:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 115</td>

</tbody>
</table>

**Total Credit Hours** 21-22

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

<table>

ECON 305 Economic Statistics
ECON 4015 Introduction to Econometrics
IMSE (except IMSE 334)
ME
PHIL 350 Symbolic Logic
PHIL 485 Philosophy of Science
PHYS
STAT (Only one of STAT 301, STAT 325 can be used to satisfy this requirement)

Total Credit Hours 33

1 Courses joined with “and” count together as one course.

Notes:

1. Students who wish to use graduate-level courses, numbered 500 or higher, as part of the 27 hours of upper-level coursework required for the major, must submit a petition to obtain the approval of the Program Advisor in Mathematics.

2. Students seeking secondary teacher certification must take MATH 331, MATH 486, EDD 450 and EDD 451. Also, MATH 395 and a course in statistics are recommended for such students. None of the following MATH courses may be used to fulfill any requirements of either a Mathematics major or a Mathematics minor: MATH 385 Math for Elem Teachers I 3, MATH 386 Math for Elem Teachers II 3, MATH 387 Math for Elem Teachers III 3, MATH 442 Geometry for Teachers 3, MATH 443 Algebra for Teachers 3, MATH 444 Data Anlysys,Prob&Stat forTchrs 3, MATH 445 Number & Prop1 Rsng for Tchrs 3, MATH 446 Discrete Math/Modeling for Tch 3, MATH 447 Micro in Math for Teachers 2, MATH 449 Concepts of Calc for Teachers 3, MATH 486 Sec School Math for Teachers 3.

3. Applied Statistics courses (STAT) cannot be used to fulfill the Math major or minor/focus area requirements.

4. At least 12 of the 27 upper level hours in mathematics must be elected at UM-Dearborn in order to graduate.

5. In order to enroll in a mathematics class, a student must have earned a grade of at least C- in all prerequisite mathematics courses; a grade below C- signals that the student should immediately repeat the class in order to build a stronger foundation for subsequent study. The same principle applies when a mathematics course is a prerequisite for courses of other disciplines.

Credit by Examination
The department grants credit for Calculus I to those students who have received a score of three, four, or five on the AB Exam or a score of three on the BC Exam of the Advanced Placement Program Tests of the College Entrance Examination Board. Credit is granted for both Calculus I and Calculus II to those students who have received a score of four or five on the BC Exam of the Advanced Placement Program Tests. In each case, the student is then eligible to elect the next calculus course in the calculus sequence.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours in mathematics courses approved for upper-level credit in the mathematics major.

Medieval and Renaissance Studies

Minor or BGS/LIBS Concentration Only

The minor/concentration in Medieval and Renaissance Studies is cross-cultural in design and covers the time period from Late Antiquity (ca. 400) to the seventeenth century. Through the interdisciplinary study of history, art, religion, language and literature, students will develop an integrated understanding of medieval and early modern civilization. Its legacy, along with its intellectual and social diversity, enhances our understanding not only of the past but of present society.

The minor/concentration in Medieval and Renaissance Studies consists of 15 credit hours from the courses (CABR) listed below. Students must elect at least one course from Art History, History and English.

Art History
Select at least one course from the following: 3
ARTH 331 Early Christian Byzant Art
ARTH 332 Early Med and Romanesque Art
ARTH 334 The 14th Century
ARTH 335 Women in Medieval Art
ARTH 341 Art&Arch in Early Ren Florence
ARTH 342 High Renaissance and Mannerism
ARTH 343 Northern Renaissance Art
ARTH 344 Italian Renaissance Sculpture
ARTH 351 Southern Baroque Art
ARTH 352 Northern Baroque Art
ARTH 454 Rembrandt

Comparative Literature
COML 433 Writing Women in Renaissance

History
Select at least one course from the following: 3
HIST 314 England: Tudors and Stuarts
HIST 329 Medieval Society
HIST 330 The Renaissance
HIST 331 The Reformation Era: 1500-1648
HIST 4312 European Encounters, 1400-1800

English
Select at least one course from the following: 3
ENGL 371 Eng Lit from Begin-1500
ENGL 372 Eng Lit: 1500 to 1600
ENGL 373 English Lit 1600-1660
ENGL 400 Maj Eng Auth of the Mid Ages
ENGL 401 Lit of Anglo-Saxon England
ENGL 404 Medieval Mystical Writers
ENGL 405 Chaucer
ENGL 406 Studies in Medieval Lit/Cult
ENGL 408 Shakespeare I: Earlier Works
Microbiology

The field of microbiology encompasses the study of a wide diversity of organisms, including archaea, bacteria, fungi, and viruses. The program in microbiology is designed to prepare students for laboratory positions in industry, government, and university research. The program also provides a foundation for graduate work in microbiology, virology, molecular biology, medicine, and other areas. Certification is possible by special examination upon graduation.

Prerequisites to the Major

A solid background in mathematics is essential to success in any of the scientific disciplines. Incoming students who intend to choose a major in Microbiology should have completed at least three years of high school mathematics. First-year students should plan to enroll in MATH 104 or MATH 105; MATH 113 or MATH 115; or MATH 114 or MATH 116 based on the results of their math placement tests. CHEM 134 or CHEM 144 and CHEM 136 or CHEM 146 are prerequisites to many other courses in the Natural Sciences Department; students majoring in any of the sciences should complete this sequence as soon as possible.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Writing and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)

• Lecture/Lab Science Course
• Additional Science Course

Social and Behavioral Analysis (GEB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement

Complete a two-semester beginning language sequence.

Language Courses

Ancient Greek I and II MCL 105 and MCL 106
Arabic I and II ARBC 101 and ARBC 102
Armenian I and II MCL 111 and MCL 112
French I and II FREN 101 and FREN 102
German I and II GER 101 and GER 102
Latin I and II LAT 101 and LAT 102
Spanish I and II SPAN 101 and SPAN 102

Major Requirements

A minimum of 29 credit hours in Microbiology or Biological Sciences must be completed as outlined below:

Note: Students should begin the chemistry sequence before electing any MICR/BIOL course.

Required Courses

AREA A

All of the following (minimum 12 hours required):

MICR 385 Microbiology 4
MICR 406 Microbial Genetics 3
MICR 440 Micro Genetics & Physi Lab 1
MICR 485 Physiology of Microorganisms 3

Select at least one credit hour from the following:

MICR 495 Off-Campus Research
MICR 497 Seminar in Microbiology
MICR 498 Ind Study in Microbiology
MICR 499 Lab in Micro Research
AREA B
An organismal/environmental course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MICR 405</td>
<td>Applied &amp; Environ Microbiology</td>
</tr>
</tbody>
</table>

AREA C
Complete an additional 13 credit hours (to reach minimum 29 hours required for the major) from the following list, of which at least four credit hours must be from microbiology courses (MICR).

Microbiology Courses:

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

Total Credit Hours: 13

Notes:

1. A maximum of 44 hrs of MICR or BIOL may count in the 120 hours required for graduation.
2. A maximum of 36 hrs from Areas A, B, and C may count toward the 120 hours required for graduation.
3. At least 12 of the 29 hrs of upper level hours used toward the major must be elected at UM-Dearborn.
4. A maximum of 6 hrs of Independent Study (courses numbered 495, 498, 499) in any science discipline may count in the 120 hours to graduate.
5. A maximum of 6 hrs combined in MICR 495/BIOL 495, MICR 498/BIOL 498, MICR 499/BIOL 499 may be applied toward the 29 hours required in the major.

Minor or BGS/LIBS Concentration
A minor or concentration consists of 12 hours of upper-level credit in microbiology (MICR).

Middle East Studies
The Middle East Studies Certificate is a credential for students who have studied the history and culture of the Middle East from a variety of disciplinary perspectives. Requiring a minimum of 12 upper level credits after the completion of prerequisites, the MEST Certificate can complement your major or stand alone as a post baccalaureate credential.

Required Pre-requisites
The completion of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 101</td>
<td>The World to 1500 CE</td>

</tbody>
</table>

Notes:

1. No more than a total of six credit hours combined in MICR 495, MICR 498, and MICR 499 may be applied toward the 120 credit hours required for graduation. Both MICR 498 and MICR 499 require independent study contracts agreed upon by a faculty member.
2. All 400-level microbiology courses have MICR 385 as a prerequisite.
3. When topic is appropriate – must petition

Other appropriate courses with approval of program advisor by petition.
Modern and Classical Languages

**Armenian**

(not a field of concentration)

Course offerings in Armenian are located under the heading "Modern and Classical Languages (MCL)."

Greek

(not a field of concentration)

Course offerings in Greek are located under the heading "Modern and Classical Languages (MCL)."

Swedish

(not a field of concentration)

Course offerings in Swedish are located under the heading "Modern and Classical Languages (MCL)."

Music

Minor or BGS/LIBS Concentration only

**Prerequisites**

Select one course from the following:  

- MHIS 100 Intro to Music
- MHIS 120 History of Jazz
- MHIS 130 Intro to World Music

Select one course from the following:  

- MTHY 100 Fundamentals of Music
- MTHY 101 Music Theory I
- MTHY 102 Music Theory II

Select 12 hours of upper-level credit in music history (MHIS), music theory (MTHY)  

Total Credit Hours 18

It is strongly advised that all students pursuing a minor in music take at least one semester of applied music (MAPP 125 Class Piano or MAPP 135 Class Guitar), in addition to the required course work; or that they join one of the musical ensembles active on campus such as Jazz Ensemble, African Drum and Dance Society, or the Gospel Choir for at least one calendar year.

Music Theory

(not a field of concentration)

Natural Sciences

(not a field of concentration)

Organizational Change in a Global Environment
Minor or BGS/LIBS Concentration only
Requires 15 credits of upper level course work from the following (CAOG):

Select 15 credits from the following: 15

<table>

Total Credit Hours 15

Philosophy

Philosophy explores the fundamental values and assumptions of human activities such as science, the arts, religion, morality, and social and political institutions. It uses the power of human reasoning to address such questions as "What is it to know something?" "What is the best way to live?" and "Is belief in God rationally justifiable?" Ultimately, philosophy has as its goal the development of a coherent view of the world and our place in it.

Philosophical inquiry helps students acquire and sharpen valuable intellectual and practical skills that can be important in their careers. These skills include effective writing, verbal argumentation, and critical thinking.

The primary value of philosophy lies in its contribution to intellectual insight and to a liberal arts education. The study of philosophy can also serve as a basis for a variety of careers, including medicine, business, and government. It is especially effective as the basis for a pre-law program. Recent developments in cognitive science and in medical and environmental ethics have broadened the range of careers and professions for which the study of philosophy can be recommended.

Prerequisites to the Major

PHIL 100 Introduction to Philosophy 3
PHIL 233 Critical Thinking or PHIL 234 Symbolic Logic 3
PHIL 240 Ethics 3

Total Credit Hours 9

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement

Complete a two-semester beginning language sequence.

Major Requirements

PHIL 301 & PHIL 302 Ancient Philosophy and Modern Philosophy 6

Alternative I or II

A student may choose either a traditional major in philosophy (Alternative I) or a program that stresses the relationship of philosophy to other areas of study (Alternative II).

Cognates (CALC)

As noted above, cognate requirements depend on the student’s choosing between Alternative I and Alternative II. Approved list of cognate courses can be obtained at the CASL Advising Office, 1039 CB or on line at the CASL Advising website.

Total Credit Hours 30-42

With regard to both alternatives, students are strongly encouraged to work closely with a faculty adviser to develop a coherent program. Alternative I requires a total of 24 hours in philosophy courses at the 300 or 400 level and six upper-level hours of cognate courses in one or more disciplines outside philosophy. Alternative II requires a total of 18 hours in philosophy courses at the 300 or 400 level and 12 upper-level hours of cognate courses. Satisfactory completion of PHIL 301 Ancient Philosophy and PHIL 302 Modern Philosophy will be counted as part of the 24 hours in philosophy in Alternative I or as part of the 18 hours in philosophy in Alternative II.

Notes:

1. A maximum of 44 hrs in PHIL may count in the 120 hours required to graduate.
2. Credit cannot be given for both PHIL 234 and PHIL 350.
3. At least 15 hrs of upper level Philosophy required for the major must be elected at UM-Dearborn.

**Minor or BGS/LIBS Concentration**

A minor concentration consists of 12 hours of upper-level credit in philosophy.

**Physics**

Physics is the study of the most fundamental properties of matter and energy. The physics program has been designed with the recognition that a student might choose to major in physics for a variety of reasons. In addition to meeting the needs of those planning to continue their physics education in graduate school, the program serves those students wanting to pursue technical careers immediately after graduation, those seeking to enter medical, dental or other professional schools, and those interested in earning certification as high school teachers.

After completing a core curriculum in physics and mathematics and an introduction to the life and other physical sciences, students have the opportunity to gain first-hand experience in basic and applied physics research by participating in faculty research projects both on and off campus. Similar experiences may be arranged in hospital, industrial, or government research facilities in the Detroit metropolitan area. The physics faculty have concentrated their efforts in quantum optics, statistical and condensed matter physics, biophysics, astrophysics, and the history and philosophy of physics. Physics majors have worked on problems in these specialty areas, and also on projects in the interdisciplinary application of physics in medicine and in the environment. Students wishing to emphasize the applied side of physics may do so by replacing elective courses in physics with courses offered by the College of Engineering and Computer Science.

**Prerequisites to the Major**

A solid background in mathematics is essential to success in any scientific discipline. Incoming students who intend a concentration in physics should have completed at least three years of high school mathematics. First-year students should plan to enroll in MATH 105, MATH 115 or MATH 116 based on the results of their math placement tests. PHYS 150 and PHYS 151 are prerequisites to all other physics courses. Students intending on majoring in physics should complete these courses as soon as possible.

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

**Capstone**

Capstone (GECE) – 3 Credits (p. 22)

**Foreign Language Requirement**

Complete a two-semester beginning language sequence.

- PHYS 360 Instrumentation for Scientists 4
- PHYS 401 Mechanics 3
- PHYS 403 Electricity and Magnetism 3
- PHYS 406 Thermal and Statistical Physics 3
- PHYS 453 Quantum Mechanics 3
- PHYS 460 Advanced Physics Laboratory 3

Select six additional credit hours of lecture courses in astronomy and/or physics, chosen from (only one can be astronomy (ASTR)): 6
Evening Programming Offerings

The political science faculty have a commitment to a comprehensive evening program. In terms of required courses, the goal of the discipline is to offer POL 101 each semester and POL 201 and POL 300 at least once every year. If POL 201 or POL 300 is not offered during a given two-year period, a full-time evening student is allowed to petition the discipline for permission to substitute other classes. Evening students should watch for infrequently offered prerequisite classes and take them when they are available.

Prerequisites to the Major

Students majoring in political science must take two Prerequisites:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL 101</td>
<td>Intro to American Government</td>
<td>3</td>
</tr>
<tr>
<td>POL 201</td>
<td>Intro Comparative Government</td>
<td>3-4</td>
</tr>
</tbody>
</table>

Total Credit Hours 6-7

1. POL 101 is highly recommended for all upper-level courses. Junior or senior standing is a prerequisite for most 400/4000-level courses. Students are advised to complete POL 101 and POL 201 within their first four terms and POL 300 during their fourth or fifth term.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

**Major Requirements**

Students must complete 30 hours of upper-level political science courses. Students are advised to complete required classes as soon as possible to prevent schedule conflicts. Those who ignore this advice may have difficulties completing their major requirements as they planned.

**Summary of requirements:**

**Field Requirements**

Select one course from each field:  

21

- **American Politics (CAAP):**
  - POL 311  Int Group and Pol Process  
  - POL 312  Legislative Process  
  - POL 313  American State Government  
  - POL 315  The American Presidency  
  - POL 316  The American Judicial Process  
  - POL 322  Mich Gov, Pol, & Publ Policy  
  - POL 323  Urban Politics  
  - POL 326  Presidential/Congress Election  
  - POL 327  Pol Parties and Elections  
  - POL 328  Pub Opinion and Press Groups  
  - POL 329  Politics and the Media  
  - POL 334  Organizing and Leadership  
  - POL 340  Federalism  
  - POL 362  Women, Politics, and the Law  
  - POL 413  American Constitutional Law  
  - POL 414  Civil Rights and Liberties  
  - POL 415  Problems in Constitutional Law  
  - POL 417  Constitution&National Security  
  - POL 418  Supreme Court and Religion  
  - POL 484  Revitalizing Cities  
  - POL 489  Seminar in Urban Politics  
  - POL 4165  Criminal Law  

- **Political Theory (CAPT):**
  - POL 302  The Theory of the Law  
  - POL 303  Justice  
  - POL 304  American Political Thought  
  - POL 305  Race/Justice/Freedom in Amer  
  - POL 306  Political Ideologies  
  - POL 307  Marxist Thought  
  - POL 308  Moral and Political Dilemmas  
  - POL 309  Ancient Political Theory  
  - POL 310  Modern Political Theory  
  - POL 314  Issues in Amer Pol Thought  

- **Public Policy (CAPP):**
  - POL 325  Environmental Politics  
  - POL 333  Citizens and Bureaucrats  
  - POL 360  American Policy Process  
  - POL 363  Cr Just Policy and Admin  
  - POL 364  Health Pol and Administration  
  - POL 365  Energy Policy  
  - POL 367  Fiscal Policy and Budgeting  
  - POL 466  Politics&Policies Soc Welfare  
  - POL 467  Food Politics and Policy  
  - POL 481  Terrorism & US Natl Security  
  - POL 484  Revitalizing Cities  
  - POL 490  Sem in Public Administration  

- **Comparative Politics (CAPO):**
  - POL 341  Canadian Politics  
  - POL 350  Pol of the Developing Areas  
  - POL 355  Religion and Politics  
  - POL 370  Communist & Post-Communist Sys  
  - POL 385  Middle East Politics  
  - POL 450  Revolution  

- **International Relations (CAIR):**
  - POL 361  American Foreign Policy  
  - POL 371  Problems in Intl Politics  
  - POL 375  Great Pwrs Comp and Conflict  
  - POL 451  Peace and War  
  - POL 471  American Foreign Policy I  
  - POL 472  American Foreign Policy II  
  - POL 473  International Security Affairs  

- **Political Analysis:**
  - POL 300  Political Analysis  

- **Capstone:**
  - POL 4910  Capstone in Political Science  

**Additional Electives to Reach a Total of 30 Hours**

Select any 9 credits of political science courses at the 300 level or above. Students also have the option to declare a concentration and take 9 credits from one of the following concentrations below:

2

- **Public Law:**
  - POL 302  The Theory of the Law  
  - POL 316  The American Judicial Process  
  - POL 318  Criminal Law  
  - POL 413  American Constitutional Law  
  - POL 414  Civil Rights and Liberties  
  - POL 415  Problems in Constitutional Law  
  - POL 4165  Criminal Law  
  - POL 417  Constitution&National Security  
  - POL 418  Supreme Court and Religion  

- **Public Administration:**
  - POL 313  American State Government  
  - POL 322  Mich Gov, Pol, & Publ Policy  
  - POL 334  Organizing and Leadership  
  - POL 340  Federalism  
  - POL 333  Citizens and Bureaucrats  
  - POL 363  Cr Just Policy and Admin  
  - POL 367  Fiscal Policy and Budgeting  
  - POL 364  Health Pol and Administration  
  - POL 490  Sem in Public Administration

Total Credit Hours 30

1 Courses at the 300 level or above may be used to complete the required total of 30 hours of upper-level coursework beyond POL 300 and the required field courses.

Notes:

1. At least 15 of the 30 upper level hours in the Political Science major must be elected at UM-Dearborn.
2. A maximum of 6 hours of POL 494, POL 495, POL 496, POL 497 internship credit may count in the 30 hours required for the major.
3. Any one course may be used to satisfy only one requirement within the major.

Minor or BGS/LIBS Concentration

A minor or concentration consists of 12 hours of upper-level credit in political science.

Psychology

As the science of human experience and behavior, psychology has a vast range. At one end, it borders on natural sciences such as biology and physiology, and at the other, it shares interests with social science disciplines such as anthropology and sociology. A student might choose to focus on a particular subfield of psychology by taking elective courses from within one of these areas: social, personality, clinical, developmental, environmental, industrial/ organizational, cognitive, experimental and physiological. The curriculum is designed to accommodate concentrators who will go on to use psychology in a human services career or in a related field, concentrators intending to pursue an advanced degree in psychology and non-concentrators who seek personal enrichment. Honors and internship programs provide opportunity for students to develop research skills and to gain practical experience in an applied setting.

Prerequisites to the Major

Students desiring to major in psychology are required to take the following or their equivalent.

<table>
<thead>
<tr>

Major Requirements
Students must complete at least 30 hours in psychology at the 300 level or above. For those transferring from a community college this requirement will ordinarily mean that the 30 hours will be completed during the junior and senior years.

Students are required to take one course in each of the following areas.

Methods (CAPM)
Select one course from the following:
- PSYC 415 Lab in Developmental Psych
- PSYC 425 Lab in Social Psychology
- PSYC 4445 Personality Assessment Lab
- PSYC 465 Experimental Psychology

Biological Psychology (CABP)
Select one course from the following:
- PSYC 370 Physiological Psychology
- PSYC 372 Animal Behavior
- PSYC 455 Health Psychology
- PSYC 4725 Motivation and Behavior

Clinical/personality (CACP)
Select one course from the following:
- PSYC 440 Abnormal Psychology
- PSYC 441 Intro to Clinical Psychology
- PSYC 442 Child Psychopathology
- PSYC 450 Personality Theory

Developmental Psychology (CADP)
Select one course from the following:
- PSYC 300 Life-Span Developmental Psych
- PSYC 301 Psych of Infant Development
- PSYC 302 Psych of Child Development
- PSYC 315 Personality Development
- PSYC 407 Psychology of Adolescence
- PSYC 412 Psychology of Aging
- PSYC 418 Cognitive Development
- PSYC 432 Socialization of the Child

Social/Organizational Psychology (CASP)
Select one course from the following:
- PSYC 320 Social Psychology
- PSYC 322 Psychology of Prejudice
- PSYC 325 Psych of Interpersonal Relation
- PSYC 4305 Psychology in the Workplace

Statistics and Experimental Design
PSYC 381 Prin of Stat and Exper Design

Cognitive (CAPC)
Select one course from the following:
- PSYC 363 Cognitive Psychology
- PSYC 375 Psychology of Language
- PSYC 461 Learning and Memory
- PSYC 463 Sensation and Perception
- PSYC 464 Human Factors Psychology
- PSYC 474 Animal Intelligence

Electives in Psychology
Select 9 credits any upper-level psychology to equal 30 total credits

Total Credit Hours
30

Cognates
Students must also complete at least six hours in cognate courses at the 300 level or above, (excluding co-op’s, internships or independent studies), from: any CASL discipline (excluding psychology); College of Business disciplines; College of Engineering and Computer Science disciplines; College of Education, Health, and Human Services (EDA and EDC disciplines only).

Notes:
1. A maximum of 54 hrs. in Psychology may count in the 120 hours required to graduate (excluding PSYC 498 and PSYC 499 for PSYC Honors students).
2. At least 15 of the 27 upper level hours in PSYC must be elected at UM-Dearborn.
3. No more than 6 hours of Independent Study and no more than 6 hours of Independent Research within the Behavioral Sciences (anthropology, psychology and sociology) may be counted in the 120 hours required to graduate

Honors Program in Psychology
Psychology offers an honors program which provides special opportunities for outstanding students, including a research training seminar followed by research in collaboration with faculty members. Students are formally accepted for the honors program early in their junior year. Prospective students should plan on completing PSYC 381 and a methods course by the end of fall term in their junior year. Requirements for entrance are a) GPA of 3.2 or higher in psychology and overall UM-Dearborn courses and b) informal evidence of being a superior student, such as high motivation and ability
to work independently. Requirements for graduation with honors in psychology are the successful completion of:

- All requirements for psychology major
- PSYC 481 Computers in Psychology, normally taken in the fall semester, senior year
- PSYC 498 Honors Seminar normally taken winter term, junior year
- PSYC 499 Honors Research normally completed during senior year
- Research proposal meeting completed early in senior year
- Final Oral Defense completed at least one month prior to graduation

### Psychology Internship

Juniors and seniors can obtain practical experience working under supervision in a setting relevant to psychology. Internship students will spend approximately 6 or 12 hours per week at their field placement and will attend a weekly seminar on campus. Students may register for PSYC 485 Psychology Internship for 3 or 6 credits. Application should be made to the director of the psychology internship program.

### Minor or BGS/LIBS Concentration

A minor or concentration consists of PSYC 101 and 12 hours of upper-level credit in psychology.

### Public Relations (PR)

The public relations certificate requires the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 260</td>
<td>Public Relations Principles</td>
<td>3</td>
</tr>
<tr>
<td>JASS 2015</td>
<td>Fundamentals of Journalism</td>
<td>3</td>
</tr>
<tr>
<td>COMM 300</td>
<td>Communication Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>COMM 360</td>

<tr>
<td>COMM 460</td>
<td>Public Relations Campaigns</td>
<td>3</td>
</tr>
<tr>
<td>COMM 477</td>
<td>Prof Communication Ethics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 18

### Notes Regarding PR Certificate Program:

1. A minimum 2.0 cumulative GPA and a minimum of twelve earned hours completed at UM-Dearborn are required for admission to the program.
2. A maximum of nine credit hours may simultaneously count toward the PR certificate and toward the Communication major.
3. A maximum of two transfer courses (six credit hours) may count toward the PR program.
4. A minimum 2.0 GPA in the courses counting toward the PR certificate and minimum 2.0 cumulative GPA are required at the time of graduation and/or posting of the certificate.

### Religious Studies

#### Minor or BGS/LIBS Concentration Only

It is impossible to understand any cultural context, including Western, without knowledge of the traditions, influence and rationale of its religious underpinnings. In light of this fact, a Religious Studies minor has been established to provide a focus for discussions of the ethical standards and the cultural orientations that have been fostered by various religions. It is also the objective of this program to provide a background in the religious beliefs, practices, and aesthetics of other cultures in order to give students insight into the basis of social and political actions that otherwise are subject to misunderstanding.

Religious Studies is an interdisciplinary course of study which requires one prerequisite course and 15 upper level credit hours of any RELS courses.

### Science and Technology Studies

#### Minor or BGS/LIBS Concentration Only

In a democratic society increasingly reliant on science and technology, it is crucial for citizens to understand the social, political, ethical, economic, and environmental issues at stake in the development, distribution, consumption, and control of the products of science and technology. Science and Technology Studies (STS) is an interdisciplinary program in which the methods and perspectives of various disciplines in the humanities, social sciences, and behavioral sciences are used to examine the social contexts from which science and technology emerge, the intertwined organizations of people and things used to implement scientific and technological systems, the social consequences of these systems, and the cultural reactions to them.

In keeping with UM-Dearborn’s location and its historic and continuing connections to the automobile industry, the STS Program gives special attention to the impact of the automobile and the automobile industry on American society. The program’s introductory course, for example, analyzes the social as well as the technical reasons for the emergence of the internal combustion engine, the reorganization of factories and reconceptualization of labor fueled by mass production and lean production, the impact of the automobile on the design of cities and the development of suburbs, and the iconic status of the car in American culture. A website on "The Automobile in American Life and Society" (autolife.umd.umich.edu) has been developed by the STS Program and is used in the introductory course.

Most of the courses in STS are cross listed with other disciplines, and the STS faculty hold appointments in such fields as Anthropology, Art History, Biological Sciences, Communications, Economics, English, Environmental Studies, History, Mathematics, Mechanical Engineering, Philosophy, Psychology and Sociology.

A minor in STS is particularly relevant for students who live and work in southeast Michigan and makes an appropriate complement to any field of study in the arts and sciences, engineering, education, or management.

Students who wish to minor in STS must complete STS 300 Introduction to Science and Technology Studies and four courses from the list below, with at least one course from each of the three areas. Contact the STS Director for updated information about course offerings.

### Social Studies

The Social Studies major provides students with a broad range of courses through which to examine and appreciate the processes and institutions that shape civilizations and social orders. It seeks to recreate the context of changing human activities, be they cultural, economic, geographic, political, or social, and to explain and understand the contemporary human condition. Because of its interdisciplinary structure, the Social Studies major is valuable for those who want a multidimensional understanding of the human past and future, and of the contemporary world and their own place in it.

The degree was especially designed for students seeking to become secondary school teachers, but it could also provide background for those who seek a career in government work, law or business.

#### Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

#### Foundational Studies

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

#### Areas of Inquiry

- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

#### Capstone

Capstone (GECE) – 3 Credits (p. 22)

#### Foreign Language Requirement

Complete a two-semester beginning language sequence.

Total Credit Hours 15

Sociology

The field of sociology has grown in scope and importance as society has grown more complex and pluralistic. The modern individual is involved in a tightly integrated, sometimes conflicting, network of social groups, families, institutions, governmental, economic, educational and religious bodies, and specialized community organizations. Sociology studies the internal structure by which society is organized, the development and dynamics of the various groupings within it and the influences of these upon the individual. The undergraduate program in sociology provides a focus for general liberal education, as well as for preparation for careers in sociology. These include careers in social work and related human services, law, criminal justice, labor relations, public administration, business management, human relations, marketing and public opinion research.

Social Work/Criminal Justice Internship

Provides field experience in social welfare or criminal justice agencies, e.g., for children/adolescents, in residential programs, in abuse remediation, in probation, for chemical dependencies, in victim advocacy, for elderly, in prisons, for special needs populations, in court services, and for families and communities. Instructor and student will, work together to determine appropriate intern placement.

Prerequisites to the Major

A student desiring to major in sociology is required to have completed an introductory course in sociology, or to complete SOC 200 or SOC 201 at UM-Dearborn. The introductory course (or its equivalent) is the prerequisite for all other sociology courses.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Students must complete 28 hours in sociology in course numbered 300 or above. All students are required to complete 18 of these 28 hours in sociology at the UM-Dearborn campus. All majors must complete the following courses:

**Required courses:**

- **SOC 308** Sociological Theory 3
- **SOC 410** Quantitative Research 4
- **SOC 413** Qualitative Research 3

**Macro Sociology (CAMS)**

Select one of the following: 3

- **SOC 422** Structure of American Society
- **SOC 423** American Social Classes
- **SOC 435** Urban Sociology
- **SOC 450** Political Sociology
- **SOC 453** Sociology of Law
- **SOC 455** Sociology of Religion
- **SOC 4555** Immigrant Cultures and Gender
- **SOC 460** America in a Global Society

**Public Issues (CAPI)**

Select one of the following: 3

- **SOC 350** Poverty and Inequality
- **SOC 403** Minority Groups
- **SOC 430** Population Problems
- **SOC 446** Marriage and Family Problems
- **SOC 447** Family Violence
- **SOC 465** Deviant Behavior/Soc Disorganz
- **SOC 466** Drugs, Alcohol, and Society

**Organizations (CAOS)**

Select one of the following: 3

- **SOC 440** Medical Sociology
- **SOC 442** Sociology of Work
- **SOC 477** Social Welfare
- **SOC 482** Methods of Social Work Pract
- **SOC 483** Images of Organizations

**The Individual and Society (CASS)**

Select one of the following: 3

- **SOC 443** Gender Roles
- **SOC 445** The Family
- **SOC 449** Black Family in Contemp Amer

**Senior Seminar**

- **SOC 497** Senior Research Seminar

**Upper Level Course**

Select any one upper level Sociology course 1

**Cognates**

Students must also complete six hours in upper level cognate courses from two of the following six disciplines: ANTH, CIS, ECON, HIST, POL, STAT. Internships in these disciplines cannot be used to satisfy the cognate requirement.

Total Credit Hours 31

1. Double majors in sociology and psychology may use PSYC 425 in combination with PSYC 381 as a substitute.

**Notes:**

1. A maximum of 44 hrs. in Sociology may count in the 120 hours required to graduate.
2. At least 18 of the 28 upper level hours in SOC must be elected at UM-Dearborn.
3. No more than 6 hours of Independent Study and no more than 6 hours of Independent Research within the Behavioral Sciences (anthropology, psychology and sociology) may be counted in the 120 hours required to graduate.

**Minor or BGS/LIBS Concentration**

A minor or concentration consists of 12 hours of upper-level credit in sociology.

**Spanish**

(See Hispanic Studies (p. 138))

**Speech**

(not a field of concentration; see Communication (p. 119))

**Statistics**

(minor only, see Applied Statistics (p. 105))

**Swedish**

(not a field of concentration; see Modern and Classical Languages (http://catalog.umd.umich.edu/undergraduate/college-arts-sciences-letters/modern-classical-languages))

**Urban and Regional Studies**

Urban and Regional Studies (URST) encompasses the environmental, aesthetic, social, economic, geographic, historical, political, and cultural aspects of cities, suburbs and regions. It advances in-depth study of some of the major challenges facing individuals and groups living and working in major metropolitan regions, such as the Detroit area. These challenges include:

- Economic development
- Urban poverty and income inequality
- Preservation and promotion of culture, architecture and art
- Land use conflicts
- Provision of adequate and sustainable transportation and housing services.
Career Opportunities

Urban and Regional Studies provides students with the knowledge, techniques and critical analytical skills that will enable them to effectively participate in changing cities and regions.

Pursuing a degree in Urban and Regional Studies at UM-Dearborn offers you the opportunity to combine real-world practice and theory. Students can specialize in areas such as urban and regional policy, community development, urban design and the environment.

Graduates of this program may consider careers in urban/regional planning, community organizing, non-profit management, public policy/ administration, social services, and arts and culture management. They may also consider pursuing graduate education and research in areas such as geography, urban planning, sociology, anthropology, environmental studies, public policy and public administration.

The Major

The program is interdisciplinary by design, meaning that courses draw upon a variety of traditional academic disciplines – e.g. history, English, geography, economics, sociology and anthropology. Students are encouraged to rigorously and creatively integrate the theory and methods learned in these courses. In addition, a unique feature of the program is that students gain hands-on experience by working in the community through an internship, academic service learning and/or community-based research.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Cognates

Six credit hours of upper-level (300/400; 3000/4000 level, excluding MATH 385, MATH 386, MATH 387) coursework in a single discipline, in addition to any courses already elected in that discipline used to satisfy urban and regional studies requirements. Cognate courses will provide supporting skills or contexts for the study of urban issues. Internships in these disciplines will not be used to satisfy the cognate requirement.

Notes:
1. At least 18 of the 36 upper level hours required in the major must be elected at UM-Dearborn.
2. In satisfying the academic based community research requirement, students must obtain approval of the URST faculty program advisor for internships, independent study, and “other” approved forms of academic service learning, prior to enrolling in the courses. Courses already designated as academic service learning (ASL, 300/400; 3000/4000 level only) do not require approval. ASL courses vary by semester.

Minor or BGS/LIBS Concentration

URST is also available as a minor, or as concentration in General Studies or Liberal Studies. The minor/ concentration requires 15 credit hours of upper level coursework including URS 300 and at least one course from each of the three tracks.

Women's and Gender Studies

Global women’s poverty, gender-based violence and other forms of discrimination have made gender equity one of the central moral challenges of our century. Women’s and Gender Studies offers an interdisciplinary major and minor designed to provide students with an understanding of gender as a category of analysis that intersects with race, class, sexuality, religion and (dis)ability, and the tools to lead for gender equity and social justice. Faculty who teach in the program are committed to critical thinking, student mentoring, active learning, and the application of theory to practice through social change opportunities on campus, in metropolitan Detroit, and beyond.

Women’s and Gender Studies prepares students for a variety of careers. Our graduates have gone on to work in fields of health, social work, law, politics and government, education, business, science, and the arts. Working closely with an advisor from the program, students devise a course of study tailored to meet their specific needs and interests. Many of our students graduate with a double major with fields such as Psychology, Behavioral Sciences, Communications, Economics, History and Anthropology. For more information see our website at umdearborn.edu/casl/wgst

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)
• Lecture/Lab Science Course
• Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)
Capstone
Capstone (GECE) – 3 Credits (p. 22)

Foreign Language Requirement
Complete a two-semester beginning language sequence.

Requirements
A major requires 30 credit hours in Women's and Gender Studies:

- WGST 303 Intro to Women's & Gender Stud 3
- WGST 384 Feminist Philosophy 3 or WGST 409 Feminist Theories

Gender, Culture, and Representation Courses (CAGS)
Select 6 credit hours:
- WGST 315 Body Image and Culture
- WGST 335 Women in Medieval Art
- WGST 337 Women Musicians/West Mus Hist
- WGST 385 Language and Gender
- WGST 386 Gender Issues in Literature
- WGST 387 Gender, Sex, Power Screen Studies
- WGST 393 Black Women, Rel & Spirituality
- WGST 401 Images of Women in Germany
- WGST 406 Culture and Sexuality
- WGST 407 Sexual Praxis and Theory
- WGST 425 Women in Classical Antiquity
- WGST 433 Writing Women In Renaissance
- WGST 445 20C/21C Women Authors
- WGST 451 Family, Sexuality, Rights
- WGST 455 Gender and Media Studies
- WGST 466 Arguing Feminism: Rhetoric
- WGST 470 Black Women / Lit, Film, Music
- WGST 471 Sexual Subcultures in Lit
- WGST 473 Arab American Women Writers
- WGST 486 Queer Theory & Literature
- WGST 487 Monsters, Women & the Gothic
- WGST 4505 Feminism & Mod. Mid. East
- WGST 4555 Immigrant Cultures and Gender

Gender and Social Institutions Courses (CAGI)
Select 6 credit hours:
- WGST 325 Gender, Science, & Engineering
- WGST 326 Poverty and Discrimination
- WGST 336 Perspectives in Women's Health
- WGST 338 Women & Islam Mid East to 1900
- WGST 362 Women, Politics, and the Law
- WGST 370 Women in America-Hist Perspect
- WGST 404 Dissed: Differ, Power, Discrim
- WGST 405 Gender Roles
- WGST 408 Gender, Pwr & Intl Development
- WGST 412 Men and Masculinity
- WGST 420 Kinship and Marriage
- WGST 436 Reproductive Health Policy
- WGST 446 Marriage and Family Problems
- WGST 447 Family Violence
- WGST 451 Family, Sexuality, Rights
- WGST 461 cops & Cons: Women in Prison
- WGST 475 Diversity Iss in Mental Health
- WGST 476 Inside Out Prison Exchange
- WGST 481 Gender and Globalization
- WGST 484 Violence Against Women
- WGST 3651 Women/Leadership/Social Change
- WGST 3955 Diversity and the Workplace
- WGST 4505 Feminism & Mod. Mid. East
Select 9 credit hours of coursework in 300/3000; 400/4000 level WGST courses
Select 3 credit hours of a capstone experience satisfied through any combination of the following:
- Internship 1
- WGST 498 Womens&Gender St Thesis
Or other approved form of capstone learning experience by petition.

Total Credit Hours 30

1 Students may elect to participate in any CASL Internship program with approval from the director of WGST and the Internship Program Director.

Cognates
Six credit hours of upper-level (300/400; 3000/4000 level) coursework in a single CASL discipline. Excluding courses in Women’s and Gender Studies or cross-listed courses with Women’s and Gender Studies, and MATH 385, MATH 386, MATH 387. Cognate courses will provide supporting skills for the study of women and gender. Internships will not be used to satisfy the cognate requirement.

Notes:
1. A maximum of 44 hrs. in WGST may count in the 120 hours required to graduate.
2. At least 15 of the 30 upper level hours required in WGST must be elected at UM-Dearborn.

Minor or BGS/LIBS Concentration
WGST is also available as a minor or as a concentration in General Studies or Liberal Studies. The minor/ concentration requires 15 credit hours of upper level coursework including WGST 303, Introduction to Women’s and Gender Studies.

Writing
(not a field of concentration)
Writing Certificate

Twelve credit hours of writing (at least one course must be COMP or cross listed with COMP; minimum B grade required in each course). Here is a partial list:

- COML/HUM/ WGST 433 Writing Women in Renaissance 3
- COMM 317 Case Studies in Tech Writing 3
- COMM 340 Professional Communication 3
- COMP/ENGL 327 Advanced Exposition 3
- COMP/COMM/ ENGL 364 Writing for Civic Literacy 3
- COMP/COMM/ ENGL 464 Contemporary Rhetorical Theory 3
- COMP/ENGL 468 Read/Writ Young Adult Fiction 3
- COMP 485 Theories of Writing 3
- ENGL/COMP 310 Narrative Journalism 3
- ENGL 323 Advanced Creative Writing 2-3
- FREN 302 Advanced Conversation and Comp 3
- GER 301 Advancing Competencies I 3
- JASS 307 Copy Editing 3
- JASS 310 Narrative Journalism 3
- JASS 315 Media Productn for Metro Comm 3
- JASS 330 Feature Writing 3
- JASS 331 Online Reprting,Rsrch,Writing 3
- JASS 436 Memoir and Travel Writing 3
- JASS 467 Script-Writing Workshop 3
- SPAN 301 Adv Conversation and Comp I 3

Practicum experience required (minimum 30 clock hours; must include substantial writing/editing component). Possible ways to fulfill practicum requirement include:

- Independent Study
- Internship (HUM 485/HIST 3085 )
- Co-op (LIBS 395)
- Peer Consulting in Writing Center
- Community Service Work
- Volunteerism/Civic Engagement

Notes Regarding Writing Certificate Program:

1. Students, at the time that they are completing the Writing Certificate, must submit a Memorandum of Reflection, a sample of written work, and a Writing Certificate Completion Sheet. See LCC Department for details.
2. Courses used toward another major, minor or certificate program may simultaneously count toward the Writing Certificate.
3. A minimum 3.0 GPA in the courses counting toward the Writing Certificate and a minimum 2.0 cumulative GPA are required at the time of graduation and/or posting of the certificate.

College of Business

Vision and Mission

The vision of the University of Michigan-Dearborn’s College of Business is to be the college of choice for quality business education in the greater metropolitan Detroit area, with impact beyond Southeast Michigan.

The mission of the University of Michigan-Dearborn’s College of Business is to serve the diverse people of Southeast Michigan and beyond by providing innovative and experiential education that results in problem solving skills for responsibility and success in a dynamic marketplace.

Our mission is supported by:

- A faculty committed to teaching that supports student development and preparation for a wide range of business opportunities.
- Collaborative research that has sustained impact on the thoughts and activities of our academic and professional colleagues.
- Service by faculty and staff that supports an evolving curriculum and the needs of our students, personnel, community, and external partners.

Since 1959, the College of Business at the University of Michigan-Dearborn has been committed to providing practice-oriented business programs that address the needs of business, industry, and government. Our undergraduate and graduate students are taught by faculty who have close ties with the business community as well as expertise from participating in the business, professional, and academic realms.

The exceptional performance of our faculty has provided that the College of Business is one of only 600 schools worldwide to be accredited by AACSB International, the Association to Advance Collegiate Schools of Business. This accreditation not only speaks to the quality of the faculty but also to the relevancy and practical nature of the courses offered in the College.

When students graduate from the College of Business, they take with them the skills and knowledge to lead in a rapidly-changing business environment, both regionally and nationally. Whether it is through their participation in our internship program or their experiences in iLabs, the College’s Center for Innovation Research, our students gain real experience and are positioned to immediately contribute to their employers’ success and advance their career.

Bachelor of Business Administration Program

The Bachelor of Business Administration (BBA) program is a professionally oriented program that builds upon a strong liberal arts foundation and develops the diversified competencies called for in the management of a modern business enterprise. The program also is designed to impart knowledge of the fundamental administrative skills demanded of the leaders in modern public and private organizations. It also can provide a rigorous preparation for graduate study in management science, business administration, law, and related areas.

Approximately one-half of the course requirements of the degree program are in non-business disciplines and provide the foundation for the professional offerings. These requirements are designed to give the student a more profound understanding of the student’s own heritage, and of the physical and social universes within which the student lives.
They develop the principles and standards of analysis, expression, and conduct.

**BBA Program Learning Goals**

The following Learning Goals have been developed by the faculty in the College of Business. These goals describe what we want all of our students to know and be able to accomplish upon graduation.

1. Students will be knowledgeable about the business disciplines.
2. Students will be effective communicators.
3. Students will be effective team members.
4. Students will be competent in the application of technology.
5. Students will be knowledgeable about global business practice and managing a diverse workforce.
6. Students will be knowledgeable about ethical principles and their application.
7. Students will apply critical thinking skills to business situations.

**BBA Program Planning for UM-Dearborn Pre-business Students**

Programs of undergraduate study in business administration leading to a bachelor's degree involve approximately four years of college study, the first two years of which can be considered pre-professional preparation in foundation courses covering fundamental subject matter. The third and fourth years constitute the more specialized professional phase of the degree program. It is in the offering of this professional phase that the faculty of the College of Business has principal responsibility.

Students seeking the BBA degree who are admitted to UM-Dearborn as freshmen enter the pre-business program of the College of Business. The pre-business program is designed to provide students with a liberal arts foundation. Pre-business students declare their major in the BBA program during the term in which they complete their sophomore year and the specific course requirements. Students not enrolled in the BBA program cannot elect more than 30 credit hours in courses offered by the College of Business.

**Admission**

Admission to the BBA program is competitive and requires that the student has high promise as evidenced by the record compiled in the first two years of study. A student must have completed at least 55 credit hours to be considered for admission to the BBA program. These credit hours must include necessary prerequisites for admission to the BBA program.

Courses required for admission to the BBA Program, including those courses that are prerequisite to the required courses, in which a grade of C- or below has been received, must be repeated during the student’s next academic term. Prerequisite courses are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 105</td>
<td>Writing &amp; Rhetoric I</td>
<td>6</td>

</tr>
<tr>
<td>ITM 120</td>
<td>Bus Prob Solving w/ Comp Apps</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, students must complete a minimum of 12 upper-level business credits.

**Total Credit Hours** 38

1 Including DS 300 and OM 300 with a minimum GPA of 2.80.

Appropriate and timely sequencing of the required math courses is critical for the successful admission to the BBA program. Students, entering as freshmen, are required to have completed math through college algebra or pre-calculus (MATH 104 or MATH 105) by the end of their sophomore year. Freshmen are required to take the math placement exam prior to their first term of enrollment and begin their math courses in their first term of enrollment.

**BBA Program Planning for Transfer Students**

Programs of undergraduate study in business administration leading to a bachelor's degree involve approximately four years of college study, the first two years of which can be considered pre-professional preparation in foundation courses covering fundamental subject matter. The third and fourth years constitute the more specialized professional phase of the degree program. It is in the offering of this professional phase that the faculty of the College of Business has principal responsibility.

**Admission**

A transfer student seeking the BBA degree enters the College of Business as a Pre-business student. The transfer student will complete required courses for admission to the BBA Program. Prerequisite courses are UM-D's:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP 105</td>
<td>Writing &amp; Rhetoric I</td>
<td>6</td>

</tr>
<tr>
<td>ACC 298</td>
<td>Financial Accounting</td>
<td>6</td>
</tr>
<tr>
<td>&amp; ACC 299</td>
<td>and Managerial Accounting</td>
<td></td>
</tr>
</tbody>
</table>

In addition, students must complete a minimum of 12 upper-level business credits.

**Total Credit Hours** 38

1 Including DS 300 and OM 300 with a minimum GPA of 2.80.

The UM-Dearborn Undergraduate Admissions Office provides local community colleges with equivalency tables. These tables should be consulted when planning course scheduling. Transfer students with credit for DS 300 and/or OM 300 from an AASCB accredited school will be required to complete BE 401 and/or FIN 401 as part of the 12 credits of upper-level business credits for admission to the BBA Program.

Admission is based on the quality and content of both the high school and the college academic records, and standards of evaluation are designed to ensure that each student who is admitted has the intellectual capacity and the preparation to pursue advanced undergraduate work.
students. Admission criteria are applied to all students without regard to race, color, sex, creed or national origin.

Students who plan to transfer to the BBA program at UM-Dearborn after completing two academic years of course work should plan to complete most of the General Education requirements prior to transfer. Effective for the incoming freshmen class of Fall 2015, the University has introduced a campus-wide general education experience (Dearborn Discovery Core). Transfer students may follow general education distribution requirements effective Fall 2013 or the new Dearborn Discovery Core. Please refer to the College’s website at: umdearborn.edu/ cob/undergrad-programs for complete information regarding general education requirements.

Appropriate and timely sequencing of the required math courses is critical for the successful admission to the BBA program. Pre-business students are encouraged to take the math placement exam prior to their first term of enrollment. Transfer students must progress with math every full term of their enrollment until they complete the math requirement.

Transfer of Credit
Full credit will be given for all acceptable courses in which a student has earned at least a C grade at an accredited college. A maximum of 62 credits from a community college and a maximum of 75 credits from a non-UM university or college are accepted for transfer; the total maximum number of non-UM credits not to exceed 75. A maximum of 90 credits from another UM unit are accepted for transfer. The minimum number of hours at UM and in the College of Business as stated in the section on BBA Degree Requirements must also be earned.

Michigan Transfer Agreement (MTA)
Refer to this topic under Admissions in the General Information section of this Catalog.

BBA Degree Requirements
The BBA degree will be granted to those students who meet the following requirements:

Satisfactory completion of at least 123 hours of college-level work distributed as follows:

<table>
<thead>
<tr>
<th>BBA Prerequisite requirements</th>
<th>32</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dearborn Discovery Core requirements</td>
<td>16-46</td>
</tr>

<td>31-32</td>
</tr>
<tr>
<td>Major requirements</td>
<td>15-21</td>
</tr>
</tbody>
</table>

1 Transfer students admitted prior to Fall 2016 may fulfill the general education requirements with the Dearborn Discovery Core, Liberal Art Distribution requirements in effect Fall 2013, or with the completion of the Michigan Transfer Agreement (MTA). Please contact an advisor for information.

Electives to meet the minimum 123 credits for graduation will vary student to student. Courses may count for more than one area requirement. Satisfactory completion of 48-61 hours at UM-Dearborn, with the last 30 of 36 credits taken on the UM-Dearborn campus.

Achievement of a minimum 2.0 grade point in all UM-Dearborn coursework, in all courses offered by the College of Business, and in the major.

Total Credit Hours 32

Note: Each incoming student will take the UM-Dearborn Composition Placement Examination. Freshman must take the exam and enroll in the appropriate level of English Composition in their first term of enrollment. Transfer students must take the exam by the sixth week of the first semester in the College of Business. Performance on the exam will determine which writing courses will be required. Excellent performance on the examination may result in the requirement for COMP 105 and/or COMP 106/COMP 280 being waived. Note that demonstrating proficiency does not grant credit for courses not taken.

Note: All incoming freshmen will take the UM-Dearborn Mathematics Placement Exam and enroll in the appropriate level of math their first term of enrollment. Transfer students without credit for college algebra or pre-calculus or higher level math are required to take the exam by the sixth week of their first semester and begin math, based on their placement, by their second semester of enrollment. Excellent performance on the examination may result in the requirement for MATH 104/MATH 105 being waived. Note that demonstrating proficiency does not grant credit for courses not taken.

Dearborn Discovery Core – General Education Requirements (16-46 hrs)
Courses that satisfy the Dearborn Discovery Core may also apply towards specific BBA requirements. Please refer to the General Information section of this Catalog for requirements.

Select one: 3-4

| ITM 310 | Info Systems in Management | |
ACC 380/ACC 381 is a requirement for students pursuing an Accounting major

Major Requirements (15-39 hrs)

All BBA students must declare and fulfill the requirements for a major in Accounting, Digital Marketing, Finance, General Business, Human Resource Management, Information Technology Management, Management, Marketing, and Supply Chain Management.

Note: Only one independent study can be applied toward the General Business, Marketing, and Human Resource Management majors. Marketing majors may do more than one if they are iLabs related.

Minor

Students pursuing any degree may wish to complement their academic program with a minor from the College of Business. Courses cannot apply toward both a major and a minor.

BBA Elective Courses

Students must complete a minimum of 123 credits to earn the BBA degree. Elective credits are the non-specific credits each student needs to reach degree completion. College-level courses in any discipline which bear UM-Dearborn or transferable academic credit can apply. College of Business business internships may also apply. Additive credit courses do not carry college-level credit toward program. Courses below the 100 level are additive credit. Non-business co-ops and their related seminars do not carry credit toward a BBA degree.

Additional Academic Information

Office of Student Services

The Office of Student Services helps students make informed decisions about their course of study. To provide this help, the Office offers students current and accurate information on College of Business academic policies and procedures, coordinates academic advising, provides necessary College forms and materials, and reviews students’ academic progress and performance at specified intervals.

The Office offers a systematic program of guidance and advising from admission through graduation. Advising occurs in many forms and at various levels. All newly admitted students are required to attend an orientation advising session prior to their registration in the College. Pre-business students with 55 credits will be required to meet with their advisor each subsequent term until they have declared their major in the BBA degree program. In addition, BBA students, upon reaching 85 credit hours are required to schedule a degree audit advising appointment.

The Office is located in:
168 FCS (Fairlane Center South Building)
19000 Hubbard Dr.
Dearborn, MI 48126

Changes in Course Elections: Add, Drop, Withdrawal Add

A student may add courses during the first two weeks of a full term or the first week of a half term or mini-term. Refer to the Office of Registration & Records website at umdearborn.edu/rr_registration for procedures and dates. Any exceptions for adding courses must be approved by
the Academic Standards Committee of the unit in which the student is enrolled.

Drop
A student may drop courses during the first two weeks of a full term or the first week of a half term or mini-term without penalty. Courses may be dropped during the third through the ninth week of a full term, and through the fourth week of a half term. Refer to the Office of Registration & Records website at umdearborn.edu/rr_registration for procedures and dates.

Students enrolled in a business internship (BI) course are not allowed to drop or withdraw from the course without approval from the Internship Director. Approval to drop courses under circumstances other than stated above will require the approval of the Academic Standards Committee of the College of Business. Petitions to drop a class after the ninth week of a full term or the fourth week of a half term will be considered only under extreme circumstances beyond a student's control, such as illness under the care of a physician which precludes class attendance for periods in excess of a week. Documentation will be required. Failure to receive approval will result in a grade(s) of E for the course or courses.

Withdrawal
Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Course Prerequisites
The faculty has determined the appropriate prerequisites for each course. These prerequisites exist to make sure the student has the specific background necessary not only to minimally complete the course, but also to assure a broad enough background so the student fully benefits from the course. Students must observe all prerequisites in course planning.

Grading System
Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Pass/Fail Grading Option
Students enrolled in the College of Business may elect courses with the pass/fail grading option subject to the following conditions:

This option may not be elected by students on academic probation.

Courses to be taken under this option must be specified at the time of registration or within the regular period for adding courses.

BBA Prerequisite courses and all College of Business courses cannot be elected on a pass/fail basis.

In a course offered exclusively on a pass/fail basis, a passing grade will be recorded as S (and not used in computing a student's grade point average), and a failing grade will be recorded as E (and used in computing grade point average). In a course offered with a pass/fail option, a reported grade of C- or above will be recorded as P, and a reported grade of below C- will be recorded as F. (Whether a P or F is recorded, the grade is not used in computing a student's grade point average.) A student may elect at most two courses on a pass/fail basis, excluding internship courses. Courses which are elected on a pass/fail basis in a manner that does not conform to these guidelines will not accrue toward the degree requirements of the student.

Changing from the pass/fail option to a letter grade or vice versa is not permitted after the first two weeks of a full term or after the first week of a half term.

Absence from Final Examinations
Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Incomplete Course Work
It is the College of Business students’ responsibility to obtain a contract for any incomplete coursework request, regardless of which academic unit the course is in. Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Academic Standing
Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Good Scholastic Standing
To be in good scholastic standing, a student must have a 2.0 cumulative grade point average in all UM-Dearborn coursework, in their major, and in all courses offered by the College of Business.

Unsatisfactory Performance
The records of students enrolled in the College of Business are reviewed at the end of each term by the Academic Standards Committee. Two degrees of scholastic deficiency will be used by the committee to identify a student’s unsatisfactory performance resulting from D and E grades:

probation
withdrawal

Probationary status will be assigned to students who are not in good scholastic standing (cumulative, College of Business, and/or major grade point average below 2.0) but whose records indicate a possibility for removal of deficiencies by continued enrollment. Students are informed of their academic status and required to schedule an advising appointment.

Students whose academic records are so poor as to indicate little possibility of successful completion of their program will be required to withdraw from the College of Business. If the student is enrolled in coursework at the time the withdrawal decision is made, the withdrawal is effective immediately. The student will be informed, in writing, and that term’s tuition assessment will be adjusted to zero.

D Grades
While any D grade (D, D-, D+) is passing, it is not considered satisfactory performance. Any deficiency of grade points (below 2.0 overall average) resulting from one or more D grades must be made up before the student is restored to good standing. If the student receives a D grade in a course that is an important prerequisite for other courses, it is recommended that the course be repeated.

E Grades
Neither credit nor honor points are granted for a course in which a student receives a grade of E.

Coursework at Other Institutions
BBA students must complete a minimum of 30 of the last 36 credits that apply toward the degree program on the UM-Dearborn campus. The following business courses must be elected at UM-Dearborn: OM 300, DS 300, BA 300, FIN 401, and BPS 451. A maximum of three credits in a
student’s major and/or three credits in a student’s minor may be taken outside the UM-Dearborn. Students are encouraged to meet with an advisor if they intend to elect coursework off campus. Please refer to the Registration and Records website: umdearborn.edu/rr_guest/ for complete details on guesting at other institutions.

Repeating Courses
Students may repeat a course up to two times for a total of three attempts. Regardless of whether it is higher or lower than the previous grade(s), the last grade assigned in a course will be used in computing the student’s cumulative grade point average and credits earned toward degree. Please refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Statement on Academic Integrity
The College of Business holds in high value integrity in all relationships and activities. As the College develops students for professional business careers, it must demand not only academic excellence, but academic honesty as well. Students engaged in academic misconduct hurt themselves, their fellow students, the reputation of the College and society as a whole. As such, a culture of zero tolerance for academic misconduct has evolved. Certainly, building a classroom environment that discourages academic misconduct before it surfaces is the ideal. While this can eliminate much of the opportunity for academic misconduct, it is not always sufficient. Consequently, policies that address academic misconduct must be developed. The College’s policy is as follows:

• All cases of academic misconduct in which a faculty member deems is serious enough to penalize must be reported in writing to the Associate Dean. The report should include the student’s name, course, date, brief description of the offense, and the grade sanction. As has historically been the case, the faculty member has the right to decide what the appropriate grade sanction is.
• The faculty member must inform the student of the decision, and provide him/her with a signed copy of the report.
• The student has the right to appeal the decision through existing College and University channels. The Associate Dean will retain all reports of academic misconduct that have been upheld. Decisions are upheld in two ways: when they are not challenged by the student or when the faculty case has been supported through an appeals process.
• All cases are strictly confidential. With the exception noted below, COB faculty, staff and/or the Hearing Board will not have access to this information.
• The Associate Dean will remand any case of repeat academic misconduct by a College of Business student to the School’s Academic Standards Committee for formal action. Except in the rarest of circumstances, two violations will result in expulsion from the College of Business.

Petitions for Academic Action
Each request to the faculty of the College of Business for special academic action relative to credits, requirements, standing, etc., should be entered on the appropriate petition form (available in the Student Services Office) and forwarded, with appropriate documentation, to the office for review by the Academic Standards Committee.

Student Academic Conduct
A student in the College of Business or any student enrolled in a College of Business course will not engage in academic misconduct, including, but not limited to, plagiarism, cheating, fabrication, aiding and abetting dishonesty or falsification of records and official documents as defined in the Statement of Student Rights and Code of Student Conduct. Definitions of prohibited conduct, sanctions, procedures for applying sanctions, and appellate procedures are specifically set out in the Statement.

Student Personal Conduct
Any conduct which can be the grounds for civil or criminal lawsuit shall be subject to sanctions by the College of Business.

Right of Appeal
Refer to this topic in the General Information section of this Catalog.

Change of Degree Programs between Colleges
See Admission under Program Planning for UM-Dearborn Students. Information is available at the College Office.

Class Standing
Refer to this topic under Campus Policies and Procedures in the General Information section of this Catalog.

Grade Reports
Refer to this topic under Reporting of Grades in the General Information section of this Catalog.

Requests for Transcripts
Refer to this topic under Transcripts in the General Information section of this Catalog.

Second Baccalaureate Degree from the College of Business
Students that have already earned a BBA may apply to the Office of Undergraduate Admissions if they want to pursue a second degree. Students must meet current admission criteria. If admitted, a second baccalaureate degree will be granted to those students who meet the following minimum requirements:

Satisfactory completion of the BBA Prerequisite Requirements, Dearborn Discovery Core, BBA Core, and Major coursework required for the degree sought.

Satisfactory completion of at least 33 semester hours of coursework while enrolled in the College of Business as a post-baccalaureate student; at least 21 hours of this course-work must be in courses offered by the College of Business.

Achievement of at least a 2.0 grade point average in all coursework and in courses offered by the College of Business.

Inactive Student Status
A student may be inactive for a maximum of two consecutive terms and maintain eligibility to register. A student who is declared inactive as a result of not being enrolled for any coursework during a 12-month period must apply for readmission to the College. A decision on readmission will be based upon the past performance of the student and enrollment space available in the College at that time. Upon readmission, a student who has been inactive will be required to satisfy any program requirements that have been added in his/her absence.
Internship & Career Management Center (ICMC)

Building a career and building a business are actually quite similar.

To build a business you must identify an unmet need, develop a plan to serve that need, develop a strategy to market your product or service and lastly, ensure that your customer is satisfied. To build a career you must identify where there is an opportunity, develop a personal plan to be able to respond to that opportunity, develop a plan to market yourself and lastly, ensure that you are providing value to the market. We help our students develop a viable career plan that will serve them and their employers in the short term as well as throughout their careers. We are looking forward to working with you and remember, the ICMC - Works4U!

Take Control of your Career!

We help students develop a personal career strategy that helps them:

- Apply the skills and knowledge developed in the classroom
- Continue to build a strong track record of experiences
- Successfully network with other business professionals and executives

Career Development Process

Our process starts when the student enrolls in BA 300 (Career Planning and Development) and then continues through their engagement in the College to Career Coaching Program and/or the Internship Program, and/or other Leadership Development Options and culminates with the successful launch of their career upon graduation.

BA 300 - Career Planning and Development

You are encouraged to register for BA 300 as soon as you are eligible. This course is the entry into all of the services that the ICMC provides. Through many activities and personal reflection opportunities, we help students take control of their careers by:

- Helping them identify their interests and passions
- Identifying ways for them to pursue those passions
- Learning how to effectively market themselves in today's economy

College to Career Coaching

After BA 300 students have several options available to them to help with their career pursuits. One of these options is our College to Career Coaching Program. When a student chooses to participate in this program, we help them connect with mid-level business executives or human resource specialists from industry for the duration of at least one semester. By being able to work closely with these individuals, our students are provided with one on one guidance to help them in the further development and implementation of their personal career plan.

Internship Program

The College of Business Internship Program provides unparalleled opportunities for University of Michigan-Dearborn, College of Business students of all disciplines to enhance their academic experience by applying their education in actual business environments. Through an internship, students apply the skills and knowledge they have developed in the classroom, build a strong track record and enhance their relationship skills with business leaders in the community.

Junior and Senior BBA students as well as Graduate students have the option of pursuing an internship with us, as part of their career strategy.

These students often have the option of considering internships that are either part or full time in several different industries.

The vast majority of our internships are paid. The average salary for undergraduate students is $14/hour and for graduates, it is $16/hour.

Students who participate in the program get the opportunity to:

- Apply classroom theory to actual work situations
- Test out their interests and develop their long-range career plans
- Earn elective course credits toward their degree requirements
- Enhance their marketability after graduation
- Earn money
- Develop experience and maturity by strengthening their resourcefulness, problem-solving skills, self-confidence, self-discipline, and their sense of responsibility
- Potentially gain faster promotions once they are hired, than their non-internship experienced co-workers
- Develop human relations and communication skills through interaction in career settings

For a student to participate in the internship program, the following policies are required:

- Student must sign and comply with an Internship Contract.
- Student must complete BA 300 before they can participate in the program.
- Student must have at least a cumulative GPA of 2.7 in order to participate.
- During the internship, the student will be required to submit periodic updates via Canvas and submit a final paper summarizing their internship experience.
- If a Business Internship course is elected, a grade of Satisfactory or E will be recorded on your transcript once the internship has been successfully completed.
- Internship work commitments can be for one or multiple semesters and are negotiated between the student and the employer.
- Internship Certificates are awarded to students who successfully complete six hours of COB internship credit.

Students enrolled in BI 350, BI 450, or BI 470 are considered to be full-time by the University of Michigan-Dearborn. Students enrolled in these courses must get permission from the Internship office to elect up to two additional courses while on internship.

Students enrolled in BI 355, BI 455, or BI 475 are considered to be part-time by the University of Michigan-Dearborn and are expected to manage their overall course load in a manner that is consistent with the employer's needs and the needs of the student.

For the BBA degree, up to six internship credit hours can be applied to elective courses. Internships are available in all College of Business major disciplines.

Career Counselling

Our office is always open to help students on a one on one basis. Some students drop in for a brief conversation while others schedule a more private counselling session with someone from our staff to help them with the myriad of challenges that they may face in their personal career. Feel free to take advantage of this support whenever you need it.
Placement Support
Finally, as the student approaches their graduation date, we work closely with them to help them understand potential professional certification options, as well as employer development programs, that might help them be even more successful in their careers. We then help connect the student with firms where viable opportunities exist in the field of their choosing.

Get Started!
If you have not done so already, get registered for BA 300 - Career Planning and Development and get ready to take advantage of a valuable process that will help you while in school but also as you graduate and begin to launch your career.

If you have any questions, stop by our office at FCS 146 and we can help you get the ball rolling.

For additional information regarding our programs, please visit the website at: umdearborn.edu/cob/life-cob/internship-career-management-center.

Academic Honors
Dean's List
A student is honored by inclusion in the Dean's List if he or she meets two conditions:

1. has completed at least 12 credit hours in graded coursework toward a degree during the term, and
2. has achieved a 3.50 or better term GPA. The Dean's List is compiled after the fall, winter, and summer terms.

Beta Gamma Sigma
Beta Gamma Sigma is the national honor society for business schools accredited by AACSB-The Association to Advance Collegiate Schools of Business. Membership in Beta Gamma Sigma is one of the highest scholastic honors that a student in the BBA program can achieve. It is based on outstanding scholastic achievement as measured by overall grade point average. Invitation for membership to Beta Gamma Sigma is extended to qualified BBA juniors and seniors in the top 5 percent of their class.

Honor Scholars
Every year, one honor scholar from each major is selected and recognized at the Annual Honors Convocation. Selection is made by the College of Business’s Scholarship Committee based on the students’ GPA and achievement of 90 credit hours or more toward degree.

Chancellor’s Medallion
The Chancellor’s Medallion is awarded at each Commencement Exercise to UM-Dearborn graduates including one from the College of Business. The student is selected by the Scholarship Committee based on his/her quality of character, vitality, intellect, integrity and academic record. The Fall awardee is selected from students who were graduated in August and those who are to be graduated in December. The Winter awardee is selected from students who are to be graduated in April/May.

Graduation with Distinction
Students who are degree candidates in Business and have obtained a cumulative GPA of at least 3.20 but less than 3.60 are recommended for graduation “With Distinction.” Such distinctions are noted on transcripts and diplomas.

Graduation with High Distinction
Students who are degree candidates in Business and have obtained a cumulative GPA of at least 3.60 are recommended for graduation “With High Distinction.” Such distinctions are noted on transcripts and diplomas.

Accounting
The Accounting major provides the student with a foundation to pursue a career in accounting.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Business Studies as a Secondary Major**

(not available to College of Business majors)

The Business Studies major combines foundational courses in business with the liberal arts. It is meant to complement a non-business student’s program of study by offering primary business topics as well as the necessary analytical tools required for careers in management related fields. Students cannot pursue this major either on its own or in conjunction with a business major.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

**Prerequisites to the Major**

ECON 201 Prin: Macroeconomics
ECON 202 Prin: Microeconomics
MATH 104 College Algebra
or MATH 105 Pre-Calculus

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Digital Marketing

Digital marketing is where marketing meets digital media, such as the internet, social media, cell phones and video games. Digital marketing covers activities such as search engine optimization, viral marketing, web analytics, social network marketing, experiment-based market research, and reputation management. Majoring in digital marketing and marketing is not permitted.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)
  • Lecture/Lab Science Course
  • Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Entrepreneurship

The Certificate in Entrepreneurship can complement any field of study.

Gain the tools and skills you need to familiarize yourself with tasks such as market assessment, capital formation, business planning, effective communication, staffing, systems design, financial planning and operations management. This certificate focuses on the research, planning, and strategies that are critical to start a new business, take over a family business, or quickly advance in your field. The program is open to all undergraduate students at UM-Dearborn, as well as guest students with or without college degrees.
Admission

Current UM-Dearborn undergraduate students:

- Open to anyone with a GPA of at least 2.0.
- Must declare the Entrepreneurship certificate by submitting the declaration of certificate form (http://umdearborn.edu/cob/fileadmin/template/som/files/undergrad/docs/Declaration_of_Certificate.pdf) to their academic unit office.

Guest students:

- Open to anyone interested in learning more about entrepreneurship.
- Guest students should fill out the UM-Dearborn guest application (http://umdearborn.edu/gueststudents). Then, notify the College of Business by filling out the declaration of certificate form (http://umdearborn.edu/cob/fileadmin/template/som/files/undergrad/docs/Declaration_of_Certificate.pdf) and send it to cboatin@umich.edu or drop it off in the student services office at 168 Fairlane Center South. (Admission to persons not holding a college degree will be limited to five per academic term.)

Goals of the Certificate

Goal 1: Students will apply a working knowledge of the principles of entrepreneurship to analysis and problem solving. Objectives: Students will be able to:

- 1a Creatively analyze the business environment for opportunities
- 1b Recognize problems and convert them into opportunities

Goal 2: Students will understand how to apply entrepreneurial techniques in an organizational setting. Objectives: Students will be able to:

- 2a Use the entrepreneurial mindset in various business settings
- 2b Apply the concepts of entrepreneurship in their chosen field of work

Goal 3: Students will gain an understanding of the steps that might take in their own entrepreneurial pursuits. Objectives: Students will be able to:

- 3a Identify local resources for starting their own entrepreneurial ventures

Certificate Requirements

The Certificate in Entrepreneurship requires 4 courses or 12 credit hours.

Finance

The Finance major offers flexibility for developing careers in investments, financial institutions and corporate finance. The program offers analytical rigor, theoretical knowledge and teaching methods that stress hands-on applications. Finance internships historically have proven to be among the most numerous and challenging available. Students majoring in Finance may choose an optional concentration in Financial Management or Financial Services.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Financial Planning

The Financial Planning certificate complements a number of fields, such as finance, marketing, accounting, and economics.

Gain the tools and skills you need to familiarize yourself with tasks such as personal financial planning, investment planning, retirement planning, tax planning, estate planning, and risk management. The program is open to all undergraduate students at UM-Dearborn.

Students interested in preparing for the professional financial planning examinations may wish to complete the Financial Planning minor (p. 184), which includes the courses in this certificate program.

Admission

The certificate in Financial Planning is available to current UM-Dearborn undergraduate students:

- Open to any UM-Dearborn undergraduate student with a GPA of at least 2.0.
- Must declare the Financial Planning certificate by submitting the declaration of certificate form (http://umdearborn.edu/cob/fileadmin/template/som/files/undergrad/docs/Declaration_of_Certificate.pdf) to their academic unit office.

Goals of the Certificate

Goal 1: Students will explain the components of financial planning.

Goal 2: Students will be able to develop a retirement savings plan for an individual.

Goal 3: Students will describe an ethics framework for a personal financial planner.

Certificate Requirements

The Certificate in Financial Planning requires 4 courses or 12 credit hours.

</table>

Note that the required courses have a prerequisite (FIN 401). This course is required of College of Business students but would be an addition to the 12 credit requirement for most students not in the College of Business.

General Business

The major in general business has been designed for students seeking a broad business background rather than a specialization in any one functional area of business. Coursework to complete the General Business major must be upper division business credits beyond the BBA core (excluding business internship). General Business students will not be permitted to combine this major with any other College of Business major.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)
Human Resource Management

The Human Resources Management major courses are designed as fundamental preparation for positions in human resource management, industrial relations, or general management. A Human Resources Management major would also be valuable to students who are not contemplating a career in human resources, as these courses provide knowledge and skills for selecting, developing, motivating, retaining, evaluating, and directing employees - skills needed by managers in any technical or business domain.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Human Resource Management

The Human Resource Management major courses are designed as fundamental preparation for positions in human resource management, industrial relations, or general management. A Human Resources Management major would also be valuable to students who are not contemplating a career in human resources, as these courses provide knowledge and skills for selecting, developing, motivating, retaining, evaluating, and directing employees - skills needed by managers in any technical or business domain.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
• Lecture/Lab Science Course
• Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

MATH 104 College Algebra 4
or MATH 105 Pre-Calculus

Minor Requirements
ACC 298 Financial Accounting 3
ITM 310 Info Systems in Management 3
MKT 352 Mktg Principles and Policies 3
OB 354 Behavior in Organization 3
Plus three courses from at least two disciplines from ACC 299 and/or
any 300-400 level courses offered in the College of Business. 9

Total Credit Hours 21

Marketing
Marketing covers the creation of new products and services, the
distribution of products from suppliers and manufacturers down to
the final consumers, the pricing of products, as well as advertising,
sales, and other promotional initiatives. The marketing major provides
students an opportunity to develop skills for careers in marketing
management, advertising, sales, marketing research, new product
development, retailing, international business, purchasing, management
of nonprofit organizations, and general business management. Their
functional visibility enables high-achieving marketing persons to be aptly
recognized, promoted, and compensated. Marketing is also an excellent
major for students who are considering starting their own business.
Majoring in digital marketing and marketing is not permitted.

Prerequisites for all courses must be met. Students not enrolled in the
College of Business BBA program cannot elect more than 30 credit
hours in courses offered by the College of Business. BBA students must
complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC)
course is 2.0. The minimum GPA for the program is 2.0. In addition, the
DDC permits any approved course to satisfy up to three credit hours
within three different categories. Please see the General Education
Program: The Dearborn Discovery Core (p. 16) section for additional
information.

Supply Chain Management

The major in Supply Chain Management provides students with opportunities for careers in e-business, startups, manufacturing, high tech, service and consulting companies. Supply Chain Management encompasses a set of approaches utilized to efficiently integrate suppliers, manufacturers, warehouses and stores so that merchandise is produced and distributed at the right quantities, to the right locations, and at the right time, in order to minimize system-wide costs while satisfying service level requirements. SCM is an interdisciplinary field that emphasizes cross-functional links and seeks to manage those links to enhance a company’s competitive advantage.

Prerequisites for all courses must be met. Students not enrolled in the College of Business BBA program cannot elect more than 30 credit hours in courses offered by the College of Business. BBA students must complete 12 credits outside their major to earn a minor.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

College of Education, Health, and Human Services

History of the College

Shortly after UM-Dearborn opened in 1959, a small teacher certification program was added to the liberal arts division. By 1969, under the leadership of its first faculty chairman, Paul D. Carter, the teacher certification program had grown into one of the largest academic departments on the campus. With the academic reorganization of the campus in the spring of 1973, the department became the Division of Urban Education with its own regentally appointed associate dean, Richard W. Morshhead. By 1987, the Division of Urban Education had become the School of Education led by Dean Morshhead, and, soon, the School was granted authority to offer graduate programs, which expanded under subsequent deans John Poster (who served from 1990 to 2005), Paul Zionts (2005 to 2009), and Edward Silver (2010 to 2013). Graduate degree programs in the unit now include a MA in Early Childhood Education, an MA in Education, a MA in Educational Technology, an MA in Teaching, an MS in Science Education, an MA in Educational Leadership, an MED in Special Education, an Education Specialist and a Doctorate of Education. During the 2012-13 academic year, the Regents of the University of Michigan approved a change in the scope and the name of the School of Education, and, since September 1, 2013, the unit has been known as the College of Education, Health, and Human Services (CEHHS). The CEHHS fosters connectedness among the academic endeavors in the unit, providing a unique focus on the interrelated nature of education, human health, and human services. In this way, the College mirrors the intermingling of these spheres in the lives of the professionals who work within them, and addressing the historically fractured nature of the preparation of professionals in these critically important fields.

Online Catalog

Through a partnership with the UM-Dearborn Mardigian Library, the catalog for books in the CEHHS Curriculum Knowledge Center is now online. To search the catalog, simply go to the Mardigian Library site and access “Library Catalog.” Books in the CEHHS CKC will be so designated in the library search.

Dean's Office

Janine E. Janosky is Dean of the College of Education, Health, and Human Services. Laura Reynolds is the Associate Dean. The Office of the Dean is located in 253 Fairlane Center South Building (FCS), telephone 313-593-5435.

Office of Student Success

The Office of Student Success for The College of Education, Health, and Human Services is located in 262 FCS. All matters relating to College of Education, Health, and Human Services student records and teacher certification are handled in this office. Certification applications and advising appointments can be secured here, telephone 313-593-5090.

Field Placement handles all matters related to practicum, internships, and student teaching and is located within the office of student success.

Undergraduate Degree Programs

The College of Education, Health, and Human Services provides undergraduate students with a number of different program options through bachelor's degrees from two departments. The Department of Education degrees are intended for those wishing to acquire a teaching certificate at the elementary and secondary school levels or for those planning on working with children and families.

Individuals who successfully complete undergraduate degree programs in Elementary Education, Early Childhood Education, Elementary Learning Disabilities and Children and Families will receive their bachelor's degree directly through the College of Education, Health, and Human Services. Students completing Secondary Education programs receive a recommendation for their teacher's certificate through the College of Education, Health, and Human Services. Their degrees will be recommended by the College of Arts, Sciences, and Letters.

The Department of Health & Human Services undergraduate degrees train students in health protection programs that can be applied to individuals, communities and populations.

Undergraduate Degree Program Requirements

The College of Education, Health, and Human Services offers three different baccalaureate degrees: the Bachelor of Arts degree, the Bachelor of Science degree, and the Bachelor of General Studies degree. Where appropriate, these degrees have been combined with programs leading to the Michigan Provisional Teacher’s Certificate.

Bachelor of Arts (AB)

To be recommended for the degree by the faculty, students must satisfy all appropriate residence requirements, distribution requirements, and program requirements. Students seeking secondary certification earn their bachelor's degrees from the College of Arts, Sciences, and Letters; coordinated programs in the College of Education, Health, and Human Services result in the CEHHS faculty’s recommendation for secondary certification.

Students in Health and Human Services can seek additional certification, after receiving their bachelor's degree, through the National Commission for Healthcare Education Credentialing.

Bachelor of Science (BS)

This degree is available through the Department of Education to those individuals seeking a teaching certificate with a major in one of the natural sciences or in mathematics. The degree is also available through the department of Health and Human Services for those majoring in Public Health. It will be granted to those students who earn 60 or more credit hours in mathematics, the natural sciences, health courses,
computer science, or any combination of these, with at least 20 of these
hours in upper division (junior-senior level) courses.

**Bachelor of General Studies (BGS)**

This degree is available to those wishing to pursue the Children and
Families program. To be recommended for a BGS degree, a student must
satisfy campus distribution requirements as well.

**BGS: Two Plus Option**

Students who have completed an associate’s degree in an approved area
at a community college are eligible to apply for admission to the Bachelor
of General Studies degree. Admission, however, is not automatic.

Details regarding any of the programs cited above can be found in later
sections of this Undergraduate Catalog.

**Admission to the College of Education, Health, and Human Services**

**Application Procedure**

Individuals seeking a bachelor’s degree and/or recommendation to the
Michigan Department of Education for a teaching certificate should apply
through the UM-Dearborn Office of Admissions located in the University
Center.

Individuals holding a bachelor’s degree from an accredited institution and
seeking teaching certification through one of the College’s post-degree
programs should apply through the College of Education, Health, and
Human Services Student Services Office, 262 FCS.

**Admission of Freshmen**

Individuals who have qualified for admission as freshmen to UM-
Dearborn and wish to specialize in an elementary school teaching major,
early childhood education, learning disabilities, or children and families
will be admitted to the College of Education, Health, and Human Services.
Those who intend to earn a specific secondary school teaching major
are to be admitted for their degree to the College of Arts, Sciences, and
Human Services program.

Any student planning on a career in which the student might be expected
as a matter of course to instruct others or to help others learn could
find some study of education to be a valuable experience. This is
particularly true for those intending to pursue careers in fields involving
human relations and social interaction. Certainly, there can be no better
preparation for assuming some of the responsibilities of parenthood
than a background in education. (See the "Children and Families" degree
program that appears earlier in the Catalog.)

Education courses are ideally suited, in many instances, to serve as
electives as well as cognate studies. Students may elect them either
to augment their general college work or to enrich their own cultural
growth. It is always important that the student consult with the student’s
own academic advisor before electing any college course. Faculty in the
College of Education, Health, and Human Services, however, are available
to help individuals identify education courses which might be of
the most benefit to them. For further information, non-education students
are invited to visit the College of Education, Health, & Human Services
Office of Student Success or contact the College at 313-593-5090 or the
following website: umdearborn.edu/cehhs/cehhs_student_services/

**Academic Advising**

Upon admission to a specific program in the College of Education, Health,
and Human Services, each student is assigned an academic advisor. This
practice is aimed at helping the student plan a course of study that will
fulfill the curriculum requirements in the most efficient manner.

Although all students are responsible for fully understanding the
requirements of the programs they elect, they also are expected to
meet regularly with their advisor. Undergraduates and others seeking
provisional teaching certificates are required to meet with their College
of Education, Health, and Human Services advisor at least once a year.
This procedure ensures that all students are kept abreast of periodic
modifications in the curriculum and in certification regulations. Teacher
certification students enrolled in other academic units at UM-Dearborn
such as secondary certification candidates with a concentration in the
College of Arts, Sciences, and Letters are also expected to comply with this policy.

Department of Education

Education at UM-Dearborn

Education is not one career; it is many. Individuals specializing in education are qualified to pursue a wide variety of attractive and rewarding professions including teaching, corporate training, recreation, social service, and childcare. Wherever there is a need for people specifically prepared to teach others, there is a need for individuals with a background in education.

Still, most college graduates seeking a career in education elect to become classroom teachers. Teaching offers a wide choice of opportunities to work with persons of different age levels in a variety of specialized fields. It is a satisfying career for those who like to inspire growth in others and continue their own development.

Students admitted to any of the education programs offered at UM-Dearborn are provided with an academic and professional background suited to the challenges of education in a multicultural society. For further information, please visit the College of Education, Health, and Human Services website at http://umdearborn.edu/cehhs/.

Accreditation

The College of Education, Health, and Human Services’s teacher certification and professional development efforts are presently approved by the Michigan’s Department of Education (MDE), the Teacher Education Accreditation Council (TEAC) and, for our Early Childhood Education Center, by the National Association for the Education of Young Children (NAEYC).

All its programs have passed - and will continue to be subject to the ongoing approval of - the Michigan Department of Education. This required approval enables us to offer programs and make recommendations resulting in state-issued certification of teachers and in the state-issued endorsement of such certified teachers in any of a number of subject areas at the elementary and secondary level.

The University of Michigan-Dearborn Educator Preparation Program, which is designed to produce graduates who are knowledgeable in their content areas and their use of pedagogy with diverse learners and who are prepared to become caring and reflective professionals, is granted Accreditation by the Teacher Education Accreditation Council (TEAC), a subsidiary of the Council for the Accreditation of Educator Preparation (CAEP), for a period of seven years, from 2012-2019. This accreditation certifies that the program has provided evidence that it adheres to TEAC’s quality principles.

Regarding the authorizing authority for the CEHHS’s Early Childhood Education Center, the National Association for the Education of Young Children’s (NAEYC’s) voluntary accreditation system has set standards for early childhood education programs and helped interested parties identify high-quality educational programs for young children. NAEYC fully recognizes the Early Childhood Education Center of UMDearborn’s CEHHS.

Department of Health and Human Services

Our Work: Education, Health, and the Human Services

The College of Education, Health, and Human Services aims to prepare and sustain exemplary practitioners and administrators for work in the interrelated fields of education, human health, and human services. We do this through emphasis on scholarship, diverse clinical experiences, and practice in effective service delivery.

The College draws broadly upon institutional resources including faculty and programs in other colleges of the University. Additionally, facilities in local school districts, health-related settings, and other public agencies and private corporations regularly provide students with a spectrum of rich experiences.

The College contributes to the University of Michigan-Dearborn’s identity as a dynamic metropolitan university where teaching and research interact to develop leaders and new knowledge in the tradition of the University of Michigan and in pursuit of impact in the metropolitan region.

Students in the College of Education, Health, and Human Services participate in the affairs of the unit in a variety of ways including programmatic advisory committees, student groups such as the Student Michigan Education Association (SMEA), and honor groups like the Phi Lambda Theta.

Course Offerings

Courses offered by the College of Education, Health, and Human Services are numbered following the general course numbering system. Courses numbered 100–299 are lower-division courses. Courses numbered 300#499 are undergraduate upper-division courses. Courses numbered 500 and above are graduate courses.

Each education course also carries an alphabetical letter designation. This designation reflects the course’s location in the subject-matter classification system used by the College of Education, Health, and Human Services.

In designating courses on election forms, etc., students should use the word "Education" followed by the course letters, then the number of the particular course (i.e., Education, or EDA 340.)

Students must have junior standing (completion of at least 55 semester hours of credit) before they may elect courses for education credit. This regulation does not pertain to the following courses: EDA 340, EDC 240, EDC 241, LIBR 465, LIBR 470, and EXPS 410.

Majors
- Child Life (p. 199)
- Community Health Education (p. 200)
- Educational Studies (p. 203)
- Elementary School Certification Program (p. 204)

Majors Offered:
- Early Childhood (p. 202)
- Language Arts (p. 210)
- Mathematics Studies (p. 210)
- Reading (p. 211)
- Science Studies (p. 211)
- Social Studies (p. 212)
- Special Education (p. 212)

Minors Offered:
- English as a Second Language (p. 209)
- Language Arts (p. 210)
- Mathematics Studies (p. 210)
- Reading (p. 211)
- Science Studies (p. 211)
- General Studies (Children and Families) (p. 214)
- Health Policy Studies (p. 216)
- Instructional Technology (p. 219)
- Public Health (p. 224)
- Secondary School Certification Program (p. 226)

Minors
- Health Policies Studies (p. 218)
- Public Health
- Social Work

Certificates
- Addiction Studies (p. 198)
- Behavioral Analysis and Mental Health (p. 199)
- K-8 STEM2 Teaching (p. 220)
- Pre-Professional Health (p. 223)
- STEM2: Multidisciplinary (p. 225)

Post-Degree Programs
- Certification Only Program (Elementary-COE, Secondary-COS (p. 221))
- Professional Education Certificate Program (PEC) (p. 221)
- Enhancement Program (EP) (p. 221)
- Post-Degree Programs in Early Childhood (p. 221)
- Endorsement Programs (Early Childhood (ZS) and English as a Second Language (NS) (p. 221)

Administration
Janine E. Janosky, PhD, Dean
Laura Reynolds, PhD, Associate Dean
Paul Bielich, MLS, Instructional Learning Manager
Karen Claiborne, MPA, Administrative Specialist
Judy Garfield, Customer Service Assistant
Jonathan Larson, MA, Academic Advisor
Claudia Lugo-Meeks, MEd, Instructional Learning Assistant
Elizabeth Morden, Customer Service Assistant
Joann Otlewski, Regional School Registrar (Teacher Certification)
Lori Petrick, Assistant to the Dean
Tahnee Prokopow, MPH, Director of Health Professions Advising
Julie Stahl, Administrative Assistant
Lindsey Tarrant, MA, Student Success Supervisor/Academic Advisor
Carolyn Williams, Field Placement Coordinator

Chairs and Directors

Academic and Professional Standards

All matters in the College of Education, Health, and Human Services having to do with maintaining academic and professional standards are handled by the Professional Standards Committee or by the College’s Executive Committee. The Executive Committee is responsible for acting in the place of the Governing Faculty on matters related to any of the College’s instructional programs.

The Professional Standards Committee is responsible for acting on student petitions and other similar academic requests. Students may initiate petitions to the committee by securing appropriate forms in the Office of Student Success. Such petitions must be signed by the student’s education advisor before submission to the Professional Standards Committee. Both committees meet regularly throughout the academic year.

Policy Changes

College of Education, Health, and Human Services policies change periodically. This occurs when teacher certification and/or graduation requirements are changed by the Michigan Department of Education, by the wider campus community, or by the College of Education, Health, and Human Services itself. The primary responsibility for being aware of program requirements and for meeting appropriate standards rests with the student. Students are encouraged to review current policies, graduation, and certification requirements with their advisors through required annual advising. For information regarding academic advising see the General Information section of this Undergraduate Catalog.

Statement of Student Rights and Code of Student Conduct

The College of Education, Health, and Human Services adheres to the University policies regarding the Student Academic and Non-Academic Code of Conduct that were approved by the Senior Officers on May 11, 1994. Refer to this topic in the General Information section of this Undergraduate Catalog for further information.

In addition the College of Education, Health, and Human Services at the University of Michigan-Dearborn holds high value and expectations in all academic undertakings. As the College of Education, Health, and Human Services trains students to educate and serve as role models for future generations, it demands academic excellence and honesty. The values of an academic community are grounded in the honesty of one’s efforts and respect for the efforts of others. Students who engage in academic misconduct have a pernicious effect upon themselves, their fellow classmates, the reputation of the College and the University, society, and the future generations that are taught by these individuals. Academic integrity is expected in all aspects of coursework, relationships with fellow students, and the use of all University resources. Procedures describing the processes of adjudication and the jurisdiction of the CEHHS Academic Hearing Board are described on the CEHHS Student Resources web page.

Residency Requirements for Transfer Students

All individuals entering the College of Education, Health, and Human Services as transfer students must complete a major part of their total college work in residence at UM-Dearborn. This limits the number of semester hours that are transferable to UM-Dearborn from other institutions. The maximum amount of transfer credit allowed in any such program will depend on the type of institution at which the credit originally was earned. Typically, more credit can be transferred from a four-year institution and used toward a degree program than from a community college. The admission criteria are applied to all students without regard to race, color, sex, national origin, or creed. The table below details the College’s transfer credit policy.

In the table below, institutions attended by students prior to their enrollment in a degree program at UM-Dearborn are grouped into three categories. Category A includes all two-year institutions; category B includes all four-year institutions other than the schools and colleges of the University of Michigan (UM); category C is composed of those schools and colleges of the UM which are not located on the Dearborn campus. Maximum transferable credits and minimum residence requirements (both in semester hours) are given.

<table>
<thead>
<tr>
<th>Categories of Previously Attended Institutions</th>
<th>Transferable Credits (Maximum)</th>

<td>38</td>
</tr>
</tbody>
</table>

Courses successfully completed prior to transfer may not correspond exactly to those offered by UM-Dearborn or the UM. Therefore, a broad policy has been established to evaluate them. If, after such evaluation, the student believes that proper weight has not been given to the courses completed prior to transfer, the student should contact the College of Education, Health, and Human Services Office of Student Success for re-evaluation. No course in which a student received less than a grade of C, or has been graded on a pass/fail or satisfactory/unsatisfactory scale, will be transferred. No courses elected in the professional component (education courses) during the freshman and sophomore years are admissible to the program, except as general elective credit. Transfer students must meet all residence requirements. The exceptions to this ruling are those persons who complete the Pre-Elementary Associate Degree or the PreSecondary Associate Degree at Henry Ford College.

Courses at Other Institutions

Once admitted to UM-Dearborn and to the certification program, students are expected to complete their programs of study at UM-Dearborn. When documentable, extenuating circumstances occur, students must request permission to take off-campus courses using the established petition process in the College of Education, Health, and Human Services. Forms and information regarding deadlines are available in the College of Education, Health, and Human Services Office of Student Success.

Class Standing and Course Election

The number of credit hours earned toward graduation at the end of any given term determines a student’s class standing. In the case of transfer
hours, only the credit accepted toward a degree can be used in deriving the class standing of a student. Freshmen and sophomores are classified as lower-division students while junior and seniors are considered upper-division students.

Class Standing
First two years of pre-professional study: Lower-division students

<table>
<thead>
<tr>
<th>Class</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 24 credit hours</td>
</tr>
<tr>

<table>
<thead>
<tr>
<th>Class</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Junior</td>
<td>55 to 84 credit hours</td>
</tr>
<tr>
<td>Senior</td>
<td>85 to 128+ credit hours</td>
</tr>
</tbody>
</table>

Authorization to elect education courses in the professional sequence of courses at the University of Michigan is limited to upper-division students in good academic standing. Students must have at least junior class standing (55 semester hours), a cumulative GPA of 2.75, have taken the Campus Composition Placement Test, and passed the MTTC Professional Readiness Examination or alternative scoring measures.

Academic Standing
Students should consult the General Information section of this Undergraduate Catalog on campus-wide policies governing scholastic standing. The College of Education, Health, and Human Services reviews the records of all its degree students at the end of each term. If a certification student’s grade point average for one term drops below 2.75, the student is placed on academic probation and may not register for education methods courses in the professional sequence. If the overall average remains below 2.75 for another term, the student may not be allowed to register as a student in a teacher certification program. Other undergraduate students (those not seeking a teaching certificate) must maintain a grade point average of at least 2.5.

Maximum Credit Hour Loads
Students electing more than 18 credit hours in a full term (Fall, Winter, Summer) must have written permission from the College’s Dean. If the student’s GPA is below 3.0, this practice is especially discouraged. Students enrolled in the student teaching term must petition to elect any courses other than student teaching and its accompanying seminar.

Grades of Incomplete and Absence from Final Exams
A student must request permission to have an "incomplete" mark (I) or an "Absent from Final Exam" mark (X) appear on his/her transcript by obtaining an Incomplete Request/Contract form from the College of Education, Health, and Human Services Office of Student Success. This form must be taken to the instructor for approval and signature. These marks are not automatically assigned. The instructor will determine the time limit if it is to be less or more than the four-month campus deadline for "Incompletes" and less than five weeks for the final examination. If the deadline date stated in the contract is not met, these marks will automatically convert to an E.

Pass/Fail Grading Options
The College of Education, Health, and Human Services allows students enrolled in any program to use the pass/fail grading system. However, this is limited to elective credit only and rules specific to each program or specialty may require grades other than "pass" in pertinent courses. Note the following conditions for enrolling in pass/fail courses:

1. The student cannot be on academic probation.
2. The student may elect a total of two courses on an optional pass/fail basis toward the academic program.
3. Only one pass/fail course may be elected during a term.
4. Education courses, when used in a student’s professional education sequence, may not be elected on an optional pass/fail basis.
5. Distribution requirements may not be elected on an optional pass/fail basis.
6. Courses offered only on a nongraded basis are not regulated by this policy.
7. Courses in a student’s teaching major and/or minor may not be elected for optional pass/fail credit.
8. The optional pass/fail grade will count for residency, certification and degree requirements but will not enter into the computation of a student’s grade point average.
9. Courses taken for optional pass/fail credit must be specified on the registration form or otherwise identified within the usual time permitted for adding classes. After the add/drop period has elapsed, the student is not permitted to change from a pass/fail to a letter grade or vice-versa. Students may drop an optional pass/fail class within the usual add/drop period. Petitions requesting a change of pass/fail to a letter grade or vice-versa will not be accepted after the first two weeks of the term.

For further information, refer to other sections in this Undergraduate Catalog.

Honors
Graduating with Distinction
At the time of graduation, the College of Education, Health, and Human Services honors its academically outstanding undergraduate degree candidates by recommending that they graduate with either distinction or high distinction. Those graduating seniors who have achieved an overall grade point average of at least 3.2 will be recommended for a degree with distinction. Those who have achieved an overall grade point average of at least 3.6 will be recommended for a degree with high distinction.

Dean’s List
At the beginning of each term, those students enrolled in a College of Education, Health, and Human Services undergraduate degree program who have established a noteworthy academic record during the previous term are publicly recognized. In conjunction with the Office of Academic Affairs, the Dean of the College publishes the names of those degree students who have earned a grade point average of 3.5 or better while carrying a minimum course load of 12 earned GPA credit hours during the immediately preceding term. Only credit earned at UM-Dearborn is used in determining whether or not a student meets the requirements for this honor.

Other Awards
In addition to the Dean’s List, the College of Education, Health, and Human Services also recommends candidates for other awards. See the General information section of this Catalog for additional awards.
Curriculum Knowledge Center

The Curriculum Knowledge Center (CKC) is a special center and library committed to impacting our metropolitan region in Southeast Michigan through Learning, Teaching, and Outreach. The CKC serves as the gateway to CEHHS for children, families, and teachers to support teaching and learning and serves as a conduit vehicle for enrollment and persistence in college. The CKC operates as a resource for families in low socioeconomic communities by supporting each child’s potential as a future college student and encouraging families to continue their own education through enrolling in college courses or other CKC opportunities.

The Curriculum Knowledge Center (CKC) has a variety of resources, student textbooks and equipment available to develop lesson plans, to fulfill class assignments and design presentations. The resources found in the CKC assist the pre-service teacher in understanding the full scope of what is necessary to become an exemplary teacher and contribute to the success of the education and health and human service students in preparing their coursework. Computers, scanners and software are available for student editing of video presentations. Print materials and study guides for the MTTC are available for check-out. The CKC offers all College of Education, Health, and Human Services students a place to study and complete group projects.

Students are encouraged to use the materials, equipment, and services the facilities provide when preparing for class preparations, practicum assignments, and student teaching. Students who have paid a laboratory fee for a specific course may use the laboratory without any additional charge. Students who have not paid a course fee must pay for the materials they use. Current prices are posted in the Materials Preparation Center. All fees are solely for the support of the Education Laboratories. Two microcomputer labs with the latest educational software are located in Rooms 190 and 194, FCS.

Special Facilities and Services

In addition to campus-wide facilities and services described elsewhere in the Catalog, the following special facilities and services are of particular interest to education students.

Early Childhood Education Center

The Early Childhood Education Center (ECEC), an auxiliary unit of the College of Education, Health, and Human Services, serves as an education and care site for university student, faculty, staff, and community children. The ECEC enrolls over 200 children, ages one through six, per term. Located in a shared facility with Oakwood Hospital’s Center for Exceptional Families (CEF) at 18501 Rotunda Dr. in Dearborn, the two centers collaborate to provide services and programs for children with and without disabilities and their families. The ECEC facility also includes a full day kindergarten and summer programs. The ECEC serves as a teacher preparation facility for students enrolled in a variety of courses offered by the College of Education, Health, and Human Services. The ECEC Advisory Board makes recommendations to the administration regarding policies and decisions related to the center. The center is staffed with teachers having special training in early childhood education and is under the overall direction of a faculty director.

Addiction Studies Certificate

Educational programs in Addiction Studies prepare students for work in the field of substance abuse including such positions as substance abuse counselors, peer support mentors, researchers, criminal justice professionals and clinical supervisors in both the community and in residential settings. Working with individuals with addictive disorders, the objectives are to eliminate dependence on alcohol or drugs and reduce criminal behaviors associated with illicit substances use. Specific proficiencies of the program include skills in assessment, interviewing, counseling and treatment planning within the context of diverse populations.

Goals and Outcomes

Program Goals The Addiction Studies certificate program at the University of Michigan Dearborn prepares individuals to support substance abuse prevention and to counsel individuals and families with drug or alcohol problems. This program will provide instruction in individual and group counseling skills, substance abuse identification methodologies, substance abuse treatment modalities, and substance abuse prevention strategies. Upon completion of this certificate program students will be prepared to take the addiction certificate exam. The learning outcomes for addiction studies certificate program correspond to the Twelve Core Functions and Global Criteria for Certified Alcohol & Drug Counselor (CADC) defined by the Michigan Certification Board of Addiction Professions (www.mcbap.com). Proficiency in these domains will prepare students to sit for the CADC exam. The coursework will enhance student experience in the field which is also a mandatory requirement for certification. Students who complete the Addiction Studies Certificate will learn how to practice the following in health care settings:

1. SCREENING: The process by which the client is determined appropriate and eligible for admission to a particular program.
2. INTAKE: The administrative and initial assessment procedures for admission to a program.
3. ORIENTATION: Describing to the client the following: general nature and goals of the program; rules governing client conduct and infractions that can lead to disciplinary action or discharge from the program; in a nonresidential program, the hours during which services are available; treatment costs to be borne by the client, if any; and client rights.
4. ASSESSMENT: The procedures by which a counselor/program identifies and evaluates an individual’s strengths, weaknesses problems and needs for the development of a treatment plan.
5. TREATMENT PLANNING: Process by which the counselor and the client identify and rank problems needing resolution; establish agreed upon immediate and long-term goals; and decide upon a treatment process and the resources to be utilized.
6. COUNSELING: (Individual, Group, and Significant Others): The utilization of special skills to assist individuals, families or groups in achieving objectives through exploration of a problem and its ramifications; examination of attitudes and feelings; consideration of alternative solutions; and decision-making.

How to Apply

• For current students, please click here for application and admission information. (https://umdearborn.edu/cehhs/fileadmin/groups/10/cehhs_cms_files/academic_programs/applications/Declaration_of_Certificate_R_R.pdf)
• For new students not enrolled in a UM-Dearborn degree program, please click here for application and admission information. (https://umdearborn.edu/cehhs/fileadmin/groups/10/cehhs_cms_files/

Child Life

Students trained in the art of a child’s life are educated to help families and children thrive during life’s most stressful and challenging events. The profession’s emphasis on child development and healthy family coping skills promotes survival and persistence through play, education and self-expression. The importance of family and family support is recognized in the curriculum and promotes the provision of support and guidance for parents, siblings, family members and the child. Child’s life professionals combine both health and education skills by bridging the gap between families, administrators, caregivers, the general public and the child under stress. University of Michigan-Dearborn graduates are fully prepared to certify as Child’s Life specialists through the exam offered by the Child Life Council.

Program Goals

The overall goals of the Child Life Specialist major are to prepared students to:

1. Prepare students with the knowledge and experience to improve the lives of children and families facing traumatic events
2. Address the unique and important cultural dimensions of the metropolitan Detroit area.

Learning Outcomes

The degree in Child Life Specialist will provide a framework for students to:

- Maintain professional and ethical standards of practice
- Promote professional relationships with families, providers and community workers
- Promote the understanding of the special needs of children and families among staff, students, volunteers and the community
- Obtain and use the relevant information regarding developmental and psychosocial factors (e.g., health care, family and child) to inform a plan of care

Career Opportunities

Child’s Life Specialist professionals work to reduce the negative impact of stressful or traumatic life events for children and their families. Students train to promote effective coping through play, preparation, education and self-expression activities. Child’s Life Specialists are place in a broad range of work environments such as:

- Emergency departments
- Surgical and intensive care units
- Special needs camps
- Medical and dental practices

Prerequisites

Prerequisites are ideally taken in the freshman and sophomore years when the student is fulfilling lower distribution requirements. These include:

- CHE 101 Intro to Health Education 3
- CHE 201 Medical Terminology 3
- EDC 240 Psych of Child Development 3
- EDC 241 Psych: Child Devel Practicum 1

Total Credit Hours: 10

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

1 Child Life Internship is required as part of the program and students should coordinate with the Program Director for their placement as the placement must meet specific requirements.

Community Health Education

The Community Health Education (CHE) major is a multidisciplinary program that incorporates biological sciences, health studies, economics, psychology, sociology, and education to promote health and disease prevention by educating individuals and communities on behaviors and actions to improve health and well-being.

CHE offers a comprehensive education that incorporates the seven areas of responsibility for health education specialists as part of the Certified Health Education Specialist examination offered by the National Commission for Healthcare Education Credentialing. Graduates will be prepared to take the certification examination.

Program Goals
The overall goals of the CHE major are to prepare students to:

1. Promote health and wellness in the community and organizational settings
2. Educate and provide information to health consumers that would improve health management and develop disease prevention programs
3. Be actively involved in researching, analyzing, and identifying ways to enhance healthcare services

Learning Outcomes
The degree in CHE will provide a framework for students to:

• Assess the needs of the people they serve
• Develop programs and events for teaching people and communities about health topics
• Understand marketing and communication for health education
• Evaluate and improve effectiveness of health education programs
• Manage health education programs and staff
• Advocate for improved health resources and policies

Career Opportunities
Community health educators work in schools, hospitals, clinics, community organizations, non-profit agencies, companies, and governmental agencies. Career options include:

• Health Education and Planning
• Industrial Health Educator
• Patient Educator
University of Michigan-Dearborn

- Public Health Education
- Youth and Senior Citizen Health Programming and Education

Degree-seeking students are required to fulfill the required courses in effect at the time they are admitted or readmitted to the program. Since these are subject to change, students should see an advisor for current requirements.

Prerequisites
Prerequisites are ideally taken in the freshman and sophomore years when the student is fulfilling lower distribution requirements. These include:

CHE Internship
The practicum course is designed to assist students in launching or advancing a career in community health education. Students will be expected to actively engage at the practicum site and become an involved member of the seminar-based class. Class sessions will emphasize steps necessary for successfully entering and working within the community health field setting. In addition, class sessions will focus on demonstration of health education skills and competencies, exploration of current health issues, understanding the resilient strength of diverse communities, accessing appropriate community resources, learning from peer experiences, and planning for a career as a health education practitioner. Internships are available in several Detroit area health and human service agencies. Student services will work with students for placement once junior status has been achieved.

Capstone Project
The ability to provide quality professional development/training for adults within the fields of health and human services is critical for the effective health educator. It is also essential that practitioners are able to engage in collaboration with other health professionals as they design professional development/training projects. For this capstone project, students will need to work in teams to develop a plan for professional development/training for the adult learners. This coursework and project will include a formal presentation to peers and a paper submission.
Early Childhood Education

The Early Childhood Education Program is designed for those intending to work with children, birth through eight years of age. Within the basic elementary education degree curriculum, it enables students to meet State requirements for a Michigan Provisional Elementary Teacher’s Certificate and the Early Childhood Endorsement (ZS) as well as to gain special competencies in the area of early childhood. It prepares individuals for careers in childcare centers, working with young children and their families, birth through kindergarten, as well as in the elementary grades 1-5. The program includes a concentrated study of the young child in infant/toddler, preschool, and early school contexts with extensive opportunities for field experiences in a variety of settings.

The requirements of the Early Childhood Education Program for undergraduates are as follows:

Total Credit Hours 57

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

Other Requirements

1. The Campus Composition Placement Test (CCPT) is required of all students, i.e., UM-Dearborn undergraduates and transfer students. Transfer students who have been given credit for COMP 105 and COMP 106 but receive a prescription from the CCPE for COMP 099 must enroll in an additional composition course (COMP 227). This test must be taken within the first semester that a student is enrolled in class.

2. Application to the College of Education, Health, and Human Services Certification Program is required of all students. The timing of this application is detailed on the four-phase checklist.

3. The MTTC (Michigan Tests for Teacher Certification) Professional Readiness Examination must be taken and scores must be at the state-approved level or alternative scoring measures for admission.

4. A cumulative GPA of 2.75 on a 4.0 scale is required overall, in the major, in the minor(s), and in the professional sequence courses.

5. All requirements as identified in the College’s four-phase screening program must be met for a teaching certificate recommendation. (See four-phase checklist.)

6. Minimum number of hours to graduate is 128 credit hours.

Early Childhood Major Requirements

A minimum of 34 semester hours from the following:

Early Childhood and Elementary Certification-Professional Sequence

The professional sequence of early childhood elementary education courses consists of:

**Foundations**
- EDA 340 Foundations of American Ed 3

**Psychology**
- EDC 300 Educational Psychology 3
- EDC 412 Social Devl/Pos Guidance Techn 3

**Methodologies (See Note #1 below)**
- EDD 452 Methods of Teaching Math K-8 3
- EDD 468 Teach Read/Lang Arts- Elem Grd 3
- EDD 467 Practicum in Reading Instruct 1
- EDD 471 Reading Instr: Models and Meth 1 3
- EDD 485 Teach Science in the Elem Grd 3
- EDD 495 Social Studies in the Elem Grd 3
- EDD 491 Soc Std Elem Grades Practicum 1

**Professional Semester (See Notes #3 & #5 below)**
- EDD 435 Dir Teaching: Elementary Sch 11
- EDD 437 Sem: Teaching Elementary Grds 1

Total Credit Hours 38

1. EDD 468 is a prerequisite for these courses.

**Notes:**
1. Enrollment in all the required EDD courses is open only to those who are officially enrolled and in good academic standing in a certification program at UM-Dearborn.
2. A GPA of 2.75 or better is required overall for the Professional Sequence.
3. A grade of S is required in EDD 411. Also required is one full term of study at UM-Dearborn (12 semester hours). Election of EDF 450 is required prior to directed teaching.
4. Eligibility for directed teaching requires acceptable scores from the MTTC Subject Area Test, “Elementary Education.”
5. Recommendations for all other certification endorsements including major(s)/minor(s) require acceptable scores from relevant MTTC subject area tests.

Educational Studies

The Bachelor of Arts in Educational Studies prepares students to understand the field of education without focusing on teacher certification requirements. This degree program will be beneficial to students who are seeking jobs in non-school settings and want to deepen their understanding about teaching and learning. For example, many community organizations and non-profits work closely with schools and the education of children and adolescents. Other students may be interested in a degree in education that will provide a strong background for a graduate degree in fields such as social work or public administration.

The undergraduate major of Educational Studies will provide a foundation for students in three areas: learners and learning, educational systems, and pedagogy. The major will NOT lead to teacher certification; it is designed to be applicable to anyone interested in learning more about how people learn and how to use the foundational knowledge of education in a variety of different work environments.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundation Studies**

Total credit hours needed for graduation: 120

Elementary School Certification Program

This program has been specifically developed for students intending to teach in either the elementary school or the middle school. It permits them to meet the requirements for both a bachelor’s degree and the Michigan Elementary Provisional Certificate. The curriculum consists of two parts, the first involving academic study, and the second consisting of professional preparation.

Certification

In recommending students for teacher’s certificates, the College of Education, Health, and Human Services functions, indirectly, as an arm of the Michigan Department of Education. All such certificates awarded to students at UM-Dearborn are issued at the request of an appropriate faculty body by the Michigan Department of Education in Lansing irrespective of the particular campus attended (Ann Arbor, Dearborn, Flint).

Elementary Provisional Certificates

The initial teaching certificate awarded the beginning elementary school teacher is the Michigan Elementary Provisional Teacher’s Certificate. This certificate is valid for teaching all subjects in kindergarten through fifth grade and in subject areas (majors and minors) if an endorsement on the certificate has been obtained in grades six through eight. One is also qualified to teach all subjects in self-contained classrooms through grade eight. The Provisional Teacher’s Certificate is valid for six years and may be renewed twice (for three years each time) provided that renewal conditions are met. Legislative or other state action may change these specifications. Therefore, students are advised to contact the College of Education, Health, and Human Services’ Office of Student Success, located in room 262 Fairlane Center South (FCS), to learn of the most recent policies.

General Requirements for a Teacher’s Certificate

In order to be awarded an elementary or secondary provisional teacher’s certificate, students at UM-Dearborn must be recommended for the certificate by the Governing Faculty of the College of Education, Health, and Human Services. The general procedure to be followed in obtaining such a recommendation is outlined below. It should be noted, however, that progression from one step to another is not automatic; students are expected to be individually responsible for understanding and meeting the requirements and provisions of the programs they pursue.

Qualifying for a Provisional Teacher’s Certificate

To qualify for certificate recommendation, an individual must fulfill the following requirements:

1. Earn a bachelor’s degree from UM-Dearborn or another accredited institution with an overall GPA of 2.75; a minimum GPA of 2.75 in the major; a minimum GPA of 2.75 in the minor; and a minimum GPA of 2.75 in the Professional Sequence. Irrespective of where the degree is earned, each candidate shall satisfactorily complete directed teaching and all required methods courses and practica at UM-Dearborn.
2. If acquiring both the bachelor’s degree and a teacher’s certificate from UM-Dearborn, the individual shall complete the degree with the appropriate number of semester hours depending on the program selected.
3. Comply with the four-phase program described below.
4. Meet all Michigan Department of Education Teacher Certificate requirements including state mandated tests.
5. Satisfy the College faculty that the applicant possesses attributes that are necessary and desirable for successful teaching.

College of Education, Health, and Human Services Four-Phase Checklist

The College of Education, Health, and Human Services at the UM-Dearborn is committed to the ideal of quality in the field of teacher education. It recognizes that not everyone who wishes to be a teacher is capable of meeting program requirements that relate to teacher competency. Therefore, the College of Education, Health, and Human Services is selective in admitting students into its teacher preparation programs and in making recommendations for teacher certification. A four-phase screening procedure is employed to help identify those people most likely to perform at the level of excellence defined by the College. Further, this procedure is useful in assisting students with career decisions. The screening procedure is divided into four successive phases, each with its own set of academic and professional admission standards. Students are expected to have successfully met all of the requirements at one phase before entering the next. Each student is responsible for knowing and meeting all program requirements as listed in the Undergraduate Catalog. The “College of Education, Health, and Human Services Four-Phase Checklist” is as follows:
Phase 1 - Admission to the College of Education, Health, and Human Services

Three types of students are considered for admission to the College of Education, Health, and Human Services at this entry level phase:

1. **First time in any college (FTIAC) students**
   - Campus admission standards for SAT, ACT, and high school Grade Point Average (GPA) are used in determining admission.

2. **Transfer students**
   - Campus admission standards are used for students transferring 54 or fewer semester hours. College of Education, Health, and Human Services admission standards (a minimum cumulative GPA of 2.75/4.0 scale) are used for students transferring 55 or more semester hours.

3. **Degreed persons seeking certification only**
   - College of Education, Health, and Human Services admission standards are used for individuals with a bachelor's degree earned at a regionally accredited institution. The individual must have a cumulative GPA of 2.75 or higher in their major, minor, and overall to be admitted to the College of Education, Health, and Human Services and the Teacher Certification Program.

**Important: Fingerprinting and criminal** background checks are required for work in school settings. Such work is required of all certification students. All background checks must be completed in the first semester of admission to the College of Education, Health, and Human Services. Live Scan fingerprinting is being offered by Integrated Biometric Technology (IBT) by appointment only. Instruction/application forms are available at the College of Education, Health, and Human Services Field Placement Office (Room 264 FCS). To make an appointment for your Live Scan fingerprinting, contact IBT at 1-866-226-2952.

**Note:** Admission to a Teacher Certification Program—see Phase 2—is a separate procedure from admission to the College of Education, Health, and Human Services itself.

Phase 2 - Admission to the College of Education, Health, and Human Services Teacher Certification Program

Admission to a College of Education, Health, and Human Services Teacher Certification program (elementary/secondary) requires all of the following:

1. meeting minimum score requirements on the Michigan Test for Teacher Certification (MTTC) Professional Readiness Examination (Reading, Mathematics, Writing) or alternative scoring measures,
2. a minimum of 55 semester credit hours or an earned degree with a cumulative GPA of 2.75/4.0 scale. Grades earned at all institutions are used in this calculation for students transferring into the College of Education, Health, and Human Services with the exception of degreed persons seeking certification only (see Phase 1, number 3),
3. submission to College of Education, Health, and Human Services of results from the Campus Composition Placement Test 313-593-5100 to arrange for the exam), This test must be taken within the first semester that a student is enrolled classes.
4. completion of COMP 105 and COMP 106 (and COMP 227 when required).
5. Major(s) and/or minor(s) must be formally declared on a Change of Degree/Concentration Petition form.
6. submission of completed Application for Admission Teacher Certification Program form (available in College of Education, Health, and Human Services Office of Student Success, 262 FCS). This form includes a statement of intent regarding allowing or not allowing MTTC score reporting to advisors in the College of Education, Health, and Human Services and College of Arts, Sciences and Letters.
7. valid Internet Criminal History Access Tool (ICHAT). A criminal background check will be conducted using ICHAT before placement in any field experience. If any offense is found, students must make an appointment with the Associate Dean.

**Note:** When all Phase 2 requirements have been met, students receive a formal letter of admission to the Teacher Certification Program.

Phase 3 - Eligibility for Student Teaching

Eligibility for directed (student) teaching (elementary/secondary) requires all of the following:

1. passing scores from pertinent MTTC Subject Area Tests. Elementary certification students must pass the MTTC Elementary Education test. Secondary certification students must pass the MTTC tests in their major and their minor,
2. senior student status (minimum of 85 semester hours earned),
3. completion of at least one full term (12 semester hours) of study at UM-Dearborn,
4. a minimum cumulative GPA of 2.75/4.0 scale as well as a minimum GPA of 2.75 in the major(s), minor(s), and the professional sequence, completion of professional sequence courses,
5. submission of a signed “Evaluation of Oral Expression” form to the College of Education, Health, and Human Services Field Placement Office, (264 FCS),
6. attendance at a Student Teaching Application and Placement meeting and submission of all forms distributed,
7. valid TB clearance, criminal background check, CPR certification, and evidence of training for dealing with infectious diseases/blood borne pathogens on file,
8. Valid Internet Criminal History Access Tool (ICHAT). A criminal background check will be conducted using ICHAT before placement in any field experience. If any offense is found, you must make an appointment with the Associate Dean.

Phase 4 - Eligibility for a Recommendation for a Degree and/or a Michigan Teaching Certificate

Recommendation for a degree and/or a Michigan Teaching Certificate (secondary) requires all of the following:

1. submission of completed Degree/Diploma Application form to Enrollment Services /Registration and Records (1169 UC). The form and applicable deadlines are available online at http://umdearborn.edu/rr_apply-graduate. Note: Secondary Certification students must submit their Degree/Diploma Application form as a student in the College of Arts, Sciences and Letters and fill out a Program Completer Form to be submitted to the College of Education, Health, and Human Services certification officer
2. acceptable scores from all relevant Michigan Tests for Teacher Certification (MTTC),
   - to be recommended for any additional major(s), minor(s), endorsement(s), all relevant tests must be taken and passed. Results must be in by the time recommendations are prepared for the state by the UM-Dearborn certification officer.
b. Secondary Certification students: Subject area tests for which student wishes to be recommended. (At least one major and one minor are required.)

3. successful completion of the chosen program, major(s), minor(s), professional sequence, and supplementary requirements,
4. a minimum cumulative GPA of 2.75/4.0 scale as well as a minimum GPA of 2.75 in the major(s), minor(s) and professional sequence.

Based on this record of achievement, a decision to recommend or not to recommend and/or certification will be made.

**Professional Semester/Directed Teaching (Student Teaching)**

Each student enrolled in a teacher certification program at UM-Dearborn, whether pursuing an elementary or a secondary provisional certificate, is expected to spend one full academic term exclusively in professional work. This period of time is called the "professional semester." Directed Teaching (student teaching) and its related seminar serve as the core for this particular term. This entails a full day's teaching load and all school-related activities at a University-negotiated site. Most students elect their professional semester courses during the second half of the senior year. The professional semester for elementary and secondary certification students is as follows:

**Elementary Professional Semester**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDD 435</td>
<td>Dir Teaching: Elementary Sch</td>
<td>12</td>
</tr>
<tr>
<td>EDD 437</td>
<td>Sem: Teaching Elementary Grds</td>
<td>1</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>13</td>
</tr>
</tbody>
</table>

**Secondary Professional Semester**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDD 421</td>
<td>Directed Teach Secondary Sch</td>
<td>12</td>
</tr>
<tr>
<td>EDD 424</td>
<td>Sem: Teaching Secondary Grds</td>
<td>1</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>13</td>
</tr>
</tbody>
</table>

Opportunities for directed teaching are available only in the University's fall and winter terms. Students wishing to elect directed teaching in the fall term are required to attend an application meeting in the preceding September and those desiring to elect it during the winter term are required to attend an application meeting the preceding March. Meeting dates, times, and locations will be posted on the Field Placement Office website and in the Fairlane Center South. Requirements for acceptance into the professional semester are outlined in the Four-Phase program.

**Incompletes, Unsatisfactory Grades, and Withdrawals**

No student will be assigned to, or registered for, directed teaching with incomplete work in the Professional Sequence of courses. Moreover, once a student has been assigned to a directed teaching contact and then has had registration denied because of incomplete work, the student will be prohibited from receiving any future directed teaching assignment for that semester.

Any student, who has withdrawn from or received an unsatisfactory grade in directed teaching, whether through the action of a school district, the University, or by personal choice, will have a request for future placement carefully reviewed by the College's Executive Committee. Reassignment to directed teaching is not guaranteed, nor is it an automatic process.

Students must file petitions for reassignment consideration.

**General Field Placement Policy**

Students in the teacher preparation program are assigned field placements, either as practicum students or as student teachers, in public or private schools. Field placement shall be made in accordance with the policies and procedures set forth by the College of Education, Health, and Human Services and to be in compliance with accreditation standards.

The student is expected to maintain a professional attitude in order to conform to the expectations of the placement school and the University. Appropriate academic preparation is required as outlined in the elementary and secondary programs of the School. Professional responsibilities during the Directed Teaching term are detailed in the "UM-Dearborn Directed Teaching Handbook" which is located on the CEHHS Field Placement website.

The public and private schools exercise the right to screen the University's students. Acceptance or rejection of students is not controlled by the University. A placement school may reject a University student for several reasons, including a lack of placement positions in the school or a determination that the University student's presence in the school or classroom may disrupt or interfere in some way with the educational process.

Currently there is no way in which the University can require the placement school to state specific reasons for rejection.

If a University student is repeatedly denied placement by the field schools, the College of Education, Health, and Human Services will recommend career counseling and terminate matriculation in the teacher certification program.

**Academic Program Requirements (Majors and Minors)**

Students entering this program are required to complete all core courses pre-professional and all requirements for a selected major(s). Academic majors and/or minors can be selected from the following fields: English as a Second Language (ESL)-minor only, Language Arts, Mathematics, Integrated Science, Reading and Social Studies – major only. Students desiring to pursue an Early Childhood major with elementary certification should follow the program outlined under "Early Childhood Education." Students desiring to pursue the Learning Disabilities major with elementary certification should follow the program outlined under "Elementary Education Learning Disabilities Program." Courses in the major and/or minor may not be elected on a pass/fail basis. Courses that apply to the majors and minors are listed below under "Areas of Study for Majors and Minors."

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
  • Lecture/Lab Science Course
  • Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

Core Course Requirements
Core courses are generally completed in the freshman and sophomore year.

Selections must be from courses numbered 100-200 unless otherwise stated.

COMP 105        Writing & Rhetoric I 3
COMP 106        Writing & Rhetoric II 3
ENGL 327        Advanced Exposition 3
LIBR 465        Literature for Children 3
EXPS 282        History & Civics Elem Schools 3
EXPS 283        Geography & Econ Elem Schools 3
EXPS 220        Science in the Elem School 3
NSCI 231        Inquiry: Physical Science 3
NSCI 232        Inquiry:Earth/Planet Science 3
NSCI 233        Inquiry: Life Science 3
EXPS 420        Science Capstone 3
MATH 385        Math for Elem Teachers I 3
MATH 386        Math for Elem Teachers II 3
MATH 387        Math for Elem Teachers III 3

Total Credit Hours 42

1 Two of the three NSCI distribution courses may be transferred to UM-Dearborn. Great Experiments 240, 242, or 340, 342 and NSCI 120, NSCI 121 may not be used to satisfy Science distribution requirements. NSCI 233 and BIOL 100 may not both be elected for credit in the College of Education, Health, and Human Services.

Pre-Professional Requirements
Pre-professional courses are generally completed in the freshman and sophomore year.

EDC 240        Psych of Child Development 3
EDC 241        Psych: Child Devel Practicum 3
EDF 450        Hlth, Nutr, & PE/Clsrm Tchrs 2
EDT 211        Design Tech-Based Learn Solutn 3

EXPS 250        Elem Ed Vis & Perf Arts 3

Total Credit Hours 15

Professional Requirements
The professional sequence of education courses consists of a minimum of 44 semester hours of credit. This concentration of study represents the core of professional preparation. At least two practica are required prior to student teaching. The semester hours are distributed as follows:

Foundations
EDA 340        Foundations of American Ed 3

Multicultural Education
EXPS 410        Multicult in School and Soc 3

Psychology
EDC 300        Educational Psychology 3
EDC 460        Educating the Exceptional Child 3
EDC 417        Mgmt of Classroom Behavior 3

Methodologies (See Note #1 below)
EDD 452        Methods of Teaching Math K-8 3
EDD 468        Teach Read/Lang Arts- Elem Grd 3
EDD 471        Reading Instr: Models and Meth 3
EDD 485        Teach Science in the Elem Grd 3
EDD 491        Soc Std Elem Grades Practicum 3
EDD 495        Social Studies in the Elem Grd 3

Professional Semester (See Notes #3 & #5 below)
EED 435        Dir Teaching: Elementary Sch 12
EED 437        Sem: Teaching Elementary Grds 1

Total Credit Hours 45

1 EDD 467 and EDD 471 are to be taken concurrently. Both require EDD 468 as a prerequisite.

Notes:
1. Enrollment in all the required EDD courses is open only to those who are officially enrolled and in good academic standing in a certification program at UM-Dearborn (junior standing required) with a cumulative GPA of 2.75 or higher.
2. A UM-Dearborn cumulative GPA of 2.75 or better is required overall for the Professional Sequence.
3. Passing the MTTC Professional Readiness Examination or alternative scoring measures is required.
4. Eligibility for directed teaching requires passing scores from the MTTC (Michigan Tests for Teacher Certification) subject area test: Elementary Education.
5. Recommendations for other certification endorsements require passing scores from relevant MTTC subject area tests.

Other Requirements
1. The Campus Composition Placement Exam (CCPT) is required of all students, i.e., UM-Dearborn undergraduates and transfer students. Transfer students who have been given credit for COMP 105 and COMP 106 but receive a prescription from the CCPT for COMP 099 must enroll in an additional composition course (COMP 227).
2. Application to the College of Education, Health, and Human Services Teacher Certification Program is required of all students. The timing of this application is detailed on the four-phase checklist.

3. The Michigan Professional Readiness Examination or alternative scoring measures must be taken and scores must be at the state-approved level for admission.

4. A cumulative grade point average (GPA) of 2.75 on a 4.0 scale is required overall, in the major, in the minor(s), and in the professional sequence courses.

5. All requirements as identified in the College’s four-phase screening program must be met for a teacher certification. (See four-phase checklist.)

6. Minimum number of hours to graduate is 128 semester hours.

**Areas of Study for Majors**

- Early Childhood (p. 202)
- Language Arts (p. 210)
- Mathematics (p. 210)
- Reading (p. 211)
- Science Studies (p. 211)
- Social Studies (p. 212)
- Special Education (p. 212)

**Elementary School Certification Program**

The program as outlined above meets the state’s teacher certification requirements at the time of this writing. However, changes by the University or the State may affect some program requirements. Therefore, the student is strongly advised to inquire about possible changes by checking with their advisor in the College of Education, Health, and Human Services.

**Areas of Study for Minor**

- English as a Second Language (p. 209)
- Language Arts (p. 210)
- Mathematics (p. 211)
- Reading (p. 211)
- Science (p. 212) Studies (p. 212)

**Early Childhood Education**

The Early Childhood Education Program is designed for those intending to work with children, birth through eight years of age. Within the basic elementary education degree curriculum, it enables students to meet State requirements for a Michigan Provisional Elementary Teacher’s Certificate and the Early Childhood Endorsement (ZS) as well as to gain special competencies in the area of early childhood. It prepares individuals for careers in childcare centers, working with young children and their families, birth through kindergarten, as well as in the elementary grades 1-5. The program includes a concentrated study of the young child in infant/toddler, preschool, and early school contexts with extensive opportunities for field experiences in a variety of settings.

The requirements of the Early Childhood Education Program for undergraduates are as follows:

Notes:
1. With the approval of the Early Childhood Program Coordinator, a maximum of six credit hours of freshman and sophomore level transfer courses in early childhood will be considered for general credit toward the early childhood major.
2. An overall GPA of 2.75 or better is required for the major.
3. At least 15 semester hours in UM-Dearborn courses required for a major.
4. A grade of S is required in EDD 411.

Early Childhood and Elementary Certification-Professional Sequence
The professional sequence of early childhood elementary education courses consists of:

Notes:

1. Enrollment in all the required EDD courses is open only to those who are officially enrolled and in good academic standing in a certification program at UM-Dearborn (junior standing required) with a cumulative GPA of 2.75 or higher.
2. A UM-Dearborn cumulative GPA of 2.75 or better is required overall for the Professional Sequence.
3. Passing the MTTC Professional Readiness Examination is required.
4. Eligibility for directed teaching requires passing scores from the MTTC (Michigan Tests for Teacher Certification) subject area test: Elementary certification (elementary education), Secondary certification (major and minor tests).
5. Recommendations for other certification endorsements require passing scores from relevant MTTC subject area tests.

English as a Second Language
Minor Only
Students must demonstrate experience in learning a modern second language or coursework in a modern second language or permission of Program Coordinator or take one semester course in a modern language.

Notes:
1. *EDD 447/EDD 448 is a pre-requisite for EDC 455/EDC 555*
2. *LING 480 or LING 280 is a pre-requisite for LING 461/ENGL 461, LING 561/ENGL 561, LING 482/ENGL 482, LING 582/ENGL 582, LING 484/ENGL 484, LING 584/ENGL 584, LING 474/LING 574 and LING 476/LING 576.*

**General Studies**

The College of Education, Health, and Human Services awards the Bachelor of General Studies degree (BGS) in the following program.

**Children and Families BGS**

The Children and Families Program is a Bachelor of General Studies degree. This program is a four-year degree program without elementary teaching certification, designed for students who wish to pursue careers in child care centers, teaching and administration, social service agencies or in other work with children and families. The 2+2 Children and Families BGS Program is designed to combine selected two-year community college associate degree programs with two years of coursework at the UM-Dearborn. The associate degrees eligible for this program must be covered by articulation agreements between the community college and the UM-Dearborn, College of Education, Health, and Human Services, or are accepted with permission of the Children and Families academic advisor.

UM-Dearborn students may be admitted to the Children and Families Program with a minimum grade point average of 2.5.

**Coursework at Community College**

Credits earned to complete designated community college associate degrees will be accepted for the UM-Dearborn BGS degree as lower-division credit (up to a maximum of 62 hours). Courses not applied toward meeting BGS distribution requirements or program prerequisites will be utilized as elective courses or general credit toward the Children and Families BGS degree. (Examples of the variety of community college associate degrees that could be appropriate for this 2+2 program are: Early Childhood Education and Care, and Family Support Services.) Currently, articulation agreements exist with Henry Ford College, Schoolcraft College, Macomb Community College, Washtenaw Community College and a transfer agreement is in place with Oakland Community College.

**Courses to be taken at UM-Dearborn**

Students must complete Composition 227 (at UM-Dearborn).

Students must complete at least 48 hours in courses numbered 300 or above, of which at least 21 hours must be in the College of Education, Health, and Human Services. Courses must be distributed such that three areas of focus are developed, including: 1) Child Studies (Area I); 2) Behavioral Studies (Area II); and 3) an Elective area (Area III) to be chosen by the student with advisor approval. A minimum of 12 upper-level hours must be in Child Studies (Area I) and 9 upper-level hours in Behavioral Studies (Area II) must be earned at UM-Dearborn.

The remaining coursework at UM-Dearborn (to total the required 58-60) will be elected from either lower- or upper-division courses. These can be used to complete distribution requirements, to meet specific prerequisites, or to meet requirements and strengthen background in the Child Studies area.

To complete the program, students must have a 2.5 grade point average overall, 2.5 in Child Studies (Area I) and 2.5 in Behavioral Studies (Area II), and at least a 2.0 in the Elective area (Area III). A total of 120 credit hours is necessary to graduate.

**Areas of Study**

The student will elect courses in three areas of study, as follows:

<table>
<thead>
<tr>
<th>Area</th>
<th>Subject</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>Child Studies</td>
<td>31-40</td>

Health Policy Studies

The study of social factors and their relationship to the health care system has become increasingly important in recent decades. It is now widely accepted that understanding the social dimensions of health, illnesses, and the health care system is crucial for all the health-related professions and for an informed consumer citizenry as well.

In recognition of its importance, the UM-Dearborn offers a Bachelor of Arts major in Health Policy Studies. This program provides future health professionals with a strong behavioral and social science orientation but also draws on resources in humanities, management, education and engineering. Students study important perspectives that enable them to broaden and deepen their understanding of health care and health systems. The objective is to provide students with analytic frames of reference, as well as research and evaluation approaches that illuminate issues and provide a good basis for approaching problems the health care delivery field. These include the economics and politics of health care delivery, sociological perspectives, cross-cultural comparisons of health care systems, ethical considerations, computer applications, and practical work in aspects of the American system. Much of the course work is developed around a policy orientation.

Students participate in undergraduate coursework that prepares them for health-related work, strengthens their position for admission to graduate programs, and enhances professional socialization. This program is intended for students interested in health services administration, health policy and planning and the health professions such as medicine, dentistry and nursing.

Health Policy Studies (HPS) is also available as a minor and as an area of focus for the Bachelor of General Studies (BGS) and the Bachelor of Arts in Liberal Studies (LIBS).

Joint Programs with Community College Degree in Allied Health and Nursing

Students who have completed an Associate Degree program from an accredited community college in Nursing (RN) or Allied Health (including, inter alia, Health Information Technology, Health Services Manager, Medical Assistant, Pharmacy Technician, Physical Therapist Assistant, Radiography Technician, Respiratory Therapy Assistant, Surgical Technology, and Diagnostic Medical Sonographer), with an overall GPA of 2.5 or higher, may apply for admission to Health Policy Studies through the joint program. Students who have been accepted will be able to transfer up to 62 credit hours of their Associate’s Degree program toward an AB in Health Policy Studies.

Students transferring into HPS under the joint program will have to complete distribution requirements, including prerequisites to the major, major requirements and an HPS track, as set forth in the next sections. The transferred allied health and nursing courses may only be used for the HPS bachelor’s degree; that is, a student who comes to UM-Dearborn through the joint program, but subsequently changes majors from HPS will lose many of the 62 transferred credit hours, retaining only those course credits that would otherwise transfer to UM-Dearborn.

Prerequisites to the Major

The following courses fulfill distribution requirements as well as serve as prerequisite courses for certain HPS core courses.

SOC 200 Understanding Society 3
  or SOC 201 Contemporary Social Problems

ECON 2001 Introductory Economics 3
  or ECON 201 Prin: Macroeconomics

Any 100 or 200 level PHIL course (PHIL 240 preferred) 3

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)

Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)

Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

Major Requirements

The Bachelor of Arts in Health Policy Studies includes three components of requirements: CASL General Education Distribution Requirements (approximately 42 credit hours—HPS students are required to take 6 credit hours in the Behavioral and Social Analysis Area of Inquiry, instead of the usual 9 hours) within which certain prerequisites are taken; Health Policy Studies Core Courses (31 hours) and one of several tracks (15 hours). The degree, like other CASL degrees, requires a minimum of 120 hours, 48 of which are upper division.

Health Policy Studies Core

All HPS majors take 31 hours of core courses. HPS 440 Medical Sociology, should be taken first as it is intended as a gateway course to Health Policy Studies. HPS 410 Social Research Methods, should also be taken early on, as it shows students how to read scientific articles and familiarizes students with basic statistics. HPS 402 Health Policy Studies Senior Seminar is a capstone course for the major, bringing together the various issues raised in the program and looking at both the past and the likely future of the health care system, hence students should enroll for this course after they have taken most of the other HPS courses.

HPS 401 Health Policy Studies Internship should be taken in the senior year.

Total Credit Hours 31-34

1 By permission of the HPS Director by petition

Health Policy Studies Tracks

All HPS majors take a 15 credit hour track. These tracks provide training in areas directly applicable to careers in health care services. Increased public interest in the American health care system has created a demand for administrators in hospitals, neighborhood clinics, long-term care facilities, group practices, ambulatory facilities, managed care entities such as health maintenance organizations (HMO) and preferred provider organizations. Employment in such organizations may require specialized training in management and the social and behavioral sciences.

Students with an eye toward the occupations within these organizations will find an optimal combination of background and skill through completing one of the tracks, below, and thus improve their chances of working successfully in the health care field or enhance their chances of admission to graduate programs.

Some of the courses in the tracks within the College of Business require additional prerequisites, such as accounting courses, ACC 298 and ACC 299; or Principles of Microeconomics, ECON 202; or ITM or CIS introductory courses. Other tracks also include courses that have prerequisites, such as CHEM 225 or BIOL 140.

Total Credit Hours 15

**Individualized Track**

(15 hours)

Students with special interests can design their own tracks in conjunction with the HPS Program Director by petition. Individualized tracks have included gerontology, medical social work, and organizational behavior.

**Notes:**

1. The same courses cannot satisfy both major and minor requirements.
2. The same courses cannot be used to satisfy both HPS core and track requirements.
3. The same course cannot be used in more than one track.
4. Upper level courses, particularly in finance, information systems, and health behavior and education tracks, may require additional prerequisites.
5. Students not enrolled in the BBA program (in the College of Business) cannot elect and/or transfer more than 30 credits of coursework in disciplines offered by the College of Business.

**Health Policy Studies Minor Or BGS/LIBS Concentration**

The Health Policy Studies Program offers a specialization called Health Administration for the BGS major.

The minor or concentration in Health Policy Studies consists of 15 credit hours of upper level HPS courses (excluding HPS 498 and HPS 499). It is recommended that the minor or area of focus include HPS 440, Medical Sociology and, at a minimum, either HPS 456 Health Care and the Law or HPS 442 Medical Ethics.

Premedical students should consider a minor in Health Policy Studies. The International Organization of Medical Sciences Conference of Medical Education addressed a number of issues, including the question of premedical education. The Conference emphasized the need for colleges to offer courses in the social and behavioral sciences so that future physicians would develop an understanding of the larger health care system and the social factors that influence health and illness. Since that time, other national organizations have continued to recommend that pre-medical students should take courses in the social and behavioral sciences that have a focus on the health care system and on the experience of health and illness. HPS offers an ideal set of courses that may be taken as a minor for a student planning on attending medical school. Students should contact the HPS Program Director to...
design a minor that would provide the breadth and depth of a social and behavioral science emphasis related to the delivery of medical care.

**Instructional Technology**

Program Description

The undergraduate major in instructional technology prepares students with regards to developing the knowledge and skills to be able to improve the learning and performance of individuals by using technology across a broad spectrum of employment settings.

This program is also consistent with the mission of the newly formed College of Education, Health and Human Services (CEHHS) with its commitment to excellence rooted in strong academics, innovative research and engaged learning. Students will have the opportunity to engage in real-world learning experiences through internships in professional settings (http://cehhs-updates.blogspot.com/2016/10/cehhs-student-internship-opportunities.html). The curriculum outlined for the undergraduate degree in instructional technology provides students with a choice of a focus in either health informatics or education.

Digital technology is a key factor in almost every industry, business, educational setting and health care environments. Instructional technologists are needed in work places to train employees to use technology efficiently, to learn to use and apply new technologies as they emerge and to create training materials. Therefore, a wide variety of jobs are available for a student with a major in instructional technology including:

- Instructional Designer
- Training Developer
- Computer User Support
- Web-based Training

Instructional Technology is a field concerned with improving the efficiency and effectiveness of learning, performance improvement, and instructional delivery by using appropriate technology. The programs goals include:

- Design instruction using needs assessment
- Apply learning theory to instructional design
- Select a delivery system for the specific learning environment
- Integrate instruction with other factors that influence human performance
- Use technology in support of the development and delivery of instruction

Total Credit Hours for the Major: 36

**Electives (32 Cr. Hours)**

Additional Electives will be required to meet minimum credit hours for graduation. Please refer to Dearborn Discovery Core requirements to ensure these are met.

Total Hrs. for Degree: 120 total credit hours required for graduation.

**Program Notes:**

1. All College of Education, Health, and Human Services undergraduate students are required to take the Composition Placement Test by the end of the first semester they are enrolled in classes.

2. Students transferring in Comp 105 or Comp 106, but receiving the prescription of 099 from the Composition Placement Test, must complete Comp 227 before taking EDD courses.

3. Minimum GPA’s required for program completion: 2.75 cumulative, 2.75 in major, 2.75 in optional minor(s), and 2.75 in Professional Studies.

4. For admission to Phase III of the teacher certification program, passing scores on MTTC Professional Readiness Exam (reading, writing and mathematics) are required.

5. Advising Policy: The student is responsible for complying with requirements described in the Undergraduate Catalog as well as on the Four Phase Checklist. Students are expected to meet with their College of Education, Health, and Human Services advisor at least once a year and in the term prior to graduation.

6. Courses taken on a PASS/FAIL basis will NOT be accepted toward program completion.

7. Minimum number of semester hours required to graduate is 128.

8. CEHHS recommends successful program completers for State of Michigan Teacher Certification however, it is ultimately up to the State of Michigan to issue certificates. Certain offenses on a criminal record can keep individuals from obtaining teacher certification. Please refer to Elementary School Certification Program for additional information. Please refer to Dearborn Discovery Core requirements for Dearborn K-8 STEM2 Teaching Certificate.

9. Must meet Dearborn Discovery Core Requirements see umdearborn.edu/696973/ for details.

**K-8 STEM2 Teaching Certificate**

The K-8 STEM2 Teaching Certificate is designed to enhance students’ content knowledge in science, technology, engineering, mathematics and medicine, to be able to use best pedagogical practices for teaching K-8 STEM lessons, and to successfully integrate the STEM disciplines within lessons and units.

CEHHS students in the elementary certification program elect one content area for a major with about 20% selecting either science or mathematics. The new certificate provides students with the opportunity to take additional coursework in engineering, STEM education, health related courses, as well as science or mathematics. While the UM-Dearborn K-8 STEM$^2$ Teaching Certificate does not lead to a state endorsement, it will provide evidence of the additional preparation in STEM$^2$ for K-8 teachers.

The certificate consists of 15 undergraduate credit hours, including the newly developed EXPS 400: STEM$^2$ Teaching and Learning. Students will participate in exemplary examples of STEM$^2$ curricula and learn how to integrate the STEM$^2$ disciplines within lessons and units for K-8 students.

**Program Goals**

The UM-Dearborn K-8 STEM2 Teaching Certificate has the following goals for students in the program. Students are:

1. Knowledgeable in the content, skills and practices of the STEM2 disciplines.

2. Knowledgeable in the use of pedagogy to integrate the STEM2 disciplines into effective lessons and units.

3. Prepared to be effective educators in K-8 STEM2 teaching.

</table>

Total Credit Hours 24

¹ No more than 2 courses in any one area for a minor except English Literature.

Notes
1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, at least 15 semester hours must be in courses 300 or above; 9 semester hours at 300 or above for a minor.
3. At least 15 semester hours in UM-Dearborn courses required for a major.

Post-Degree Programs
Application forms for any post-degree program can be obtained from the College of Education, Health, and Human Services Office of Student Success (262 FCS) or online at (http://catalog.umd.umich.edu/undergraduate/college-education-health-human-services/post-degree-programs/%20http://umdearborn.edu/cehhs/cehhs_post_cert.html)umdearborn.edu/cehhs/cehhs_post_cert.html.

Certification Only Program (Elementary-COE, Secondary-COS)
Candidates with a degree from an accredited institution and wishing to earn a Michigan Elementary or Secondary Provisional Certificate, must meet the following requirements for these programs:

1. A bachelor’s degree from an accredited institution is required for admission along with acceptable scores on the MTTC Professional Readiness Examination for the post-degree certification only program or the alternative measure. Students must have a 2.75 GPA overall and in their major and minor to be admitted to the College of Education, Health, and Human Services teacher certification program. Once admitted to the teacher certification program, students must continue to maintain a 2.75 GPA.
2. To be eligible for directed teaching (student teaching), students must take and pass the relevant MTTC test: “Elementary Education” test for seekers of elementary certification; the major and minor tests for seekers of secondary certification.
3. When the desired major/minor is incomplete and the GPA for the major and/or minor is between 2.50 and 2.74, a minimum of 12 semester hours for the major and nine (9) semester hours for a minor must be completed with UM-Dearborn courses and the cumulative GPA must be 2.75 or better.
4. Potential candidates must observe established procedures in having their credentials evaluated for the certification program. Request forms are available in the College of Education, Health, and Human Services Office of Student Success. Credentials are evaluated for acceptable majors, minors, and those supplementary courses, required by the program.
5. At least two practica at UM-Dearborn shall be required of all COE/COS students prior to student teaching.
6. A maximum of six semester hours (non-UM-Dearborn courses) will be accepted, if applicable, toward the professional sequence, not including directed teaching or seminar. The cumulative GPA in the professional sequence must be 2.75 or better. No community college courses can be used for credit in the professional sequence of required courses. Grades earned in professional sequence courses must observe the criteria established for directed teaching eligibility.
7. When there is evidence to warrant an adjustment in requirements for an admitted COE/COS student, the Professional Standards Committee will act accordingly. Students desiring re-evaluations may use the established petition process.
8. To be eligible for certification, students must have acceptable scores from the Michigan Tests for Teacher Certification Subject Area Tests for every major, minor and endorsement.
9. No credit toward program is allowable for ROTC and/or physical education.
10. Foreign transcripts must be evaluated by: Educational Credential Evaluators, Inc.
11. An English language proficiency test may be required for non-native English speakers.
12. For all practicums and student teaching, the following are required:
   a. TB clearance,
   b. Criminal background clearance
   c. Evidence of training for dealing with infectious diseases and blood-borne pathogens and,
   d. CPR certification

Individuals entering this program are required to meet the basic certification requirements at the time they are admitted, and which are appropriate for the particular certificate desired. To enroll, it is necessary to apply for admission to the UM-Dearborn as a "Certification Only Student," through the College of Education, Health, and Human Services. Forms are available in the College of Education, Health, and Human Services Office of Student Success.

**Professional Education Certification Program (PEC)**

The Professional Education Certificate Program is for persons with a Michigan Provisional Teaching Certificate wishing to earn a Professional Education Certificate. Upon the expiration of the Michigan Provisional Teaching Certificate, teachers are required by state law to secure a Professional Education Certificate in order to retain a valid teaching credential. In recommending individuals for this certificate, the University forwards requests to the Michigan Department of Education that, in turn, issues the certificate. Application forms for this program are available in the College of Education, Health, and Human Services Office of Student Success (262 FCS) or online at umdearborn.edu/cehhs/cehhs_post_cert/.

**Curriculum**

Individuals already holding a valid Michigan provisional certificate can qualify for a Michigan Professional Education Certificate by completing the 6 semester hour post-degree program offered at UM-Dearborn through the College of Education, Health, and Human Services. This program is ideal for the working teacher who wants to maintain a valid teaching credential but is not interested in pursuing a graduate degree.

The Professional Education certificate program is tailor-made to fit the particular professional needs and goals of the individual student. To meet residency requirements, students must satisfactorily complete at least 3 semester hours of advisor-approved courses in a planned 6-hour program. The entire course of study, however, can be completed at UM-Dearborn by attending classes during late afternoons, early evenings, and summers. Correspondence courses are not accepted.

**Admission**

1. Admission to this post-degree program (PEC) requires formal application to the program, a Michigan Provisional Teaching Certificate, and an approved bachelor's degree. Official copies of transcripts and a copy of the teaching certificate are required.
2. The plan of study is agreed upon with an advisor who will meet regularly with the student to advise and monitor progress of the 6 semester hour plan of work. It is the student’s responsibility to make annual appointments with the advisor.
3. Forms are available in the College of Education, Health, and Human Services Office of Student Success, 262 FCS. A minimum 2.75 GPA is required. Neither teaching experience nor the state reading requirement needs to be satisfied when seeking a renewal.
4. 30 SCECH = 1 semester credit hour = 30 clock hours of DPPD
   Application forms are available in the College of Education, Health, and Human Services Office of Student Success (262 FCS).
5. Correspondence courses may not be used in this program for either renewal or continuing certification.
6. Workshops, online courses, and conferences offering graduate credit must be approved by the Professional Standards Committee prior to enrollment.
7. When the Professional Education Certification Program is being used to earn an additional major/minor or endorsement all required coursework for the major, minor or endorsement must be completed prior to recommendation. Also, the Michigan Tests for Teacher Certification (MTTC) Subject Area Tests must be taken and acceptable scores earned prior to recommendation.

When the renewal of a provisional certificate is desired, six semester hours of approved credit will permit the student to file an application for renewal of the existing provisional certificate. Effective September 1, 2013

**First Provisional Renewal**

Requires completion of one of the following:

- Possession of a current or expired Michigan provisional certificate.
- 6 semester hours in a planned course of study since the issuance of the provisional certificate at an approved educator preparation institution.

or

- 150 State Continuing Education Clock Hours (SCECHs) appropriate to the grade level and content endorsement(s) of the certificate held since the issuance of the provisional certificate.

or

- Combination of semester credit hours and SCECHs (30 SCECHs equate to 1 semester credit hour) since the issuance of the provisional certificate.

or

- Completion of an approved master's or higher degree in areas appropriate to K-12 teaching at any time at an approved educator preparation institution.

**Second Provisional Renewal**

Requires completion of one of the following:

- Possession of a current or expired Michigan provisional certificate.
• 6 semester hours in a planned course of study since the issuance of the provisional certificate at an approved educator preparation institution.

or

• 150 State Continuing Education Clock Hours (SCECHs) appropriate to the grade level and content endorsement(s) of the certificate held since the issuance of the provisional certificate.

or

• Combination of semester credit hours and SCECHs (30 SCECHs equate to 1 semester credit hour) since the issuance of the provisional certificate.

or

• Completion of an approved master’s or higher degree in areas appropriate to K-12 teaching at any time at an approved educator preparation institution.

When applying for the Professional Education Certificate, the student must account for 6 semester hours of approved courses; three years of teaching experience (or the equivalent in substitute teaching) at the appropriate certificate level; and the required semester hours in state-approved reading courses. Effective September 1, 2013

Professional Education Certificate

Holders of a provisional certificate are expected to advance to the professional education certificate. The professional education certificate is valid for up to five years, and it, too, must be renewed.

Requirements for the professional education certificate include:

• Possession of a current or expired Michigan provisional certificate.
• Having taught successfully for the equivalent of three years under the Michigan provisional certificate and within the subject area endorsements and grade level on the certificate (including substitute teaching).
• Presenting evidence of having completed a minimum of six semester hours of reading methodology if the teacher holds an elementary certificate or three semester hours for secondary certificate holders.
• Effective July 1, 2009 - EDC 560 Reading Diagnostics
• And ONE of the following since the issuance of the Provisional Certificate:
  6 semester hours in a planned course of study at an approved educator preparation institution
  150 State Continuing Education Clock Hours (SCECH)
  150 annual District Provided Professional Development (DPPD) hours

Combination of the three

Completion of an approved Master’s Degree or higher at any time.

To be recommended for a Professional Education Certificate, a total of 6 semester hours in approved courses is required with a minimum 2.75 GPA. Effective September 1, 2013

Enhancement Program (EP)

This program (EP) is for persons with a Michigan Permanent, Continuing, or Professional Education Certificate who wish to enhance their certificate with an additional major, minor, or endorsement. Individuals entering this program are required to meet all requirements leading to the desired additional endorsement on their teaching certificate. Additionally, the MTTC Subject Area Test must be taken and acceptable scores achieved before a recommendation can be made to the state. Application forms for this program are available in the College of Education, Health, and Human Services Office of Student Success, (262 FCS) or online at umdearborn.edu/cehhs/cehhs_post_cert.

Endorsement Programs Early Childhood (ZS) and English as a Second Language (NS)

These endorsements are available to certified teachers who wish to enhance their certificates with either an early childhood (ZS), and English as a second language (NS), endorsement. This is a planned program where the selection of courses will vary depending on evaluation of the student’s prior coursework. Those interested in an endorsement can enroll in one of two post-degree programs: Professional Education Certificate (PEC), or Enhancement Program (EP), as described above, or may complete these endorsement programs under a master’s degree plan (some undergraduate courses may be applied toward these endorsements, but will not apply toward a master’s degree).

Post-Degree Programs in Early Childhood

Post-degree students wishing to obtain Michigan Elementary Teaching Certification and persons with provisional certificates wishing to maintain certification validity and to qualify for the Michigan (Early Childhood Endorsement (ZS) are also eligible for admission to the Early Childhood Education Program. All relevant Michigan Tests for Teacher Certification (MTTC) are required. Course requirements for these students will vary according to the individual undergraduate coursework of the student. Students working toward the M.A. degree and/or the Professional Education Certificate can qualify for the Michigan Early Childhood Endorsement (ZS) by pursuing appropriate coursework. Upon the student’s successful completion of a prescribed Early Childhood sequence and a passing score on the MTTC Early Childhood test, the College of Education, Health, and Human Services will recommend to the State of Michigan that the student is qualified to receive an Early Childhood Endorsement (ZS) on the student’s Elementary Teaching Certificate.

Inquiries for additional information and program guides can be directed to the College of Education, Health, and Human Services Office of Student Success, 313-593-5090.

Public Health

The Program
Public Health focuses on improvement and protection of the health of local, regional, and national populations through research and development of public health programs. The Public Health major prepares students for a wide range of public health positions and offers a solid foundation to pursue an advanced degree. The program employs an interdisciplinary foundation of public health practice, health policy, health economics, health administration, education, and advocacy. It provides a framework for students to conduct research, analyze data, apply classroom learning, and develop and implement interventions to improve overall health and disease prevention for diverse populations.

Program Goals
The Public Health degree is designed to provide students with an interdisciplinary education on the principles of public health and prevention based on the guidelines set forth by the American Public Health Association (APHA). These include:

- Investigative techniques and procedures to identify factors affecting population health in local and regional communities
- Design interventions that target factors affecting population health in local and regional communities
- Participate in cutting-edge research regarding health disparities, health inequities, health promotion and prevention of disease

Learning Outcomes
Students will acquire broad-based knowledge and a grounded approach to research that includes a strong foundation in research methodologies, the ability to analyze and integrate data from multiple sources, and hands-on exposure to conducting community-based research.

Career Opportunities
With the new requirements in the Affordable Health Care ACT, a bachelor’s in Public Health offers graduates unique career opportunities in areas that focus on improvement and prevention in public and private organizations. These include:

- Community-based public health organizations
- State and local government agencies and health departments
- Outreach agencies
- Legislative and public health advisory roles
- Health advisory roles in business and corporations

The Major
Degree-seeking students are required to fulfill the required courses in effect at the time they are admitted or readmitted to the program. Since these are subject to change, students should see an advisor for current requirements.

Prerequisites
Prerequisites are ideally taken in the freshman and sophomore years when the student is fulfilling lower distribution requirements. These include

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**STEM2: Multidisciplinary Certificate**

A Multidisciplinary Certificate in Science, Technology, Engineering, Mathematics and Medicine

The STEM®: A Multidisciplinary Undergraduate Certificate is designed to enhance students’ content knowledge in science, technology, engineering, mathematics and medicine, and to assist students in integrating their knowledge of each of these disciplines.

Students with this certificate will be well prepared to work for industrial firms that perform outreach activities into K-12 classrooms. They would also be ideal candidates for employment by museums of science and/or industry which seek employees who can work with K-12 students by leading activities or by designing interactive exhibits exploring the intersections of science, technology, engineering, mathematics and health. Secondary teacher certification students may choose this certificate to gain multidisciplinary knowledge of STEM® in addition to their selected major/minor for teaching.

The UM-Dearborn certificate, which requires a minimum of 15 credit hrs, includes a broad, multidisciplinary group of courses to provide foundational knowledge for students interested in STEM®: Science, Technology, Engineering, Mathematics and Medicine.

**Program Goals:**

The UM-Dearborn STEM2: A Multidisciplinary Undergraduate Certificate has the following goals for students in the program. Students will be:

1. Aware of the nature of STEM2 disciplines.
2. Knowledgeable in issues related to STEM2 disciplines in education and society.

To view application forms and admission information, please click here.

Select One STEM2 Course: 3
EXPS 400 STEM2 Teaching and Learning 3
EXPS 450 Issues in STEM2 and STEM2 Ed 3

Select the Engineering Course:
ENGR 100 Intro to Eng and Computers 2

Select One Additional Science Course with Lab: One Natural Sciences course beyond the 7 credit hours required for the Dearborn Discovery Core 4

Select One Statistics Course:
STAT 263 Introduction to Statistics 3

Select One Medical/Health Course: 3
CHE 101 Intro to Health Education
HHS 200 Introduction to Public Health
HPS 430 Health Behavior & Health Educ
HPS 442 Medical Ethics

Total 15 Credit Hours Required

Certificate Requirements:
1. Current enrollment at UM-Dearborn
2. An overall GPA of at least 2.75
3. Completion of the Declaration of Certificate form
4. Completion of the required coursework with a GPA of at least 2.75

Secondary School Certification Program

Secondary School Certification Program

UM-Dearborn students may earn a bachelor’s degree while securing a recommendation for a Secondary Provisional Teacher’s Certificate. These programs are intended for those who wish to teach in either a middle school or senior high school. Students in this program will have two advisors, one in the College of Arts, Sciences, and Letters (CASL) to help plan the degree program and another, in the College of Education, Health, and Human Services, to assist in planning the certification program.

Note: Education courses, or courses in the major or minor, may not be elected for pass/fail credit.

The teaching certificate awarded to the beginning secondary school teacher is the Michigan Secondary Provisional Teacher’s Certificate. This certificate is valid for teaching in grades six through twelve in those areas where the applicant has completed a major or minor, and passed the appropriate state mandated tests. It is valid for six years and may be renewed (for three years each time) provided that renewal conditions are met. Legislative or other state action may change these specifications. Therefore, students are advised to contact the Office of Student Success in the College of Education, Health, and Human Services to learn of the most recent policies.

Certification

In recommending students for teacher’s certificates, the College of Education, Health, and Human Services functions, indirectly, as an arm of the Michigan Department of Education. All such certificates awarded to students at the UM-Dearborn are issued at the request of an appropriate faculty body by the Michigan Department of Education in Lansing irrespective of the particular campus attended (Ann Arbor, Dearborn, Flint).

Campus Degree/Certification Program

Students, upon the successful completion of certification requirements, will receive their certification recommendation through the College of Education, Health, and Human Services and their degree recommendation from CASL. Therefore, they should be properly enrolled in the College of Education, Health, and Human Services and CASL. Students are responsible for meeting all of the appropriate degree requirements legislated by the particular unit that is to recommend their degree. The College of Education, Health, and Human Services and its faculty, therefore, can accept no responsibility for seeing that students are properly acquainted with their various degree requirements. Instead, students are to seek such information from the advisors available in their own particular degree recommending unit.

Certification Advising

All secondary certification students are assigned an academic advisor in the College of Education, Health, and Human Services. It is the policy of the College of Education, Health, and Human Services that all undergraduates and others seeking provisional teaching certificates are to meet with their certification academic advisor at least once per academic year. By means of this practice, the individual secondary certification student can be kept abreast of periodic modifications in the curriculum and in certification regulations.

Certification Requirements

A person desiring to earn a secondary teacher’s certificate must meet all of the conditions listed below.

1. The satisfactory completion of a degree program with an overall GPA of 2.75 or higher.
2. The satisfactory completion of a teaching major and a teaching minor, each with a GPA of 2.75 or higher.
3. The successful completion of the courses below is required of everyone desiring to qualify for a secondary teaching recommendation.
4. EDA 205 Introduction to Education and EDT 211 Designing Tech-Based Learning Solutions. All requirements as identified in the College’s four-phase program listed below must be met for a teaching certificate recommendation.

College of Education, Health, and Human Services Four-Phase Checklist

The College of Education, Health, and Human Services at the UM-Dearborn is committed to the ideal of quality in the field of teacher education. It recognizes that not everyone who wishes to be a teacher is capable of meeting program requirements that relate to teacher competency. Therefore, the College of Education, Health, and Human Services is selective in admitting students into its teacher preparation programs and in making recommendations for teacher certification.
A four-phase screening procedure is employed to help identify those people most likely to perform at the level of excellence defined by the College. Further, this procedure is useful in assisting students with career decisions. The screening procedure is divided into four successive phases, each with its own set of academic and professional admission standards. Students are expected to have successfully met all of the requirements at one phase before entering the next. Each student is responsible for knowing and meeting all program requirements as listed in the Undergraduate Catalog. The "College of Education, Health, and Human Services Four-Phase Checklist" is as follows:

**Phase 1 - Admission to the College of Education, Health, and Human Services**

Three types of students are considered for admission to the College of Education, Health, and Human Services at this entry level phase:

1. **First time in any college (FTIAC) students**
   - Campus admission standards for SAT, ACT, and high school Grade Point Average (GPA) are used in determining admission.

2. **Transfer students**
   - Campus admission standards are used for students transferring 54 or fewer semester hours. College of Education, Health, and Human Services admission standards (a minimum cumulative GPA of 2.75/4.0 scale) are used for students transferring 55 or more semester hours.

3. **Degreed persons seeking certification only**
   - College of Education, Health, and Human Services admission standards are used for individuals with a bachelor’s degree earned at a regionally accredited institution. The individual must have a cumulative GPA of 2.75 or higher in their major, minor, and overall to be admitted to the College of Education, Health, and Human Services and the Teacher Certification Program.

   **Important:** Fingerprinting and criminal background checks are required for work in school settings. Such work is required of all certification students. All background checks must be completed in the first semester of admission to the College of Education, Health, and Human Services. Live Scan fingerprinting is being offered by Integrated Biometric Technology (IBT) by appointment only. Instruction/application forms are available at the College of Education, Health, and Human Services Field Placement Office (Room 264 FCS). To make an appointment for your Live Scan fingerprinting, contact IBT at 1-866-226-2952.

   **Note:** Admission to a Teacher Certification program—see Phase 2—is a separate procedure from admission to the College of Education, Health, and Human Services itself.

**Phase 2 - Admission to the College of Education, Health, and Human Services Teacher Certification Program**

Admission to a College of Education, Health, and Human Services Teacher Certification program (elementary/secondary) requires all of the following:

1. meeting minimum score requirements on the Michigan Test for Teacher Certification (MTTC) Professional Readiness Examination (Reading, Mathematics, Writing) or alternative scoring measures,
2. a minimum of 55 semester credit hours or an earned degree with a cumulative GPA of 2.75/4.0 scale. Grades earned at all institutions are used in this calculation for students transferring into the College of Education, Health, and Human Services with the exception of degreed persons seeking certification only (see Phase 1, number 3),
3. submission to College of Education, Health, and Human Services of results from the Campus Composition Placement Test 313-593-5100 to arrange for the exam). This test must be taken within the first semester that a student is enrolled classes,
4. completion of COMP 105 and COMP 106 (and COMP 227 when required),
5. Major(s) and/or minor(s) must be formally declared on a Change of Degree/Concentration Petition form,
6. submission of completed Application for Admission Teacher Certification Program form (available in College of Education, Health, and Human Services Office of Student Success, 262 FCS). This form includes a statement of intent regarding allowing or not allowing MTTC score reporting to advisors in the College of Education, Health, and Human Services and College of Arts, Sciences and Letters.
7. valid Internet Criminal History Access Tool (ICHAT). A criminal background check will be conducted using ICHAT before placement in any field experience. If any offense is found, students must make an appointment with the Associate Dean.

   **Note:** When all Phase 2 requirements have been met, students receive a formal letter of admission to the Teacher Certification Program.

**Phase 3 - Eligibility for Student Teaching**

Eligibility for directed (student) teaching (elementary/secondary) requires all of the following:

1. passing scores from pertinent MTTC Subject Area Tests. Elementary certification students must pass the MTTC Elementary Education test. Secondary certification students must pass the MTTC tests in their major and their minor,
2. senior student status (minimum of 85 semester hours earned),
3. completion of at least one full term (12 semester hours) of study at UM-Dearborn,
4. a minimum cumulative GPA of 2.75/4.0 scale as well as a minimum GPA of 2.75 in the major(s), minor(s), and the professional sequence,
5. completion of professional sequence courses,
6. submission of a signed "Evaluation of Oral Expression" form to the College of Education, Health, and Human Services Field Placement Office, (264 FCS),
7. attendance at a Student Teaching Application and Placement meeting and submission of all forms distributed,
8. valid TB clearance, criminal background check, CPR certification, and evidence of training for dealing with infectious diseases/blood borne pathogens on file,
9. Valid Internet Criminal History Access Tool (ICHAT). A criminal background check will be conducted using ICHAT before placement in any field experience. If any offense is found, you must make an appointment with the Associate Dean.

**Phase 4 - Eligibility for a Recommendation for a Degree and/or a Michigan Teaching Certificate**

Recommendation for a degree and/or a Michigan Teaching Certificate (secondary) requires all of the following:

1. submission of completed Degree/Diploma Application form to Enrollment Services/Registration and Records (1169 UC). The form and applicable deadlines are available online at http://umdare.edu/rr_apply-graduate. Note: Secondary Certification students must submit their Degree/Diploma Application form as a student in the College of Arts, Sciences and Letters and fill out a
Program Completer Form to be submitted to the College of Education, Health, and Human Services certification officer

2. acceptable scores from all relevant Michigan Tests for Teacher Certification (MTTC),
   a. to be recommended for any additional major(s), minor(s), endorsement(s), all relevant tests must be taken and passed.
   Results must be in by the time recommendations are prepared for the state by the UM-Dearborn certification officer.
   b. Secondary Certification students: Subject area tests for which student wishes to be recommended. (At least one major and one minor are required.)

3. successful completion of the chosen program, major(s), minor(s), professional sequence, and supplementary requirements,

4. a minimum cumulative GPA of 2.75/4.0 scale as well as a minimum GPA of 2.75 in the major(s), minor(s) and professional sequence.

Based on this record of achievement, a decision to recommend or not to recommend and/or certification will be made.

Secondary education students pursuing a bachelor's degree in the College of Arts, Sciences, and Letters should not confuse the requirements for their teaching major with those for their academic concentration in CASL. The courses required to complete a teaching major are determined by the College of Education, Health, and Human Services in compliance with the state certification code. The courses required for a degree concentration are prescribed by the CASL and are a part of the student's degree program. Often the two sets of requirements overlap so that by fulfilling concentration requirements, the student also, in most cases, completes most of the requirements for a teaching major. Occasionally, however, students must exercise caution when electing individual courses so that one set of requirements is not ignored while fulfilling the other. The student's academic advisor in the College of Education, Health, and Human Services will be able to assist in planning an overall certification program that simultaneously meets both sets of requirements in an expeditious manner.

Areas of Study for Majors and Minors

The teaching majors and minors currently available for secondary certification students are listed below:

Select two of the following: 6

The balance of courses to be selected with the approval of the advisor in accordance with the Economic concentration and certification requirements.

**Total Credit Hours**

36

**Notes:**

1. **An overall GPA of 2.75 or better is required for a major and a minor.**
2. **For the major, 15 semester hours must be in courses 300 or above; 9 semester hours at 300 or above for a minor.**
3. **At least 15 semester hours in UM-Dearborn courses required for a major.**

### English

**Major Requirements**

A minimum of 30 semester hours is required.
Required Courses
ENGL 461  Modern English Grammar  3
or ENGL 482  History of the English Language
ENGL 323  Advanced Creative Writing  3
or ENGL 327  Advanced Exposition
Select one of the following:  3
   ENGL 383  American English
   LING 425  Language and Society
   ENGL 461  Modern English Grammar
   LING 464  Contemporary Rhetorical Theory
   ENGL 465  Discourse Analysis
   ENGL 477  African American English
   ENGL 482  History of the English Language
   ENGL 484  World Englishes
   LING 476  Sociolinguistics
The balance of the courses are to be selected with the approval of the degree and certification advisors in accordance with the English concentration requirements. Among the electives JASS 310, JASS 330 and COMM 335 are allowed.
Supplementary requirement (not included in the 30 semester hours):
   LIBR 470  Literature for Young People  3
Total Credit Hours  33
Note: COMP 105 and COMP 106 are required but do not count toward the English major.

Notes:
1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, 18 semester hours must be in courses 300 or above; 9 semester hours at 300 or above for a minor.
3. At least 15 semester hours in UM-Dearborn courses required for a major.

French
Major Requirements
A minimum of 30 semester hours in coursework beyond second-year proficiency is required.

Prerequisite: FREN 202 or equivalent French language proficiency (not counted toward major).

Required
   FREN 301  Advanced Conversation and Comp  3
   FREN 302  Advanced Conversation and Comp  3
   FREN 332  French Cinema  3
One specialized language course from the following:  3
   FREN 305  Language of Business
   FREN 306  Cult Intro to French Business
   FREN 408  Writing and Translating
Two civilization/culture courses from the following:  6
   FREN 336  French Civilization of Past
   FREN 337  France in the 20th Century
   FREN 338  France of Today
   FREN 339  Francophone Lit and Civil
One literature course from the following:  3
   FREN 330  French Lit: Md Ages-18 Century

FREN 331  French Lit: 19th-20th Century
FREN 334  Workshop in French Theater
FREN 339  Francophone Lit and Civil
Additional credit hours from other French area offerings:  9
Total Credit Hours  30

Notes:
1. FREN 339 is listed under two headings. Students may count it under one or the other of the headings as they wish, but not under both.
2. Concentrators are encouraged to strengthen their knowledge of French language and culture by participating in any of the approved study-abroad programs.
3. For the major, 30 credit hours of upper-level courses (courses numbered 300 or higher) are required; 20 credit hours of upper-level courses are required for the minor.
4. An overall GPA of 2.75 or better is required for a major or a minor.
5. At least 15 semester hours in UM-Dearborn courses required for a major.
6. Acceptable scores from the MTTC Subject Area Test in French are required for Teacher Certification.

History
Major Requirements
A minimum of 30 semester hours is required.

Required Courses
   HIST 101  The World to 1500 CE  3
   HIST 103  The World Since 1500 CE  3
   HIST 111  The American Past I  3
   HIST 112  The American Past II  3
   HIST 300  The Study of History  3
   HIST 361  United States Economic History  3
   HIST 3601  Michigan History  3
Balance of courses to be selected from three different global areas:  9
   Asia, Europe, Africa, the Americas, Russia or the Middle East
Total Credit Hours  30

Notes:
1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, 15 semester hours must be in courses 300 or above; 9 semester hours at 300 or above for a minor.
3. At least 15 semester hours in UM-Dearborn courses required for a major.

Integrated Science
Major Requirements
A minimum of 36 semester hours is required spread over three of the four subject areas for Integrated Science. The remaining subject area will constitute your minor. You must minor in one of these four disciplines.

Biology
Required Courses
   BIOL 130  Intro Org and Environ Biology  4
   BIOL 130L and Intro Org & Envr Biol Lab/Rec
   BIOL 140  Intro Molec & Cellular Biology  4
   BIOL 140L and Intr Molec & Cell Biol Lab/Rec
Select one course from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<tr>
<td>PHYS 403 Electricity and Magnetism</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Select from the following: 15

- PHYS 320 Environmental Physics
- PHYS 360 Instrumentation for Scientists
- PHYS 405 Optics
- PHYS 406 Thermal and Statistical Physics
- PHYS 453 Quantum Mechanics
- PHYS 457 Atomic and Nuclear Physics
- PHYS 460 Advanced Physics Laboratory
- PHYS 463 Solid State Physics

**Total Credit Hours** 32

**Notes:**

1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, 18 semester hours must be in courses 300 or above; 9 semester hours in courses 300 or above for a minor.
3. At least 15 semester hours in UM-Dearborn courses required for a major.

### Social Studies

A minimum of 36 semester hours is required.

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td>3</td>
</tr>
<tr>
<td>POL 371 Problems in Intl Politics</td>
<td>3</td>
</tr>
<tr>
<td>HIST 103 The World Since 1500 CE</td>
<td>3</td>
</tr>
</tbody>
</table>

The balance of courses to be selected with the approval of the academic advisor in accordance with the Political Science concentration and certification requirements.

**Total Credit Hours** 30

**Notes:**

1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, at least 12 semester hours of the 36 must be in courses 300 or above.
3. 15 semester hours in UM-Dearborn courses required for a major.

### Spanish

**Major Requirements**

A minimum of 30 semester hours of coursework beyond second-year proficiency is required.

<table>
<thead>
<tr>
<th>Prerequisite:</th>
<th>SPAN 202 or equivalent Spanish language proficiency (hours do not count toward major).</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>SPAN 350 Masterpiece of Latin Amer Lit</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 351 Masterpieces of Spanish Lit</td>
<td>3</td>
</tr>
<tr>
<td>Two 400-level language courses from the following:</td>
<td>4-5</td>
</tr>
<tr>
<td>SPAN 406 Advanced Written Expression</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 409 Oral Expression</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours** 36

**Notes:**

1. An overall GPA of 2.75 or better is required for a major.
2. For the major, 18 semester hours must be in courses 300 or above.
3. 15 semester hours in UM-Dearborn courses required for a major.
**Professional Requirements**

Preparation for a teaching credential consists of required courses in education. At least two practicums and methods courses in the academic major and minor are required prior to directed teaching.

### Distribution Requirements

<table>

<td>Sem: Teaching Secondary Grds</td>
<td>1</td>
</tr>
</tbody>
</table>

Total Credit Hours 64-65

### Notes:

1. Enrollment in all the required EDD courses is open only to those who are officially enrolled and in good academic standing in a certification program at UM-Dearborn (junior standing required), with a cumulative GPA of 2.75 or higher.
2. A GPA of 2.75 or better is required overall for the Professional Sequence.
3. Taking and passing the MTTC Professional Readiness Examination or alternative scoring measures.
4. Eligibility for directed teaching requires acceptable scores from the MTTC (Michigan Tests for Teacher Certification) subject area tests: major and minor, and one full term of study at UM-Dearborn (12 semester hours).
5. Eligibility for other endorsements requires acceptable scores from the relevant MTTC subject area tests.

Methods courses are open only to students officially admitted into the College's certification programs. Therefore, credit for successfully completing such courses will be awarded by the College only to those students who, at the time of enrolling in such courses, are officially admitted and are in good academic standing. These courses are: EDD 421, EDD 424, EDD 440/EDD 441, EDD 450/EDD 451, EDD 469, EDD 480/EDD 481, EDD 490/EDD 496, and EDD 496/EDD 497.

The program as outlined above meets the Michigan Department of Education teacher certification requirements at the time of this writing. However, changes by the University or the Michigan Department of Education may affect some program requirements. Therefore, students are strongly advised to inquire about possible changes by checking with the College of Education, Health, and Human Services Office of Student Success and/or with their academic advisor.

### Biology

A minimum of 20 semester hours is required.

### Required courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>

<td>(A programming language)</td>
</tr>
</tbody>
</table>

Additional Electives:

MATH 462 Mathematical Modeling
MATH 472 Intro to Numerical Analysis
STAT 325 Applied Statistics I
or other electives approved by academic advisor

Total Credit Hours 25

1. Not included in the minimum 20 semester hours.

The State Certification requirements for Computer Science require three (3) programming languages. The above program requires C++. Students must select two additional languages to meet the three language requirement. One recommended language is LOGO (MATH 447). Students with significant background in a language may petition for a waiver of the course teaching that language.

Notes:
1. An overall GPA of 2.75 or better is required for a minor.
2. For the minor, 9 semester hours at 300 or above are required.

Earth Science
A minimum of 24 semester hours is required.

Required Courses

</tr>
<tr>
<td>ECON 301</td>
<td>Intermediate Macroeconomics</td>
</tr>
</tbody>
</table>

Total Credit Hours 25
**ECON 302** Intermediate Microeconomics 3
**ECON 351** Environmental Economics 3
**ECON 361** U S Economic History 3
**ECON 448** International Trade 3

**Total Credit Hours** 21

**Notes:**
1. An overall GPA of 2.75 or better is required for a major and a minor.
2. For the major, 15 semester hours must be in courses 300 or above; 9 semester hours at 300 or above for a minor.
3. At least 15 semester hours in UM-Dearborn courses required for a major.

---

**English**

A minimum of 20 semester hours is required.

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 461</td>
<td>Modern English Grammar</td>
<td>3</td>
</tr>
<tr>
<td>or ENGL 482</td>
<td>History of the English Lang</td>
<td></td>
</tr>
<tr>
<td>ENGL 323</td>
<td>Advanced Creative Writing</td>
<td>3</td>
</tr>
<tr>

<tr>
<td>FREN 339</td>
<td>Francophone Lit and Civil</td>
<td></td>
</tr>
</tbody>
</table>

Additional credit hours from other French area offerings: 2-3

**Total Credit Hours** 20-21

**Notes:**
1. FREN 339 is listed under two headings. Students may count it under one or the other of the headings as they wish, but not under both.
2. Concentrators are encouraged to strengthen their knowledge of French language and culture by participating in any of the approved study-abroad programs.
3. For the major, 30 credit hours of upper-level courses (courses numbered 300 or higher) are required; 20 credit hours of upper-level courses are required for the minor.

4. An overall GPA of 2.75 or better is required for a major or a minor.

5. At least 15 semester hours in UM-Dearborn courses required for a major.

6. Acceptable scores from the MTTC Subject Area Test in French are required for Teacher Certification.

### History

A minimum of 21 semester hours is required.

Total Credit Hours: 21
POL 316 The American Judicial Process 3
POL 325 Environmental Politics 3
POL 371 Problems in Intl Politics 3
HIST 103 The World Since 1500 CE 3

Total Credit Hours 21

Notes:
1. An overall GPA of 2.75 or better is required for a major or a minor.
2. For the major, 15 semester hours must be in courses 300 or above; 9 semester hours in courses 300 or Above for a minor.
3. 15 semester hours in UM-Dearborn courses required for a major. 9 semester hours in UM-Dearborn courses required for a minor.

Psychology
A minimum of 21 semester hours is required.

Required Courses
PSYC 101 Introduction to Psychology 3
PSYC 300 Life-Span Developmental Psych 3
PSYC 320 Social Psychology 3

Select one of the following:
PSYC 315 Personality Development 3
PSYC 445 Personality Assessment Lab 3
PSYC 450 Personality Theory 3

Select three of the following:
PSYC 321 Attitude and Social Behavior 9
PSYC 322 Psychology of Prejudice 3
PSYC 363 Cognitive Psychology 3
PSYC 418 Cognitive Development 3
PSYC 421 Group Processes 3
PSYC 461 Learning and Memory 3

Total Credit Hours 21

Notes:
1. An overall GPA of 2.75 or better is required for a major or a minor.
2. Fifteen semester hours must be in courses 300 or above for a minor.

Spanish
A minimum of 20 semester hours of coursework beyond second-year proficiency is required.

Prerequisite: SPAN 202 or equivalent Spanish language proficiency (hours do not count toward major).

Required Courses
SPAN 301 Adv Conversation and Comp I 3
SPAN 302 Advan Conversation Comp II 3
SPAN 305 Language of Business 3

One civilization/culture courses from the following: 3
SPAN 356 Spanish Civilization and Cult 3
SPAN 357 Latin American Civiliztn Cult 3
SPAN 358 Spain in the Twentieth Century 3

One literature course from the following: 3
SPAN 350 Masterpiece of Latin Amer Lit 3
or SPAN 351 Masterpieces of Spanish Lit 3

One 400-level language courses from the following: 2-3
SPAN 406 Advanced Written Expression 3
SPAN 409 Oral Expression 3
SPAN 420 Introduction to Translation 3

Additional credit hours from other Spanish area offering. 2-3

Total Credit Hours 19-21

Notes:
1. Concentrators must take at least one course that deals specifically with Spanish (peninsular) topics such as SPAN 351, SPAN 356, or SPAN 358 and at least one course that deals with the Latin American topics such as SPAN 350 or SPAN 357.
2. Concentrators are encouraged to strengthen their knowledge of Spanish language and Hispanic culture by participating in any of the approved study-abroad programs.
3. For the major, 30 credit hours of upper-level courses (courses numbered 300 or higher) are required; 20 credit hours of upper-level courses are required for the minor.
4. An overall GPA of 2.75 or better is required for a major or a minor.
5. At least 15 semester hours in UM-Dearborn courses are required for a major.
6. Acceptable scores from the MTTC Subject Area Test in Spanish are required for teacher certification.

### Speech

A minimum of 21 semester hours is required.

**Prerequisite:** SPEE 101 and COMM 220 (hours not counted toward minor).

**Required Course**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LIBR 470</td>
<td>Literature for Young People</td>

<tr>
<td>COMM 420</td>
<td>Critical Media Studies</td>
<td></td>
</tr>
<tr>
<td>COMM 430</td>
<td>International Communications</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours** 21

### Notes:

1. An overall GPA of 2.75 or better is required for a minor.
2. The 21 semester hours must be in courses 300 or above for a minor.
3. It is strongly recommended that students elect JASS 302 and COMM 420.

### Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

### Foundational Studies

- Written and Oral Communication (GEWO) – 6 Credits (p. 16)
- Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
- Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
- Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

### Areas of Inquiry

- Natural Science (GENS) – 7 Credits (p. 19)
  - Lecture/Lab Science Course
  - Additional Science Course
- Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
- Humanities and the Arts (GEHA) – 6 Credits (p. 20)
- Intersections (GEIN) – 6 Credits (p. 21)

### Capstone

Capstone (GECE) – 3 Credits (p. 22)

### Major Requirements

A minimum of 30 semester hours from the following:

<table>
<thead>

---

¹ Indicates courses required for Pre-Professional Studies.
Completion with a grade of B or better is necessary before enrollment in EDD 413 and EDD 420.

Professional Requirements

The professional sequence of education courses consists of a minimum of 42 semester hours of credit. This concentration of study represents the core of your professional preparation. At least two practicums are required prior to student teaching. The semester hours are distributed as follows:

Foundations
EDA 340 Foundations of American Ed 3

Psychology
EDC 300 Educational Psychology 3
EDC 460 Educating the Exceptional Child 3

Methodologies (See Note #1 below)
EDD 452 Methods of Teaching Math K-8 3
EDD 468 Teach Read/Lang Arts- Elem Grd 3
EDD 467 Practicum in Reading Instr 1
EDD 471 Reading Instr: Models and Meth 3
EDD 485 Teach Science in the Elem Grd 3
EDD 495 Social Studies in the Elem Grd 3
EDD 491 Soc Std Elem Grades Practicum 1

Professional Semester (See Notes #3 & #5 below)
EDD 435 Dir Teaching: Elementary Sch 12
EDD 437 Sem: Teaching Elementary Grds 1

Total Credit Hours 39

1. EDD 467 and EDD 471 are to be taken concurrently. Both require EDD 468 as a prerequisite.

Notes:
1. Enrollment in all the required EDD courses is open only to those who are officially enrolled and in good academic standing in a certification program at UM-Dearborn (junior standing required) with a cumulative GPA of 2.75 or higher.
2. A UM-Dearborn cumulative GPA of 2.75 or better is required overall for the Professional Sequence.
3. Passing the MTTC Professional Readiness Examination is required.
4. Eligibility for directed teaching requires passing scores from the MTTC (Michigan Tests for Teacher Certification) subject area test: Elementary certification (elementary education), Secondary certification (major and minor tests).
5. Recommendations for other certification endorsements require passing scores from relevant MTTC subject area tests.

Social Studies

Please refer to Elementary School Certification Program for additional degree requirements.

Major Requirements

A minimum of 36 semester hours from the following:

Required Courses
EXPS 283 Geography & Econ Elem Schools 3
EXPS 282 History & Civics Elem Schools 3

History:
HIST 101 The World to 1500 CE 3
HIST 103 The World Since 1500 CE 3
HIST 112 The American Past II 3
HIST 3601 Michigan History 3

Political Science:
POL 101 Intro to American Government 3

Select 3 credit hours from:
POL 371 Problems in Intl Politics 3
POL 471 American Foreign Policy I 3
POL 472 American Foreign Policy II 3

Geography:
GEOG 206 World Regional Geography 3
GEOG 300 Urban Geography 3

Elective

Economics:
ECON 2001 Introductory Economics 3
ECON 201 Prin: Macroeconomics 3
ECON 202 Prin: Microeconomics 3

Total Credit Hours 36

Notes:
1. An overall GPA of 2.75 or better is required for a major.
2. For the major at least 9 hours must be in courses 300 or above
3. At least 12 semester hours in UM-Dearborn courses required for a major.

College of Engineering and Computer Science

Engineering: The Profession

Engineers are the link between scientific knowledge and practical applications. Engineers combine various roles and functions in their job. What are engineers?

• Engineers are science-knowledgeable men and women who use mathematics, chemistry, and physics for an applied purpose.
• Engineers invent, design, or improve products that people want to buy or use.
• Engineers are business people who design, manufacture, or sell a technical product or service to customers, taking into consideration safety, cost, quality, reliability, societal impact, and ease of use.
• Engineers are planners and integrators who bring together skills and knowledge from many disciplines and fields for some technical purpose or application.
• Engineers are creative problem-solvers and doers: they make decisions and get things done in a combined science/technical/business/applied profession.
• Engineers analyze problems, develop design solutions, and pay close attention to detail.
• Engineers interact with a variety of people, including clients, scientists, other engineers, technicians, managers, and government officials.
• Engineers are interested in how and why things work and like practical challenges.
• Successful engineers are known for their analytical, imaginative, and creative skills, for using common sense, for being team players, for being able to pick up new knowledge and skills quickly, and for their commitment to continue to improve and learn.

**Computer Science: The Profession**

Computer and information scientists offer expertise in the effective and efficient use of computers for tackling a broad spectrum of practical challenges, usually in a team environment. Computer and information science includes the following sub-specialties: operating systems, compilers, computer graphics computer game design, computer networks and network administration, security, enterprise computing technologies, information and database systems and database administration, information retrieval, artificial intelligence and machine learning, robotics, theoretical computer science, programming languages, software engineering and web technologies. Software engineering is the area within computer science that is concerned with the theoretical and practical aspects of the detailed design, building, testing, modification, optimization, and maintenance of large, high quality, software systems for a wide range of applications across society. Software engineers analyze users’ needs and work as part of a core team to design, create, and implement high quality and cost effective new software, computer applications, and utility programs. A core team may be composed of software engineering, manufacturing, design, management, and marketing people who work together until the software product is released and implemented. Digital Forensics is the area of computer science concerned with the examination and analysis of computer hard drives, storage devices, cell phones, PDAs or any electronic device that may hold evidence that could be used in a court of law. The digital forensics analyst uncovers and preserves data for later use as legal evidence, and analyzes the data in light of a particular crime or criminal or civil investigation.

The College of Engineering and Computer Science offers undergraduate degrees in four computer science fields: Computer and Information Science, Data Science, Digital Forensics, and Software Engineering.

**Career Choice**

What can help students to decide to pursue a career in engineering or computer science? Some of the clues are an interest in and successful completion of science, mathematics, and computer science courses; a desire and ability to investigate the "why" as well as the "how" of things; and an interest in the creative development of devices or systems that meet specific needs. Not all of these signs or interests will fit everyone, but they can be used as a guide.

The College of Engineering and Computer Science’s Office of Advising and Academic Success has online information about careers in engineering and computer science and a number of links to very informative external web sites at: umdearborn.edu/cecs/SRA/links. (http://www.%20umdearborn.edu/cecs/SRA/links)

Individuals with interests in using science and mathematics to benefit others will find that engineering and computer science professions offer a wide variety of career and employment choices and opportunities.

Admissions counselors at UM-Dearborn and academic advisors of the College of Engineering and Computer Science are glad to talk with students about career choices or choosing the school that best suits their interest and abilities. Prospective students are welcome to contact the College of Engineering and Computer Science by phone or personal visit and to read the information on the College’s Web page umdearborn.edu/cecs.

**Educational Goals and Programs**

The mission of the College of Engineering and Computer Science is to be the leader in providing quality undergraduate and graduate programs in an environment integrated with engineering practice, research, and continuing professional education, in close partnership with the industrial community.

The College of Engineering and Computer Science’s (CECS) educational objective is to prepare its students to take positions of leadership commensurate with their interests and abilities in a world where science, engineering, and human relations are of basic importance.

Programs of study integrate fundamental mathematical and scientific theory with experiments, advanced analysis, and design practice to produce the coherent educational preparation required of professional engineers and computer scientists.

Both the CECS academic curriculum and co-operative placements are planned to prepare students to become practicing engineers or computer scientists, administrators, or investigators. The knowledge, skills, and discipline gained from the CECS degree programs are broad and fundamental and also constitute excellent preparation for other careers, such as law and medicine.

**Undergraduate Requirements**

The College of Engineering and Computer Science (CECS) offers undergraduate programs leading to the Bachelor of Science in Engineering (BSE) degree in the following fields: bioengineering, computer engineering, electrical engineering, industrial and systems engineering, manufacturing engineering, robotics engineering, and mechanical engineering. (Students in these BSE programs may also choose to earn a concurrent second degree in engineering mathematics.) The College also offers an undergraduate degree program leading to a Bachelor of Science (BS) in the following fields: Computer and Information Science (CIS), Data Science, Digital Forensics, and Software Engineering. The CIS program has two concentrations: computer science and information systems. (Students in these BS programs may also choose to earn a concurrent second degree in CIS mathematics.)

The minimum credit-hour requirement for the degree programs in engineering is 125 to 128 semester credits, depending on the specific major. The BS in Software Engineering, Data Science, Digital Forensics, or in Computer and Information Science requires a minimum of 120 to 123 semester credits of course work, depending on the specific major.

The first two years can be considered pre-professional study covering foundation subjects, and the last two years are the specialized, professional phase of the degree program.

The scholastic requirements for graduation are given under “Requirements for Graduation” section of this Catalog. For the detailed requirements specified by the College of Engineering and Computer
Science for each of its undergraduate programs, see the sections for each program below.

Students have the option of earning a minor in addition to their major. CECS offers a minor in Computer and Information Science. The College of Arts, Sciences, and Letters and the College of Business offer various minors of interest to CECS students. See the relevant sections of this Catalog.

The CECS Office of Advising and Academic Success, 2000 Heinz Prechter Engineering Complex (HPEC), 313-593-5510, umd-cecs-undergrad@umich.edu, is the primary contact for undergraduate students for academic advising and information about all undergraduate degree programs of the College of Engineering and Computer Science.

More information about CECS and its programs is available through the College’s home page: umdearborn.edu/cecs.

Admission to the College of Engineering and Computer Science

Admission requirements for entering as a freshman or a transfer student are described under the Admission Requirements, General Information section of this Catalog.

Admission to the College of Engineering and Computer Science (CECS) follows the traditional selective admission standards of the University of Michigan-Dearborn. Students are admitted from high schools directly to the CECS as freshmen or as transfer students from other colleges or universities.

Admission as a Transfer Student

The University of Michigan-Dearborn admits students as transfers who have completed course work at a community college or at another four-year school.

Transfer students can enter at or before the sophomore/junior level, and their preparatory work should have included foundation subjects in the areas of mathematics, science, and pre-engineering or computer science in order to begin their professional course work. Generally, the mathematics, science, or pre-engineering/pre-computer science programs of other engineering schools, of community colleges, and of liberal arts programs provide an appropriate preparation for admission to the College of Engineering and Computer Science.

Transfer guides for students interested in transferring into CECS from nearby colleges are available online: umdearborn.edu/cecs/pros_students/undergrad_info. Advisors at UM-Dearborn are available to assist prospective students by recommending a specific program of courses at a two-year institution to be taken prior to transfer.

Transfer of Credits

An appraisal of the previous record of a student transferring to the University of Michigan-Dearborn is made at the time of admission to determine the number of credits that apply toward the degree program specified by the applicant. In general, credit will be given for courses taken at accredited institutions in which the student earned at least a C grade and provided that the courses can appropriately be applied as meeting requirements of the student’s chosen degree program. Credit is not transferable for courses in which grades less than C or equivalent was earned in another institution. Irrespective of the number of credits the student has previously earned, a student must complete through instruction from the University of Michigan-Dearborn faculty, a minimum of 30 of the last 36 credits presented for the degree. At least 30 credits must be upper-level course work in their CECS major at the University of Michigan-Dearborn in order to qualify for a University of Michigan-Dearborn degree.

CECS Office of Advising and Academic Success

The College of Engineering and Computer Science (CECS) Office of Advising and Academic Success is the primary contact for undergraduate students for academic advising and for information about all undergraduate CECS programs. The office provides the following services to CECS undergraduate students:

• academic orientation of freshmen and transfer students
• academic advising of new and continuing students
• evaluation of transfer credits, admission of cross-campus transfer applicants
• coordination of registration, drops, adds, and total withdrawals
• handling of petitions and individual requests
• degree audits of students’ credits toward graduation
• placement and release of academic holds
• handling of academic (probationary) actions and petitions
• readmission of previously enrolled students
• final certification of degree completion.

The Undergraduate Student Handbook, issued by the office, is available online at umich.app.box.com/s/6a5c4j9hwlcnpz7o2xjmvlrtumvoj (http://umich.app.box.com/s/6a5c4j9hwlcnpz7o2xjmvlrtumvoj). (http://www.umdearborn.edu/cecs/SRA/pdf/Student_Handbook.pdf.html)

Other Programs

Graduate Programs

A Master of Science in Engineering (MSE) degree is offered in automotive systems, computer engineering, electrical engineering, energy systems, industrial and systems, manufacturing systems, and mechanical engineering. A Master of Science (MS) degree is offered in computer and information science, engineering management, information systems and technology, program and project management, and software engineering. Also, a MSE/MBA offered jointly with Industrial and Manufacturing Systems and the College of Business. See the UM-Dearborn Graduate Catalog for admission requirements and complete program and course descriptions.

Majors

• Bioengineering (p. 250)
• CIS Mathematics (p. 251)
• Computer and Information Science (p. 254)
• Computer Engineering (p. 252)
• Data Science (p. 256)
• Digital Forensics (p. 258)
• Electrical Engineering (p. 260)
• Engineering Mathematics (p. 261)
• Industrial and Systems Engineering (p. 262)
• Manufacturing Engineering (p. 263)
• Mechanical Engineering (p. 266)
• Robotics Engineering (p. 267)
• Software Engineering (p. 269)

Minors
• Computer and Information Science (p. 256)

Certificates
• Practical Aspects of Computer Security (p. 266)

Administration
Tony England, PhD, Dean

Ghassan Kridli, PhD, Associate Dean for Undergraduate Education

Yi Lu Murphey, PhD, Associate Dean for Graduate Education and Research

John Cristiano, Director, Henry W. Patton Center for Engineering Education and Practice, and Institute for Advanced Vehicle Systems

Anthony DeLaRosa, Assistant Director, Experiential Learning

M. Jeanne Girard, Director, Office of Extended Learning and Outreach

Eric Kirk, Facilities Manager

Leigh McGrath, Business Manager

Lisa Remsing Hall, Director of Academic Services

Chairs and Directors
William I. Grosky, Chair, Department of Computer and Information Science

Ben Q. Li, Chair, Department of Mechanical Engineering

Pankaj K. Mallick, Director, Interdisciplinary Programs

Paul Richardson, Chair, Department of Electrical and Computer Engineering

Armen Zakarian, Chair, Department of Industrial and Manufacturing Systems Engineering

Professors Emeriti
Aswad, A. Adnan, PhD, Professor Emeritus of Industrial and Manufacturing Systems Engineering

Boffi, Luiz V., ScD, Professor Emeritus of Electrical and Computer Engineering

Bolling, Fredric, PhD, Professor Emeritus of Mechanical Engineering

Cairns, J. Robert, PhD, Professor Emeritus of Mechanical Engineering

Chang, Chia-hao, PhD, Professor Emeritus of Industrial and Manufacturing Systems Engineering

Conlon, Howard E., MS, Associate Professor Emeritus of Mechanical Engineering

Despres, Thomas A., PhD, Professor Emeritus of Mechanical Engineering

Habib, Izzeddin S., PhD, Professor Emeritus of Mechanical Engineering

Heim, Dwight S., PhD, Professor Emeritus of Electrical Engineering

Kachhal, Swantana K., PhD, Professor Emeritus of Industrial and Manufacturing Systems Engineering

Kampfner, Roberto, PhD, Associate Professor Emeritus of Computer and Information Science

Knight, James W., PhD, Associate Professor Emeritus of Industrial and Manufacturing Systems Engineering

Kurajian, George M., MS, Professor Emeritus of Mechanical Engineering

Miller, Murray H., PhD, Professor Emeritus of Electrical and Computer Engineering

Mitchell, William J., MS, Associate Professor Emeritus of Mechanical Engineering

Murtuza, Syed, PhD, Professor Emeritus of Electrical and Computer Engineering

Na, Tsung Y., PhD, Professor Emeritus of Mechanical Engineering

Riordan, John, MS, Professor Emeritus of Computer and Information Science

Sullivan, Joseph E., MS, Associate Professor Emeritus of Electrical and Computer Engineering

Trojan, Paul K., PhD, Professor Emeritus of Metallurgical Engineering

Tsui, Louis, PhD, Associate Professor Emeritus of Computer and Information Science

Wolf, Louis W., PhD, Associate Professor Emeritus of Mechanical Engineering

Faculty

Department of Computer and Information Science
Akingbehin, Kiumi, PhD, Wayne State University, Professor of Computer and Information Science

Dehzangi, Omid, PhD, Nanyang Technological University, Assistant Professor of Computer and Information Science

Sengupta, Subrata, PhD, Case Western Reserve University, Professor of Mechanical Engineering

Shim, Taehyun, PhD, University of California-Davis, Professor of Mechanical Engineering

Varde, Keshav S., PhD, University of Rochester, Professor of Mechanical Engineering

Zhang, Yi, PhD, University of Illinois at Chicago, Professor of Mechanical Engineering

Zikanov, Oleg, PhD, Moscow State University, Professor of Mechanical Engineering

**Important Academic Policies**

Listed below are some important policies affecting College of Engineering and Computer Science students. The CECS Undergraduate Student Handbook also has important information: umdearborn.edu/cecs/SRA/pdf/Student_Handbook.pdf

The English Composition Placement Exam is required of all students upon entering UM-Dearborn.

The Mathematics Placement Exam is required of all freshmen before they register for a mathematics course. All transfer students expecting to take pre-calculus or calculus I are also required to take the mathematics placement exam.

CECS students must take and pass the mathematics course into which they place. CECS students who register for a mathematics course other than the course into which they placed will be disenrolled from that course.

The Office of Admissions and Orientation 313-593-5100 schedules placement exams.

Prerequisite courses and co-requisite courses: A student needs to have the proper prerequisites to enroll in a course and cannot enroll in a course when one or more of its prerequisites need to be repeated because of probation. This is monitored by the College.

Grades: All courses required for CECS students must be taken for a grade. Grades count as part of a CECS student's grade point average (GPA), except for the grades in 'additive credit' courses (EDF courses, or courses numbered 001 to 099).

Pass/Fail courses: CECS students cannot take required courses on an audit or Pass/Fail basis. Any course audited or taken Pass/Fail will not count towards the degree, even as a general elective. Pass/Fail or non-credit courses may be taken only for non-degree credit.

Non-Credit Courses: Students cannot use non-credit courses towards their degree. A list of non-credit courses is found in the CECS Undergraduate Student Handbook available online: umdearborn.edu/cecs/SRA/pdf/Student_Handbook.pdf

The D- Repeat Rule: Any course in which a CECS student earns the grade of D- does not carry degree credit. Any course in which a CECS student receives a D- must be repeated and must be passed with a higher grade in order for the course to count toward a CECS degree. This rule applies to all CECS students.

The On-Probation Repeat Rule: It is a CECS degree requirement that if a student's overall cumulative GPA, CECS cumulative GPA, or both, drops below 2.0, any required courses with grades of C# or below taken during that semester must be repeated.
Honor Points

A student on academic probation who earns a grade of C- or below in a course that is a prerequisite for another course, cannot elect the course without first repeating the prerequisite course. A student who elects a course without the proper prerequisites, or who needs to repeat the prerequisite because of probation, will be disenrolled from the course.

Course Registration

Changes in Course Elections: Add, Drop, Withdrawal

Please refer to the General Information section of this Catalog and the CECS Undergraduate Student Handbook for further information on changes in course elections.

CECS has a policy of required advising for undergraduate students. CECS students meet with their assigned advisor each term prior to registering for classes for the following semester. Upon completion of 44 credit hours, students are assigned a faculty member as their advisor.

Adding Courses

Courses that extend over the full term must be elected during the two-week period beginning on the opening day of classes for the term. For seven-week half terms, or other scheduled terms shorter than a normal full term, course elections must be made during the first week of classes.

Late registration of courses is not permitted in most cases. Students are responsible for knowing the registration deadlines each semester.

Dropping Courses

Students may drop courses that extend over the full term without academic penalty during the nine-week period beginning on the first day of classes of the term. For seven-week half terms, or other scheduled terms shorter than a normal full term, this period will be four weeks. A final grade of E will be recorded for an unofficially dropped course.

In the event of extraordinary circumstances realized subsequent to the stated four- or nine-week periods, a student may petition to drop a course after the regular drop deadline. Late drop petitions, like other petitions, are handled by the CECS Office of Advising and Academic Success (2070 HPEC). A late drop petition will be considered only for important medical or other compelling reasons and not merely because a student is doing poorly in a course.

Students must contact an SRA advisor in person to discuss a late drop petition since supporting documentation is always required. Students continue to be registered for a course, and should continue to attend it and do all the assignments, unless and until their late drop petition is approved by the CECS Office of Advising and Academic Success.

Totally Withdrawing from the Term

Total Withdrawal: Students may withdraw from all their courses for a given semester up to the last day of classes (NOT the last day of exams). CECS students who are totally withdrawing (from all classes) always need the signature of a CECS academic advisor (Room 2070 HPEC).

Incomplete Coursework (I) or Absence from Final Examinations (X)

A CECS student whose term course work (other than the final examination) is incomplete in a minor way may, upon timely completion and approval of the I Contract Form, be granted the privilege of completing the course work within a five-week period, beginning on the first day of classes of the immediately following term. If granted this privilege, a mark of I will be recorded on the transcript.

A student who is unavoidably absent from a final examination may, by approval from the course instructor, be granted the privilege of making up the examination within a five-week period, beginning on the first day of classes of the immediately following term. If granted this privilege, a mark of X will be recorded on the transcript.

Failure to complete the required work, or to make up the final examination, within the specified time, or the denial of this privilege for an I or an X by the instructor, will result in a grade of E for the final grade.

The I Contract form is obtainable from the CECS Office of Advising and Academic Success, 2070 HPEC. The I or X will remain on the transcript even after the official final letter grade is assigned.

In extenuating circumstances an extension beyond the stated period may be requested by means of a petition submitted to the CECS Office of Advising and Academic Success (2070 HPEC), which must also be approved by the instructor. However, such arrangements for completing the work must be made within the above mentioned five-week period.

Failure to complete the required work or examination within the specified time will result in a mark of I or X being automatically converted to a permanent IE orXE in the transcript, which will count as an E in the student’s grade point average.

Grading System

The following (4.0) grading system is used by the CECS:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Honor Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.4</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.4</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.4</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>D-</td>
<td>0.7</td>
</tr>
<tr>
<td>E</td>
<td>0.0</td>
</tr>
<tr>
<td>UE</td>
<td>0.0</td>
</tr>
</tbody>
</table>

The honor points earned in a course are calculated by multiplying the honor points assigned for the grade by the credit hours for the course; e.g., an A grade in a three credit hour course yields 12 honor points. The semester grade point average is calculated by dividing the total honor points earned in a semester by the credit hours elected in that semester. The overall cumulative grade point average is obtained in the same manner with all courses elected at UM-Dearborn included in the calculation.

If any courses were repeated in the Fall 2005 or subsequent semesters, the most recent grade will be used in computing the grade point average, and a maximum of two previous grades in the same course will be
excluded from calculation of the grade point average. A given course may be taken a maximum of three times.

Courses in which a mark of S, P, Y, F, or NC is received are not included in grade point average calculations.

A CECS student with a class rank of junior or senior and who is in good scholastic standing may, with the approval of the College, elect a non-CECS course that is not a part of the degree requirements, nor a prerequisite to any required course, using the Pass/Fail Option.

Selected courses may be offered by CECS on a grading basis of awarding S for satisfactory work, E for failing work, and NC for no credit. Any course assigned an S mark or an NC mark will not count towards degree requirements, nor will an S or an NC mark enter into the computation of a student’s grade point average. Only CIS co-op courses with an assigned S mark may count toward degree requirements. A grade of E will be treated as a conventional E on all records.

**Class Standing**
The number of credit hours accumulated at the close of a given term determines a student's class standing.

<table>
<thead>
<tr>
<th>Underclassmen</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 24</td>
</tr>
<tr>
<td>Sophomore</td>
<td>25 to 54</td>
</tr>
<tr>
<td>Upperclassmen</td>
<td></td>
</tr>
<tr>
<td>Junior</td>
<td>55 to 84</td>
</tr>
<tr>
<td>Senior</td>
<td>85 or more</td>
</tr>
</tbody>
</table>

**Scholastic Standing**
In order to attain a BSE or BS degree, a student must achieve a final overall average of 2.0 or higher for all University of Michigan – Dearborn courses taken while enrolled in CECS. In addition, the student must obtain a grade point average of 2.0 or more for all elected CECS courses.

**Good Standing**
To be in good scholastic standing at the end of any term, a student must have an overall average of 2.0 or higher for all UM-Dearborn courses elected. Additionally, a student must have a 2.0 or above grade point average for all CECS courses elected.

**Grades Less Than C (2.0)**
While a grade of C, D+, or D is passing, it is not considered satisfactory scholastic performance. Any deficiency of grade points (below 2.0) in either the overall grade point average (GPA) or the CECS cumulative grade point average (CECS GPA) resulting from one or more C, D+, D, or D- grades must be made up while enrolled in this College. C, D+, D, or D- grades are used in computing the student’s GPA or CECS GPA or both.

A student must repeat, as early as possible, any required courses in which a C, D+, D, or D- grade is received in a given term if either the overall GPA or CECS GPA falls below 2.0 at the end of that term. Moreover, if a student on academic probation earns a C, D+, D, or D- grade in a prerequisite for another course, such a course cannot be elected without first repeating the prerequisite course.

Any course in which a student received D- must be repeated, even if the course was taken when the student's overall cumulative GPA, and/or GPA in CECS courses, was above 2.0.

Neither credit nor grade points are allowed for a course in which a student received an E grade. Any deficiency of grade points (below 2.0 average) resulting from one or more E grades must be made up while enrolled in this College before the student is restored to good standing. A required course in which a grade of E has been assigned must be repeated on this campus during the student’s next academic term.

**Continued Enrollment in the Cooperative Education Program**
Although students on probation are normally allowed to continue their academic enrollment, they should consult immediately with the cooperative education program coordinator to review their status in the cooperative education phase of their program. Students will certainly jeopardize their ability to participate in this program if, during any term, their grade point average falls below 2.0. In the event that a student is placed on probation, CECS reserves the right to require that the student spend another term in class and not participate in a work assignment for that term.

**Unsatisfactory Performance**
The records of CECS students are reviewed at the end of each term by the Academic Standing Committee. Three degrees of scholastic deficiency are used by the Committee to identify a student’s unsatisfactory performance resulting from C, D+, D, D-, and E grades: warning, on probation, or required to withdraw.

In cases where the grade average for one term falls below 2.0 while the overall average remains above 2.0, the student normally will receive a warning letter from the Committee.

Probationary status (academic probation) is normally assigned to students who are not in good scholastic standing but whose records indicate a possibility for removal of deficiencies by continued enrollment. CECS students on academic probation are restricted to registering for no more than 13 credits per semester.

Students whose academic record is poor for two or three successive semesters are subject to being required to withdraw from the College. Students who have been required to withdraw may submit a formal written appeal to be readmitted at a later time, but must, in all cases, have had at least one semester of non-enrollment in CECS for their appeal to be accepted for consideration.

**Academic Standing Appeal Procedure**
Students who wish to appeal a decision by the Academic Standing Committee requiring them to withdraw may do so by addressing a petition to the Executive Committee (the chief policy body) of the CECS. In all cases, the Executive Committee requires a one-term non-enrollment period, to allow students who have been required to withdraw time to reflect upon their situation, to consider alternatives, and to make plans. If a negative decision is rendered at this high level, the student may, under unusual circumstances, appeal the case to the Appeals Board of the UM-Dearborn.

**Requirements for Graduation**
In order to secure a degree of BSE or BS from the College of Engineering and Computer Science, UM-Dearborn, a student must meet the following requirements:

1. Must have been admitted to a degree program in the CECS.
2. Must satisfactorily complete the specified number of elective and required courses of the specific degree program.
3. Must attain a grade point average of C (2.0) or better for all courses completed at UM-Dearborn.
4. Must achieve a minimum grade average of C (2.0) for all CECS courses completed at UM-Dearborn.
5. Must have completed at least 30 credit hours of upper-level CECS course work at UM-Dearborn of the degree program in which enrolled.
6. Must be enrolled for credit in the CECS during the term in which the requirements for the degree are completed.
7. Must have taken the English Composition Placement Exam and passed the appropriate composition course, as indicated by the results.
8. Must have repeated all courses that needed to be repeated, in accordance with the policies stated above.
9. Must have submitted a diploma application online through UM-Dearborn Connect by the third week of the beginning of the term in which the student expects to graduate.

In order to obtain a BSE in an engineering major and a concurrent BSE degree in Engineering Mathematics, or a BS degree in CIS, digital forensics, or software engineering and a concurrent degree in CIS Mathematics, the student must complete the specified minimum credit hours of additional and separate courses in advanced mathematics from the choices listed in the Engineering Mathematics degree program or the CIS Mathematics degree program, respectively.

Academic Code of Conduct
The Academic Code of Conduct (ACC) for the University of Michigan-Dearborn is based on the premise that undergraduate and graduate students will perform honestly and ethically on all tests, projects, and assignments. Students are expected to conduct themselves in a manner conducive to an environment of academic integrity and of respect for the educational process. Therefore, an individual should realize that deception for the purpose of individual gain is an offense against the members of the community.

Sanctions for violation of the Academic Code of Conduct may include one or more of the following: a letter of reprimand, reduction in course grade, failure in the course(s), entry of action on the student's transcript, suspension, expulsion, and recession of a degree.

Familiarization with the code is the responsibility of every student at UM-Dearborn. The Academic Code of Conduct can be found on the university policy page at umdearborn.edu/policies_umd.

See also under Student Rights and Responsibilities in the General Information section of this Catalog

Changes in Policies and Rules
The College of Engineering and Computer Science reserves the right to effect changes in curricula, policies, and rules. Students should consult with the CECS Office of Advising and Academic Success (2000 Heinz Prechter Engineering Complex) for the applicable rules at the time of admission.

Cooperative Education
The Engineering Cooperative Education Program (also known as an internship program) is a coordinated integration of classroom work and practical experience in business, industry, and government. The student alternates terms of attendance (co-op program does provide some flexibility, if needed) in class with four-month periods of employment with a cooperating organization, at the employer's location, while supervised by representatives of both the University and the employer. The work experience is considered an integral part of the educational process, and both the College and the participating employer share responsibility for this integration.

The Computer Information Science Cooperative Education program, like that of Engineering, is an optional program for students who desire practical work experience related to a student's academic background or individual career interest. Co-op students may be hired under any of three options: 1) alternating full-time, 2) parallel part-time, 3) summer only. Students are encouraged to complete a minimum of two work semesters with a participating employer.

Objectives, Advantages, and Renumeration
Emphasis is placed on the educational and training value of work assignments. The student's earnings, though substantial, must be considered only as an attractive by-product of the cooperative educational processes. As a result, convenience of location or transportation and personal preferences of the student must yield to educational advantages if these advantages cannot be otherwise achieved.

Numerous firms located in Michigan and out-of-state afford a wide range of experiences in all major areas in which students may have career aspirations. Cooperative education experience in professional assignments permits a practical test of vocational interest, the application of classroom knowledge to practical problems, a first-hand exposure to labor-management relationships, the development of responsible work habits, and the prospects of full-time employment upon graduation.

Work assignments, salaries, and employee benefits provide students with the prospect of substantial self-support during their enrollment as UM-Dearborn students.

Student Counseling and Placement
The cooperative education coordinator of the College counsels each co-op student with respect to career interests and aptitudes, and arranges interviews with appropriate cooperating employers. These interviews furnish the opportunity for a professional work assignment that is agreeable to the student and to the employer.

Evaluation and Recognition of Achievement
Each student is formally evaluated by the employer, and also must prepare and submit a detailed, well-written work report to the director at the end of each work assignment period. At the conclusion of each work assignment period, a grade determined mainly from the employer's evaluation and the student's report will be assigned by the director and recorded on the student's transcript. The grade assigned and recorded for each work assignment period will be either S for satisfactory or NC (no credit) for unsatisfactory.

Computer Information Science students are awarded academic credit by faculty on the basis of learning achievement and requirements met. CIS students may earn a maximum of nine credits toward their degree programs by completing the equivalent of three full-time (40 hr/wk) work terms for three credits each.

The cooperative education degree option requires a minimum of two work assignments and the possibility of an optional third term of
professional employment in the program during the junior and senior years. Successful participation in the required professional work assignment periods is recognized by satisfactory cooperative education performance concurrent with the baccalaureate degree (Not applicable to CIS students). Additionally, the awarding of this certificate is recorded on the student’s academic transcript upon graduation. Eligibility for receiving the satisfactory cooperative education performance certificate will be determined by the engineering cooperative education director based upon the reports submitted on and by the student over the several periods of work assignments.

**Participation in the Cooperative Education Program**

Students in the cooperative education option offered by the College of Engineering and Computer Science shall participate in four-month work periods alternating with their classroom terms. Students admitted to the CIS co-op program must fulfill the study-term requirements of the alternate, parallel, or summer only plans. Details on the study-term requirements are available through the co-op office. These alternating work periods may not be waived except as follows: 1) where academic achievement in any term is so poor as to minimize the possibility of the student successfully pursuing the academic program to the end; in such cases, the student will immediately be required to repeat a regular classroom term or be caused to withdraw from the College of Engineering and Computer Science; 2) where such illness or disability exists that, in the opinion of the employer or suitable medical counselor, industrial assignment would not be in the best interests of the employer and/or the student during a particular term.

Both the cooperating employers and the University expect that students participating in the cooperative education program will be able to demonstrate a considerable increase in academic knowledge after each term of classroom study. Therefore, participants in the CECS Cooperative Education Program must be full-time students during their alternated class terms; that is, must satisfactorily complete at least 12 credit hours of their degree program course work during each scheduled class term.

**Admission to the Cooperative Program**

The first and most important step toward admission to the CECS Cooperative Education Program is current enrollment as an undergraduate student in good academic standing in a CECS degree program. Since the first co-op work period is always scheduled within the junior academic year, sophomores enrolled in the CECS will be accepted into the CECS Cooperative Education Program for participation in career counseling and placement interviewing activities during the second term of their sophomore year. Transfer students admitted to the CECS at the junior year level may be accepted into the Cooperative Education Program after completing one semester as a full-time student (12 credits). In all but the most unusual circumstances, all students must apply for admission to the internship program not later than during the registration week of the class term preceding their intended first work assignment period or as advertised by the CECS Cooperative Education Director.

An application for acceptance into the CECS Cooperative Education Program may be submitted later than the first term of the junior year but will not be approved when the class level of the student is such that there will not be sufficient time prior to graduation to participate in the program for at least two-co-op periods alternated with the usual terms of class.

The basic entrance-level requirement of the CECS Cooperative Education Program, applying to all students, is satisfactory completion of the sophomore year, with a recommended GPA of at least 2.30. Student admitted to the CIS program must have completed 30 semester hours (sophomore status) and have a minimum cumulative GPA of 2.25. Transfer students must have completed 12 UM-Dearborn credit hours. The courses of this basic requirement include the calculus sequence, differential equations, linear algebra, college chemistry, the engineering physics sequence, and introductory courses in engineering that include computer-aided tools for design and analysis.

In addition to the basic entrance-level requirement there also are specific courses that must be satisfactorily completed before beginning the first co-op work period. These specific courses, which differ according to the degree programs, are all courses normally scheduled in the sophomore year under CECS’s basic freshman-sophomore curriculum (the equivalent course at another college may be acceptable for a transfer student).

For the mechanical engineering co-op student, the specific required courses that must be satisfactorily completed are computer methods in mechanical engineering and thermodynamics or applied mechanics.

The specific courses required for the industrial and manufacturing systems engineering co-op student are computer programming for engineers and manufacturing processes. Thermodynamics and applied mechanics are optional courses.

For the electrical engineering co-op student, the specific required courses for those enrolled at UM-Dearborn during their sophomore year are digital systems in electrical engineering and the first courses in circuits.

The purpose of these course requirements is to prepare the co-op student academically for professional work assignments where there will be continual association with practicing engineers in their daily work. Through fulfillment of these requirements the co-op student will have sufficient competence to function as a member of an engineering group.

**Registration in the Cooperative Education Program**

Each co-op work assignment extends for one term (four months) and occupies the student full time. From a group of co-op courses available, the co-op student elects a two or three-credit hour course whose content is appropriate to the particular field of engineering and to the level of practice being undertaken that term. Three such registrations are recommended (two are required) for a total of seven credit hours, for satisfactory completion of the Cooperative Education Program. All credit hours earned via co-op courses are added to the academic (classroom) credit hours required in the undergraduate program of studies pursued by the student. Since the co-op work assignment occupies the student full-time, registration in courses other than the co-op course is strongly discouraged. A student on a co-op assignment cannot elect more than one other course besides the co-op course (two courses maximum including the co-op course) during the semester. CIS students can earn up to seven co-op credits toward graduation. CIS students register from a group of co-op courses (CIS 299, CIS 399, CIS 499). The student elects a three-credit hour course whose content is appropriate to the level of practice being undertaken that term. Three such registrations are recommended for satisfactory completion of the Cooperative Education Program.

In some instances students may be involved in a cooperative-type educational program prior to their eligibility for and/or acceptance into the Engineering Cooperative Education Program. Such cooperative-type programming might occur either while enrolled at UM-Dearborn or at another educational institution. However, no regular employment completed prior to formal enrollment in the CECS Cooperative Education
Program will be considered as satisfying the requirements of the CECS Cooperative Education Program.

International Study

Student Exchange Programs with the Jönköping School of Engineering in Jönköping, Sweden and the Ulm University of Applied Sciences in Ulm, Germany

The College of Engineering and Computer Science has a formal student exchange program with the Jönköping School of Engineering in Jönköping, Sweden. CECS undergraduates in good standing in any major are eligible to apply. A formal exchange program also exists with Ulm University of Applied Sciences in Germany for Mechanical Engineering coursework.

Students choose the classes they will take during the student exchange semester in consultation with the CECS International Advisor and with their faculty advisor. They register for their exchange classes at UM-Dearborn and pay regular UM-Dearborn tuition. The student exchange classes are listed as UM-Dearborn classes on the UM-Dearborn transcript. Students register for a full load during their student exchange semester, consisting of three technical courses in engineering or computer science taught in English and a fourth language course.

Prechter International Travel Fellowship

CECS students may be eligible for a travel fellowship to help defray some of the cost of travel associated with approved international studies. The travel fellowships are made possible by a gift from Ms. Waltraud Prechter to the CECS’ Institute for Advanced Vehicle Systems.

CECS students should make an appointment with the CECS International Advisor (2000 HPEC) for information about the Jönköping and Ulm programs and the travel fellowship.

Career Opportunities

A wide variety of employment opportunities is available to computer and information science graduates, as mentioned above. The University’s Career Services Office assists students and graduates in planning careers in computer and information science and offers many job listings in the computer industry.

Cooperative Education/Internship Program

Work experience opportunities are available for qualified computer and information science students through the CECS Cooperative Education Office. These programs allow students to earn a salary and up to nine credit hours which can be applied toward graduation while working full-time during alternate semesters or part-time during regular semester for participating firms or governmental agencies (Acromag, APPLE, Chrysler, DENSO, DTE Energy, Ford, General Electric, Harmon Becker, NASA, Nokia, TACOM, U.S. Steel, Xilinx, etc.).

CIS Professional Advisory Board (CISPAB)

The Department continually seeks outside interactions with business, industries, and government through its Professional Advisory Board. The PAB is composed of senior computing technologists who provide input on curriculum, potential employment for students, research opportunities for faculty, and a perspective on future challenges requiring collaboration.

Computing Facilities

Student software development is done in various campus computing laboratories, having IBM-compatible PC’s, UNIX machines, a CRAY supercomputer, and Macintosh computers as well as specialized department computing laboratories. The software available includes state-of-the-art tools for database, video conferencing, software engineering, expert systems, a large number of operating systems (e.g., LINUX, Windows, Macintosh, etc.), programming languages and solid modeling tools. These labs are all staffed by student assistants under the direction of a laboratory manager.

Upsilon Pu Epsilon (UPE)

UPE is the national computer science honor society. Membership is available to upper-division students maintaining a 3.0 GPA for all course work. UPE sponsors a variety of educational and social events on campus.

Association for Computing Machinery (ACM)

The student chapter of the Association for Computing Machinery (ACM) sponsors “chalk talks” to help familiarize students with new computing technologies, guest speakers on computer-related topics, and a variety of social events.

Bioengineering

Bioengineering is an emerging branch of engineering that primarily deals with problems of medicine, healthcare, and—in general—quality of human life. It is a multidisciplinary field that combines scientific principles of biology, chemistry, physics, and mathematics with the best engineering techniques developed in traditional areas (for example, mechanical, electrical, chemical, and computer engineering) and new breakthrough methods developed in recent years.

Activities of bioengineers are widely spread. They use their knowledge to design and build medical instruments, artificial organs, prosthetic limbs, therapeutic devices, and medical imaging equipment. They help doctors to design new medical procedures, including new rehabilitation techniques. They also assist pharmaceutical and biotechnology industries in developing new, more efficient bioprocessing technologies. Finally, they find solutions for medical and biology-related problems of consumer technology in the areas of safety, ergonomics, and comfort.

Bioengineering is a rapidly growing profession with expanding career opportunities. By virtue of their vigorous cross-training, bioengineers are well-poised for careers in healthcare, medical device production, pharmaceutical industries, and consulting in health-related fields, as well as other positions in industry, education, and government.
Undergraduate Degree Program

The undergraduate program in bioengineering provides first a strong foundation in all of the basic ingredients of engineering: the natural and physical sciences, mathematics, a comprehensive socio-economic-cultural background, the behavioral sciences, and finally the basic engineering sciences that begin the development of problem-solving skills.

The program integrates natural sciences with engineering analysis and design concepts to advance the fundamental understanding of biological systems and to develop biology-based technologies with applications across a wide spectrum of societal needs. The bioengineering curriculum is designed to cater to students looking to enter the professional world immediately after earning their undergraduate degree, as well as those who are interested in pursuing graduate studies and research. Various fundamental, design, and application oriented courses (e.g. Biomaterials, Biomechanics, Bioinstrumentation, Biotransport, and Bioprocesses) fulfill industrial needs and help students to perform well in biotech, pharmaceutical, and healthcare industries as engineering professionals. At the same time, the exposure to advanced courses and cross-cutting, state-of-the-art research experiences provide a solid foundation to continue graduate studies and emerge as leaders in science and engineering.

Program Educational Objectives

The Program Educational Objectives for the Bachelor of Science in Engineering in Bioengineering are:

1. Be successfully employed in their discipline or closely related field and contribute to the economy and healthcare.
2. Graduates continue to enhance their knowledge base and skills through graduate or other professional development, to keep abreast of ongoing changes in technology and health-related disciplines.
3. Graduates be well rounded and well suited to work with colleagues and professionals with diverse technical backgrounds and cultures and a wide range of competencies including those related to healthcare.

To achieve the educational objectives, the graduates of the program will have:

a. an ability to apply knowledge of mathematics, sciences and engineering.
b. an ability to design and conduct experiments, as well as to analyze and interpret data.
c. an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
d. an ability to function on multidisciplinary teams.
e. an ability to identify, formulate and solve engineering problems.
f. an understanding of professional and ethical responsibility.
g. an ability to communicate effectively.
h. the broad education necessary to understand the impact of engineering solutions in a global economic, environmental, and societal context.
i. a recognition of the need for, and an ability to, engage in life-long learning.
j. a knowledge of contemporary issues.
k. an ability to use the techniques, skills and modern engineering tools which are necessary for engineering practice.

Concentration Requirements

A candidate for the degree Bachelor of Science in Engineering (Bioengineering) is required to pursue scholastic quality and to complete satisfactorily the following program of study:

Bioengineering Program for Students Admitted as Freshmen

(128 hours)

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

In addition to completion of the Dearborn Discovery Core, the following courses are required to earn a BSE degree in Bioengineering from UM-Dearborn.

Basic Preparation for Engineering

CIS Mathematics
(Concurrent Degree)

Current CECS undergraduate students majoring in Computer and Information Science (CIS), Digital Forensics, or Software Engineering (SE) may pursue a concurrent Bachelor of Science (BS) degree in CIS Mathematics. This makes it possible for CECS students to earn two degrees at the same time: a principal BS degree in CIS, DF, or in SE and a separate concurrent BS degree in CIS Mathematics. Both degrees must be earned at the same time. The courses for the concurrent BS degree in CIS cannot be used as elective credits for the principal degree, but must be taken in addition to the 120-123 credits required for the BS degree in CIS, the BS degree in DF, or the BS degree in SE.

The BS in CIS Mathematics degree requires a minimum of thirty credits in mathematics courses, as follows:

Fourteen credits of mathematics courses required for the BS degree in CIS, DF or in SE: 1
MATH 115 Calculus I 4
MATH 116 Calculus II 4
MATH 217 Intro to Matrix Algebra 2-3
or MATH 227 Introduction to Linear Algebra
CIS 275 Discrete Structures I 4
Six credits from the following two courses: 2
MATH 205 Calc III for Engin Students 3
or MATH 215 Calculus III
MATH 216 Intro to Diff Equations 3
Select a minimum of ten credits from the following courses: 10
MATH 315 Applied Combinatorics
MATH 372 Computing with Mathematica
MATH 390 Topics in Mathematics 4
MATH 395 Elementary Number Theory
MATH 404 Dynamical Systems
MATH 405 Integral Equations
MATH 412 First Course in Modern Algebra
MATH 413 Linear Algebra 5
MATH 420 Stochastic Processes 6
MATH 425 Mathematical Statistics
MATH 451 Advanced Calculus I
MATH 452 Advanced Calculus II
MATH 454 Fourier and Boundary
MATH 455 Func of a Complex Var with App 7
MATH 462 Mathematical Modeling
MATH 472 Intro to Numerical Analysis
MATH 473 Matrix Computation

Total Credit Hours 30-32

1 Students may elect MATH 227 instead of MATH 217 but only 14 credits from the courses above will count toward the degree.
2 Students may elect MATH 215 instead of MATH 205 but only 6 credits from the courses above will count toward the degree.
3 Calculus III is required for the SE degree and for the CIS-CS option degree; it must also be taken by CIS-IS option students as part of the requirements for the concurrent BS degree in CIS Mathematics.

1 Information for students planning to transfer to UM-Dearborn from community colleges or from four-year colleges and universities is given under Admission Information in the General Information section and under Undergraduate Requirements in the Engineering section of this Catalog.
The following CECS graduate courses may also be used towards the Engineering positions.
Pursuing the dual degree option is qualified for a much wider variety of others require specialization in electrical engineering, a student who since some job listings require a computer engineering background while for students to work concurrently to earn a second degree in Electrical Engineering by taking an additional 16 credit hours of courses. In this final design, testing, and documentation. Students with an interest in to design and implement an instruction set and logic functions for a development boards, system-on-a-chip technology, computer networks, and reconfigurable computing. In the junior year, students learn how to design and implement an instruction set and logic functions for a computer. In the senior year, students work on projects in which they design a complete real-world system, from initial specifications to final design, testing, and documentation. Students with an interest in pursuing graduate studies or wish to pursue a research and development career are encouraged to undertake directed research projects under the supervision of faculty advisors for more advanced design experiences.

A unique feature of the Computer Engineering program is the opportunity for students to work concurrently to earn a second degree in Electrical Engineering by taking an additional 16 credit hours of courses. In this case, a student can earn two Bachelor's Degrees in just 141 credit hours. Since some job listings require a computer engineering background while others require specialization in electrical engineering, a student who pursues the dual degree option is qualified for a much wider variety of engineering positions.
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)

Computer and Information Science
Computing professionals offer expertise in the effective and efficient use of computers for solving human problems, whether that be as a member of a project development team, as a builder of powerful and easy-to-use tools, as an individual researcher, or as an educator.

Required courses in the CIS major stress theory and application, as well as the role of other fields such as mathematics, statistics, electrical and computer engineering, business, and software engineering, among others. The curriculum is modeled on the recommendations of the two main professional computing societies, the Association of Computing Machinery (ACM) and the Institute for Electrical and Electronic Engineering (IEEE). Written and oral communications skills are emphasized throughout the program. The use of teamwork on projects is practiced in many courses. Professionalism and ethics are also stressed for future computing professionals. The CIS courses include software engineering, algorithm analysis, networking, security, programming languages, game design, computer architecture, data structures, operating systems, artificial intelligence, database management systems, graphics, information systems, robotics, web development and capstone design courses.

The CIS curricula prepare students to begin careers as computing professionals or to pursue graduate study in the field. The BS in Computer and Information Science program is accredited by the Computing Accreditation Commission of ABET (the Accreditation Board in Engineering and Technology):
415 North Charles Street
Baltimore, MD 21201
Telephone 410-347-7700.

A candidate for the degree of BS in CIS is required to select one of two concentrations: Computer Science or Information Systems. A BS in Software Engineering is also offered. Both programs encourage innovation on the part of students, prepare students for graduate education, train students to communicate effectively, and provide students with the tools needed to become leaders in their profession.

The Computer Science concentration emphasizes understanding how computer systems work, as well as their uses as critical components in other disciplines, and prepares its graduates for positions in systems programming, scientific programming, networks, game programming,
web technology, graphics and visualization, and enterprise computing among others.

The Information Systems concentration is oriented toward the design and development of computer information systems. It includes more business-related courses than the computer science concentration, and prepares graduates for positions in applications programming, database management, information systems design, and information engineering, among others.

**Program Objectives**

1. Our graduates will be successfully employed in computer science–related fields or other career paths, including industrial, academic, governmental, and non-governmental organizations, or will be successful graduate students in a program preparing them for such employment.
2. Our graduates will lead and participate in culturally diverse teams, becoming global collaborators.
3. Our graduates will continue their professional development by obtaining continuing education credits, professional registration or certifications, or post-graduate study credits or degrees.

**Computer Science Program Outcomes**

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline;
b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs;
d. An ability to function effectively on teams to accomplish a common goal;
e. An understanding of professional, ethical, legal, security, and social issues and responsibilities;
f. An ability to communicate effectively with a range of audiences;
g. An ability to analyze the local and global impact of computing on individuals, organizations, and society;
h. A recognition of the need for, and an ability to engage in, continuing professional development;
i. An ability to use current techniques, skills, and tools necessary for computing practices;
j. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices;
k. An ability to apply design and development principles in the construction of software systems of varying complexity.
l. An ability to program.

**Dearborn Discovery Core Requirement**

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

**Foundational Studies**

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

**Areas of Inquiry**

Natural Science (GENS) – 7 Credits (p. 19)
- Lecture/Lab Science Course
- Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Any for-credit courses; that is, courses not on the No Credit list, which is found at the end of the CECS Student Handbook, umdearborn.edu-cecs/SRA/pdf/Student_Handbook.pdf, and is also posted outside 2000 HPEC. No Credit courses do not count toward the degree.
The minor in CIS requires a minimum of 24 credit hours, which must include CIS 150, CIS 200, CIS 275, CIS 350 and eight additional credit hours at the 300 or 400 level approved by the student’s faculty advisor in CIS. An introduction to calculus (MATH 115) is required and does not count toward the 24 hours. Completion of MATH 116 is strongly recommended.

Minor in Computer and Information Science

The minor in CIS requires a minimum of 24 credit hours, which must include CIS 150, CIS 200, CIS 275, CIS 350 and eight additional credit hours at the 300 or 400 level approved by the student’s faculty advisor in CIS. An introduction to calculus (MATH 115) is required and does not count toward the 24 hours. Completion of MATH 116 is strongly recommended.

Data Science

With increasing availability of data, companies, governments, and nonprofits alike are striving to convert information into actionable information and insight. In the past, students trained in singular disciplines such as computer science, operations research, or statistics had the skill set needed to analyze the required data. But the "volume", "velocity" and "variety" of today's data and future data streams pose unique challenges and also creates unique opportunities. Present data sets requires more programming, mathematics/statistics, modeling skills, and domain knowledge than a traditional undergraduate curriculum offers. In fact, one of the obstacles that must be removed before government, business and social sectors are prepared to use large datasets to enhance their decision-making, is the acquisition of a trained workforce that can leverage it.

Decision makers require data and evidence before resources are committed. In the current environment, commitments are not made unless evidence supports that the opportunities are both cost effective and yield positive net benefits. Healthcare practitioners seek evidence-based medicine; social scientists engage in impact assessments; business analysts practice decision science and engineers and computer scientists desire facility with big data sets using a variety of statistical techniques.

The University of Michigan-Dearborn, with its strong Engineering, Mathematics, Social and Behavioral Sciences, and Business Management programs is in a strategic position to enhance both undergraduate and graduate education with data science course offerings and a data science major. UM-Dearborn’s recent addition of the Department of Health and Human Services is also uniquely positioned in time, developmental stage, and location, to benefit from data science offerings. In other words, a case could be made for data science programming that enhances student education and marketability in all four of UM-Dearborn’s Colleges—the College of Engineering; the College of Arts, Sciences and Letters; and the College of Business and the newly formed College of Education, Health and Human Services.

The Data Science degree is housed within the College of Engineering and Computer Science. The interdisciplinary nature of this degree program will require resources from all academic units, namely the College of Business, the College of Engineering and Computer Science, the College of Arts, Sciences, and Letters and the College of Education, Health, and Human Services. Students in this program will take courses and be involved with scholarly activity from a number of departments and disciplines across campus including Management Studies, Computer and Information Science, and Health and Human Services, Behavioral Science, Social Science as well as the Mathematics and Engineering disciplines.

This program requires technical courses from each college on our campus and is highly multidisciplinary. Taking a multidisciplinary approach, the curriculum is designed to leverage existing courses on campus and combine these with foundational courses in data science. This creates synergy among academic units on campus, provides flexibility in scheduling, and allows for timely completion of the program. Students with varied backgrounds can take different courses to suit their needs, based on interest and guided by faculty advisors.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)
Areas of Inquiry

Natural Science (GENS) – 7 Credits (p. 19)

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)

Humanities and the Arts (GEHA) – 6 Credits (p. 20)

Intersections (GEIN) – 6 Credits (p. 21)

Capstone

Capstone (GECE) – 3 Credits (p. 22)

General Requirements

Basic Requirements

- CIS 1501 CS I for Data Scientists 4
- MATH 115 Calculus I 4
- MATH 116 Calculus II 4
- MATH 205 Calc III for Engin Students 3-4
  or MATH 215 Calculus III
- MATH 227 Introduction to Linear Algebra 3

Natural Science

Two courses, 7 credits, one of which is a laboratory course. Please consult the Dearborn Discovery Core.

Ethics

- HHS 470 Information Science and Ethics 3

Business Course

- ENGR 400 Appl Business Tech for Engr 3
  or ENT 400 Entrepreneurial Thinking&Behav

Data Science Applications

Students should complete 18 credit hours in one of the following five analytics areas listed below. In addition, at least half of the elected courses selected should be designated as being in the analytics domain.

Applied Social and Behavioral Science Analytics

Take an additional 18 credits from any of the following: Political Science, Economics, History, Criminal Justice, Sociology, Anthropology, and Psychology. Students must meet the prerequisites for each course. In addition, the 18 disciplinary credits must have the same prefix, e.g. POL, ECON, HIST, CRJ, SOC, ANTH, or PSYC. As an exception, a student may substitute 6 credits of GIS for 6 of the discipline specific credits.

Business Analytics

Take DS 310 (3) Data Mining for Business Intelligence, plus 15 credit hours in one of the following: Accounting, Finance, Technology Management, and Supply Chain Management. Students must meet the prerequisites for the course. In addition, the additional 15 credit hours must have the same prefix, e.g. ACC, FIN, MKT, ITM, or OM.

Computational Analytics

Take an additional 18 credit hours from courses focusing on Applied Statistics, Mathematics or from CECS. The proposed coursework must be approved by a faculty advisor in the Department of Mathematics or CECS, respectively, prior to enrollment in the course.

Health and Medicine Analytics

Take an additional 18 credit hours from courses focusing on health and medicine. The proposed coursework must be approved by a faculty advisor in the Department of Health and Human Services prior to enrollment in the course.

Natural and Physical Science Analytics

Take an additional 18 credit hours from courses from one of the natural and physical sciences. Students must meet the prerequisites for the courses. In addition, the 18 disciplinary credits must have the same prefix, e.g. BIOL. The proposed coursework must be approved by a faculty advisor in the Department of Natural Sciences prior to enrollment in the course.

Data Science Core

- MATH 420 Stochastic Processes
- MATH 425 Mathematical Statistics
- MATH 462 Mathematical Modeling
- MATH 472 Intro to Numerical Analysis
- MATH 473 Matrix Computation
- STAT 440 Design and Analysis of Expermt
- STAT 450 Multivariate Stat Analysis
- STAT 460 Time Series Analysis
Digital Forensics

Digital Forensics is the area of computer science concerned with the examination and analysis of computer hard drives, storage devices, cell phones, PDA’s, or any electronic device that may hold evidence which could be used in a court of law. The device could be as simple as a cell phone or as complex as a main server for a large corporation. The digital forensics analyst uncovers and preserves data for later use as legal evidence, and analyzes the data in light of a particular crime or criminal or civil investigation. This may involve determining how hackers or unauthorized persons gained access to information or computer systems as well as where and how they navigated within the system.

Digital forensics specialists recover files and emails or other electronic correspondence that have been deleted or erased. They also recover data after hardware or software failure, and develop means to harden computer, cyber, and data security against loss, corruption, sabotage, or external attack.

The College of Engineering and Computer Science Digital Forensics degree program covers a wide range of knowledge, including forensic accounting and the criminal justice aspects of forensics, but puts primary emphasis on deep knowledge of computer science subjects, such as data structures, algorithms, software engineering, database management, computer networks, web technology, operating systems, and security.

The tasks of a digital forensics specialist include:

- Conduct computer forensic investigations and electronic discovery requests for various clients
- On-site collection of data at client facilities
- Verify, analyze, and transfer secure data sets from field investigators
- Use off-the-shelf and proprietary data collection, analysis, and reporting tools
- Develop security tools and methodologies to incorporate into current business practices and processes.

Students complete a minimum of 123 credits and earn a Bachelor of Science (B.S.) degree in Digital Forensics.

Students in the College of Engineering and Computer Science Digital Forensics program are advantaged by graduating from one of the few such computer science-heavy programs in the country.

Program Objectives

1. Our graduates will be successfully employed in digital forensics-related fields or other career paths, including industrial, academic, governmental, and non-governmental organizations, or will be successful graduate students in a program preparing them for such employment;
2. Our graduates will lead and participate in culturally diverse teams, becoming global collaborators;
3. Our graduates will continue professional development by obtaining continuing education credits, professional registration or certifications, or post-graduate study credits or degrees.

Program Outcomes

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline;
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
3. An ability to communicate effectively with a range of audiences;
4. An ability to use current techniques, skills, and tools necessary for computing practices;
5. An ability to apply design and development principles in the construction of software systems of varying complexity.

Dearborn Discovery Core Requirement

The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Modern electronic devices can perform high-speed computations and process information in a wide variety of formats. Electronic devices have radically changed many aspects of daily life including high-definition television, video game consoles, digital cameras, satellite transmissions, GPS navigation, automotive entertainment systems, surround sound, mp3 players and advanced medical imaging systems. These technological advancements require high-speed electronic circuits that can receive, transmit and process electrical signals using circuits and devices developed by electrical engineers. They have the specialized knowledge required to design circuits and systems to perform a variety of functions, such as store electrical energy (batteries and power electronics), control of electric vehicles, transmit signals and information through wires (cable TV) or free space (TV, AM and FM radio, satellite, dish networks), provide automatic control of mechanical systems (cruise control, braking, target tracking and factory automation), enable communication between devices (internet, web, cell phones), process digital signals (microprocessors, digital signal processing algorithms and hardware), and ensure safety and performance of complex systems (electromagnetic compatibility).

A unique feature of the Electrical Engineering program is the opportunity for students to work concurrently to earn a second degree in Computer Engineering by taking an additional 16 credit hours of courses. In this case, a student can earn two Bachelor’s Degrees in just 141 credit hours. Some employment listings require a computer engineering background while others call for specialization in electrical engineering. A student who pursues the dual degree option is qualified for both types of positions and therefore has a distinct advantage in securing employment.

The Computer Engineering Program at the University of Michigan-Dearborn is accredited by the Engineering Accreditation Commission of ABET (the Accreditation Board for Engineering and Technology). abet.org

Program Educational Objectives
The objective of the BSE EE degree programs are to:

1. Achieve professional growth in an engineering position in regional and national industries. Growth can be evidenced by promotions and appointment in the workplace (management positions, technical specialization), entrepreneurial activities, and consulting activities.
2. Success in advanced engineering studies evidenced by enrollment in graduate courses, completion of graduate degree programs, presentations and publications at professional events, and awards or licences associated with advanced studies.
3. Realization of impactful achievements in societal roles demonstrated by attainment of community leadership roles, mentoring activities, civic outreach service, and active roles in professional societies.

Program Outcomes
The Electrical Engineering program is designed to demonstrate that graduates of the program have:

a. an ability to apply knowledge of mathematics, science, and engineering
b. an ability to design and conduct experiments, as well as to analyze and interpret data
c. an ability to design a system, component, or process to meet desired needs
d. an ability to work cooperatively on multi-disciplinary projects
e. an ability to identify, formulate, and solve engineering problems
f. an understanding of professional and ethical responsibility  
g. proficiency in oral and written communications  
h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context  
i. a clear understanding that lifelong learning is essential for sustained professional development  
j. a knowledge of contemporary issues and its impact on the engineering profession  
k. an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

Please contact the ECE Department for more information on approved electives.

**Dual Degree in EE or CE**

Students must take 17-19 hours beyond the 123-125 hours needed for the EE/CE degree for a total of 142 hours. For a second degree in EE, CE students should take the ECE Core courses: ECE 3171, ECE 385, ECE 450, ECE 460, ECE 480, and ECE 4951. For a second degree in CE, EE students should take the CE Core courses: ECE 370, ECE 375, ECE 471, ECE 473, ECE 475, and ECE 478.

**Engineering Mathematics**  
(Concurrent Degree)

The program in engineering mathematics at UM-Dearborn provides the student with an opportunity to extend his/her knowledge of the language of the scientist and to become more proficient in the application of mathematical reasoning to the formulation and solution of scientific problems in engineering. This program recognizes the ever-increasing demand that the changing physical and economic world imposes on the engineering profession. This program seeks to make available to the...
students the knowledge with which they will be better able to understand and to create the complex mathematical models that represent the world.

A current CECS undergraduate student majoring in Computer Engineering, Electrical Engineering, Industrial and Systems Engineering, Manufacturing Engineering, or Mechanical Engineering may pursue a concurrent Bachelor of Science in Engineering (BSE) degree in Engineering Mathematics. This makes it possible for an engineering student to earn two degrees at the same time: a BSE degree in Engineering Mathematics and a BSE degree in their principal engineering major. Both degrees must be earned at the same time.

The Engineering Mathematics degree requires a minimum of 14 credit hours of course work in advanced mathematics beyond the 16 credits of mathematics already required in the degree program of the student's principal engineering major. Approved courses for the BSE in Engineering Mathematics concurrent degree include:

- MATH 404 Dynamical Systems 3
- MATH 405 Integral Equations 3
- MATH 412 First Course in Modern Algebra 3
- MATH 413 Linear Algebra 1
- MATH 420 Stochastic Processes 2
- MATH 425 Mathematical Statistics 3
- MATH 451 Advanced Calculus I 3
- MATH 452 Advanced Calculus II 3
- MATH 454 Fourier and Boundary 3
- MATH 462 Mathematical Modeling 3
- MATH 472 Intro to Numerical Analysis 3
- MATH 473 Matrix Computation 3
- MATH 513 Linear Algebra 3
- MATH 555 Func of a Complex Var with App 3

1. Credit for only one from MATH 413 and MATH 513.
2. Credit for only one from MATH 420 and IMSE 506.

The following CECS graduate courses may also be used towards the Engineering Mathematics degree: ECE 555, ECE 560, ECE 567, ECE 580; IMSE 505, IMSE 506, IMSE 510, IMSE 511; ME 518, ME 519, provided that

1. a minimum of 9 hours is taken from the Mathematics department (MATH) courses listed above, and
2. permission to take a graduate course is granted.

**Industrial and Systems Engineering**

Industrial and systems engineering is concerned with the study and design of integrated systems of people, materials, equipment and their interaction with the surrounding environment. Historically, this field developed in the manufacturing industries where industrial engineers applied their engineering knowledge and management techniques to design and efficiently operate industrial and business systems. But the advent of the modern information technology enabled industrial engineers to apply their quantitative methods and organizational skills to a multitude of large-scale systems in addition to industrial systems. Today, industrial and systems engineers are being called upon, with increasing frequency, to design and improve the performance of systems in a wide spectrum of fields such as the service, energy, transportation, finance, and health care. Thus, their scope is not limited to tackling industrial problems alone, but extends to finding solutions for the endless variety of problems of modern industrial society.

The field of study bridges engineering knowledge, management principles, physical and social sciences, and the life sciences. Simply put, it stresses the scientific and technological approach to the design, development, and the optimal operation of both large-scale and small-scale systems. The industrial and systems engineer is a versatile expert whose talents are vigorously sought, and will be for a long time to come, by various sectors of society.

**Undergraduate Degree Program**

The undergraduate program in industrial and systems engineering provides first a strong basis in the foundations of engineering: natural and physical sciences, mathematics, socioeconomic-cultural background, the behavioral sciences and the basic engineering sciences which begin the emphasis on problem solving. Then, the program develops the intermediate bases on which industrial systems and other systems engineering work is founded. This includes studies in production and operations management, lean concepts, quality engineering methods system modeling, simulation and optimization, organization and decision theory, and human factors engineering. Contemporary operations research methods are progressively developed and applied through systems-design case studies ending with a capstone design experience.

The undergraduate degree program in Industrial and Systems Engineering is accredited by the Engineering Accreditation Commission of ABET (the Accreditation Board for Engineering and Technology):

111 Market Place,
Suite 1050,
Baltimore, MD 21202-4012
Telephone: 410-347-7700.

An unusual opportunity is available to obtain considerable practical expertise in the student’s specialty for those who elect the internship option.

Students who do well in their undergraduate program are encouraged to consider graduate work and may take some of their electives in preparation for graduate study. Information and assistance regarding fellowships and assistantships for graduate study may be obtained from the Dean, College of Engineering and Computer Science, or from the department chairperson.

**Educational Objectives of the BSE (Industrial and Systems Engineering) Program**

Consistent with providing a strong academic foundation in the field of Industrial and Systems Engineering, the program educational objectives for our graduates are:

- To remain gainfully employed in Industrial and Systems Engineering related fields,
- To continue develop professionally, and
- To serve in leadership roles.

**Program Outcomes**

To achieve the educational objectives, the graduates of the program will have:
a. an ability to apply knowledge of mathematics, sciences and engineering
b. an ability to design and conduct experiments, as well as to analyze and interpret data
c. an ability to design a system, component or process to meet desired needs
d. an ability to function on multidisciplinary teams
e. an ability to identify, formulate and solve engineering problems
f. an understanding of professional and ethical responsibility
g. an ability to communicate effectively
h. the broad education necessary to understand the impact of engineering solutions in a global and society context
i. a recognition of the need for, and an ability to, engage in lifelong learning and graduate studies
j. a knowledge of contemporary issues
k. an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

Concentration Requirements
A candidate for the degree Bachelor of Science in Engineering (Industrial and Systems Engineering) is required to pursue scholastic quality and to complete satisfactorily the following program of study:

Industrial and Systems Engineering Program for Students Admitted as Freshmen

(128 hours minimum)

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
  • Lecture/Lab Science Course
  • Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)

In addition to completion of the Dearborn Discovery Core, the following courses are required to earn a BSE degree in Industrial and Systems Engineering from UM-Dearborn.

Basic Preparation for Engineering

1 Information for students planning to transfer to UM-Dearborn from community colleges or from four-year colleges and universities is given under Admission Information in the General Information section and under Undergraduate Requirements in the Engineering section of this Catalog.

Dual Degree in Industrial and Systems Engineering
Students must take at least 15 hours beyond the 128 hours needed for the Manufacturing Engineering degree including IMSE 3005, IMSE 4745 and IMSE 4585 from the courses listed in the I&SE curriculum.

Mechanical Engineering
The mechanical engineering field is one of the oldest of the several engineering fields. It is also one of the broadest in scope, for it is not
identified with nor restricted to any particular technology (like nuclear engineering), nor to any particular vehicle (like land-based automobiles), nor to any particular device or particular system. It is, in fact, concerned with so many areas of modern technology that the tasks and challenges of the mechanical engineer are most interesting and varied.

The field is logically associated with mechanical things, but this can lead to a restrictive image. For example, one often associates mechanical engineers with automobiles and, thus, with engines. To the non-engineer this is an acceptable association that implies a knowledge of pistons and carburetors. As engineers know, this picture is very shallow; the breadth of understanding implied when one thinks of designing an engine challenges the imagination. Automobile engines are just one of many devices that convert energy into useful work. To understand this conversion process is also to understand the basic principles of energy conversion applicable to solar engines, jet engines, gas turbines, fuel cells, ship-propulsion systems, rocket engines, hydro-electric power plants, and new kinds of converters not yet developed. The mechanical engineer possesses this universally applicable background in thermodynamics, heat transfer, fluid mechanics, aerodynamics, and combustion theory that is basic to all such systems. The mechanical engineer also has a similar understanding of materials from steels to textiles to biological materials to the latest plastics and the most exotic high temperature composites. The point is that everything that is built is achieved by applying these same principles and using these same materials.

To understand the dynamic nature of most mechanical devices and systems requires a thorough mastery of forces and stresses, of vibrations and acoustics, of shock and impact, of deformation and fracture. Yet, these are basic to virtually every product devised by people or found in nature. Automobiles are just one small example of where they are important.

Thus, the mechanical engineer is a designer who creates physical things of all sorts because the mechanical engineer’s breadth of background is everywhere applicable. The mechanical engineer produces machines to build other machines, and thus is in the forefront of new manufacturing technology. In this role the engineer is faced with the task of building new things created by all kinds of engineers. This exposes the engineer to other technologies, and the mechanical engineer must be able to grasp their essence easily. For example, as the builder of energy devices to tap the oceans’ resources, the mechanical engineer is simultaneously one of the oceanographers, one of the chemists, and one of the environmentalists, as well as the master designer.

The mechanical engineer is comfortable working with people as well as with machines. For example, the role in vehicle design is that of making technical advances in performance, efficiency, and cost while simultaneously meeting the life and comfort requirements of operators and passengers. Logically, then, the mechanical engineer is active in the new fields of biomechanics, biomaterials, biomedical fluid mechanics and heat transfer, air and water pollution, water desalination, sensory aids, and prostheses.

**Undergraduate Degree Program**

The undergraduate program in mechanical engineering provides first a strong foundation in all of the basic ingredients of engineering: the natural and physical sciences, mathematics, a comprehensive socio-economic-cultural background, the behavioral sciences, and finally the basic engineering sciences that begin the development of problem-solving skills.

The program provides for the detailed study of several advanced topics, including fluid machinery, heat transfer, manufacturing processes, vibration theory, stress analysis, metallurgy, electrical science, and control systems.

The greatest strength of the undergraduate program is the project-oriented design work that requires the student to organize thinking of the multitude of factors on which every design is based - performance, efficiency, esthetics, cost, reliability, safety, reparability, etc. - and to reach sound conclusions that the student must be prepared to defend and implement. This is the art of engineering, and its study permeates the courses and laboratories of the upper-level instruction in this field.

For those who choose the cooperative education option, it is possible to develop a more thorough understanding of how design factors are considered and how decisions are implemented in industrial organizations.

The undergraduate degree program in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET (the Accreditation Board for Engineering and Technology):

111 Market Place, Suite 1050, Baltimore, MD 21202-4012
Telephone: 410-347-7700.

Students who do well in their undergraduate program are encouraged to consider graduate work and may take some of their electives in preparation for graduate study. Information and assistance regarding fellowships and assistantships for graduate study may be obtained from the Dean, College of Engineering and Computer Science, or from the department chairperson.

**Program Educational Objectives**

The Program Educational Objectives for the Bachelor of Science in Engineering in Bioengineering are:

1. Our graduates will be successfully employed in engineering or other related industries and will advance in their professional fields.
2. Our graduates will possess adequate technical skills and knowledge for identifying, formulating and developing innovative solutions to mechanical engineering problems using modern engineering techniques and tools.
3. Our graduates will engage in life-long learning through graduate studies and/or professional development activities.
4. Our graduates will effectively communicate technical information and apply mechanical engineering solutions with strong social and ethical responsibility.

To achieve the educational objectives, the graduates of the program will have:

a. an ability to apply knowledge of mathematics, sciences and engineering.
b. an ability to design and conduct experiments, as well as to analyze and interpret data.
c. an ability to specify, model, and design a system, component or process to meet desired needs.
d. an ability to function on multidisciplinary teams.
e. an ability to identify, formulate and solve engineering problems.
f. an understanding of professional and ethical responsibility.
g. an ability to communicate effectively.
h. the broad education necessary to understand the impact of engineering solutions in a global and societal context, including environmental and economical impacts.
i. a recognition of the need for, and an ability to, engage in life-long learning.
j. a knowledge of contemporary issues.
k. an ability to use the techniques, skills and modern engineering tools, such as information technology, which are necessary for engineering practice.

Concentration Requirements

1 Information for students planning to transfer to UM-Dearborn from community colleges or from four-year colleges and universities is given under Admission Information in the General Information section and under Undergraduate Requirements in the Engineering section of this Catalog.

Practical Aspects of Computer Security
The PACS undergraduate certificate will provide students with essential computer science concepts, basic security principles, and the tools and experience necessary for an entry-level position in IT-Security. This certificate provides a foundational knowledge in computer security principles, firewalls, malware, intrusion detection, physical security, wireless network security, mobile device security, social network security, and web application security.

The PACS undergraduate certificate is comprised of 4 courses (15 credit hours) delivered in a web-based format. All 15 credit hours are transferrable into the College of Engineering and Computer Science’s Computer & Information Science (CIS) or Digital Forensics B.S. degrees. This certificate is distinctly unique in that it creates a pathway for a
student to receive a credential before transitioning into the degree program.

Any individual interested in advancing their knowledge in computer security principles, firewalls, malware, intrusion detection, physical security, wireless network security, mobile device security, social network security, and web application security will benefit from this program.

Data from the US Bureau of Labor Statistics indicates that job growth projections will increase 12% through the year 2022 for individuals with backgrounds in computer security. However, with the increase in cloud computing, this percentage has the potential to be even higher. As the utilization of information technology increases, there is also anticipated job growth in the healthcare industries. This growth, coupled with the impending federal government hiring regulations for military veterans, makes the job prospects extremely favorable for students who possess this credential.

Certificate Requirements
This web-based 15 credit hour certificate is comprised of 3 required core CIS courses, along with an applications course in practical computer security.

Robotics Engineering

With recent advances in computer hardware and software, as well as 3D printing, the field of robotics is entering a new phase where robots are smaller, faster, cheaper, and smarter. These next generation robots will have applications in a wide variety of fields, including manufacturing, medicine, education, entertainment, military applications, etc.

The Bachelor of Science in Engineering (B.S.E.) degree in Robotics Engineering program requires a total of 125 credit hours. The program is designed to provide students with an understanding of important concepts in Robotics, Electrical and Computer Engineering, Systems Engineering, and Mechanical Engineering, as well as an ability to apply these concepts to design robots and robotic systems for diverse applications.

The educational objectives of the Robotics Engineering program are to develop graduates who possess:

- Good design skills, the ability to formulate problems; design experiments; collect, analyze, and interpret data; evaluate material, computational, and management resources needed to solve typical problems
- The ability to work in multidisciplinary teams and communicate effectively
- The ability to pursue graduate studies as well as a research career in industry, government, or academia
- Hands-on experience with commonly used industry standard software and hardware tools
- A good awareness of professional responsibility, ethics, and the need to engage in life-long learning
- A strong preparedness to meet regional needs, including the automotive, construction, defense-related, life-sciences, and power industries, consistent with the University's mission
- A strong grounding in the principles and methods of robotics engineering, including robots, robotic systems, computers and control systems, and the ability to apply these in systems, products, and applications.

Program Educational Objectives
The objective of the BSE RE degree programs are to:

1. Achieve professional growth in an engineering position in regional and national industries. Growth can be evidenced by promotions and appointment in the workplace (management positions, technical specialization), entrepreneurial activities, and consulting activities.
2. Success in advanced engineering studies evidenced by enrollment in graduate courses, completion of graduate degree programs, presentations and publications at professional events, and awards or licences associated with advanced studies.
3. Realization of impactful achievements in societal roles demonstrated by attainment of community leadership roles, mentoring activities, civic outreach service, and active roles in professional societies.

Program Outcomes
The Robotics Engineering program is designed to demonstrate that graduates of the program have:

a. an ability to apply knowledge of mathematics, science, and engineering
b. an ability to design and conduct experiments, as well as to analyze and interpret data
c. an ability to design a system, component, or process to meet desired needs
d. an ability to work cooperatively on multi-disciplinary projects
e. an ability to identify, formulate, and solve engineering problems
f. an understanding of professional and ethical responsibility
g. proficiency in oral and written communications
h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
i. a clear understanding that lifelong learning is essential for sustained professional development
j. a knowledge of contemporary issues and its impact on the engineering profession
k. an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

Concentration Requirements
(125 hours minimum)

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education
Software Engineering

Software Engineering is the computer discipline that is concerned with the theoretical and practical aspects of building high quality software systems, on time, and within budget. Software engineers are tasked with the detailed analysis, design, implementation, testing, maintenance and management of software product development projects for a broad range of computing applications across society.

The increasing pressure to deliver high-quality, reliable software products in less time is rapidly fueling the demand for computer professionals with specific preparation in software engineering and experience in working on teams. These pressures stem from such widespread development as:

- The use of software for demanding and safety-critical applications that make it imperative to avoid the serious, indeed sometimes fatal, consequences of poorly understood design.
- The need to create consumer and entertainment applications like computer games, in the face of a highly competitive global market place.
- The increasing need to develop useful, easy-to-use software tools that reliably meet customer needs and whose features and documentation can be used and understood by their intended user with a high degree of consistency and confidence.
- The need to re-engineer or replace aging legacy software systems to take advantage of modern computer hardware capabilities.

Recent advances in the practice and technology of software engineering have made it possible to offer undergraduate and graduate degree programs in software engineering itself. Notable among these advances are:

- The availability of proven computer tools (such as CASE tools) and processes (such as the Personal Software Process) to standardize and automate software development.
- The increasing importance of formal methods and software quality measurement techniques to ensure more thorough testing of software.
• The success of the agile and object-oriented software engineering methods, as well as the move toward technical and managerial practices that cover the full software development cycle.

Software engineers must know the subset of computer science that is relevant to software development. They must also have knowledge of the principles of effective and reliable design, of mathematics and other sciences that are traditionally known by engineers, and of the skills and applications of project management.

Software engineering includes:

• Software design and development; that is, building commercial, industrial-strength software by the application of validated knowledge and experience that have been codified into formal methods of best practices.

• Software process and quality assurance; that is, the systematic discipline of consciously improving the quality, cost and timeliness of the process itself by which large software systems are designed and developed.

• Software development project management; that is, how to manage large software design projects and bring development to a timely and efficient completion.

The software engineering degree program offered by the Department of Computer and Information Science stresses the range of technical, systematic, and managerial aspects of the software engineering process but places primary emphasis on the technical facets of designing, building, and modifying large and complex software systems. This program concentrates on all software development lifecycle phases, including: program management, requirements engineering, software architecture design, software implementation, software configuration management, software quality assurance, and software process maturity measurements and improvements. It balances both theoretical and practical aspects by covering fundamentals in the classroom and evaluating student knowledge by implementing team-based work projects. Students complete a minimum of 120 credits and receive a BS degree in Software Engineering. The degree prepares graduates for immediate employment in the software engineering field and for graduate study.

The BS degree in Software Engineering is accredited by the Engineering Accreditation Commission of ABET (the Accreditation Board for Engineering and Technology):

415 North Charles Street,
Suite 1050,
Baltimore, MD 21201
Telephone: (410) 347-7700.

Program Objectives
1. Our graduates will be successfully employed in software engineering–related fields or other career paths, including industrial, academic, governmental, and non-governmental organizations, or will be successful graduate students in a program preparing them for such employment.

2. Our graduates will lead and participate in culturally diverse teams, becoming global collaborators.

3. Our graduates will continue professional development by obtaining continuing education credits, professional registration or certifications, or post-graduate study credits or degrees.

Program Outcomes
1. An ability to apply knowledge of mathematics, science, and engineering;

2. An ability to design and conduct experiments, as well as to analyze and interpret data;

3. An ability to design a system, component, or process to meet desired needs within realistic constraints, such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

4. An ability to function on multidisciplinary teams;

5. An ability to identify, formulate, and solve engineering problems;

6. An understanding of professional and ethical responsibility;

7. An ability to communicate effectively;

8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

9. A recognition of the need for, and an ability to engage in, life-long learning;

10. A knowledge of contemporary issues;

11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

12. An ability to program.

13. An ability to manage a project.

Dearborn Discovery Core Requirement
The minimum passing grade for a Dearborn Discovery Core (DDC) course is 2.0. The minimum GPA for the program is 2.0. In addition, the DDC permits any approved course to satisfy up to three credit hours within three different categories. Please see the General Education Program: The Dearborn Discovery Core (p. 16) section for additional information.

Foundational Studies
Written and Oral Communication (GEWO) – 6 Credits (p. 16)
Upper Level Writing Intensive (GEWI) – 3 Credits (p. 16)
Quantitative Thinking and Problem Solving (GEQT) – 3 Credits (p. 17)
Critical and Creative Thinking (GECC) – 3 Credits (p. 17)

Areas of Inquiry
Natural Science (GENS) – 7 Credits (p. 19)
• Lecture/Lab Science Course
• Additional Science Course
Social and Behavioral Analysis (GESB) – 9 Credits (p. 19)
Humanities and the Arts (GEHA) – 6 Credits (p. 20)
Intersections (GEIN) – 6 Credits (p. 21)

Capstone
Capstone (GECE) – 3 Credits (p. 22)
General Requirements

In addition to completion of the Dearborn Discovery Core, the following courses are required to earn a BS degree in Software Engineering from UM-Dearborn.

**Business Courses**
- OB 354 Behavior in Organization 3

**Mathematics**
- MATH 115 Calculus I 4
- MATH 116 Calculus II 4
- CIS 275 Discrete Structures I 4
- CIS 306 Discrete Structures II 4
- MATH 217 Intro to Matrix Algebra 2-3
  or MATH 227 Introduction to Linear Algebra
- IMSE 317 Eng Probability and Statistics 3

**Laboratory Science Sequence**
Select two courses, 8 credits, in one sequence from: 8
- BIOL 130 Intro Org and Environ Biology
  & BIOL 140 Intro Molec & Cellular Biology
- CHEM 134 General Chemistry IA
  & CHEM 136 General Chemistry IIA
- CHEM 144 Gen Chemistry IB
  & CHEM 146 General Chemistry IIB
- GEOL 118 Physical Geology
  & GEOL 218 Historical Geology
- PHYS 125 Introductory Physics I
  & PHYS 126 Introductory Physics II
- PHYS 150 General Physics I
  & PHYS 151 General Physics II

**Natural Science**
Select four credits from: 4
- ASTR 130 Introduction to Astronomy
  & ASTR 131 and Introductory Astronomy Lab
- BIOL 130 Intro Org and Environ Biology
- BIOL 140 Intro Molec & Cellular Biology
- CHEM 134 General Chemistry IA
- CHEM 136 General Chemistry IIA
- CHEM 144 Gen Chemistry IB
- CHEM 146 General Chemistry IIB
- CHEM 225 Organic Chemistry I
- CHEM 226 Organic Chemistry II
- CHEM 227 Organic Chemistry Laboratory
- GEO 118 Physical Geology
- GEO 218 Historical Geology
- PHYS 125 Introductory Physics I
- PHYS 126 Introductory Physics II
- PHYS 150 General Physics I
- PHYS 151 General Physics II

**CIS Core**
Seven computer and information science courses are required of Computer Science concentrators
- CIS 150 Computer Science I 4
- CIS 200 Computer Science II 4
- CIS 310 Computer Org and Assembly Lang 4
- CIS 3501 Data Struc & Alg Anlys for SE 4
- CIS 375 Software Engineering I 4
- CIS 427 Comp Networks and Dis Process 4
- CIS 450 Operating Systems 4

**Software Engineering Requirements**
- CIS 285 Software Engineering Tools 3
- CIS 376 Software Engineering II 4
- CIS 476 Soft Arch & Design Patterns 3
- CIS 4961 Design Seminar for SE I 2
- CIS 4962 Design Seminar for SE II 2

**One Application Sequence**
Select seven to nine credit hours: 7-9

**Information Systems Sequence**
- CIS 425 Information Systems 4
- CIS 447 Intro Computr & Ntwrk Security 3

**Computer Game Design Sequence**
- CIS 297 Intro to C Sharp 3
- CIS 487 Computer Game Design & Implem 3
- CIS 488 Computer Game Design II 3

**Web Engineering Sequence**
- CIS 421 Database Mgmt Systems 4

Take one of the following courses:
- CIS 435 Web Technology
- CIS 436 Mobile App Des & Impl

**Technical Electives**
Select five to seven additional credits from the following. Only one of the following 2 courses may be used towards the 120 credits of the degree:
- CIS 296 Java Programming
  or CIS 297 Intro to C Sharp
- CIS 381 Industrial Robots
- CIS 387 Digital Forensics I
- CIS 400 Programming Languages
- CIS 405 Algorithm Analysis & Design
- CIS 421 Database Mgmt Systems
- CIS 423 Dec Support and Exp Systems
- CIS 425 Information Systems
- CIS 435 Web Technology
- CIS 436 Mobile App Des & Impl
- CIS 437 Advanced Networking
- CIS 447 Intro Computr & Ntwrk Security
- CIS 451 Computer Graphics
- CIS 452 Inf Vis & Multimedia Gaming
- CIS 467 Digital Forensics II
- CIS 474 Compiler Design
- CIS 479 Intro to Artificial Intel
- CIS 487 Computer Game Design & Implem
- CIS 488 Computer Game Design II
- ECE 372 Intro to Microprocessors
- ECE 473 Embedded System Design
- ENGR 400 Appl Business Tech for Engr
- ENT 400 Entrepreneurial Thinking & Behav
Courses A-Z

Accounting (ACC)

ACC 298 Financial Accounting 3 Credit Hours
The first course, of a two-course sequence, to introduce accounting concepts, principles, financial statement preparation, and the uses of accounting information. Topics include fundamental concepts and procedures of financial accounting including income measurement, asset valuation, financial statement preparation and analysis, and uses of accounting information for decision making.
Prerequisite(s): (MATH 104* or MATH 105* or MPLS with a score of 115 or MATH 113* or MATH 115* or MPLS with a score of 116)
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior or Graduate

ACC 299 Managerial Accounting 3 Credit Hours
To introduce managerial accounting concepts and applications. Specific topics include: cost terminology, cost behavior, product costing systems, budgeting, standard costing systems and variance analysis, and cost allocation methods. To connect the materials in this course to concepts covered in the prerequisite course, ACC 299 begins with financial statement analysis. Discussion of ethics and globalization issues will be interwoven into the presentation of course materials.
Prerequisite(s): ACC 298

ACC 304 Auditing & Forensic Examinations 3 Credit Hours
To study forensic examination and investigation techniques including typical embezzlement and financial statement fraud scenarios, fraud risk factors, sources and uses of evidence, and interrogation and surveillance techniques. Specifically, the course presents an introduction to forensic accounting and fraud examination by studying the nature of fraud, how it is committed, and the motivations of those who defraud an organization, owners, and capital markets. Fraud detection includes the recognition of fraud symptoms and approaches to act on those symptoms. Fraud investigation includes the examination of a fraud act, methods used to conceal the act, and other methods specific to detect various types of fraud. Other course topics may include expanding assurance services, advanced internal control testing, and risk based investigations. Special attention will be given to the changing role and services offered by internal auditors and fraud examiners, and responsibility to the public.
Prerequisite(s): ACC 298
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters or Business

ACC 355 Cost Accounting and Analysis 3 Credit Hours
To study the development, analysis and interpretation of accounting information for planning and controlling costs and revenues. Topics include: cost concepts, cost behavior, product costing systems, cost allocation systems, budgeting, standard costs and variance analysis and performance evaluation techniques.
Prerequisite(s): (ACC 356 or ACC 358) and BE 401

ACC 356 Intermediate Financial Acct 1 3 Credit Hours
To study the accounting function in the business environment; review the operations and operating cycles in service, merchandising, and manufacturing industries; the conceptual accounting base of recording revenue and matching expenses at the traditional point of sale or delivery; the current state of the accounting profession; and an overview of financial accounting statements.
Prerequisite(s): ACC 299 and ACC 380* and ACC 381*

ACC 357 Intermediate Financial Acct 2 3 Credit Hours
To study financing and investing issues in today's international business environment, including financing through various ownership and debt instruments, off-balance-sheet financing and leverage; investing in tangible and intangible operating assets; investing in financial instruments for return and risk management purposes; and investing in financial instruments to influence or control operations of other business units.
Prerequisite(s): ACC 356 and ACC 380 and ACC 381 and FIN 401*

ACC 358 Financial Reporting 3 Credit Hours
This course provides an intermediate level analysis of financial accounting focusing on recognition, measurement, and reporting issues associated with assets, liabilities and owner equity in conjunction with related income determination questions. The course is designed for financial statement information users who need a level of sophistication beyond an introductory level, yet not the complete technical expertise of a financial accountant. (YR).
Prerequisite(s): ACC 298
Restriction(s):
Cannot enroll if Major is Accounting

ACC 360 Federal Income Taxation 3 Credit Hours
To acquaint the student with the federal income tax, tax research, tax planning, and application of tax laws to taxable entities. The course will introduce the student to a broad range of tax concepts within a framework of financial accounting principles. Emphasis will be placed on the taxation of business entities, individual taxpayers, and the differences between financial and tax accounting. The use of technology to research problem assignments will be used to develop students' business communication and problem solving skills.
Prerequisite(s): ACC 356 or ACC 358 or FIN 411

ACC 380 Accounting Information Systems 3 Credit Hours
To study the concepts, theory, organization and application of accounting information systems and the flow of accounting data through transaction cycles. Topics include: the principles of accounting systems design, internal control analysis and development and the overall evaluation of networked computer-based accounting systems. Emphasis is placed on transaction processing systems, internal control systems, and computer-assisted decision making for unstructured problems by employing accounting databases.
Prerequisite(s): ACC 299
Corequisite(s): ACC 381
ACC 381  Accounting Info Sys Lab  1 Credit Hour
ACC 381 is a lab component of ACC 380. Students will complete weekly laboratory assignments to reinforce the concepts of ACC 380 to use information technology to solve business problems. In addition, the use of several common applications (e.g., Word, Excel, Access, and PowerPoint) will also be covered at the beginning to advanced levels.
Prerequisite(s): ACC 299
Corequisite(s): ACC 380
Restriction(s): Can enroll if Class is Sophomore or Junior or Senior

ACC 403  Advanced Managerial Accounting  3 Credit Hours
This course is intended to equip students with both theoretical and practical tools to manage all significant facets of production process costs, revenue streams, budgeting, and the related reporting system. The course focuses on topics such as managing “upstream” cost, cost structures, control tools, establishing standards, reporting processes, analysis to improve per unit profitability, and budgeting. The above topics will be used to develop resource plans to achieve management’s objectives. (YR).
Prerequisite(s): ACC 355

ACC 416  Advanced Financial Acct  1  3 Credit Hours
To study advanced operating issues of revenue recognition and matching related expenses, including compensation, taxation, and capital costs; and a comprehensive analysis of financial statements, the related disclosures, and their information content.
Prerequisite(s): ACC 357 or ACC 358

ACC 417  Adv Financial Accounting  2  3 Credit Hours
This course is intended to help students gain expertise in preparing financial statements for complex business organizations. Specific topics include: the preparation of segmental and consolidated financial statements; intricate accounting issues associated with business combinations including but not limited to combinations at the date of acquisition and periods post acquisition; analysis of inter-company transactions such as inventory and asset transfers between parent and subsidiary; reporting for segments of a business as well as interim reporting; foreign exchange issues including inter-period reporting and financial statement translation; international reporting issues associated with all of the above, as well as, other topics. (YR)
Prerequisite(s): ACC 416

ACC 438  Advanced Federal Income Tax  3 Credit Hours
To acquaint the student with the concepts of federal taxation, tax research, tax planning, and application of tax laws to taxable entities. The course will introduce the student to a broad range of tax concepts within a framework of financial accounting principles. Emphasis will be placed on the taxation of business entities and the differences between financial and tax accounting. The use of technology to research problem assignments will be used to develop students’ business communication and problem solving skills.
Prerequisite(s): ACC 360

ACC 439  Not-for-Profit Accounting  3 Credit Hours
To study the principles and procedures of accounting for not-for-profit entities. Topics may include: state and local government financial accounting, financial accounting for selected other entities, managerial concepts and current issues. Students will not receive credit for both ACC 439 and ACC 539.
Prerequisite(s): ACC 356

ACC 457  Auditing  3 Credit Hours
To introduce students to the audit profession, process, and practice. Topics include general auditing and ethical standards, principles of internal control and audit objectives, audit testing and sampling techniques, as well as the auditor’s responsibility for communications and risk assessment.
Prerequisite(s): BE 401 ACC 357
Restriction(s): Can enroll if Class is Senior

ACC 480  Information Tech Eval & Control  3 Credit Hours
The course emphasizes the control and evaluation of information systems to ensure accounting and management financial reporting and information processing objectives are accomplished. The course covers the theory of control evaluation, design of internal control, and the evaluation of internal controls in traditional and emerging information technology environments. Emphasis will be placed on current technologies in use by business organizations, emerging technologies, and the application of current profession guidance to evaluate existing and proposed information systems. (YR).
Prerequisite(s): (ACC 380 or MIS 310) and ACC 457*

ACC 482  Seminar: Accounting  1 to 3 Credit Hours
To provide students with an opportunity for intensive study in current areas related to the research activities and/or professional activities of faculty members. Permission of College of Business.
Restriction(s): Can enroll if Class is Senior
Can enroll if College is Business

ACC 487  Advanced Auditing  3 Credit Hours
To introduce students to advanced audit and assurance service practices, strategies, and techniques. Topics include audit strategy, fraud, internal and operation audits, auditor liability, issues in audit information technologies, and audit practice. (YR)
Prerequisite(s): ACC 457
Restriction(s): Can enroll if Class is Senior
Can enroll if College is Business

ACC 492  Research: Accounting  1 to 3 Credit Hours
To provide the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to registration in the term when such a course is to be elected, an interested student must submit to the dean of the school a written request for permission to elect a research course, on a form available in the school office. The request will include a description of the proposed research project. The dean will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit. Permission of College of Business.
Restriction(s): Can enroll if Class is Senior
Can enroll if College is Business

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally.
African & African-American Studies (AAAS)

AAAS 106  Intro to the African Past  3 Credit Hours
This course is a survey of the social, economic, political, intellectual and cultural heritage of the African peoples from pre-history to the present. The emphasis is on the internal dynamics of the African society through five millennia, as well as the impact of external forces on African life. Themes of particular interest: the roots of African culture, the trans-Atlantic slave trade and the African Diaspora in the New World, the European Conquest and the character of the colonial order and the ongoing struggle to end the legacy of alien domination. (YR)
Restriction(s):
Can enroll if Level is Undergraduate

AAAS 239  Intro to Lit: African American  3 Credit Hours
A study of African-American literature designed to expose students to important periods, works, and authors within historical context. Topics will include slavery, reconstruction, the Great Migration, the Harlem Renaissance, and the contemporary renaissance in Black women’s literature. Students will be required to read critically, discuss, analyze, and write their responses to the several literary genres that will be incorporated (fiction, drama, poetry). (YR).

AAAS 300  Introduction to AAAS  3 Credit Hours
This gateway course in the African and African American Studies Program introduces students to the intellectual debates, historical perspectives and cultural issues central to the field of African and African American Studies. The course readings draw from the disciplinary strengths of the Humanities as well as the Social and Behavioral Sciences. Course materials include selections from literature, film, music, art, drama, folk and popular culture. The course content is supplemented by attendance at off-campus events and visits to institutions featuring significant aspects of African and African American history and culture.
Restriction(s):
Cannot enroll if Class is Freshman

AAAS 304  Detroit History and Culture  3 Credit Hours
This interdisciplinary course explores the political, social, and cultural history of Detroit by examining ways various groups and classes have interacted with and been shaped by structures of power and influence. This course highlights trade and commerce, newcomers, and the influence of organizations and institutions within the contexts of labor, race, ethnic, and religious histories and current affairs, and examines how these fit into the evolution of Detroit from the 19th century to the present. Where pertinent the influence of national and international movements are included. (YR)

AAAS 313  African American Religious Experience  3 Credit Hours
Full Title: African American Religious Experience This lecture course presents a survey of African American expressions across diverse religious traditions including Christianity, Islam, Judaism, Buddhism, and will explore contested forms of spiritual expression such as secularism and new religious movements. The course tracks these experiences from the late 18th to the 21st century in light of the contemporaneous context of social, political, and economic forces in the United States. No prerequisites. (YR)

AAAS 316  African American History  3 Credit Hours
This course will trace the experience of African Americans from their first landing in Virginia in 1619 through slavery and the Civil War. Emphasis will be placed on the origins of racism, the development of the slave system in the United States and the historical developments that led to the Civil War. (YR).

AAAS 320  African-American Music History  3 Credit Hours
A study of African American Music History from its African origins through the present. An understanding of the broad cultural, political, social, economic and media forces that have affected African Americans, their music and history- and in turn, the many important ways that African American music has influenced culture. Course examines multiple genre of music including classical, spiritual, jazz, blues and rap.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

AAAS 322  Psychology of Prejudice  3 Credit Hours
A consideration of ethnic (including racial, sexual, and religious) prejudice from the psychological point of view, focusing on the mind of both the oppressor and the oppressed. (AY),
Prerequisite(s): PSYC 170 or PSYC 171 or PSYC 101

AAAS 325  Econ of Poverty/Discrimination  3 Credit Hours
An analysis of the economic aspects of poverty and discrimination. Emphasis on the theoretical economic causes of poverty and the economic bases for discriminating behavior, the impact of poverty and discrimination on individuals and society, and the effect of reform policies on the two problems. (AY).
Prerequisite(s): ECON 201 and ECON 202

AAAS 333  Intro to Gospel Music  3 Credit Hours
This course explores the history and aesthetics of Black sacred music within cultural context. Major figures (Thomas A. Dorsey, Mahalia Jackson, The Winans Family, Kirk Franklin), periods (slavery, Great Migration, Civil Rights movement), and styles (folk and arranged Negro spirituals, congregational songs, and gospel songs - traditional to contemporary) will be studied through recordings, videos, films, and at least one field experience. Underlying the course is the theory (Mellonee Burnim and Pearl Williams-Jones) that gospel music is an expression of African American culture that fuses both African and European elements into a unique whole. (OC).

AAAS 340  Race and Evolution  3 Credit Hours
An evolutionary survey of the biological differences among human populations in response to such factors as climate, culture, disease, nutrition and urbanization. The meaning of racial variation is discussed in terms of adaptation to environmental stress. "Race" is rejected, racism is discussed. (YR).
Prerequisite(s): ANTH 101

AAAS 345  West Africa Since 1800  3 Credit Hours
A history of the West African peoples since 1800, which focuses on their unique cultural heritage. Themes include: West Africa before the advent of alien domination, the European Conquest, West Africa under the Colonial regimes, and the liquidation of colonial rule and the reassertion of West African independence. (AY).

AAAS 3634  History of Islam in the US  3 Credit Hours
This course traces the long history of Islam and of Muslims in the United States (1730s-present), paying careful attention to the interaction among Muslims across the dividing lines of race, gender, immigrant generations, sect, political orientation, and class, and between Muslims and other Americans.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
AAAS 368  Black Exp in U.S.-1865-Present  3 Credit Hours
The history of Blacks in America is traced from the Reconstruction era and the rise of Jim Crow segregation to the Civil Rights movement of the 1960’s and the current period. Special attention is paid to the migration of blacks to the north and the social-economic situation which they encountered there. Specific topics to be addressed include formation of the NAACP. (AY).

AAAS 369  Civil Rights Movement in Amer  3 Credit Hours
A survey of race relations and civil rights activities from late 19th century to the present. The principal focus, however, is on the period since World War II, especially on the mass-based civil rights movement (1955-1965) and the various policy debates and initiatives of the past thirty years, most notably affirmative action and busing. We also examine critiques of non-violence and integrationism. (AY).

AAAS 371  African Exper in the Americas  3 Credit Hours
The course is a survey of African populations and cultures from 1500 to the present throughout the Americas. The focus of the course is on the Caribbean and Latin American contexts of these populations, but comparisons to North America will be made. Topics include the slavery, the relationship between Africans and indigenous populations, religions, politics, music, and questions of race and ethnicity. Readings will include ethnographic description, history, biography and fiction. (YR).

AAAS 385  Black Cinema  3 Credit Hours
The course will examine selected films from African American and African film traditions in order to analyze how their cultural production is responsive to the conditions of social oppression, economic underdevelopment, and neo-colonialism. How film traditions define "Black aesthetics" will also be discussed. (AY).

AAAS 388  W. African Music: Trad.&Glob.  3 Credit Hours
West African popular music contains a unique mixture of African, Cuban, European and American influences. With the advent of radio and recording, music that was once locally based is now part of a national and international popular music industry. This course offers an overview of modern West African music, both traditional and popular. The course begins with an introduction to traditional West African instruments and musical genres. Next, there is an exploration of the fusion of traditional African styles with European, Cuban and American styles during and after the colonial era. The course culminates with an examination of the contributions of West African musicians to the World Music scene, focusing on issues of representation and Fair Trade.

Prerequisite(s): MHIS 100 or MHIS 120 or MHIS 130 or MTHY 100 or AAAS 106 or AAAS 275 or HUM 100 or HUM 270

AAAS 389  Odyssey of Black Men in Amer  3 Credit Hours
This course will examine the struggle of African American men for personal, political, and creative expression. This course incorporates several literary genres (narrative, fiction, essay, drama, and poetry) and the literary voices of black men who range from professional writers to politicians, from athletes to actors. Students will be required to critically read, discuss, analyze, and write their own responses to the literature found in the texts. (YR).

Prerequisite(s): COMP 280 or COMP 270 (COMP 106 or COMP 220 or ENGL 230 or CPAS with a score of 40) and (ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

AAAS 390  Topics in Af & Af Am Studies  3 Credit Hours
This course examines problems and issues in selected areas of African and African American Studies. The specific title of the course will change in the Schedule of Classes according to content. Course may be repeated for credit when specific topic differs. (OC).

Restriction(s):
Can enroll if Level is Professional Development or Undergraduate

AAAS 393  Black Women, Rel & Spirituality  3 Credit Hours
This lecture course surveys descriptive and critical literature relevant to the religious and spiritual experience and thought of African diasporic women. Studying religiosity and spirituality among this population helps students understand this influential, culturally-constructed world view of Black women as they engage in a variety of institutions including healthcare, economic activity, the criminal justice system, politics, and social relationships. The course gives particular attention to Black feminist and Womanist literature on these topics. (AY)

Restriction(s):
Cannot enroll if Class is Freshman

AAAS 403  Minority Groups  3 Credit Hours
The status of racial and ethnic minorities in the United States with particular reference to the social dynamics involved with regard to majority-minority relations. Topics of study include inequality, segregation, pluralism, the nature and causes of prejudice and discrimination and the impact that such patterns have upon American life. Students cannot receive credit for both AAAS 403 and AAAS 503. (YR).

Prerequisite(s): SOC 200 or SOC 201

Restriction(s):
Can enroll if Level is Undergraduate

AAAS 404  Dissed: Differ, Power, Discrim  3 Credit Hours
Have you ever been dissed? Why are some people targets of disrespect? This class examines the unequal distribution of power - social, economic, and political - in the United States and other countries that results in favor for privileged groups. We will examine a variety of institutional practices and individual beliefs that contribute to disrespect. We'll look at ways that beliefs and practices, like viewing inequality as consequence of a 'natural order', obscure the processes that create and sustain social discrimination. We will engage in the intellectual examination of systems, behaviors, and ideologies that maintain discrimination and the unequal distribution of power and resources. Students will not receive credit for both AAAS 404 and AAAS 504.

Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

Can enroll if Level is Undergraduate

AAAS 4401  Seminar: African Diaspora  3 Credit Hours
Research seminar on the history of the African Diaspora in the Atlantic World. This course covers examples of classic texts in the field, as well as significant new scholarship, with an emphasis on critical reading, analysis, and the development of an independent research project. Students gain a deeper understanding of the significance of the African Diaspora in the New World, derived from lectures and discussions providing an overview of this subject, as well as the micro views gleaned from sharing classroom presentation about students? individual research topics. The graduate version of this course includes weightier readings and assignments, with a research paper for potential publication.

Prerequisite(s): HIST 300 or AAAS 2755 or HIST 345 or AAAS 345

Restriction(s):
Cannot enroll if Class is Freshman or Sophomore or Graduate
**AAAS 449  Black Family in Contemp Amer  3 Credit Hours**
The African-American family is examined in relationship to the historical and contemporary forces that have shaped its characteristic patterns of family life. These forces include the influence of slavery, urbanization, racial discrimination and urban poverty. The patterns of family life include parental roles, family structure, kinship relations, and gender roles. (YR).

**Prerequisite(s):** SOC 200 or SOC 201

**AAAS 469  Contemporary African Amer Lit  3 Credit Hours**
An intensive study of major 20th-century African-American writers. Fiction, poetry, autobiography, and drama will be examined but one genre will be stressed in any given term, e.g., the novel. Lectures will provide historical and biographical context for analysis and discussion of the works. Students cannot receive credit for both AAAS 469 and AAAS 569. (YR).

**Prerequisite(s):** (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

**Restriction(s):**
Cannot enroll if Class is Graduate

**AAAS 470  Black Women / Lit, Film, Music  3 Credit Hours**
This course will examine works produced by Black women authors, activists, filmmakers and musical performers in order to determine the methods they have incorporated in order to challenge and eradicate the prevailing stereotypes about Black women while advancing their own personal and racial agendas. It will also focus on the extent to which race, gender and class have shaped the creative work of Black women. Students will be required to read, discuss, analyze and write their own responses to the works of such firebrands as author Zora Neale Hurston, activist Ida B. Wells, filmmaker Julie Dash, and singer Billie Holliday.

**Prerequisite(s):** FILM 240 or FILM 248 or FILM 385 or AAAS 239 or AAAS 275 or HUM 303 or HUM 221 or HUM 222 or HUM 223 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 237 or ENGL 248 or ENGL 200 or ANTH 303 or PSYC 303 or SOC 303 or WGST 303

**Restriction(s):**
Cannot enroll if Class is Freshman
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

**AAAS 473  Race, Crime, and Justice  3 Credit Hours**
This course is an analysis of race and its relation to crime in the criminal justice system. Students will analyze and interpret the perceived connection between race and crime, while exploring the dynamics of race, crime, and justice in the United States. This course is designed to familiarize students with current research and theories of racial discrimination within America’s criminal justice system.

**Prerequisite(s):** SOC 200 or SOC 201

**Restriction(s):**
Cannot enroll if Class is Freshman

**AAAS 477  African American English  3 Credit Hours**
An examination of the structure, history and use of African-American English. Topics will include the pronunciation, grammar and vocabulary of African-American English, theories of origin, linguistic repertoire and code-switching in African-American communities, the Ebonics controversy, and the role of this variety in education and identity formation. Student cannot receive credit for both AAAS 477 and AAAS 577.

**Prerequisite(s):** LING 280 or LING 281 or LING 480

**Restriction(s):**
Can enroll if Level is Undergraduate

**AAAS 491  Topics in African Diaspora  3 Credit Hours**
This course deals with African Diasporan history from the 19th century to the present. The method is by definition cross-cultural and comparative, requiring that the works or figures under study represent a diversity of Diasporan nationalities and/or cultures. The course may focus on a wide range of topics. Students cannot receive credit for AAAS 491 and AAAS 591 when the topic title is the same.

**AAAS 491C  Topics in AAAS  3 Credit Hours**
Topic: Senior Research Seminar: Africa and the New World Diaspora. A history research seminar exploring the broad history of Africa and its descendants in the New World. Emphasis will be placed on a series of cross-cultural but interconnected themes including: African civilizations, the trans-Atlantic slave trade and comparative systems of servitude, the Haitian Revolution, the American Civil War, the European conquest of Africa, trans-Atlantic systems of inequality, the World Wars, the African intellectual renaissance, the Civil Rights Movement in the United States, and Independence Movements in Africa.

**Prerequisite(s):** HIST 300

**AAAS 498  Thesis  3 Credit Hours**
Students pursuing the AAAS minor or an area of focus in African and African American Studies may choose to complete their coursework with a final thesis project that reflects research interests developed during their course of study. This thesis, which can be used to fulfill three (3) hours of the required upper-division course work, will be written under the direction of a faculty member whose scholarly expertise is compatible with the research field(s) of the student. (OC).

**Prerequisite(s):** AAAS 275 or AAAS 239 or ENGL 239 or HIST 106 or AAAS 106

**Restriction(s):**
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

**AAAS 499  Independent Study  3 Credit Hours**
Students pursuing the AAAS minor as well as those interested in focusing on some particular area in African and African American Studies may wish to do research on a topic not covered in the regular AAAS curriculum. This course provides an opportunity for students to conduct research under the direction of a qualified faculty member. The project must be defined in advance in writing. (OC).

**Prerequisite(s):** AAAS 275 or AAAS 239 or ENGL 239 or AAAS 106 or HIST 106

**Restriction(s):**
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally.
American Studies (AMST)

AMST 300  Comparat. American Identities  3 Credit Hours
This course will confront and complicate the following key questions: what does it mean to be an American? What is American culture? Participants in this course will respond to the questions central to the American Studies field by reading and discussing historical, sociological, literary, artistic, material culture, political, economic, and other sources. Students will use this interdisciplinary study to examine the multiple identities of Americans - as determined by factors such as gender, race, class, ethnicity, and religion. While emphasizing the diversity of American culture, participants will consider some core values and ideas uniting America both in historical and contemporary society. Students will be invited to seek out and share fresh narratives of the American experience.
Prerequisite(s): COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280
Restriction(s):
Can enroll if Level is Undergraduate
AMST 390  Topics in American Studies  3 Credit Hours
Examination of problems and issues in selected areas of American Studies. Title in the Schedule of Classes will change according to course content. Course may be repeated for credit when specific topics differ.
Restriction(s):
Can enroll if Class is Senior
AMST 499  Ind. Study in Amer Studies  1 to 3 Credit Hours
The independent study is designed for American Studies majors to provide an opportunity for pursuing a significant scholarly project that explores a topic of interest in American Studies while synthesizing insights gained from prior coursework in American Studies. The course can be repeated for up to 6 credits.
Prerequisite(s): AMST 300 or HIST 3602 or ENGL 306 or SOC 306 or COMM 306
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is American Studies
* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Anthropology (ANTH)

ANTH 101  Introduction to Anthropology  3 Credit Hours
Anthropology emphasizes the holistic study of human beings, in both the past and the present, and introduces students to the four primary subfields (sociocultural anthropology, linguistic anthropology, archaeology and biological anthropology) of the discipline. This course shows students how the sub-fields intersect to explain human biological and cultural diversity, and provides students with the ability to better understand their own culture in light of a globalized world, as well as the applied skills of the discipline. (F, W) 999999

ANTH 201  Introduction to Archaeology  3 Credit Hours
Through hands-on labs and comparison of different sites and research projects, this class provides a survey of the theoretical concepts and methods archaeological anthropologist use to learn about people through material things. Considers topics such as site formation, sampling strategies, excavation methods, lab analyses, museum presentations, heritage laws, the history of archaeology, theoretical approaches, and archaeological ethics.

ANTH 202  World Cultures  3 Credit Hours
A comparative study of politics, economics, family and religion in selected cultures—foraging, tribal, peasant, and industrial. Provides a survey of theoretical concepts in social and cultural anthropology through the comparison of ethnographic case studies. ANTH 101 recommended. (YR).

ANTH 215  Research Skills BSSci  1 Credit Hour
This course teaches foundational research and critical-thinking skills necessary for the success of students in the Behavioral Sciences (including Anthropology, Psychology, and Sociology) in conducting university-level research projects, papers, and other research assignments. Students will learn important research skills like distinguishing between scholarly and non-scholarly sources of information, using library search tools to find peer-reviewed and scholarly sources, evaluating and analyzing information sources and using them to build informed opinions and arguments, integrating and synthesizing sources, and using sources ethically. Students will learn these skills through lectures, practice and by applying them through a series of assignments. (F, W, S)
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

ANTH 300  Intro To Women's & Gender Stud  3 Credit Hours
This course provides an interdisciplinary overview of the key theories and topics in Women’s and Gender Studies. Special attention is given to how gender intersects with class, race, nationality, religion and sexuality to structure women’s and men’s lives. Students are also introduced to methods of gender analysis and will begin to apply these methods to topics such as women and health, gender roles in the family, violence against women, and gendered images in the mass media.
Restriction(s):
Cannot enroll if Class is Freshman
ANTH 307  Forensic Anthropology  3 Credit Hours  
Forensic anthropology has recently seen a lot of exposure through popular television shows like CSI and Bones. Have you ever wondered how much of what you were seeing was real? Do the dead really "talk" about their lives and how they died? This course is designed as an introductory course for students interested in demystifying and getting to know the real forensic anthropology. Forensic anthropology is a specialized sub-field of biological anthropology that applies many of the methods of biological anthropology to the discovery, excavation, and identification of human remains in a medicolegal context. In this class we learn about the human skeleton and explore the key methods that are used in the identification of individuals, such as age-at-death estimation, sex determination, stature, ancestry, and personal identification. We also deal with assessment of the different types of trauma, and whether or not we can tell the cause and manner of death. The broader ethical roles and responsibilities of forensic anthropologists are also discussed, including discussions of how we determine race/ancestry, as well as ethical responsibilities we have during the investigation of human rights abuses, disasters and criminal inquiries. (F)

Restriction(s):
Cannot enroll if Class is Freshman

ANTH 311  Archaeology of Inequality  3 Credit Hours  
Inequality has a history. This class explores these histories through archaeology with a focus on the material culture of the last 500 years. While we have written records from this time, material remains such as buildings, pottery, and human bones reveal far more. The mundane details of daily life are where inequality and injustice were (and are?) created, enforced, and resisted, and these mundane details are the material of archaeology. (OC)

Restriction(s):
Can enroll if Class is Freshman

ANTH 315  Body Image and Culture  3 Credit Hours  
This course examines the biological and sociocultural construction of body image in both men and women. We explore such cultural and social practices as nudity, tattooing, piercing, scarification, dietary habits, physical activity and sports performance and their associated myths and realities. We explore how the human body is a terrain of contested meaning within society. The course provides an examination of the causes and consequences of women's poor body image, contemporary and historically. Course materials include case studies from North America, Europe, Africa, Asia and the Pacific.

Prerequisite(s): ANTH 101 or WST 275 or WGST 275 or WGST 303 or PSYC 275 or SOC 275 or ANTH 275 or HUM 275 or PSYC 303 or SOC 303 or ANTH 303

ANTH 320  Culture and Int'l Business  3 Credit Hours  
Lectures, exercises and case studies explore anthropological concepts needed by managers in multinational and multi-ethnic work environments. Topics include the world economy in anthropological perspective, national culture and business culture, implicit values about work and time, and cross-cultural communication. Special emphasis is given to Japan and the Third World. ANTH 101 or SOC 200 recommended. (AY)

ANTH 325  Anth of Health and Environment  3 Credit Hours  
Cultural conflicts over pollution, disease etiology, development and natural resources often originate and are played out in local ecosystems. Anthropologists are increasingly becoming involved as researchers, developers, and activists in these cultural strifes. This course reviews the work of environmental and medical anthropologists as well as other critical scholars who unravel the values, meanings and ideologies associated with ecological issues in given localities. Drawing on theoretical advances in critical medical anthropology, environmental anthropology and applied anthropology the course seeks to improve the knowledge and abilities of student anthropologists in their environmental health work.

ANTH 331  Human Evolution  3 Credit Hours  
A survey of biological anthropology. This course is a prerequisite for all other upper-division bioanthropology courses. Topics include the human place in nature, primate biology and behavior, evolution theory, genetics, the fossil evidence for human evolution, human growth, and biocultural adaptation to the environment. (YR).

ANTH 336  Introduction to Primates  3 Credit Hours  
Introduction to the fundamentals of primate paleontology, evolution, morphology, and behavior with an emphasis on understanding the evolution of primate and human social behavior. (YR).

ANTH 340  Race and Evolution  3 Credit Hours  
An evolutionary survey of the biological differences among human populations in response to such factors as climate, culture, disease, nutrition, and urbanization. The meaning of racial variation is discussed in terms of adaptation to environmental stress. "Race" is rejected; racism is discussed. (AY).

ANTH 341  Human Paleontology  3 Credit Hours  
A survey of the evolutionary history of life through the study of fossils and collaborative field and laboratory material. The evolution of humans and the primate order of mammals is emphasized. (AY).

ANTH 345  Cultural Ecology and Evolution  3 Credit Hours  
An introduction to the study of human ecology. This course employs the case-study method to develop an evolutionary and biocultural perspective on the relationship between human beings and their environments. (YR).

ANTH 350  Prehistoric Archaeology  3 Credit Hours  
Uses archaeological evidence to explore issues of central importance to the present, such as the biological evolution of our species, the creation of new technologies, the switch to arming, the rise of social inequality, and the beginnings of cities. Considers archaeological sites in the US, Egypt, India, China, Europe, Mesopotamia, Mexico, Peru, and elsewhere from 7 million to 500 years ago.

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 360  Myth, Magic, and Mind  3 Credit Hours  
A broadly based introduction to the range of human mythical and magical traditions. Sophomore standing; ANTH 101 highly recommended. (YR).

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
ANTH 370  Indians of North America  3 Credit Hours
The origin and development of cultures north of Mexico. A study of various culture areas and representative tribes at contact, and a political-economic analysis of the fate of American Indians since contact. The perspectives of Native American peoples are taken into account through books, novels, and poetry. Sophomore standing; ANTH 101 highly recommended. (YR).

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 371  African Exper in the Americas  3 Credit Hours
This course is a survey of African populations and cultures from 1500 to the present throughout the Americas. The focus is on Caribbean and Latin American contexts of these populations, but comparisons to North America will be made. Topics include slavery, the relationship between Africans and indigenous populations, religions, politics, music, and questions of race and ethnicity. Readings will include ethnographic description, history, biography and fiction. (YR).

ANTH 372  Anthropology of Latin America  3 Credit Hours
The course is a survey of Latin American people and cultures from the conquest to the present. It will focus on culture change and sources of conflict by analyzing topics that include the economy, kinship, ethnicity, social stratification, gender, politics, religion, and the arts. Readings will include ethnographic description, history, biography, contemporary fiction. (YR).

ANTH 373  Anth Persp on the Middle East  3 Credit Hours
This course examines Middle Eastern society from a cultural perspective. Topics discussed include kinship, gender, popular and orthodox Islam, nationalism, mass media, urbanization, and historical relations with the West. The course ends with an examination of the Arab immigrant experience in Metro Detroit. (AY).

ANTH 374  Anthropology of Europe  3 Credit Hours
Introduces anthropological approaches to European culture, emphasizing ethnographies and community studies as well as social history from the classical and medieval to the present. Will include cultural implications of industrialism and urbanization. May focus on Western or Eastern Europe during a given semester. (AY).

ANTH 376  Power & Privilege in SE Mich  3 Credit Hours
An examination of the social and cultural systems that lead to power, privilege, and inequality in American culture. This course takes a local perspective, analyzing systems of inequality as related to such factors as race, ethnicity, gender, social class and sexual orientations. Field trips to local sites are included. (YR)

Restriction(s):
Cannot enroll if Class is Freshman or Graduate

ANTH 381  Who Owns the Past?  3 Credit Hours
The past is not neutral. This class explores this idea, recognizing how representations of and stories about the past play a role in modern discussions and conflicts. Issues such as race, religion, national sovereignty, and both individual and group rights to self-determination, education, and property are all deeply entwined with how we learn about and tell each other about the past. We consider archaeological and historic sites and controversies in Asia, Africa, the Mideast, and the US, and focus on discussion and argumentative writing skills. (OC)

ANTH 390  Topics in Anthropology  3 Credit Hours
Examination of problems and issues in selected areas of anthropology. Title in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).

Prerequisite(s): ANTH 101

ANTH 391  Topics in Anthropology  3 Credit Hours
Examination of problems and issues in selected areas of anthropology. Title in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. Junior standing required. (OC).

ANTH 397  Honors Tutorial  3 Credit Hours
Advanced seminar on selected topics offered through honors program. (OC).

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 397A  Honors Tutorial  3 Credit Hours
Topic: Sugar, Salt, and Fat. This tutorial takes an historical, anthropological, and biological approach to the use of sugar, salt, and fats in the human diet. People have biological requirements for sugar and salt, and these nutrients have important biological impacts on people. At the same time, the need for these nutrients forces people to migrate great distances; create new technology for production, transport, and consumption of foods containing these nutrients; organize and reorganize their social groups; and develop new economic and political organizations. Specific topics will be the rise of colonialism, slavery, global trade, and the anthropology of eating.

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 398  Independent Studies in Anthr  1 to 6 Credit Hours
Readings or analytical assignments in anthropology in accordance with the needs and interests of those enrolled and agreed upon by the student and instructor. Permission of instructor required. (F,W).

ANTH 399  Independent Studies in Anthr  1 to 6 Credit Hours
Readings or analytical assignments in anthropology in accordance with the needs and interest of those enrolled and agreed upon by the student and instructor. (F,W).

Prerequisite(s): ANTH 101

ANTH 406  Culture and Sexuality  3 Credit Hours
The study of women, men, children, socialization practices, and the genesis of sex roles cross-culturally. Students cannot receive credit for both ANTH 406 and ANTH 506. ANTH 101 recommended. (YR).

Prerequisite(s): ANTH 101 or WST 275 or WGST 275 or PSYC 275 or PSYC 303 or SOC 275 or ANTH 275 or HUM 275 or PSYC 303 or SOC 303 or ANTH 303 or HUM 303

ANTH 407  Sexual Praxis and Theory  3 Credit Hours
This course will offer an overview of sexual differences including: the socio-cultural construction of gender, sexual behavior, and orientation; sex and sexualities in language and literature; and diversity by race, class, and cultural heritage. These topics will enable students to understand human sexuality within and across a continuum removing notions of duality, or polarity, in sexual behaviors and orientations. Examples both from within Western society and from non-Western societies may be used to further this position. Theoretical perspectives may encompass sociological and anthropological work, literary theory and criticism, queer theory, and multi-disciplinary discussions/discourse. Texts may include: Sex and the Machine: Readings in Culture, Gender and Technology, The Anatomy of Love, The Lesbian and Gay Studies Reader, Second Skins: The Body Narratives of Transsexuality, and Lesbian and Gay Marriage.

Prerequisite(s): WST 275 or WGST 275 or SOC 443 or PSYC 405 or ANTH 406 or ANTH 101 or WST 275 or PSYC 303 or SOC 303 or ANTH 303 or HUM 303 or WST 275 or SOC 275 or ANTH 275 or HUM 275

ANTH 409  Human Body, Growth & Health  3 Credit Hours

Restriction(s):
Can enroll if Class is Junior or Senior
ANTH 410  Archaeological Field School  3 Credit Hours
While participating in a primary archaeological research project, students
learn the methods and techniques of field archaeology and basic
laboratory work, gaining experience in the scientific research process
and complex problem-solving. Depending on the project, some aspects
included will be survey, excavation, mapping, historical background
research, and/or artifact conservation and analysis.
Prerequisite(s): ANTH 101 or ANTH 201

ANTH 411  Archaeological Lab Methods  3 Credit Hours
How can we learn about people from the things they leave behind?
This class teaches students about the 18th and 19th century material
culture and how archaeological analysis creates insights about past
lives through these things. This is done through hands-on participation
in primary archaeological laboratory research: conservation, identification,
dating, cataloging, and interpreting archaeological artifacts.

ANTH 412  Men and Masculinities  3 Credit Hours
This course addresses the question, "What is a man?," in various
historical, cross-cultural, and contemporary contexts. A major focus on
the social and cultural factors that underlie and shape conceptions of
manhood and masculinity in America as well as in a variety of societies
around the globe. (AY).
Prerequisite(s): SOC 200 or SOC 201 or ANTH 101 or WST 275 or WGST
275 or PSYC 275 or SOC 275 or ANTH 275 or HUM 275 or WGST 303 or
PSYC 303 or SOC 303 or ANTH 303 or HUM 303
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

ANTH 415  Nutrition and Health  3 Credit Hours
The influence of nutrition on physical and mental development from
conception to adulthood. Topics include: 1) the definition and function
of the essential nutrients for people, 2) basic principles of human
growth and development, 3) the causes and consequences of under-
and overnutrition, 4) feeding practices for infants and children and the
development of food habits, 5) nutrient and food problems in the local
region and in global perspective. Students cannot receive credit for both
ANTH 415 and ANTH 515. (YR).
Restriction(s):
Can enroll if Class is Junior or Senior

ANTH 420  Kinship and Marriage  3 Credit Hours
A study of the diversity of kinship and marriage systems, and of
the history of kinship theory which has played a seminal role in the
development of general anthropological theory. Students cannot receive
credit for both ANTH 420 and ANTH 520. (OC).
Prerequisite(s): ANTH 101 or ANTH 201
Restriction(s):
Can enroll if Level is Undergraduate

ANTH 421  Education and Culture  3 Credit Hours
How and where do people learn? Why are there schools, and how is
schooling culturally organized? Why do school experiences tend to vary
by "race", social class, and gender? What insights does anthropology
bring to practical problems of learning and teaching? Students cannot
receive credit for both ANTH 421 and ANTH 521. ANTH 101 or SOC 200
recommended. (AY).
Restriction(s):
Can enroll if Level is Undergraduate

ANTH 422  Narrative Anthropology  3 Credit Hours
A consideration of alternative approaches to gaining ethnographic
understandings by reading anthropological novels (Bohannan,
LeGuin), fiction and poetry by non-western authors (Silko, Achebe), and
travel writing (Chatwin, O’Hanlon). Junior standing; ANTH 101 highly
recommended. (YR).
Restriction(s):
Can enroll if Class is Junior or Senior

ANTH 425  Language and Society  3 Credit Hours
An examination of the social functions of speech through readings
and exercises, emphasizing schools and other applied settings. Topics
include ethnic and social class dialects, codeswitching, and the
organization of conversation. Students cannot receive credit for both
ANTH 425 and ANTH 525. (OC).
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 430  Medical Anthropology  3 Credit Hours
An analysis of human genetic variation in terms of the theory of
population genetics considers such polymorphisms as blood groups and
variant hemoglobins as well as morphological characters like stature,
skin color, and so on. Emphasis is on the genetics of human populations
and particular attention is drawn to cultural factors affecting human
biology. (OC).

ANTH 435  Human Genetics  3 Credit Hours
An analysis of human genetic variation in terms of the theory of
population genetics considers such polymorphisms as blood groups and
variant hemoglobins as well as morphological characters like stature,
skin color, and so on. Emphasis is on the genetics of human populations
and particular attention is drawn to cultural factors affecting human
biology. (OC).

ANTH 440  Religion and Culture  3 Credit Hours
An introduction to the comparative study of religious systems. Explores
religious beliefs and practices in non-Western cultures; surveys
theoretical approaches to the study of religion; and discusses how
religions grow, develop, and change. ANTH 101 recommended. (YR).

ANTH 444  Political Anthropology  3 Credit Hours
A consideration of some of the major anthropological views of politics,
focusing on the relations of power to kinship, stratification, and religion
in both states and stateless societies. Sophomore standing; ANTH 101 highly
recommended. (OC).

ANTH 450  Anthropological Theory  3 Credit Hours
An historical account of the development of anthropological theory,
emphasizing the continuity between consecutive styles of explanation.
Substantial consideration of recent theoretical developments in
structuralism and ecological analysis. Sophomore standing; ANTH 101
highly recommended. (OC).

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 450  Anthropological Theory  3 Credit Hours
An historical account of the development of anthropological theory,
emphasizing the continuity between consecutive styles of explanation.
Substantial consideration of recent theoretical developments in
structuralism and ecological analysis. Sophomore standing; ANTH 101
highly recommended. (OC).

Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
ANTH 451  Family, Sexuality, Rights  3 Credit Hours
This course investigates the changing possibilities for forming families and expressing sexuality, with a focus on how nation states and legal and cultural systems construct and respond to these changes. Selected topics include the meanings of sex, love, marriage, and relatedness in different historical moments; struggles for recognition of varied kinship and family arrangements, such as interracial, interfaith, same-sex, polygamous and multi-partner relationships; and new technologies and their implications for family life. (YR)
Prerequisite(s): (WGST 303 or SOC 303 or ANTH 303 or PSYC 303 or HUM 303) or (SOC 200 or SOC 201) or (ANTH 101 or ANTH 202)
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 455  Immigrant Cultures and Gender  3 Credit Hours
The history and culture of immigration since 1850, including: (1) formation and perseverance of immigrant communities and interethnic boundaries; (2) relations between the homeland and the immigrant; and (3) impact of migration on family life and gender roles. Students cannot receive credit for both ANTH 455 and ANTH 555. ANTH 101 recommended. (OC).
Restriction(s):
Can enroll if Class is Junior or Senior

ANTH 459  Human Osteology  3 Credit Hours
An introduction to the methods and theory of human osteology, bone history, pathology, biomechanics and taphonomy. Osteology lecture topics include age, sex, stature and ancestry estimation, the problems of commingling and differential disease diagnosis. The lab component provides hands-on skills. The course investigates how the forensic anthropologist can apply skills to human rights and police investigations and the nuances distinguishing theoretical approaches of forensic anthropology and bioarchaeology.
Prerequisite(s): ANTH 331 or BIOL 130
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore

ANTH 460  Economic Anthropology  3 Credit Hours
A comparative examination of the basis of political economy. Economic problems (the production and distribution of goods and services) will be considered in ecological, evolutionary, and political terms. The primary emphasis will be on traditional economies, on production and exchange at the household level, and on the effect of modern market systems on indigenous cultures. (OC).
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ANTH 467  Doing Anthropology  3 Credit Hours
A practicum of anthropological theory and method, including ethnographic interview and participant observation. Students will conduct field research and evaluate results with the help of classmates. Students cannot receive credit for both ANTH 470 and ANTH 570. ANTH 101 or SOC 200 highly recommended. (YR).
Restriction(s):
Can enroll if Level is Undergraduate

ANTH 477  Ethnographic Film  3 Credit Hours
This course will analyze ethnographic films as a medium for the construction of meaning in and across cultures. It will teach students to understand how the putatively "real" content of documentary film creates a mixture of fantasy, news and "science." Covering texts as varied as National Geographic photographic layouts, traditional ethnographic films made by anthropologists, and auto-ethnographies of cultural groups such as Native Americans and the Trobriand Islanders of Papua, New Guinea, the course will aim to deconstruct such oppositions as indigene vs. alien, us vs. them, and self vs. other. Students cannot receive credit for both ANTH 477 and ANTH 577. (AY).
Prerequisite(s): FILM 248 or HUM 248 or ANTH 101 or ENGL 248 or JASS 248

ANTH 481  Gender and Globalization  3 Credit Hours
Mass media, politics, and academia are full of references to globalization, and a future "world without borders." This interdisciplinary course considers the implication of globalization for women's lives, gender relations, and feminism. Topics covered include the global factory, cross-cultural consumption, human rights, global communications, economic restructuring, nationalism, and environmental challenges. Rather than survey international women's movements, this course explores how globalization reformulates identities and locations and the political possibilities they create. (AY).
Prerequisite(s): ANTH 303 or HUM 303 or SOC 303 or PSYC 303 or WGST 303
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

ANTH 482  Psychological Anthropology  3 Credit Hours
Cross-cultural comparison of theories of human nature, including psychoanalytic anthropology, culture-and-personality, and other theories from Western science, as well as non-Western theories about such concepts as the person, emotions and mental illness. Students cannot receive credit for both ANTH 482 and ANTH 582. ANTH 101 and PSYC 170 or 171 highly recommended. (YR).

ANTH 498  Independent Study  1 to 6 Credit Hours
Readings or analytical assignments in anthropology in accordance with the interests and needs of students enrolled and agreed upon by the instructor and student. Written permission of instructor required.

ANTH 499  Readings in Anthropology  1 to 3 Credit Hours
For students desiring study not available in the regular course offerings. Students cannot receive credit for both ANTH 499 and ANTH 599. (F,W)

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (Y) once a year; (AY) alternating years; (OC) offered occasionally
Applied Music (MAPP)

MAPP 120  Private Instruct in App Music  1 Credit Hour
For students who desire credit for private lessons on a musical instrument of voice. The lessons are taken outside the University from an instructor approved by the music faculty of the University. Interested students should contact the music faculty at the beginning of the term to arrange for a teacher. 8 hours of instruction over 16 weeks are required for 1 hour of credit. This course may be repeated for up to 8 hours of credit. The student pays the instructor’s fee and also tuition for university credit. (F,W)

MAPP 125  Class Piano I  2 Credit Hours
Development of skills at the keyboard in harmonization, improvisation, sight reading, accompanying, repertoire, and technique. Emphasis on group learning for beginners. (OC).

MAPP 126  Class Piano II  2 Credit Hours
Enhancement of skills at the keyboard in harmonization, improvisation, sight reading, accompanying, repertoire, and technique. Emphasis on group learning for beginners. (OC).

MAPP 135  Class Guitar I  2 Credit Hours
Development of skills in reading chord tablature, playing basic accompaniments to folk songs using various strumming and fingerpicking techniques, basic theory, reading, playing rhythms and notes. Emphasis on group learning for beginners. (OC).

MAPP 136  Class Guitar II  2 Credit Hours
Enhancement of skills in reading chord tablature, playing basic accompaniments to folk songs using various strumming and fingerpicking techniques, basic theory, reading, playing rhythms and notes. Emphasis on group learning for beginners. (OC).

MAPP 138  Symphonic Band  1 Credit Hour
Credit may be earned by students who are regular members of approved symphonic bands.

MAPP 145  Choir  1 Credit Hour
One hour of credit per semester may be earned by students who are members of the UM-Dearborn choral ensemble. There will be a concert performance every semester which will be open to the general public. (F,W).

MAPP 299  Independent St in Appl Music  1 to 2 Credit Hours
This course assumes a sound knowledge of basic technique and music theory, as covered in MAPP 126 or MAPP 136. Material covered in the course is selected in accordance with the needs and interests of those enrolled and agreed upon by the instructor and the student. **Prerequisite(s):** MAPP 126 or MAPP 136

MAPP 399  Independent St in Appl Music  1 to 2 Credit Hours
This course is intended for those students who have taken MAPP 299, or students at an advanced level who have previously studied piano or guitar formally for several years. Material covered in the course is selected in accordance with the needs and interests of those enrolled and agreed upon by the instructor and the student. **Prerequisite(s):** MAPP 299

* An asterisk denotes that a course may be taken concurrently.

Arab American Studies (AAST)

AAST 238  Intro to Lit: Arab American  3 Credit Hours
This course in an introduction to Arab American literature, its historical and cultural contexts and contemporary relevance. Topics will include the literary and cultural productions of Arab immigrants, their transnational vision, and explorations of such concepts as home, memory and identity; the literary, dramatic and poetic responses of Arab American writers to 9/11 and the ongoing war on terror; the role Arab American literature in offering different versions of Arab and Arab American lives and experiences from the one circulated in mainstream media, Hollywood cinema and culture. **Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

AAST 267  Arab & Arab American Workshop  3 Credit Hours
The Arab and Arab American Writers Workshop is a creative writing workshop focusing on poetry and fiction. Students will explore Arab American literature, writers, and themes. Students are expected to work on their own manuscripts as well as critique outside readings. The workshop will be conducted under the guidance of Arab and Arab American faculty and is open to all students. **Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

AAST 3150  Intro to Arab American Studies  3 Credit Hours
This course explores the local, national, and global conditions through which Arab American identity and its alternatives take shape. It introduces students to humanities and social science approaches to the field of Arab American Studies. **Restriction(s):** Can enroll if Class is Freshman or Sophomore or Junior or Senior

AAST 3634  History of Islam in the US  3 Credit Hours
This course traces the long history of Islam and of Muslims in the United States (1730s-present), paying careful attention to the interaction among Muslims across the dividing lines of race, gender, immigrant generations, sect, political orientation, and class, and between Muslims and other Americans. **Restriction(s):** Can enroll if Class is Freshman or Sophomore or Junior or Senior
AAT 3676 Arab Americans Since 1890 3 Credit Hours
This is a survey of immigration from the Arab Middle East from 1890 to the present. Readings from available scholarship, discussions, and reports facilitate exploring the Arab-speaking immigrants? early and recent experiences as art of U.S. society, including settlement, work, worship, military service, leisure, intellectual life, and primary and formal affiliations across the U.S.

AAT 381 Intro to Postcolonial Studies 3 Credit Hours
This course offers a general introduction to Postcolonial Studies - a field of cultural inquiry that questions how personal identity (specifically race, language, and ethnicity) shapes, and is shaped by, the politics of colonization and nationalism. Students will clarify the subject of Postcolonial Studies by examining a variety of cultural and linguistic objects (literature, film, TV-journalism, slave- and middle-passage-narrative, and political manifesto) from a variety of cultural perspectives (Arab American, Anglo-Indian, West African, and Caribbean).

Restriction(s):
- Cannot enroll if Class is Freshman or Sophomore

AAT 390 Topics in Arab American Study 3 Credit Hours
Examination of various topics dealing with Arab American Studies. Titles will change according to content and schedule of classes. Course may be repeated for credit when specific topic differs. (OC).

AAT 4677 Arab American Identity 3 Credit Hours
Extensive discussions and critical analysis of the main markers of Arab American identity formation from late nineteenth century to present. This seminar provides in-depth assessments of immigrant narratives from various sources and disciplinary approaches on specific racial, ethnic, and gender experiences within the larger U.S. context. Additional assignments distinguish the graduate version of this course from the undergraduate version.

Restriction(s):
- Students cannot receive credit for both AAST 473 and AAST 573.

AAT 473 Arab American Women Writers 3 Credit Hours
This course examines the literary and cultural contributions of Arab and Arab American women novelists, poets, filmmakers and artists to the development and consolidation of cultures of understanding and coexistence; explores the relations between, among others, citizenship and belonging, race and national security, gender and geographical mobility, and ethnic minorities and mainstream consciousness; stresses how literary and artistic productions of Arab and Arab American women writers and artists fosters alternative visions of socio-cultural coexistence, dialogue, and hospitality by means of technical and stylistic experimental and renovation. For graduate credit take AAST 573. Students cannot receive credit for both AAST 473 and AAST 573.

Frequency of Offering

- (F) fall term;
- (W) winter term;
- (S) summer term;
- (F, W) fall and winter terms;
- (YR) once a year;
- (AY) alternating years;
- (OC) offered occasionally

AAT 490 Topics in Arab Amer Studies 3 Credit Hours
The content of this course will vary. All courses which will run under this number will cover Arab American issues.

Frequency of Offering

- An asterisk denotes that a course may be taken concurrently.

Arabic (ARBC)

ARBC 101 Beginning Arabic I 4 Credit Hours
First course in the two-course elementary Arabic sequence. Listening comprehension, speaking, reading, writing, and culture are emphasized. Course materials promote the use of language to communicate with others and function in Arabic culture. (F,W,S).

ARBC 102 Beginning Arabic II 4 Credit Hours
Second course in the two-course elementary sequence. Continued emphasis on culture and the four skills of listening, speaking, reading, and writing. (F,W,S).

ARBC 201 Intermediate Arabic I 4 Credit Hours
An intermediate-level course designed to increase proficiency in listening, speaking, reading, and writing in a cultural context. Emphasis is placed on acquiring new vocabulary and expanding the use of grammar structures. (YR).

ARBC 202 Intermediate Arabic II 4 Credit Hours
Second course in the two-course intermediate Arabic sequence. Continued emphasis on the development of the four skills of listening, speaking, reading, and writing.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
- (F) fall term;
- (W) winter term;
- (S) summer term;
- (F, W) fall and winter terms;
- (YR) once a year;
- (AY) alternating years;
- (OC) offered occasionally
ARBC 301  Higher Intermediate Arabic I  3 Credit Hours
This course is designed for students who have already had the equivalent of four semesters of Arabic instruction. The course emphasizes the four language skills with specific attention to the productive skills, oral and written. The course introduces authentic reading materials drawn from different disciplines such as religion, literature, history, and politics, reflecting different styles of Arabic and different periods. (F)
Prerequisite(s): ARBC 202 or APL with a score of 301 or APL with a score of 302

ARBC 302  Higher Intermediate Arabic II  3 Credit Hours
A continuation of ARBC 301. It continues to develop the four language skills with specific attention to the productive skills, oral and written. The course introduces authentic reading materials drawn from different disciplines such as religion, literature, science, politics, reflecting different styles of Arabic and different periods. (W, YR)
Prerequisite(s): ARBC 301 or APL with a score of 301 or APL with a score of 302

ARBC 303  Advanced Arabic  3 Credit Hours
This course is an introduction to narrative traditions in Arabic through the close readings of a variety of essays. It is designed to give students experience in reading specialized short texts including modern Arabic literature and the social sciences. Each session will be organized around a particular author, genre, theme, or period, including the novel, political essay, the short story, historical prose, drama, and film, with special emphasis on the Arabic literature of Egypt and the Levant.
Prerequisite(s): ARBC 302
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

ARBC 305  Language of Business  3 Credit Hours
An introduction to the language and cultural practices of the Arab world of business. Particular emphasis will be placed on learning the terminology used in typical business correspondence and documents related to the world of finance, investment, import, and export, and commerce. A variety of businesses will be examined and opportunities for practice in reading and composing business letters will be provided. (W, AY)
Prerequisite(s): ARBC 301

ARBC 331  Survey of Arabic Literature  3 Credit Hours
Arabic 331 surveys selections from writings in Arabic prose literature (magama, novel, short story) and poetry that reflect the intellectual, literary and cultural development of the Arabs from pre-Islamic times, up to the present. The course will also explore the social, political, and cultural changes in the Middle East and the development of modern Arabic literary forms.
Prerequisite(s): ARBC 301

ARBC 332  Arabic Cinema  3 Credit Hours
The course examines the development of Arabic cinema in its socio-cultural contexts through a range of selected films. It covers the different cinematic genres, prevalent themes and diverse trends and schools across the spectrum of Arab countries including Egypt, Tunisia, Lebanon, Morocco, and Palestine. The course elaborates on the careers of film directors and their approaches to film making and to the cultural issues of their time. The course will be conducted in Arabic.
Prerequisite(s): ARBC 301

ARBC 335  Arabic Civilization  3 Credit Hours
This course gives students an appreciation of Arabic civilization through the study of excerpts from the masterworks of the literary and intellectual Arab heritage. It provides practice in reading pre-modern and modern classical Arabic texts drawn from a variety of intellectual disciplines. Students may not receive credit for both MCL 3350 and ARBC 335.
Prerequisite(s): ARBC 302
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

ARBC 350  Arabic Literature and Culture  3 Credit Hours
An introduction to the literature and other art forms of the modern Arab world in cultural and historical context. Topics include the Arab world-view, religious attitudes and self-expression, and ethnicity and gender. The course assumes no prior knowledge of the region. All readings will be in English translation. (YR)

ARBC 351  Contemporary Arabic Literature  3 Credit Hours
This course will explore the literary works of contemporary Arab writers from countries such as Iraq, Lebanon, Palestine, Algeria, France, and the U.S. Although the course covers a variety of literary genres such as the short story, memoirs, and poetry, it puts special emphasis on the Arab contemporary novel. It also provides an in-depth critical analysis of major themes dealt with by authors in their works such as identity, minority, gender, nationality, war, family, ethnicity, religion, homeland and home, politics, society and culture. Major historical, political, social, cultural, artistic and literary factors shaping and driving contemporary Arabic literary writings today also will be thoroughly examined. The course will feature films and documentaries in addition to internet-based activities.
Prerequisite(s): ARBC 301

ARBC 390  Topics in Arabic  3 Credit Hours
Examination of problems and issues in selected areas of Arabic. Title as listed in Schedule of Classes will change according to content. Course may be repeated when specific topics differ. (OC).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Art Applied (ART)

ART 201  Beginning Painting  3 Credit Hours
Lectures on the fundamentals of painting along with work in the studio. Basic ideas of structure, composition, and color are explored through individual and group instruction. Students work from still-life and from the model. This is a broad introductory painting course designed for the student unfamiliar with fundamentals of design and color. Material: acrylics. (YR)

ART 202  Beginning Drawing  3 Credit Hours
Lectures alternate with studio work in the investigation of drawing fundamentals. Students receive individual and group instruction as they work from still life setups, nature, and from the model. Emphasis is placed on the development of critical skills and perceptual drawing techniques for students with little or no studio experience. Pastel, charcoal, conte, pencil, and inks will be used. (YR).
ART 204  Beginning Watercolor  3 Credit Hours
Through lectures and studio work, students will explore the fundamentals of watercolor painting. To demonstrate the dynamics of the medium, a variety of approaches and techniques will be used, including realistic, abstract, and experimental painting. Subject matter includes still life, the figure, possible outdoor sketching and painting from the imagination. All levels of students are given individual guidance. (YR).

ART 206  Basic Design-Color  3 Credit Hours
Students will be introduced to the complex and diverse subject of color. The areas of study include principles and theories of color, practical application and technique, and the phenomenon of color interaction. The art elements (line, shape, value, space, form, and texture) and design principles will be applied within specific assignments. Compositional concerns and creative problem solving will be emphasized. (YR).

ART 210  Beginning Digital Design  3 Credit Hours
In this course students acquire practical and conceptual skills needed to create, select, and use digital illustrations and digital typographic designs. Students will develop proficiency in the use of digital art generating software, such as Adobe Illustrator. Students also learn and apply design concepts, layers, composition and color theory. Students will utilize analog sketching as a basis for their creative work, and learn to digitally convert these sketches to digital drawings and typeface. The course will also examine the history of design and typography to provide context and support for the creative process. The understanding of these topics will be developed and assessed through visual examination of completed projects, reading, critical discussion and writing that consider the connotative and denotative meaning of project solutions. (YR).

ART 220  Intro to Digital Photography  3 Credit Hours
This course focuses on the creative use of digital imaging software and hardware. Students are exposed to contemporary artists and professionals working in traditional and digital photography. Students also consider critical issues surrounding the aesthetic, ethical and theoretical aspects of digital imaging technology and current photographic practice. Application of these approaches, processes and concepts are discussed in terms of their relevance within and beyond art practices, including art as personal expression and as a professional field. Each assignment engages students' critical thinking as they explore the artistic possibilities of digital photography while expanding their technological and aesthetic knowledge. During project critiques, students practice articulating their thought processes in relation to their own work and the work of their peers.

ART 306  Intermediate Design-Color  3 Credit Hours
The design emphasis will be on line and movement, positive/negative space, push/pull dynamics and a study of the nature of grids. The color emphasis will focus on tertiary colors, the effect of variations in color intensity and tonal contrast. There will also be a study of various twentieth century design movements such as the Russian Avant Garde, Constructivism and the Bauhaus, with some assignments modeled on these styles.

Prerequisite(s): ART 206
Restriction(s):
Can enroll if Level is Undergraduate

ART 321  Intermediate Painting  3 Credit Hours
Various painting approaches, styles and concepts are explored beyond the basic level through lectures and studio work. Students are encouraged to develop their own personal style as they master new techniques and types of subject matter. This course is repeatable once in order for students to develop their skills. When repeating, the content and assignments are determined in consultation with instructor.

Prerequisite(s): ART 201

ART 322  Intermediate Drawing  3 Credit Hours
The fundamentals of drawing are refined beyond the basic level in a variety of media through lectures and studio work. Students are encouraged to develop their own personal style as they master new techniques and types of subject matter. This course is repeatable once in order for students to develop their skills. When repeating, the content and assignments are determined in consultation with instructor.

Prerequisite(s): ART 202

ART 323  Figure Drawing  3 Credit Hours
This course is designed to teach each student about the complex human form through the act of observation, drawing, and memorization of specific anatomical terms. Emphasis will be on proportion, anatomy, composition, and expression. Students will draw from a live model.

Prerequisite(s): ART 202

ART 324  Intermediate Watercolor  3 Credit Hours
Various watercolor painting approaches, styles and concepts are explored beyond the basic level through lectures and studio work. Students are encouraged to develop their own personal style as they master new techniques and types of subject matter (still life, the figure, landscape and painting from the imagination). This course is repeatable once in order for students to develop their skills. When repeating, the content and assignments are determined in consultation with instructor.

Prerequisite(s): ART 204

ART 332  Creating the Graphic Novel  3 Credit Hours
This course focuses on the creation of an original graphic novel from inception to fully developed story. Students work on character, plot development, dialogue, drawing style, and layout planning, and are encouraged to introduce any cross-disciplinary techniques such as digital applications when appropriate. Lectures and readings consider contemporary media. This course is repeatable once in order for students to develop their skills. When repeating, the content and assignments are determined in consultation with instructor.

Prerequisite(s): ART 202 or ART 206
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

ART 360  Introduction to Printmaking  3 Credit Hours
This studio course is an introduction to the fundamentals of printmaking. The basic techniques of intaglio, lino-cut, chine chole, lithography and monotype printing methods are utilized in projects. As a deeply interdisciplinary practice, printmaking engages with other artistic media of drawing, painting, and collage. Each student is encouraged to incorporate other materials based on her/his major, interests or expertise.

Prerequisite(s): ART 201 or ART 202 or ART 204 or ART 206

ART 390  Topics in Applied Art  3 Credit Hours
Study of various media and techniques in selected areas of applied art. Title as listed in the Schedule of Classes will change according to content. Course may be repeated for credit when the topics differ.

Restriction(s):
Can enroll if Level is Undergraduate

ART 399  Independent Studies in App Art  1 to 3 Credit Hours
Readings or analytical assignments in applied art in accordance with the needs and interests of those enrolled and agreed upon by the student and the instructor. (F,W).

* An asterisk denotes that a course may be taken concurrently.
Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

**Art History (ARTH)**

**ARTH 101 Western Art to 1400** 3 Credit Hours
An introduction to the history of art from the prehistoric era to the end of the middle ages. Using a broadly chronological structure, the course surveys changes in the style and substance of western (European) art in this period. The course also explores the connection between art and culture, and notes the many interrelationships between the cultures that have formed the western tradition. (F, W).

**ARTH 102 Western Art from 1400** 3 Credit Hours
A historical survey of western painting and sculpture from the Renaissance through the twentieth century. (F, W).

**ARTH 103 Arts of Asia** 3 Credit Hours
An introduction to the visual arts of three Asian civilizations: India, China, and Japan. Since this is a survey, the focus will be placed on major monuments that are characteristic of these artistic traditions. In order to better understand the works of art, the cultural milieu including religion, philosophy, and parallel arts will be considered. (YR).

**ARTH 104 Arts of the Middle East** 3 Credit Hours
From the eighth century, a new religious community with no developed artistic heritage spread rapidly over the ancient empires of the near and middle east and as far west as Spain and Hungary. Appropriating established forms and traditions, Muslim cultures created a brilliant system of religious and secular art that reveals national diversity and an underlying unity of purpose. This course provides an introduction to the visual traditions of Muslim cultures. (YR).

**ARTH 105 Creation of Art** 2 Credit Hours
An art appreciation course based on videotapes. Great art does not completely yield its secrets. The course helps the student to understand the subject, the message or content of the creation and the method that the artist used in making it. This course does not fulfill the Art History concentration requirement. (F, W).

**ARTH 106 History of Western Architecture** 3 Credit Hours
An introduction to the place of architecture in western culture. The course treats architecture as the "mother of the arts" and explores how buildings are perceived today and in the past, and why enormous amounts of money and time were spent on them. Structure and aesthetics will also be discussed, both in relation to individual buildings and to their broader urban context. (YR).

**ARTH 304 Studies in Detroit Culture** 3 Credit Hours
This course is an attempt to define a modern cultural history of Detroit. Taught by two faculty members, the emphasis of the course will vary but the following aspects of the city's cultural history will be covered in some detail: its literature, arts, music and architecture; its social conditions and broader American cultural context.

**ARTH 305 The Arts & Culture of Detroit** 3 Credit Hours
This interdisciplinary course explores the modern and contemporary cultural history of Detroit, examining the ways in which various population groups have been creative from the nineteenth century to the present. The course highlights the work of architects, designers, photographers, visual artists, poets, and musicians, and situates them in the broader cultural context of American art and history.

**ARTH 309 Egyptian Art** 3 Credit Hours
An introduction to representative works of art produced in Egypt from the Neolithic era down to modern times. Examination of the artifact's cultural context will be emphasized, including the study of philosophy (Confucianism and Daoism) and religion (Buddhism).

**ARTH 311 Art of China** 3 Credit Hours
An introduction to representative works of art produced in China from the Neolithic era down to modern times. Examination of the artifact's cultural context will be emphasized, including the study of philosophy (Confucianism and Daoism) and religion (Buddhism).

**ARTH 312 Art of Japan** 3 Credit Hours
An introduction to representative works of art produced in Japan from the Neolithic era down to modern times. The artifact's cultural context will be examined including religious practice (Shinto and Buddhism), influence from abroad, and other artistic developments in literature, music, and theatre.

**ARTH 313 Chinese Painting** 3 Credit Hours
This course is a survey of the painting of China from the earliest examples found in tombs through works influenced by the West during the modern period. The course focuses on selected artists who serve as representatives of major traditions of China's cultural and artistic heritage. Students will be introduced to Chinese philosophy and relevant literary genres that provide a context for the development of Chinese painting.

**ARTH 315 Early Chinese Art and Archaeology** 3 Credit Hours
An examination of the art and architecture of early China (Neolithic through Eastern Han). Recent excavations that have significantly changed our view of the early period will be given emphasis. Students will analyze relevant literary and philosophical texts in translation to enhance understanding of the cultural context.

**ARTH 319 Egyptian Art** 3 Credit Hours
The art of the Ancient world is examined through an intensive review of the visual traditions of Egypt: its monumental architecture, sculpture, painting and decorative artifacts.

**ARTH 321 Greek Art** 3 Credit Hours
This course surveys the history and art of Crete, the Cyclades, and Greece from the third millennium through the first century B.C. In the prehistoric period, the course will focus on both architectural and ceramic developments, as well as on the trade and economic contacts between Asia Minor and Greece. In the historic period, the course considers the major artistic developments in architecture, sculpture, and painting, focusing on how social, political or historical events caused these art forms to evolve and change over the centuries.

**ARTH 322 Roman Art** 3 Credit Hours
This course surveys Roman art from the earliest times through the later empire. The course also explores the Roman influence on western art in the Middle Ages.

**ARTH 323 Early Christian Art** 3 Credit Hours
The course survey the development of Christian art from its prehistoric origins in Rome through the first Christian emperors.

**ARTH 324 Byzantine Art** 3 Credit Hours
This course surveys the history and art of Byzantine and Early Christian art.

**ARTH 325 Islamic Art** 3 Credit Hours
This course surveys the history and art of Islamic art from its origins through the fall of the caliphate of Baghdad. The course also explores the art and architecture of Islamic Spain.

**ARTH 326 Art of the Middle Ages** 3 Credit Hours
This course surveys the art of the Middle Ages from the fall of the Roman Empire to the Renaissance. The course also explores the art and architecture of Islamic Spain.
ARTH 322  Roman Art  3 Credit Hours
This course surveys the major art forms produced by both the Romans and Etruscans. The course begins with the Roman Republic (late sixth century B.C.) and concludes with the rule of Constantine in the fourth century A.D.). We will discuss the development of the urban, government complex (the Roman Forum), the evolution of domestic architecture, and the major artistic achievements in sculpture, painting, and the minor arts. We will focus on how social, economic, religious, political and/or historical events caused these art forms to evolve and change over the centuries. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 327  Myth & Ritual in Classical Art  3 Credit Hours
Polytheistic, multicultural religious practices shaped Greek and Roman culture and society. This course examines the main deities, myths, rituals and sanctuaries of the ancient Mediterranean through the study of art, architecture, texts and archaeology. Freestanding sculptures, relief sculptures, vase paintings, wall paintings, mosaics, coinage, altars and temples will be analyzed.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 105

ARTH 331  Early Christian Byzant  3 Credit Hours
Borrowing its formal language from late antiquity and its symbolism from other mystery cults, the art of early Christianity emerged from the Roman catacombs to monumental expression under emperors Constantine and Justinian. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 332  Early Med and Romanesque Art  3 Credit Hours
A study of the dynamic interplay between barbarian, Christian and classical Mediterranean influences in the early Medieval period with a consideration of the art and architecture of the pilgrimage routes to Santiago de Compostela and of the crusader kingdoms in the Holy Land. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 333  Gothic Art and Architecture  3 Credit Hours
A survey of the architecture, sculpture and stained glass of the great cathedrals of Europe, focusing on Chartres, Amiens, Reims, and Bourges. A study of the patrons, builders, the new technology they employed and the cities in which they worked as well as an analysis of the emergence of naturalism in medieval manuscript illumination and panel painting. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 334  The 14th Century  3 Credit Hours
This is a course that examines the art and architecture of Europe in the 14th century: one of the great transitional periods in the history of western art. Beginning with the new developments in 13th-century Italian art by such artists as Giovanni Pisano and Giotto, the course charts the pattern of these developments in northern European countries as well. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 335  Women in Medieval Art  3 Credit Hours
Women have often been regarded as the second sex of the middle ages due to the misogynistic attitudes of that era. Recent scholarship, however, has unearthed a significantly more complex picture. Through a study of visual representations of women in medieval art, this course will examine women's roles in the creation and patronage of art and literature, economic and family issues, and women's participation in new and innovative forms of religious piety.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106 or WGST 275 or WGST 303 or HUM 275 or HUM 303 or PSYC 275 or PSYC 303 or ANTH 275 or ANTH 303 or SOC 275 or SOC 303 or WST 275

ARTH 341  Art&Arch in Early Ren Florence  3 Credit Hours
This course examines the city of Florence as a work of art, as well as masterpieces of Florentine sculpture, painting and architecture of the Early Renaissance (fifteenth century). Among the masters studied are the sculptors Nanni di Banco, Donatello, Ghiberti, Luca della Robbia, Pollaiuolo, and Verrocchio; the painters Masaccio, Fra Angelico, Fra Filippo Lippi, and Botticelli; and the architects Brunellischi, and Alberti. Statuary, reliefs and tombs; altarpieces, fresco cycles and mythological pictures; churches and palaces are all studied within the context of the technical, philosophical, political and cultural developments of the quattrocento. The ideals of the Florentine Republic, Humanism, Neo-Platonism, and Millenarianism provide the historical and intellectual background for the study of these works of art and architecture. Issues of patronage, placement, restoration, art criticism, women's roles in society and reception will also be explored. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103

ARTH 342  High Renaissance and Mannerism  3 Credit Hours
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 343  Northern Renaissance Art  3 Credit Hours
A survey of the art which arose amid the conflicts of late medieval mysticism and Renaissance humanism in 15th- and 16th-century Germany and the Netherlands with emphasis on the works of Van Eyck, Durer, Grunewald, Bosch, and Bruegel. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 344  Italian Renaissance Sculpture  3 Credit Hours
A study of freestanding and relief sculpture during the Italian Renaissance, with particular attention to major artistic centers like Florence, Rome, and Venice in the 15th and 16th centuries. By examining such forms as colossal statuary, equestrian sculpture, tomb monuments, garden sculpture, and portrait busts, the course will address the function of art within the public sphere, the relationship between civic sculpture and political ideology, the re-elevation of sculpture from a mechanical art to a liberal art, and the role artistic individuality and technical proficiency. Artists addressed will include Donatello, Ghiberti, Verrocchio, Antico, Riccio, Bertoldo, Michelangelo, Cellini, and Giambologna.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106
ARTh 351 Southern Baroque Art  3 Credit Hours
A study of the art of the seventeenth century in Italy and Spain, focusing upon Caravaggio, Annibale Carracci, Guercino, Reni, Coronato, Gaulli, Murillo, Zurbaran, and Velasquez, among others. (OC).
Prerequisite(s): ARTh 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 352 Northern Baroque Art  3 Credit Hours
Study of the art of the seventeenth century in France, Flanders and Holland, with emphasis on Poussin, Georges de la Tour, the Le Nain brothers, Lebrun, Rubens, Van Dyck, Van Ruisdael, Vermeer, and Rembrandt. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 360 Art of Glass  3 Credit Hours
This course focuses on glass as a medium and an art form. From Roman times to the present day, the unique qualities of glass have excited artists and craftsmen to make vessels, sculptures, and architectural ornamentation. The course traces the form and function of glassworks, focusing particularly on the historical trajectory of glass from ancient vessels and medieval stained glass, to the development of "art glass" in the nineteenth century, to contemporary objects. The course is based on lectures, discussion, and readings. Students are required to attend several field trips for "hands-on" work with objects. Enrollment is limited to 15 students.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 361 American Art  3 Credit Hours
A study of American painting, sculpture, and architecture from the colonial period to the present. In this survey of an arts tradition that has greatly depended upon developments in Europe, efforts will be made to identify what is American about American art. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 362 Impressionism and Post-Impress 3 Credit Hours
An examination of the origins of modern painting and sculpture in the art of the major Impressionists (Manet, Monet, Degas, Renoir) and Post-Impressionists (Cezanne, Seurat, Gauguin, Van Gogh). (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 363 Arts of the Twentieth Century 3 Credit Hours
A contextual study of twentieth-century art that seeks to define the relationships between western art and society. In addition to a consideration of painting, sculpture, and architecture, the emergence of new media - including altered and fabricated photography, video, and installation art - will be examined. Although a broad survey of a century rich in artistic achievements, the course will emphasize the dominance and influence of Pablo Picasso, Henri Matisse, and Frank Lloyd Wright. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 364 Picasso 3 Credit Hours
A critical examination of Pablo Picasso’s art that chronicles the artist’s achievements as a painter, sculptor, draftsman, printmaker, and ceramist. Lectures and readings are directed to positioning Picasso’s masterworks in relationship to his art as a whole and in the context of twentieth-century art. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 365 Modern Architecture 3 Credit Hours
A survey of European and American architecture from the Chicago School to Post-Modernism. The course will trace the stylistic history of modern architecture while considering parallel issues of theory, social context, and building technology. Major architects studied will be Sullivan, Wright, Mies van der Rohe, Le Corbusier, and Johnson. (AY).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 366 The Modern Print 3 Credit Hours
A history of western printmaking from Post-Impressionism to the present. The course will examine the relationship of printmaking to major movements of the day, the impact of modern technology on traditional print processes, and the developing notion of printmaking as an integral form of expression for the modern painter and sculptor. Special emphasis will be placed on the contributions of Gauguin, Munch, Picasso, Johns, and Stella. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 367 Contemporary Art 3 Credit Hours
An examination of the most recent developments in modern art. In addition to painting and sculpture, consideration will be given to related forms of expression in performance art, photography, and video. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 368 American Photography 3 Credit Hours
This course explores the history of photography, its aesthetics, and social functions in the United States, beginning with the medium's emergence in the 1830s and concluding with contemporary practices. Lectures and discussions will attend to several threads of inquiry: the history and theory of the medium and its interpretation; the diverse functions of photographs in American society; the relationship between photography and American identity formation; and the status of the photograph in a post-photographic, digital age.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 375 Urban Design Perspectives 3 Credit Hours
This course explores the ways in which urban design both creates and reflects past and present urban conditions, cultures, and spatial relationships. The course will look at the built environment architecturally, aesthetically, and anthropologically in order to highlight the ever changing complexities of urban spheres. The placement and design of buildings and public spaces, and the resulting human interactions in those spaces, will be explored in comparative contexts.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTh 384 Islamic Architecture 3 Credit Hours
This course is a comprehensive study of history and development of Islamic architecture from its birth in the seventh century to the present time. The course is designed to explain major characteristics of Islamic architecture through the study and analysis of major monumental buildings both religious and secular. Mosques, Madrasas (schools), Mausoleums, Palaces, and other buildings. Detailed analysis also will be applied to different types of art associated with these buildings, such as wall painting, stucco work, wood carving, sculpture, mosaic, and calligraphy.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 105
Restriction(s):
Can enroll if Level is Undergraduate
ARTH 385  Islamic Decorative Arts  3 Credit Hours
This course in an in-depth investigation of the decorative arts of the Islamic Middle East from the seventh through the eighteenth century including the lands of Islamic Spain and North Africa and extending east to Afghanistan. The course traces the development of decorative styles in objects of daily and courtly life, particularly ceramics, metal work, glass, wood and ivory carving, textiles and rugs. The central role played by calligraphy in all of the arts is emphasized as well as in manuscript production and the Arts of the Book. As a religion, but also a way of life, Islam fostered a distinctive artistic production reflected in these decorative arts.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106 or RELS 201

ARTH 390  Topics in Art History  3 Credit Hours
Examination of problems and issues in selected areas of art history. Title as listed in the Schedule of Classes will change according to content. Course may be repeated for credit when topics differ. (OC).

ARTH 399  Independent Studies  1 to 3 Credit Hours
Readings and research assignments in history of art selected in accordance with the special needs and interests of art history concentrators. May be repeated for a maximum of 6 credit hours. (F,W).

ARTH 400  Senior Seminar  3 Credit Hours
An introduction to art-historical research methods. The art historian's central task of interpretation is explored by considering the critical perspectives of connoisseurship, iconography, formal analysis, iconology, and modern literary theory. (OC).
Prerequisite(s): (ARTH 304 or ARTH 305 or ARTH 310 or ARTH 311 or ARTH 312 or ARTH 313 or ARTH 315 or ARTH 319 or ARTH 321 or ARTH 322 or ARTH 331 or ARTH 332 or ARTH 333 or ARTH 334 or ARTH 342 or ARTH 343 or ARTH 346 or ARTH 351 or ARTH 352 or ARTH 361 or ARTH 362 or ARTH 363 or ARTH 364 or ARTH 365 or ARTH 366 or ARTH 367 or ARTH 370 or ARTH 390 or ARTH 392 or ARTH 410 or ARTH 411 or ARTH 416 or ARTH 425 or ARTH 454) and (ARTH 304 or ARTH 426 or ARTH 425 or ARTH 450 or ARTH 454) and (ARTH 304 or ARTH 305 or ARTH 310 or ARTH 311 or ARTH 312 or ARTH 313 or ARTH 315 or ARTH 319 or ARTH 321 or ARTH 322 or ARTH 331 or ARTH 332 or ARTH 333 or ARTH 334 or ARTH 342 or ARTH 343 or ARTH 346 or ARTH 351 or ARTH 352 or ARTH 361 or ARTH 362 or ARTH 363 or ARTH 364 or ARTH 365 or ARTH 366 or ARTH 367 or ARTH 370 or ARTH 390 or ARTH 392 or ARTH 410 or ARTH 411 or ARTH 425 or ARTH 454)

ARTH 410  Museum Practice Seminar I  3 Credit Hours
Students conduct research on works of art in preparation for an exhibition and an accompanying catalogue. Students are exposed to all aspects of writing a catalogue and didactic text, designing/installing the exhibition, and planning the exhibition opening.
Prerequisite(s): (ARTH 304 or ARTH 305 or ARTH 310 or ARTH 311 or ARTH 312 or ARTH 313 or ARTH 315 or ARTH 319 or ARTH 321 or ARTH 322 or ARTH 331 or ARTH 332 or ARTH 333 or ARTH 334 or ARTH 342 or ARTH 343 or ARTH 346 or ARTH 351 or ARTH 352 or ARTH 361 or ARTH 362 or ARTH 363 or ARTH 364 or ARTH 365 or ARTH 366 or ARTH 367 or ARTH 370 or ARTH 390 or ARTH 392 or ARTH 400 or ARTH 411 or ARTH 425) and (ARTH 304 or ARTH 305 or ARTH 310 or ARTH 311 or ARTH 312 or ARTH 313 or ARTH 315 or ARTH 319 or ARTH 321 or ARTH 322 or ARTH 331 or ARTH 332 or ARTH 333 or ARTH 334 or ARTH 342 or ARTH 343 or ARTH 346 or ARTH 351 or ARTH 352 or ARTH 361 or ARTH 362 or ARTH 363 or ARTH 364 or ARTH 365 or ARTH 366 or ARTH 367 or ARTH 370 or ARTH 390 or ARTH 392 or ARTH 400 or ARTH 411 or ARTH 425)

ARTH 411  Museum Practice Seminar II  3 Credit Hours
This course is an introduction to museum studies. Students explore the history and missions of museums, and the role of museums in shaping public discourses on art. They also study current issues related to museum practice, including collection development, repatriation of cultural property, conservation, administration, research, exhibition and interpretation. Field trips to area institutions are scheduled so students can meet museum and gallery professionals in order to consider career opportunities available in this context.
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

ARTH 416  Earl Mod Jpn Paint&Wood Prnts  3 Credit Hours
Paintings and woodblock prints of the Edo/Tokugawa (1600-1868) and Meiji (1868-1912) periods are considered in light of competing developments that on the one hand looked to Japan's classical tradition and on the other to the influence of art and artists from China and the West. Special attention is given to female artists and images of women. Students cannot receive credit for both ARTH 416 and ARTH 516. (OC).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103
Restriction(s):
Cannot enroll if Class is Graduate

ARTH 425  Women in Classical Antiquity  3 Credit Hours
This course examines the evidence for the lives of women in Greek, Etruscan and Roman Antiquity, from the Bronze Age through the Imperial Period. Special emphasis will be placed on the archaeological evidence, especially works of art which illustrate women's lives and their relationships with men. Documents such as dedicatory and funerary inscriptions, the poetry of Sappho and Sulpicia, and selections from the writings of Homer, Hesiod, Aristotle, Pliny, Juvenal, and other ancient authors, will also be examined critically, particularly in relationship to the works of art. Students cannot receive credit for both ARTH 425 and ARTH 525. (YR).
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106
Restriction(s):
Cannot enroll if Class is Graduate

ARTH 426  City of Ancient Rome  3 Credit Hours
This course will focus on the ancient city of Rome, from its foundation to its precipitous decline in the fifth century AD. It will explore the public art and architecture of the city, emphasizing the different types of evidence available (topography, architecture, sculpture, texts) for understanding the history, politics, religion, and urban development of Rome, as well as the various art historical and archaeological techniques used to analyze the evidence. (OC)
Prerequisite(s): ARTH 101 or ARTH 102 or ARTH 103
**ARTH 428**  Roman Art and Memory  3 Credit Hours
The architectural vocabulary established during the centuries of classical Greek civilization influences our culture to the present day. This course explores the history and development of this fundamental architectural tradition, focusing on the Greek temple, sanctuaries and holy sites, urban planning and public works, and domestic space. Students discuss the philosophical underpinnings of Greek architectural design, the engineering practices of Greek builders, as well as the cultural and social influences on Greek buildings and cities. This course begins with the emergence of humble mudbrick and timber buildings from the Dark Ages and continues through the height of cosmopolitan urban luxury in the 2nd century AD.

**Prerequisite(s):** ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

**Restriction(s):**
Can enroll if Level is Undergraduate

**ARTH 429**  Collage, Montage, Assemblage  3 Credit Hours
Different conceptions of collage, montage, and assemblage have vitally shaped artistic practice in the twentieth century, perhaps even more so than the advent of modernist abstraction. The modern phenomenon of collecting, mixing, and sampling that permeates the last century up to and including the contemporary moment will be traced in the class across the thresholds of painting, sculpture, architecture, photography, and film. We will discuss a wide range of movements, genres, and styles (Cubism, Futurism, Surrealism, Dada, Weimar and Russian photomontage, Soviet film, found footage film, French decollage, postwar assemblage) and their relation to the ever-changing mass media, the urban, and the modernized - in short, the everyday. The last segment of the class addressed more recent interpretations of the collage paradigm, including installation art and digital applications. Student cannot receive credit for both ARTH 469 and ARTH 569.

**Prerequisite(s):** ARTH 101 or ARTH 102 or ARTH 103 or ARTH 104 or ARTH 106

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

**Astronomy (ASTR)**

**ASTR 130**  Introduction to Astronomy  3 Credit Hours
A one-term introduction for those interested in learning about the present state of knowledge of the Universe, its origin, evolution, organization, and ultimate fate. Exciting new discoveries concerning extrasolar planets, star birth, supermassive black holes, dark matter/dark energy, and cosmology are discussed. Two years of high school math or its equivalent recommended.

**ASTR 131**  Introductory Astronomy Lab  1 Credit Hour
An introduction to some of the important observational techniques and analytical methods used by astronomers. Ground-based and satellite data will be used to reveal physical and chemical properties of the moon, planets, stars, and the Milky Way. Outdoor exercises involving telescopic observation of the sun, variable stars, nebulae, and external galaxies are also included. Constellation identification will be taught using off-campus planetarium facilities.

**Prerequisite(s):** ASTR 130* or PHYS 130
ASTR 301  Astrophysical Concepts  3 Credit Hours  
A one-semester course introducing the Physical concepts used in Modern Astrophysics, with an emphasis on the application of these ideas to Astrophysical objects. The course familiarizes the student with the Astronomical concepts and vocabulary used in other Astronomy courses at the 300-level and beyond. The course begins with an overview of Astronomical objects and terminology, before introducing conservation laws in Physics and their applications in Astronomy. Newtonian mechanics and gravity are then introduced and applied to various self-gravitating systems and scenarios. Electromagnetism, Quantum Mechanics and a small amount of Statistical Physics are covered at sufficient detail to understand the behavior of electromagnetic radiation and thermal emission. Special and General relativity are introduced from the point of view of understanding the behaviors of certain exotic objects in Astronomy. Common statistical distributions used in upper-level Astronomy courses are also introduced with an emphasis on application.  
Prerequisite(s): (MATH 114 or MATH 116) and (PHYS 126 or PHYS 151)  
Restriction(s):  
Can enroll if Level is Undergraduate or Graduate  
Can enroll if College is Engineering and Computer Science or Business or Arts, Sciences, and Letters or Education, Health, and Human Services

ASTR 330  The Cosmic Distance Scale  3 Credit Hours  
An exploration of the cosmic distance ladder focusing on the systems and techniques that astronomers use in establishing the distances to celestial objects. Direct measures using radar ranging and trigonometric parallax will be discussed for objects in the solar system and for stars within about 3000 light-years of the Sun, respectively. For more remote systems in or just outside the Milky Way, methods based spectroscopic parallax and the period-luminosity relation for various types of variable stars will be introduced. For the extra-galactic objects, use of the Hubble relation and the light curves of Type Ia supernovae will be made to assess the distances. At each rung of the ladder, emphasis will be placed on the astrophysical principles and processes underlying the methodology being applied. 3 hours lecture

Prerequisite(s): (MATH 113 or MATH 115) and (PHYS 126 or PHYS 151)  

ASTR 361  Observational Techniques  3 Credit Hours  
This course is designed to provide students with an understanding of some of the basic observational techniques use by astronomers in gathering and analyzing data from celestial objects. Practical experience in acquiring, displaying, and interpreting optical and radio observations using the University's 0.4-m telescope and 2.3-m radio dish will be emphasized. Topics will include astronomical coordinate system and timekeeping, telescope optics, the design and use of CCD detectors, fundamentals of multi-color photometry, an introduction to astronomical spectroscopy, and radio measurements of the Sun and interstellar hydrogen clouds at 21-cm wavelengths. (2 hours lecture, 3 hours laboratory)  
Prerequisite(s): (ASTR 130 or PHYS 130) and (PHYS 126 or PHYS 151)

ASTR 390  Topics in Astronomy  3 Credit Hours  
A lecture in a topic of current interest in astronomy. Topics vary and are announced in the current Schedule of Classes. Three hours lecture.

Prerequisite(s): ASTR 130 or PHYS 130

ASTR 390A  Topics in Astronomy  3 Credit Hours  
Topic: Dark Matter, Dark Energy, Dark Future? An Introduction to 21st Century Cosmology. Modern cosmology, buttressed by increasingly precise observational data provided by space missions like HST, COBE, and WMAP, teaches that the universe is composed primarily of matter we cannot see nor properly characterize, the so-called 'dark matter,' and of energy whose source is unknown and may defy knowing, the ubiquitous 'dark energy.' This course will attempt to elucidate what we currently understand about the composition, structure and evolution of the universe based on general relativistic theory and astronomical observations of remote galaxies using both ground- and space-based technologies. Special attention will be given to the means by which important cosmological parameters that determine the structure of the universe, like the critical density, the Hubble parameter, and the curvature and cosmological constants, are established. If time permits, additional consideration will be given to the array of planned future space missions devoted to cosmology-related subjects.

Prerequisite(s): PHYS 305

ASTR 421  Stellar Astrophysics  3 Credit Hours  
An application of important physical principles to stars and star clusters. Topics will include gravitational collapse and star formation, radiative transfer and stellar atmospheres, nucleosynthesis and the structure of normal stars, degeneracy and the endpoints of stellar evolution, and general relativistic effects in the vicinity of black holes. 3 hour lecture.

Prerequisite(s): (PHYS 305 or ASTR 301) and (MATH 205 or ASTR 330) or MATH 215

ASTR 445  Galaxies and Cosmology  3 Credit Hours  
A course devoted to our current understanding of the composition, structure, and evolution of the universe based on general relativistic theory and astronomical observations of remote galaxies using both ground- and space-based technologies. Topics include observational characteristics, classification, kinematics and evolution of galaxies, quasars and active galactic nuclei, the cosmic microwave background radiation, concepts of general relativity, single-and multi-component models of the universe, dark matter and dark energy, and the origin of the universe (the big bang, inflation and the creation of the first elements). Three hour lecture. (AY)

Prerequisite(s): (PHYS 305 or ASTR 301 or ASTR 330) and (MATH 114 or MATH 116)

ASTR 498  Directed Studies in Astronomy  1 to 3 Credit Hours  
Special topics in astronomy chosen by mutual agreement between the student and the instructor. Course may be repeated for credit. (F, W, S)

ASTR 499  Research in Astronomy  1 to 3 Credit Hours  
Observational/experimental studies in astronomy selected by agreement between the student and the instructor. Four to twelve hours laboratory/independent study. May be repeated for credit. (F, W, S)

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:  
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
Behavioral and Biological Sciences (BBS)

BBS 451 Ethics in Research 1 Credit Hour
This course provides an opportunity for students to explore and evaluate the ethical standing of different forms of research from a variety of perspectives. From a historical perspective, students will learn why federal legal protections are in place for use of human participants and animal subjects, and how this applies to their own research and future aspirations in research. This course will provide a discussion and readings relevant to understanding the foundation of current ethical responsibilities from which students will be able to apply the requirements and policies in conducting research projects with human participants and animal subjects. (YR)
Prerequisite(s): BIOL 140 and PSYC 101 or PSYC 171
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore

BBS 490 Bio and Beh Science Capstone 3 Credit Hours
This capstone provides an opportunity for students to combine knowledge and skills from their undergraduate courses to address an interdisciplinary topic in the field of Biological Psychology (Biological and Behavioral Sciences) through their own research projects. The course includes research, writing and extended discussion culminating in a final project. (YR)
Prerequisite(s): (BIOL 370 or CHEM 370 or BCHM 370 or BIOL 470 or CHEM 470 or BCHM 471 or BIOL 301 or BIOL 306 or BIOL 474) and (PSYC 370 or BIOL 357) and (PSYC 381 or STAT 301)

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Biochemistry (BCHM)

BCHM 352 Introduction to Toxicology 3 Credit Hours
An introduction to the principles of toxicology with an emphasis on environmental toxicology. Major topics include toxic agents, toxicological mechanisms, and use of toxicological reference literature. Discussion of chemical carcinogenesis, genetic toxicology, immunotoxicology, teratology, and toxic responses of the skin, eyes, and nervous system. Three hours lecture. (AY).
Prerequisite(s): CHEM 225

BCHM 370 Principles of Biochemistry 3 Credit Hours
A concise but comprehensive survey of various areas of biochemistry designed for non-biochemistry majors. The course follows the standard approach to the subject including a description of cells, their structure and constituent macromolecules (proteins, nucleic acids, carbohydrates and lipids), enzymology, bioenergetics, intermediary metabolism, and gene regulation. Students cannot take both Biochemistry 370 and 470 or 471 for any combination of concentration, cognate or minor requirement. Three hours lecture. (F).
Prerequisite(s): BIOL 140 and CHEM 226

BCHM 390 Current Topics in Biochemistry 1 to 3 Credit Hours
Special topics current to the field of biochemistry. Topics and format for the course may vary. See Schedule of Classes for current topic. Permission of instructor. (OC).
Prerequisite(s): (BCHM 370* or BIOL 370* or CHEM 370*) or (BCHM 470* or BIOL 470* or CHEM 470*)

BCHM 404 Mech. Chronic Human Disease 3 Credit Hours
This course focuses on the biochemical, molecular and cellular mechanisms underlying the progression of chronic diseases, such as diabetes mellitus and atherosclerosis. Techniques in epidemiology, pathology, genetics, molecular biology, and biochemistry are used to understand how relevant physiological processes become pathological. The examination of chronic diseases provides an opportunity to understand biological processes across many scales of life, from extracellular matrix proteins to cells in blood vessel walls to risk factors in patient populations to the pharmacology of treatments. Use of primary literature is emphasized. Three hour lecture.
Prerequisite(s): BIOL 301 or BIOL 306 or BIOL 357 or BCHM 370 or BIOL 370 or CHEM 370 or CHEM 470 or BCHM 471 or BIOL 471 or CHEM 471

BCHM 430 Bioinorganic Chemistry 3 Credit Hours
This course examines the roles that metals play in biological systems, including the chemical principles that make metal ions well-suited for roles in protein structure, in redox catalysis and in acid base chemistry. The physical and experimental techniques that are applied to explore the structure and function of metals systems will be introduced using case studies from the primary scientific literature in the field. BCHM 370 or its equivalent are strongly recommended but not required.
Prerequisite(s): CHEM 136 and BIOL 140

BCHM 470 Biochemistry I 3 Credit Hours
Life processes from a chemical viewpoint: structure/function relationships of biomolecules with emphasis on proteins, enzyme kinetics, and mechanisms of action. Three hours lecture. (F).
Prerequisite(s): BIOL 130 and BIOL 140 and CHEM 226

BCHM 471 Biochemistry II 3 Credit Hours
Intermediary metabolism, bioenergetics, energy transformation, metabolic interrelationships, biochemical regulation, highly structured subcellular biochemical systems. Three hours lecture. (W).
Prerequisite(s): BCHM 470 or CHEM 470 or BIOL 470

BCHM 472 Biochemistry Laboratory I 1 Credit Hour
The techniques of preparative and analytical biochemistry. Preparation and characterization of proteins and nucleic acids. Physical and chemical properties of proteins and nucleic acids. Four hours laboratory. CHEM 344 Recommended. (F).
Prerequisite(s): (BIOL 470* or BCHM 470* or CHEM 470*) and CHEM 227

BCHM 473 Biochemistry Laboratory II 1 Credit Hour
The techniques of preparative and analytical biochemistry. Preparation and characterization of lipids and carbohydrates. Methods in metabolism. Four hours laboratory. (W).
Prerequisite(s): (BCHM 471* or BIOL 471* or CHEM 471*) and (BCHM 472* or BIOL 472* or CHEM 472*)
Corequisite(s):
BCHM 474  Molecular Biology  4 Credit Hours
This course will emphasize the molecular biology of eukaryotes, and topics will include genome organization and complexity, chromatin structure and function, gene expression, DNA replication and repair, genetic rearrangements, and the molecular biology of development. The laboratory will emphasize the application of recombinant DNA technology to the study of biological problems. Three hours lecture, four hours laboratory. (W).
Prerequisite(s): (BCHM 470 or CHEM 470 or BIOL 470) or (BCHM 370 or BIOL 370 or CHEM 370) and CHEM 227
Corequisite(s): BCHM 474L

BCHM 480  Biochemical Pharmacology  3 Credit Hours
Pharmacology is a study of drugs. In this course, the biochemical and molecular basis of drug action will be emphasized. Different categories of drugs, their use, abuse, and side effects will be presented. Three hours lecture. Permission of instructor. (OC).
Prerequisite(s): CHEM 370 or BCHM 370 or BIOL 370 or BCHM 470 or CHEM 470 or BIOL 470

BCHM 490  Topics in Biochemistry  1 to 3 Credit Hours
A course in special topics that examines research problems of current interest in biochemistry. Topics and format may vary. See current Schedule of Classes. One to three hours seminar. (W).

BCHM 495  Off-Campus Research in Biochem  1 to 3 Credit Hours
Participation in ongoing research at an off-campus laboratory. No more than 6 hours combined from any Natural Science courses numbered 495, 498, and 499 may be credited toward the 120 hours required for a degree. Four to twelve hours laboratory. Permission of concentration advisor. (F,W,S).

BCHM 497  Seminar in Biochemistry  1 Credit Hour
A seminar course that examines research problems of current interest in biochemistry. The course format may include training students to read and present scientific papers, guest lecturers, and lectures by the instructor on a selected topic. One hour seminar. Permission of instructor. (W).
Prerequisite(s): (BCHM 470 or CHEM 470 or BIOL 470) or (BCHM 370 or CHEM 370 or BIOL 370 or CHEM 370 or BIOL 470)

BCHM 498  Directed Reading in Biochem  1 to 3 Credit Hours
Library research in a specific area of biochemistry performed under the direction of a faculty member. No more than six hours combined from departmental courses numbered 495, 498, and 499 may be credited toward the 120 hours required for a degree. Four to twelve hours readings. Permission of instructor. (F,W,S).

BCHM 499  Laboratory Research in Biochem  1 to 3 Credit Hours
Directed laboratory research performed under the supervision of a faculty member. Research training is encouraged. No more than six hours combined from departmental courses numbered 495, 498, and 499 may be credited toward the 120 hours required for graduation. Four to twelve hours laboratory. Permission of instructor. (F,W,S).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally.

Bioengineering (BENG)

BENG 325  Thermofluid for Bioengineering  4 Credit Hours
This course is an introduction into mass and heat transport phenomena in biomedical systems. Basic mechanisms of fluid flow, heat transfer, and diffusion are presented and applied to biological objects (cells, tissues, organisms) and biomedical devices. Topics include mass, momentum, and energy conservation laws, physical properties of common and biological fluids, elements of fluid statics, control volume analysis, basics of fluid mechanics, conduction and convection heat transfer, diffusion, applications to hyper- and hypothermia, thermal ablation, and cryopreservation, basics of mass and heat transfer in the body.
Prerequisite(s): ENGR 216 and ME 230 and (ME 265 or ME 345)
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

BENG 351  Bio-Sensors & Instrumentation  4 Credit Hours
The course covers measurements in biological materials using a variety of sensor technologies along with electronic instrumentation design and use. Safety and FDA requirements are also presented.
Prerequisite(s): ECE 305 and (ENGR 216 or ECE 270) and MATH 216 and BIOL 103 and BIOL 140
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters

BENG 364  Prob&Stat in Bioengineering  3 Credit Hours
Set theory, combinatorial analysis, probability and axioms, random variables, continuous and discrete distribution functions, expectations, Chebyshev’s inequity, weak law of large numbers, central limit theorem, sampling statistics and distributions, point and interval estimation, and linear regression.
Prerequisite(s): MATH 116 or MATH 114 or MPLS with a score of 215
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

BENG 370  Biomechanics I  4 Credit Hours
The course provides a basic understanding of how the human body functions as a mechanical system. Review of mechanics. Musculoskeletal anatomy, statics and kinematics, muscle force redundancy, joint mechanics. Bone and soft tissue mechanics, muscle active force generation. Implant stress shielding and impact safety. Laboratory experiments directed at rehabilitation engineering, biological bone and tissue property measurement, bone and implant structural analysis, and impact safety.
Prerequisite(s): (ME 265 or ME 345) and MATH 216
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters
BENG 375  Biomaterial Tissue Engrg  4 Credit Hours
The course provides a basic understanding of the structure, properties and therapeutic applications of biomaterials, as well as the opportunities and scientific and technological challenges of tissue engineering. It also provides an integrated and multidisciplinary biological-engineering approach and probes mechanisms and methods of evaluation of tissue/biomaterials and patient/device interactions. Further the course assesses current outcomes, current challenges and cutting edge technological solutions to medical problems. Laboratory topics include key biological concepts, clinical safety, tissue culture, biological cells/bioactive materials interaction, and scaffold testing.
Prerequisite(s): ENGR 250 and BIOL 140
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if Level is Undergraduate

BENG 381  Bioprocessing  4 Credit Hours
This course will introduce the students to the field of bioprocessing where the engineering concepts are applied to convert raw materials to pharmaceuticals, chemicals and food using biological processes. Discussions will include application of bioprocess-engineering knowledge in designing, building, controlling, and operating the biologically driven processes. Typical applications include bioreactor design, material collection and scale-up considerations. The course will also introduce the pharmacokinetics and pharmacodynamics analysis concepts to the students and will serve as an introductory course to teach how to use these concepts to design bioprocess-engineering systems. 4 credit hours (3 credit hours of lecture and 1 credit hour of lab).
Prerequisite(s): (ME 325 or BENG 325) and BIOL 140 and CHEM 136
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Engineering and Computer Science

BENG 410  Bioinformatics  3 Credit Hours
This course covers fundamental computer skills for using various bioinformatics tools, querying bioinformatics databases, computational approaches and analysis methods for biological problems, and introduction to various programming languages and toolboxes for bioinformatics, data mining, and data visualization.
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Engineering and Computer Science

BENG 425  Transport in Biosystems  3 Credit Hours
The course introduces transport phenomena in biological and medical systems to students already familiar with basic thermal-fluid sciences. Topics include properties of body fluids and cell membranes, blood flow and solute and oxygen transport in biological systems, basic principles of pharmacokinetic analysis, transport phenomena in medical devices and artificial organs.
Prerequisite(s): ME 375 or BENG 325
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters

BENG 426  Fundamentals of Drug Delivery  3 Credit Hours
This course is designed to provide students with an understanding on the concepts in drug delivery from an engineering perspective. The course will cover drug delivery mechanisms, quantitative understanding of drug transport, nanotechnology, drug delivery devices, toxicity and immune response, FDA regulations, clinical trials and technology transfer. The course will conclude with a design project on nanoparticles development for targeted drug delivery. (F)
Prerequisite(s): BENG 325 and BIOL 140
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Arts, Sciences, and Letters or Engineering and Computer Science

BENG 451  Microfluidics  3 Credit Hours
Microscaled systems and devices have enhanced reaction rates, predictable fluidic mechanics, reduced reagent volumes, and also lowered cost of manufacturing. These advantages benefit many biomedical applications that require sensitive molecular detection in robust and economical devices. In this course, a range of microsystem techniques will be discussed, including those based on Microfluidics, BioMEMS, and Optofluidics. The lectures will meet twice a week, one hour each, and will be accompanied by student-driven design projects that will be conducted in 3-hour laboratories.
Prerequisite(s): (BENG 325 or ME 325) and (BENG 375 or BENG 381)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters

BENG 460  Nanobiosystems Engineering  3 Credit Hours
Nanobiosystems Engineering is an emerging frontier in nanotechnology. It integrates materials science, bioengineering, physics and life science with the biological and biochemical applications. This fast-developing interdisciplinary field holds the promise to solve many of the medical problems of future. The course will introduce advanced concepts related to nanomaterials and nanofabrication and their application in medicine. The course will also focus on design and development of nanodevices for the applications of pharmaceuticals and healthcare. Typical applications include nano-biosensor, targeted drug delivery, and tissue engineering will also be discussed. Students in Bioengineering will have a chance to present and discuss individual application through team project.
Prerequisite(s): (ME 325 or BENG 325) or (ME 349 or BENG 351 and BENG 375)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Engineering and Computer Science
BENG 4671  Senior Design  4 Credit Hours
A guided design project course where student teams propose design
projects, design a device, system or process related to bioengineering
and conduct evaluative experiments and/or construct a physical
prototype. Engineering ethics and responsibility. At the end of the
semester, the students are required to submit written reports and give
oral presentations with a demonstration of their projects
Prerequisite(s): BENG 325 and BENG 351 and BENG 364 and BENG 370
and BENG 375
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
BENG 470  Biomechanics II  3 Credit Hours
The course covers intermediate level subject matter on structural
biomechanics. Topics include bone structure modeling, implant and
fixation materials, analysis and design, ocular biomechanics, and head
impact and injury.
Prerequisite(s): BENG 370
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Engineering and
Computer Science
BENG 475  Regenerative Eng  3 Credit Hours
This course will discuss principles of tissue engineering whereby
the properties of stem as well as primary cells, growth factors, and
extracellular matrix and their impact in the development of engineered
tissue constructs will be explored. In addition, the course will also focus
on supporting/enabling technologies typically utilized in engineering
these constructs including nano- and micro-fabrication techniques, 3D
printing, micro-patterning as well as designing principles of bioreactors,
and drug and gene delivery techniques. Additionally, various tissue
engineering applications will be discussed including synthetic tissues
and organs that are currently under development for regenerative
medicine application.
Prerequisite(s): BENG 370 and BENG 375
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
BENG 481  Biomimetics  3 Credit Hours
The Biomimetic Engineering course will give an overview and in-depth
analysis of nature’s solutions to specific problems with the aim of
determining appropriate engineering analogs. Students will learn
mechanical principles in nature and their application to engineering
devices. Mechanical behavior of biological materials as governed by
underlying microstructure will be discussed. Students will work in teams
on projects where they will take examples of designs, concepts and
models from biology and determine their potential in specific engineering
applications. 3 credit hours
Prerequisite(s): (ME 325 or BENG 325) and (BENG 370 or ME 345)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Engineering and
Computer Science
BENG 490  Directed Design Project  1 to 3 Credit Hours
Design project involving not only design but also analysis, fabrication,
and/or testing. Topics may be chosen from any of the areas of
bioengineering. The student will need to submit a report on his or her
project at the end of the term. (F, S, W)
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
Can enroll if Major is Bioengineering
BENG 492  Guided Study in Bioengineering  1 to 3 Credit Hours
Individual study, design, or laboratory research in a field of interest to the
student. Topics may be chosen from any areas of Bioengineering. The
student needs to submit a report on his or her project at the end of the
term. (F, S, W)
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
Can enroll if Major is Bioengineering

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter
terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Biological Science (BIOL)

BIOL 100  Principles of Biology  3 Credit Hours
A lecture course introducing non-science concentrators to major areas of
biology, including cell biology, genetics, human physiology, plant biology,
ecology, and evolution. Topics of current interest are discussed. Students
cannot use both BIOL 100 and NSCI 120 to satisfy the Natural Sciences
distribution requirements. Three hours lecture. (F,W).

BIOL 103  Anatomy and Physiology I  4 Credit Hours
The structural and functional relationships of the human body at the
cellular, tissue, organ, and system levels are analyzed. Students identify
the major anatomical parts and relate these to the physiological activities
of the circulatory, skeletal, nervous, muscular, and digestive systems.
The homeostatic effects of fluids, electrolytes, and acids and bases
throughout the integrated human body are analyzed. Four hours lecture,
three hours laboratory. (F).
Corequisite(s): BIOL 103L

BIOL 105  Anatomy and Physiology IIA  4 Credit Hours
The major anatomical parts of the cardiovascular, respiratory,
reproductive, endocrine, nervous, and urinary systems of the human body
are identified and related to the physiological activities of these systems.
Emphasis is placed on the homeostatic effects of fluids, electrolytes,
acids, and bases throughout the integrated human body. Four hours
lecture, three hours laboratory. (W)
Prerequisite(s): BIOL 103
Corequisite(s): BIOL 105L
BIOL 130  Intro Org and Environ Biology  0 or 4 Credit Hours
An introduction to organismal and environmental biology, with emphasis on plant and animal diversity, structure, physiology, and development; ecology; and evolution. This course complements BIOL 140, which need not be taken as a prerequisite; together they constitute an introduction to biology. This course is intended for science concentrators. Three hours lecture, four hours laboratory/recitation. (F,W,S).
Corequisite(s): BIOL 130L

BIOL 140  Intro Molec & Cellular Biology  4 Credit Hours
An introduction to molecular and cellular aspects of biology with emphasis on cell structure and function, biochemistry, genetics, cell growth, and the origin of life. This course complements BIOL 130; together they constitute an introduction to biology. This course is intended for science concentrators. Three hours lecture, four hours laboratory/recitation.
Prerequisite(s): CHEM 134* or CHEM 144*
Corequisite(s): BIOL 140L

BIOL 240  Great Experiments in Biology  3 Credit Hours
An individualized-learning course that portrays the development of modern biological science. The course does not require attendance in classes since it can be completed at home and in the library by means of study guides, audio cassettes, slide/tape presentations, and computer-assisted instruction. (F,W,S).

BIOL 242  Great Experiments Laboratory  1 Credit Hour
An individualized-learning laboratory science course that can be completed at home. Historically important and model experiments are performed in order to demonstrate how hypotheses are drawn and tested. Data are analyzed at a computer terminal. (F,W,S).
Prerequisite(s): BIOL 240*

BIOL 290  Topics in Biology and Society  3 Credit Hours
An introduction to themes of biology reflecting the interaction between biology and society. Topics vary and are announced in the current Schedule of Classes. The course may be repeated no more than once under a different topic. Three hours lecture. (OC).

BIOL 291  Biology and Society Laboratory  1 Credit Hour
A laboratory course to accompany BIOL 290. Three hours laboratory. (OC).
Corequisite(s): BIOL 290

BIOL 301  Cell Biology  4 Credit Hours
Functional and structural features of cells, organelles, and macromolecules. Topics in biochemistry, and physical chemistry of cellular processes are considered. Three hours lecture, four hours laboratory. CHEM 226 is recommended. (W).
Prerequisite(s): BIOL 140
Corequisite(s): BIOL 301L

BIOL 303  Comparative Animal Physiology  4 Credit Hours
Physiological processes and their control in higher animals. Emphasis ranges from the cellular mechanisms and systemic patterns of regulation of body functions to the evolutionary and environmental adaptations determining body form and function in diverse animal types. Three hours lecture, four hours laboratory. MATH 114 is recommended. (F).
Prerequisite(s): BIOL 130 and BIOL 140 and (CHEM 124 or CHEM 134 or CHEM 144)
Corequisite(s): BIOL 303L

BIOL 304  Ecology  4 Credit Hours
Relationships between organisms and their environments. Patterns in the physical environment, physiological and behavioral adaptations, population dynamics, energy flow, nutrient cycling; succession. Three hours lecture, four hours laboratory (with field trips). (F, S).
Prerequisite(s): BIOL 130 and (MATH 104 or MATH 105 or MATH 113 or MATH 115 or MPLS with a score of 116)
Corequisite(s): BIOL 304L

BIOL 305  Anatomy and Physiology IIB  4 Credit Hours
The major anatomical parts of the cardiovascular, respiratory, reproductive, endocrine, nervous, and urinary systems of the human body are identified and related to the physiological activities of these systems. Emphasis is placed on the homeostatic effects of fluids, electrolytes, acids, and bases throughout the integrated human body. Students complete additional work beyond what is required in BIOL 105. Four hours lecture, three hours laboratory.
Prerequisite(s): BIOL 103
Corequisite(s): BIOL 305L

BIOL 306  General Genetics  3 Credit Hours
An intermediate course in classical, molecular and evolutionary genetics. The structure, function, and inheritance of genetic material in prokaryotes, eukaryotes and viruses are discussed. Topics include DNA and chromosome structure, genetic linkage and mapping, gene expression and its regulation, human genetic disease, and population genetics. Three hours lecture, one hour recitation. (F).
Prerequisite(s): BIOL 130 and BIOL 140
Corequisite(s): BIOL 306R

BIOL 306R  General Genetics Recitation  0 Credit Hours
Recitation component of BIOL 306. Must be taken concurrently with BIOL 306.
Corequisite(s): BIOL 306

BIOL 307  General Genetics Laboratory  1 Credit Hour
A semester-long laboratory course dealing with investigation and analysis in genetics. Laboratory sessions will include genetic crosses of plants and animals and the subsequent analysis to determine linkage and gene mapping location. Computer exercises will also be used to establish genetic tools for modern molecular analysis. Four hours laboratory. (W).
Prerequisite(s): BIOL 306*
Corequisite(s): BIOL 307

BIOL 309  Introduction to Mycology  4 Credit Hours
An introduction to the biology of the fungi. Classification, structure, industrial use, gastronomic qualities, and disease-producing ability of macroscopic and microscopic forms are studied. Laboratories include microscopic and macroscopic examinations of fungi and their growth and field studies on the occurrence and classification of edible and poisonous varieties. Three hours lecture, four hours laboratory. (OC).
Prerequisite(s): BIOL 130 and BIOL 140

BIOL 310  Histology  4 Credit Hours
Descriptive approaches to the study of the microscopic anatomy of animal tissue. The course emphasizes the study of cell and tissue types, selected organs and the interpretation of electron micrographs. Three hours lecture, four hours laboratory. (AY, F).
Prerequisite(s): BIOL 130 and BIOL 140
Corequisite(s): BIOL 310L
BIOL 311  Embryology  4 Credit Hours
Descriptive and experimental approaches to a comparative study of reproduction, morphogenesis, and growth. Emphasis is placed on the vertebrates, but some attention is focused on the development of invertebrates and plants. Three hours lecture, four hours laboratory. (AY, W).
Prerequisite(s): BIOL 130 and BIOL 140
Corequisite(s): BIOL 311L

BIOL 313  Plant Taxonomy and Systematics  4 Credit Hours
Characteristics, distribution, and relationships of plants with special reference to the local Michigan flora. Three hours lecture, four hours laboratory (including field work) per week. (OC).
Prerequisite(s): BIOL 130

BIOL 315  Aquatic Ecosystems  4 Credit Hours
An introduction to the physical, chemical, and biological characteristics of lakes, rivers, and wetlands emphasizing a comparison of ecosystem structure and function. Laboratory emphasizes data collection and analysis to characterize a representative lake, river, and wetland. Lecture and laboratory. (AY, F).
Prerequisite(s): BIOL 130 and (CHEM 124 or GEOG 118)

BIOL 320  Field Biology  4 Credit Hours
Adaptations, taxonomy, systematics, ecology, and behavior of southeastern Michigan flora and fauna. Techniques of field observation and recording are emphasized. Skills in the use of identification keys and guides are developed. The campus Environmental Study Area is used intensively. Three hours lecture, four hours laboratory (with field trips). (S).
Prerequisite(s): BIOL 101 or BIOL 130 or NSCI 120 or NSCI 233

BIOL 324  Invertebrate Zoology  4 Credit Hours
This course introduces students to the diversity of invertebrate animals from a functional evolutionary perspective. The lecture will focus on the unique aspects of the morphology, physiology, and ecology of major phyla in light of the selective forces that have favored their evolution, as well as consider the intersection of invertebrates and humans. Through dissection, prepared slides and field observations, the laboratory will introduce the diversity of invertebrate phyla and subgroups, with emphasis on form and function.
Prerequisite(s): BIOL 130

BIOL 333  Plant Biology  4 Credit Hours
A thorough survey of the evolutionary trends in plant reproduction and morphology will be considered. This survey will extend into the field of plant anatomy, but not plant physiology, which is covered in a separate course. Major groups to be studied include: bacteria, algae, fungi, liverworts, lichens, mosses, ferns, and seed plants. Certain less familiar groups will also be emphasized. Plant diversity will be examined from the perspective of its import to civilizations of the past and future. Three hours lecture, four hours laboratory. (F, S).
Prerequisite(s): BIOL 130
Corequisite(s): BIOL 333L

BIOL 335  Plant Physiology  4 Credit Hours
This course focuses on different aspects of the relationship between plants and their environment. Topics include: a) interactions of plants with the physical environment; b) ways in which the environment acts to shape plant populations through evolution; c) intra- and interspecific interactions among individuals; and d) large-scale patterns and processes at the landscape-level. Three hours lecture.
Prerequisite(s): BIOL 130

BIOL 350  Introduction to Neurobiology  4 Credit Hours
An introduction to nervous systems and how they function. This course includes the cellular physiology and anatomy of nervous systems in vertebrates and invertebrates, and how these cellular activities are integrated into systems to produce complex, coordinated behavior. Three hours lecture. (W).
Prerequisite(s): BIOL 130 and BIOL 140
Corequisite(s): BIOL 350L

BIOL 352  Endocrinology  3 Credit Hours
This class will provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiology (function) of specific endocrine systems. Interactions between organ systems will also be emphasized. Specific sections of the course will focus on function of the endocrine system during stress, fluid balance, metabolism (including calcium, glucose, lipid, and proteins), reproductive growth, development, and aging.
Prerequisite(s): BIOL 140 and BIOL 130 and CHEM 134

BIOL 353  Ornithology  3 Credit Hours
A study of the unique features of birds as representatives of vertebrates, including their morphology, anatomy, physiology, physics of flight, mating systems, social structure, vocalizations, orientation and migration, origin and evolution, growth and development, and issues in avian conservation. Students learn about the current research on bird migration at the Rouge River Bird Observatory on campus. Students develop individual species analysis of life and natural histories. Three hours lecture.
Prerequisite(s): BIOL 130

BIOL 357  Human Physiology  3 Credit Hours
Systems of the human body and their function are investigated individually and as part of an integrated natural living system. Topics include cell structure and function of nerves, muscles, the lungs, heart, blood vessels, kidneys, digestive tract, endocrine glands, brain, and reproductive organs.
Prerequisite(s): (BIOL 130 and BIOL 140) or (BIOL 103 and BIOL 105)

BIOL 360  Process Genetcs & Evolutn  3 Credit Hours
Prerequisite(s): BIOL 130 and BIOL 140 and (MATH 104 or MATH 105 or MATH 113 or MPLS with a score of 116) or MATH 115

BIOL 361  Population Genetics & Evol Lab  1 Credit Hour
A laboratory course to accompany BIOL 360. Four hours laboratory. (OC).
Prerequisite(s): BIOL 360
BIOL 370  Principles of Biochemistry  3 Credit Hours
A concise but comprehensive survey of various areas of biochemistry designed for non-biochemistry majors. The course follows the standard approach to the subject including a description of cells, their structure and constituent macromolecules (proteins, nucleic acids, carbohydrates and lipids), enzymology, bioenergetics, intermediary metabolism and gene regulation. Students cannot take both BCHM 370 and 470 or 471 for any combination of concentration, cognate or minor requirement. Three hours lecture. (F).
Prerequisite(s): BIOL 140 and CHEM 226

BIOL 380  Epidemiology  2 Credit Hours
A study of disease occurrence and spread in human populations. The primary concern is with groups of persons, rather than individuals. Emphasizes methods of study that would contribute to understanding disease etiology. Two hours lecture. BIOL 301 and 385 are recommended. (OC).
Prerequisite(s): BIOL 140

BIOL 381  Biotechnology & Bioprocessing  4 Credit Hours
Biotechnology and Bioprocessing class is centered on the study of bioengineering applications found today in the medical and agricultural industries. Students use microorganisms, plant and animal tissue culture, and enzymes during the laboratory period, practicing the fundamentals of ?hands-on? genetic engineering and material processing. Students establish and purify proteins from recombinant organisms. Besides technology, ethical and environmental concerns are discussed in the lecture. Three hours lecture, four hours laboratory.
Prerequisite(s): BIOL 140

BIOL 385  Microbiology  4 Credit Hours
The biology of microorganisms is considered through study of the properties of bacteria, fungi, algae, protozoa, and viruses. Microbial structures are discussed and correlated with their function. Aspects of cellular metabolism pertinent to microorganisms are emphasized. The interaction of microorganisms and their environment, animate and inanimate, is discussed with respect to the beneficial or harmful effects of the different microbial groups. Laboratory exercises introduce the student to basic, practical microbiological techniques and illustrate various principles of microbial life. Three hours lecture, four hours laboratory. (F, S).
Prerequisite(s): BIOL 130 and BIOL 140
Corequisite(s): BIOL 385L

BIOL 390  Topics in Biology  1 to 4 Credit Hours
Examination of problems and issues in selected areas of biology. Title in Schedule of Classes changes according to content. This course may be repeated for credit when specific topics differ. Permission of Instructor. (OC).

BIOL 402  Physiology of Excitable Cells  3 Credit Hours
An in-depth analysis of the mechanisms underlying electrical communication within and between mammalian cells. The major emphasis is on excitable cells in the brain, heart, and skeletal muscle and their functional integration. Fulfills the Biology major capstone requirement.
Prerequisite(s): BIOL 130 and BIOL 140 and (BIOL 303 or BIOL 305 or BIOL 350)

BIOL 404  Mech. Chronic Human Disease  3 Credit Hours
This course focuses on the biochemical, molecular and cellular mechanisms underlying the progression of chronic diseases, such as diabetes mellitus and atherosclerosis. Techniques in epidemiology, pathology, genetics, molecular biology, and biochemistry are used to understand how relevant physiological processes become pathological. The examination of chronic diseases provides an opportunity to understand biological processes across many scales of life, from extracellular matrix proteins to cells in blood vessel walls to risk factors in patient populations to the pharmacology of treatments. Use of primary literature is emphasized. Three hour lecture.
Prerequisite(s): BIOL 301 or BIOL 306 or BIOL 357 or BCHM 370 or BCHM 370 or CHEM 471 or BIOL 471 or CHEM 471

BIOL 405  Applied & Environ Microbiology  4 Credit Hours
The study of the diversity, structure and function of microorganisms as they interact with their environment. Emphasis will be placed on soil microbiology (fungi, bacteria, microalgae) and plant-microbe interactions (pathogens, symbioses). Ecological topics include decomposition, nutrient cycling, bioremediation and agroecosystems. Three hours lecture, four hours laboratory. (W).
Prerequisite(s): BIOL 385 or MICR 385
Corequisite(s):

BIOL 406  Microbial Genetics  3 Credit Hours
This molecular genetics course emphasizes bacteria and viruses. Topics include chromosome structure and replication, recombination, DNA repair, genetic mapping, mechanisms of gene transfer, regulation of gene expression, and mutagenesis. Three hours lecture. (W, YR)
Prerequisite(s): MICR 385 or BIOL 385
Corequisite(s):

BIOL 410  Diversity Issues Health Care  3 Credit Hours
This course will address the effect of race, age, gender, religion, and economic status on medical research and health care. Through an examination of clinical trials and case studies, students will learn how medical research is performed in the United States, and what health care treatments and options for patients are available. Medical treatment and disease topics will be selected and will be evaluated as to how they are influenced by the criteria listed. The examples will focus on both cultural differences and inequity, in national and global settings. (AY).
Prerequisite(s): BIOL 130 and BIOL 140
Restriction(s):
Can enroll if Class is Junior or Senior

BIOL 412  Vertebrates  5 Credit Hours
A comparative study of the morphology of living animals, including an analysis of structural and functional features, diversity, and macroevolution. The major emphasis is on the comparative functional anatomy of living vertebrates. Three hours lecture, eight hours laboratory. Fulfills the biology major capstone requirement. This course was formerly offered as 312; students cannot receive credit for both BIO 312 and 412. (W, AY)
Prerequisite(s): (BIOL 303 or BIOL 305 or BIOL 335) or BIOL 360

BIOL 414  Limnology  4 Credit Hours
The study of the structural and functional relationships and productivity of organisms in lakes and streams as they are regulated by their physical, chemical and biotic environments. Laboratories will emphasize field study of area lakes and streams. Three hours lecture, four hours laboratory. BIOL/ESCI 304 or ESCI 275 recommended.
Prerequisite(s): BIOL 130 and (CHEM 136 or CHEM 146)
Corequisite(s): BIOL 414L
BIOL 416  Stream Ecology   4 Credit Hours  
A study of the physical, chemical and biological characteristics of streams and rivers. Three hours lecture, four hours laboratory. (OC).
Prerequisite(s): BIOL 304

BIOL 419  Behavior and Evolution   3 Credit Hours  
An in depth examination of how evolutionary processes shape behavior, focusing on the influence of natural, sexual, and kin selection. Topics include behavioral genetics, natural selection, sexual selection, kin selection, optimality, game theory, evolutionary stable strategies, phylogenetics, and the comparative method.
Prerequisite(s): BIOL 140 and BIOL 130
Restriction(s):  
Can enroll if Level is Undergraduate

BIOL 420  Advanced Field Ecology   4 Credit Hours  
An intense study of behavioral ecology and field-oriented research at an advanced level, utilizing ecological habitats on campus and in surrounding urban areas. Focus will be on plant/animal interactions and will include pollination ecology, reproduction and distribution ecology, optimal foraging theory, and the role of animal migration and distribution of species in extreme urban environments. Three hours lecture, four hours laboratory. (OC).
Prerequisite(s): BIOL 304 or BIOL 320

BIOL 422  Conservation Biology   3 Credit Hours  
This course is a study of the historical and current preservation of global biodiversity. The value of biodiversity, extinction, threats to biodiversity, and both ex situ and in situ conservation strategies are considered. (W, AY)
Prerequisite(s): BIOL 304 or ESCI 304
Restriction(s):  
Can enroll if Level is Undergraduate

BIOL 424  Biology of Spiders   4 Credit Hours  
An introduction to the biology of spiders and related arachnids. Lectures include spider anatomy, natural history, ecology, and evolution. Laboratory work includes specimen preparation, use of dichotomous keys, spider behavior, field methods, rearing and collecting techniques, and identification of spiders and their webs. Three hours lecture, four hours laboratory. Students cannot receive credit for both Biology 424 and Biology 524.
Prerequisite(s): BIOL 130
Restriction(s):  
Cannot enroll if Class is Graduate

BIOL 430  Medical Virology   3 Credit Hours  
A general description of the history and nature of animal virus disease. Emphasis is placed on the pathogenesis and clinical description of specific diseases.
Prerequisite(s): BIOL 385 or MICR 385

BIOL 440  Micro Genetics & Physi Lab   1 Credit Hour  
This course emphasizes the use of advanced microbiological techniques for understanding the genetics and physiology of microorganisms. Experiments focus on the understanding of general microbial phenomena, such as nutrition, metabolism and biochemistry; protein and nucleic acid synthesis; energy generation, enzyme regulation, membrane transport, motility, differentiation, cellular communication and the behavior of populations.
Prerequisite(s): BIOL 385* or MICR 385* or BIOL 301* or BIOL 406* or MICR 406* or BIOL 485* or MICR 485*
Restriction(s):  
Cannot enroll if Class is Freshman  
Can enroll if Level is Undergraduate

BIOL 450  Virology   4 Credit Hours  
The first half of this course deals with bacterial viruses, with emphasis on classical events in this field. The second half surveys the field of animal viruses, with emphasis on recent discoveries, including replication, pathogenesis, and viral association with cancers. Three hours lecture, four hours laboratory. (AY,W).
Prerequisite(s): CHEM 226 and (MICR 385 or BIOL 385)

BIOL 452  Med & Env Toxicology   4 Credit Hours  
Emphasis is on the toxicity, toxicokinetics and toxicodynamics of environmental toxicants to human pathophysiology. Examples are based on toxicant exposure and subsequent diseases in humans and other biological systems. Three hours lecture, four hours laboratory. (W)
Prerequisite(s): BIOL 140 and CHEM 225 and (BIOL 370 or BIOL 470 or BIOL 301)
Restriction(s):  
Can enroll if Class is Junior or Senior  
Can enroll if Level is Undergraduate

BIOL 455  Immunology   4 Credit Hours  
A detailed study of the field of immunology. Among the topics covered are various aspects of the immunological response, such as humoral or cell-mediated immunity, cell-cell interactions, and immunology as related to the cause and prevention of disease. Three hours lecture, four hours laboratory. (AY,F).
Prerequisite(s): BIOL 385 or BIOL 301 or MICR 385

BIOL 456  Behavioral Biology   4 Credit Hours  
This course uses evolutionary and ecological theory to evaluate behavioral adaptations of organisms to their environment. Topics discussed include game theory, kin selection, sexual selection, eusociality, orientation and navigation, and signal evolution. Laboratory sessions include: observations of animal behavior, required manipulations of live animals, and field trips. Three hours of lecture, one four-hour laboratory. Students cannot receive credit for both BIOL 456 and BIOL 556. Student seeking graduate credit should elect BIOL 556.
Prerequisite(s): BIOL 130
Corequisite(s):  
Restriction(s):  
Cannot enroll if Class is Specialist or Graduate or Doctorate

BIOL 459  Pathogenic Microbiology   4 Credit Hours  
An introduction to pathogenic microorganisms and mechanisms of microbial pathogenicity. Disease-causing bacteria, fungi, viruses, and protozoa are studied. Laboratories emphasize clinical approaches to isolation, identification, and treatment. Three hours lecture, four hours laboratory. (AY,F).
Prerequisite(s): BIOL 385 or MICR 385

BIOL 470  Biochemistry I   3 Credit Hours  
Life processes from a chemical viewpoint: structure/function relationships of biomolecules with emphasis on proteins, enzyme kinetics, and mechanisms of action. Three hours lecture. (F).
Prerequisite(s): BIOL 130 and BIOL 140 and CHEM 226

BIOL 471  Biochemistry II   3 Credit Hours  
Intermediary metabolism, bioenergetics, energy transformation, metabolic interrelationships, biochemical regulation, highly structured subcellular biochemical systems. Three hours lecture. (W).
Prerequisite(s): BCHM 470 or BIOL 470 or CHEM 470
BIOL 472  Biochemistry Lab I  1 Credit Hour
The techniques of preparative and analytical biochemistry. Preparation and characterization of proteins and nucleic acids. Physical and chemical properties of proteins and nucleic acids. Four hours laboratory. CHEM 344 Recommended. (F).
Prerequisite(s): (BIOL 470* or BCHM 470* or CHEM 470*) and CHEM 227

BIOL 473  Biochemistry Laboratory II  1 Credit Hour
The techniques of preparative and analytical biochemistry. Preparation and characterization of lipids and carbohydrates. Methods in metabolism. Four hours laboratory. (W).
Prerequisite(s): (BCHM 471* or BIOL 471* or CHEM 471*) and (BCHM 472 or BIOL 472 or CHEM 472)
Corequisite(s):

BIOL 474  Molecular Biology  4 Credit Hours
This course will emphasize the molecular biology of eukaryotes, and topics will include genome organization and complexity, chromatin structure and function, gene expression, DNA replication and repair, genetic rearrangements, and the molecular biology of development. The laboratory will emphasize the application of recombinant DNA technology to the study of biological problems. Three hours lecture, four hours laboratory. (W).
Prerequisite(s): (BCHM 470 or BIOL 470 or CHEM 470) or (BCHM 370 or BIOL 370 or CHEM 370) and CHEM 227

BIOL 476  Cancer Cell Biology  3 Credit Hours
Cancer is a disease of anti-social cell behavior. This course educates students on the genetics, molecular and cellular changes that normal cells undergo to become cancer cell. Major emphasis is on providing a mechanistic insight into fundamental questions in cancer cell biology. The course also discusses currently available therapeutic treatments and emerging issues in cancer therapy research. Fulfills capstone requirement for biology majors. Three hours lecture.
Prerequisite(s): BIOL 130 and BIOL 140 and (BIOL 301 or BIOL 306 or BIOL 370 or BCHM 370 or CHEM 370 or BIOL 385 or MICR 385)

BIOL 485  Physiology of Micro-organisms  3 Credit Hours
An in-depth examination of the physiology of microorganisms. Areas of emphasis include the growth and nutrition of microorganisms, the development of viruses, the microbial degradation of organic compounds, the regulation of degradation reactions, and the biosynthesis of uniquely microbial compounds and secondary metabolites, such as antibiotics and toxins. Consideration is given to the natural environments of specific microorganisms. Three hours lecture. (W, YR)
Prerequisite(s): (BIOL 385 or MICR 385 or BIOL 370* or CHEM 370 or BCHM 370) and CHEM 225*

BIOL 489  Origins of Biological Sciences  3 to 4 Credit Hours
A study of the development of the science of biology as revealed in the writing and experiments of major biologists of the past and present. (OC).

BIOL 490  Sem in Biology/Microbiology  1 to 6 Credit Hours
Directed research on a problem culminating in the preparation of a paper and presentation of a public seminar. Tutorials, lectures and student seminars are given on selection and formulation of research problems, experimental design, and statistical treatment of data. May be repeated for credit with permission of advisor. (OC).

BIOL 491  Capstone Course in Biology  3 Credit Hours
A culminating course for biology majors which focuses on an area of current biological research and integrates material from different subdisciplines of biology. Topic varies and is announced in the Schedule of Classes. Three hours lecture.
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is Biological Sciences

BIOL 492  Capstone Research Experience  3 Credit Hours
An approved research experience with a UM-D biology faculty member which integrates material from different subdisciplines of biology. Research results are reported in a poster or seminar presentation or in a manuscript submitted for publication.
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is Biological Sciences

BIOL 493  Capstone Teaching Experience  3 Credit Hours
An approved teaching experience which integrates material from different subdisciplines of biology. Students work as a student teaching assistant/student mentor in the laboratory portion of a biology course.
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is Biological Sciences

BIOL 494L  Off-Campus Research Participat  1 to 3 Credit Hours
Participation in ongoing experimental research at an off-campus laboratory (or in the field). Arrangements made between the off-campus researcher, the student, and the Biology concentration advisor. No more than six credit hours combined from BIOL 490, 495, 498, and 499 may be counted toward the 120 hours required for a degree. Four to twelve hours laboratory. Permission of instructor. (F,S).

BIOL 494M  Seminar in Biology  1 Credit Hour
Topics of current interest in Biology will be presented by guest lecturers, faculty members or students. Topics chosen will vary from term to term. Can be elected up to three times. One hour seminar. (W).

BIOL 496  Independent Study in Biology  1 to 3 Credit Hours
Library research and independent study performed under the guidance of a faculty member. Four to twelve hours readings. Permission of instructor. (F,S).

BIOL 498  Laboratory in Biological Resrh  1 to 3 Credit Hours
Directed laboratory research performed under the guidance of faculty member. Four to twelve hours laboratory. Permission of Instructor. (F,S).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
**Business Administration (BA)**

**BA 100  College of Business Foundation  1 Credit Hour**

Business Foundations provides an introduction to a variety of topics critical to student success. Topics presented in this class include an overview of the Bachelor of Business Administration, on-campus resources available to ensure student success, academic advising, internships, student organizations, business communication, team membership, and academic integrity.

Restriction(s):
- Can enroll if Class is Freshman or Sophomore or Junior

**BA 210  Intro to Applied Creativity  3 Credit Hours**

This is a course designed for undergraduate students that is aimed at improving their understanding of creativity and creativity problem solving. In addition, students will develop skills and learn methodologies, useful in a variety of contexts, to enhance personal and organizational creativity. Topics include: exploring the need for creativity, identifying specific creative challenges, methodologies to enhance personal and organizational creativity, and applying creativity to daily situations.

Restriction(s):
- Can enroll if Class is Sophomore or Junior or Senior

**BA 300  Career Planning & Develop  3 Credit Hours**

This course focuses on providing students with the necessary skills to achieve their career goals. Topics include: laying the groundwork to selecting a career, developing job search correspondence, developing job search techniques, developing a networking strategy, developing interviewing skills, asking for references and recommendations, and evaluating and negotiating job offers. Students will be required to develop a job skills portfolio which will include documentation evidencing the application of these skills.

Restriction(s):
- Can enroll if Class is Sophomore or Junior or Senior
- Can enroll if Level is Undergraduate
- Can enroll if College is Business

**BA 305  College to Career Coaching  0 Credit Hours**

This course focuses on providing students with an ongoing process to help them develop and apply the skills and knowledge necessary to achieve their career goals. Through this course, eligible BBA students in the College of Business will have the opportunity to work, one on one, with an experienced career coach to enable them to successfully launch their career strategy upon graduation from the BBA program. Coaches actively partner with our students in a thought provoking and creative process that inspires them to maximize their personal and professional potential that helps bridge the gap between classroom knowledge and the realities of the business world.

Prerequisite(s): BA 300 or BI 350 or BI 355

Restriction(s):
- Can enroll if Level is Undergraduate
- Can enroll if College is Business
- Cannot enroll if Major is Prebusiness

**BA 320  Proj Mgmt & Leadership Skills  3 Credit Hours**

This course is intended to be a writing intensive problem based interdisciplinary course in project management skills. Topics covered will include benefits of project management, definition of a project, development of a project plan, execution of a plan, and management of change. Leadership skills will be emphasized as they relate to conflict resolution, motivating and coaching team members and listening to team members. Students will complete and present a project plan using the appropriate project management and presentation software.

Restriction(s):
- Can enroll if Class is Junior or Senior

**BA 330  Managerial Communication  3 Credit Hours**

This course is designed to improve the student's ability to communicate effectively within an organizational setting. Communication theory, strategies, techniques and skills that are essential for success in the business environment will be examined. Specific objectives during the semester will be to examine and improve managerial writing ability and to enhance interpersonal communication skills.

Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

Restriction(s):
- Can enroll if Class is Junior or Senior

**BA 400  Corporate Responsibility  3 Credit Hours**

The focus of this writing intensive interdisciplinary course will be on examining the responsibility, if any, that business should have as part of the solution to the challenges of globalization. As part of this examination, the course will focus on corporate responsible behavior and its relationship to corporate governance and maximizing shareholder value. The ethical, business, and legal cases as they relate to corporate responsible behavior in the areas of human rights, labor, environment, and corruption will be examined.

Prerequisite(s): COMP 280 or COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40

Restriction(s):
- Cannot enroll if Class is Freshman or Sophomore or Junior
- Cannot enroll if Level is Graduate

**BA 480  Seminar: Bus Administration  1 to 3 Credit Hours**

To provide students with an opportunity for intensive study in current selected areas related to the research activities and/or professional activities of faculty members.

Restriction(s):
- Can enroll if Class is Senior

**BA 480A  Seminar: Bus Administration  3 Credit Hours**

Topic: Business Planning. This course aims to be a multidisciplinary seminar that requires students to explore a potentially profitable business idea and to develop an appropriate business plan as a document increasingly adopted for the submission and evaluation of business proposals. The interactive business laboratory will lead students from the assessment of their business idea to the definition of a detailed market research and the description of a trustable strategic planning. Finally, students will be also required to devise an accurate budget and a basic pro-forma financial statement in order to give accounting consistency to the business idea described in the first part of their business plans. Topics covered include: market analysis, strategic planning and organizational structure, cost definition & analysis, break-even point, budgeting and performance representation. (OC)
BA 480D  Entre& Comm: Doing Bus in Det  3 Credit Hours
This entrepreneurship class addresses innovation, creativity, and the commercialization process to explore the implementation and feasibility of new business ideas. Topics include opportunity recognition, creativity and design thinking, market assessment, strategic and financial planning. Students will be exposed to resources from urban areas including speakers with experience and expertise in the entrepreneurial community. Students will use events and organizations like Detroit SOUP or Start Garden to understand urban business needs and idea generation. From there they will work in teams developing an understanding of creative thinking, innovation, market assessment and effective communication of business and commercialization opportunities while taking a business idea through an iterative process toward market realization.
Restriction(s):
Can enroll if College is Business

BA 490  Research: Bus Administration  1 to 3 Credit Hours
To provide the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to registration in the term when such a course is to be elected, an interested student must submit to the dean of the school a written request for permission to elect a research course, on a form available in the school office. The request will include a description of the proposed research project. The dean will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit.
Restriction(s):
Can enroll if Class is Junior or Senior

BE 401  Managerial Economics  3 Credit Hours
This intermediate level course presents price theory with business applications. Topics include consumption utility theory, production and cost theory, market structures and pricing strategies. Statistical estimation techniques of economic models are presented as well as modern elaborations of price theory. (YR).
Prerequisite(s): ECON 202 and ECON 201 and (MATH 104* or MATH 113* or MATH 105*) or MATH 115* or MPLS with a score of 115
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

BE 403  Business Conditions Analysis  3 Credit Hours
This course prepares business students to evaluate domestic and global economic conditions, including the influences that business conditions abroad have on conditions here in the United States and how financial market conditions and crises influence the business environment. The course focuses on how decision makers in business can use an understanding of the economic environment to make better decisions.
Prerequisite(s): ECON 201

BE 487  Seminar: Business Economics  1 to 3 Credit Hours
To provide students with an opportunity for intensive study in current selected areas related to the research activities and/or professional activities of faculty members. Permission of College of Business.
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

BE 497  Research: Business Economics  1 to 3 Credit Hours
To provide the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to registration in the term when such a course is to be elected, an interested student must submit to the dean of the school a written request for permission to elect a research course, on a form available in the school office. The request will include a description of the proposed research project. The dean will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit. Permission of College of Business.
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

* An asterisk denotes that a course may be taken concurrently.

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Business Economics (BE)

BA 300

Business Internship (BI)

BI 350  Business Internship  3 Credit Hours
The internship provides full-time, paid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session with the internship staff.
Prerequisite(s): BA 300
Restriction(s):
Can enroll if College is Business

BI 355  Part-Time Business Internship  1 Credit Hour
The internship provides part-time, paid and unpaid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session within the internship staff. (A maximum of 6 credit hours of internship course work may be applied toward elective graduation requirements.)
Prerequisite(s): BA 300
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Degree is Bachelor of Business Admin
Can enroll if College is Business
Prerequisite(s): BA 300
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if Degree is Bachelor of Business Admin
Can enroll if College is Business

BI 450 Business Internship II 3 Credit Hours
The internship provides full-time, paid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session with the internship staff. (A maximum of 6 credit hours of internship course work may be applied toward elective graduation requirements.)
Prerequisite(s): BI 350

BI 455 Part-Time Bus Internship II 1 Credit Hour
The internship provides part-time, paid and unpaid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session with the internship staff. (A maximum of 6 credit hours of internship course work may be applied toward elective graduation requirements.)
Prerequisite(s): BI 350

BI 460 International Business Intern 1 to 3 Credit Hours
The internship allows flexibility to engage in applied practical work experience outside of the United States, through paid or unpaid and full or part time work experiences. Participating organizations hire students within parameters set by the Internship Office throughout their experience. Students are required to submit reports, evaluation documents and participate in an assessment session with the internship staff. Students are responsible for their own legal, housing and transportation issues. This course will satisfy general elective credit.
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Degree is Bachelor of Business Admin

BI 470 Business Internship III 3 Credit Hours
The internship provides full-time paid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students will have an increasing level of responsibility and application of academic knowledge, or students will be involved with application of new academic knowledge. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session with the internship staff.
Prerequisite(s): BI 450
Restriction(s):
Can enroll if College is Business
Cannot enroll if Major is Prebusiness

BI 475 Part-Time Bus Internship III 1 Credit Hour
The internship provides part-time paid and unpaid business experience for students in a formal, monitored program. Participating employers hire students within parameters set by the internship program. Students will have an increasing level of responsibility and application of academic knowledge, or students will be involved with application of new academic knowledge. Students are required to submit a report and other paperwork at the end of each work assignment and participate in an evaluative session within the internship staff. (A maximum of 6 credit hours of internship course work may be applied toward elective graduation requirements.)
Prerequisite(s): BI 455
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Degree is Bachelor of Business Admin

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Business Policy and Strategy (BPS)

BPS 451 Strategic Management 3 Credit Hours
This course is intended to be a comprehensive and integrative capstone course for the undergraduate business student. The central focus of this course is strategic management as opposed to the functional orientation that the student has experienced in most of his/her previous courses. Emphasis is on strategy formulation and implementation. Topics covered include the analysis of a company's external and internal environment; the development of a strategic vision and organizational objectives; the design of strategy at the functional, business, corporate, and international levels; and the creation of the organizational structure, operational policies and procedures, and reward systems.
Prerequisite(s): FIN 401 and (MIS 310 or ITM 310 or ACC 380) and OB 354 and MKT 352 and OM 300
Restriction(s):
Can enroll if Class is Senior
Can enroll if Degree is Bachelor of Business Admin

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Chemistry (CHEM)

CHEM 090 Introduction to Chemistry 3 Credit Hours
An introductory course in chemistry stressing fundamental principles of chemistry and the application of mathematics to chemistry and problem-solving. Topics will include chemical formulas and equations, stoichiometry, descriptive inorganic chemistry, behavior of gases and atomic structure. Students with high school chemistry and three years of high school mathematics should elect CHEM 114. Three hours lecture. (F).
CHEM 091  Introduction to Chemistry II  3 Credit Hours
The course is designed for the Chemistry 134/144 student whose background in chemistry is inadequate for success in 134/144. This course will be offered concurrently with Chem 090 (Introduction to Chemistry). It will begin after the first Chem 134/144 exam and will encompass the final nine weeks of the term. Topics will include chemical formulas and equations, stoichiometry, descriptive inorganic chemistry, behavior of gases, and atomic structure.

CHEM 100  Chemistry and Society  0 or 4 Credit Hours
An introductory course for nonscientists that examines the way chemistry impacts our world. The course will focus not only on what modern chemistry has accomplished, but more generally on the way scientists think and how they function. Selected topics include (a) air and water pollution, ozone layer, global warming, acid rain, and other environmental chemistry; (b) the chemistry of plastics and polymers; (c) the chemistry of drugs and medicines; and (d) biotechnology and genetic chemistry. Other topics include the influence of the media on scientific issues and the decision-making process in science. Three hours lecture, three hours lab. (YR).

CHEM 111  Intro Gen Organic & Biochem  4 Credit Hours
A one-semester course covering the structure of atoms and molecules; an introduction to organic chemistry; and the properties of solids, solutions and gases. This course is open only to students in approved cooperative nursing programs. NOT acceptable as a prerequisite to CHEM 116. Three hours lecture, one hour recitation, three hours laboratory. (F). Corequisite(s): CHEM 116L.

CHEM 116  General Chemistry II  4 Credit Hours
Continuation of CHEM 114. Topics covered in this portion of the course are equilibria and reaction rates, oxidation and reduction thermodynamics, electrochemistry, and descriptive chemistry of the most common elements. Three hours lecture, one hour recitation, three hours laboratory. A student completing CHEM 114 and 116 will be prepared to enter advanced chemistry courses. (F,W,S).
Prerequisite(s): CHEM 114
Corequisite(s): CHEM 116L

CHEM 124  General Chemistry I  4 Credit Hours
An introduction to phenomena and principles of chemistry with emphasis on developing an understanding of the fundamentals of chemical processes. Concepts to be explored are chemical reactions, thermodynamics, equilibria, and kinetics. For students considering careers in life sciences, physical sciences and engineering. Three hours lecture, one hour recitation, three hours laboratory. Prerequisites are one year of high school chemistry and previous or concurrent enrollment in MATH 104 or 105. (F,W,S).
Prerequisite(s): MATH 104* or MATH 105* or MPLS with a score of 113
Corequisite(s): CHEM 124L

CHEM 134  General Chemistry IA  4 Credit Hours
An introduction to chemical phenomena and principles with an emphasis on developing both an understanding of chemistry and an appreciation of what chemists do. Students will investigate the fundamentals of chemistry in the context of real-world problems and will utilize systems of biological and environmental importance. Core concepts include stoichiometry, aqueous chemistry, gas laws, thermochemistry, atomic structure, molecular structure and bonding. Three hours lecture, one hour recitation, three hours laboratory. Primarily designed for students considering careers in life sciences or physical sciences. (F,W,S)
Prerequisite(s): MATH 104* or MATH 115* or MATH 113* or MPLS with a score of 105 or MATH 105* or MPLS with a score of 115
Corequisite(s): CHEM 134L

CHEM 136  General Chemistry IIA  4 Credit Hours
Continuation of CHEM 134. Concepts explored include conceptual and quantitative treatments of intermolecular forces, physical properties of solutions, chemical kinetics, chemical equilibria, acid-base equilibrium, thermodynamics, and electrochemistry. Primarily designed for students majoring in the physical sciences and the life sciences. (F,W,S)
Prerequisite(s): CHEM 124 or CHEM 134 or CHEM 144
Corequisite(s): CHEM 136L

CHEM 144  Gen Chemistry IB  0 or 4 Credit Hours
This course consists of an introduction to chemistry, its phenomena, and principles explored in the context of real-world examples (e.g. the automobile). Core concepts include states of matter, atomic and electronic structure, types of reactions (acid-base and reduction-oxidation), structure and bonding, gas laws, stoichiometry, thermodynamics, chemical equilibria, and the chemical composition of the atmosphere and air pollution problems. Three hour lecture, one hour recitation, three hours laboratory. Primarily designed for students considering careers in engineering. (F)
Prerequisite(s): MATH 105* or MPLS with a score of 113 or MPLS with a score of 115
Corequisite(s): CHEM 144L

CHEM 146  General Chemistry IIB  0 or 4 Credit Hours
Continuation of CHEM 144. This course consists of an introduction to chemistry, its phenomena, and principles explored in the context of real-world examples (e.g. the automobile). Core concepts to be explored include the solid state, chemical kinetics, electrochemistry and its applications (e.g. batteries, fuel cells, and corrosion), an introduction to organic functional groups, their reactions, and spectroscopic identification, and the preparation and properties of synthetic polymers. Primarily designed for students considering careers in engineering. (W)
Prerequisite(s): CHEM 124 or CHEM 134 or CHEM 144
Corequisite(s): CHEM 146L

CHEM 225  Organic Chemistry I  3 Credit Hours
The initial course in organic chemistry. A general introduction to organic chemistry with emphasis on the development of structure theory and functional group chemistry. Three hours lecture, one hour recitation. (F,S).
Prerequisite(s): CHEM 136 or CHEM 146
Corequisite(s): CHEM 225R

CHEM 225R  Organic Chemistry I Recitation  0 Credit Hours
Recitation component of CHEM 225. Must be taken concurrently with CHEM 225.
Corequisite(s): CHEM 225
CHEM 226  Organic Chemistry II  3 Credit Hours
A continuation of CHEM 225. Topics include functional group chemistry and properties of carbohydrates, amino acids, and aromatic compounds. Three hours lecture, one hour recitation. CHEM 225 and 226 constitute a two-semester sequence in organic chemistry, suitable for students in the basic sciences or engineering or with interests in one of the health professions. (W,S).
Prerequisite(s): CHEM 225
Corequisite(s): CHEM 226R

CHEM 226R  Organic Chemistry II Rec  0 Credit Hours
Recitation component of CHEM 226. Must be taken concurrently with CHEM 226.
Corequisite(s): CHEM 226

CHEM 227  Organic Chemistry Laboratory  2 Credit Hours
Development of the basic laboratory techniques of organic chemistry. The chemistry of functional groups is studied and various organic compounds are synthesized and purified. Eight hours laboratory. (F,W,S).
Prerequisite(s): CHEM 226*

CHEM 285  Introduction to Glass Blowing  1 Credit Hour
A study of the nature, properties, and manufacture of glass. Laboratory experience in the manipulation of glass and the construction of scientific apparatus. Discussions, laboratory, and field trips. (AY).

CHEM 303  Inorganic Chemistry I  3 Credit Hours
A study of the chemistry of the elements and their periodic relationship. Bonding theories and structures as well as descriptive chemistry of the representative elements will be emphasized. Three hours lecture. (F).
Prerequisite(s): CHEM 136 or CHEM 146

CHEM 325  Principles of Organic Chem  3 Credit Hours
A one-semester introduction to the compounds of carbon, with an emphasis on structure, preparation, reactivity and characterization of different functional groups. Both aliphatic and aromatic compounds will be examined. The important role of organic compounds in modern society will be highlighted with real world examples including fuels, detergents, plastics, medicines, biomolecules, environmental pollutants and additives. This course may not be used to satisfy the organic chemistry prerequisite for the Biochemistry, Biology, Chemistry, or Microbiology degree programs. Students may not receive credit for both CHEM 225 and 325. CHEM 325 may not be used as a prerequisite for Chemistry 226.
Prerequisite(s): CHEM 124 and (CHEM 136 or CHEM 146)
Restriction(s):
Cannot enroll if Major is Biochemistry, Chemistry (ACS Certified), Biological Sciences, Microbiology, Chemistry (Instructional)

CHEM 344  Quantitative Analysis  4 Credit Hours
A survey of theory and practice of volumetric, gravimetric, electrometric and colorimetric analysis. Systematic analysis of complex materials. Two hours lecture, eight hours laboratory. (F).
Prerequisite(s): CHEM 136 or CHEM 146
Corequisite(s): CHEM 344L

CHEM 348  Environmental Chemistry  3 Credit Hours
Description of the concepts, principles, practices, and current problems in the chemistry of natural waters, the soil, and the atmosphere. Three hours lecture. (AY).
Prerequisite(s): CHEM 344 and (CHEM 225 or CHEM 325)

CHEM 349  Environmental Chem Laboratory  1 Credit Hour
Collection and analysis of air, water, soil, and organisms for pollutants such as noxious gases, heavy metals, and trace organics. EPA-approved methods are emphasized. Four hours laboratory. (AY).
Prerequisite(s): CHEM 348* or ESCI 348*

CHEM 352  Introduction to Toxicology  3 Credit Hours
An introduction to the principles of toxicology with an emphasis on environmental toxicology. Major topics include toxic agents, toxicological mechanisms, and use of toxicological reference literature. Discussion of chemical carcinogenesis, genetic toxicology, immunotoxicology, teratology, and toxic responses of the skin, eyes and nervous system. Three hours lecture. (AY).
Prerequisite(s): CHEM 225

CHEM 368  Physical Chemistry I  3 Credit Hours
Nature of the gaseous state, chemical thermodynamics, biochemical and chemical equilibria and kinetics. Three hours lecture, one hour discussion. (W).
Prerequisite(s): CHEM 225 and CHEM 344 and MATH 116 and (PHYS 125 or PHYS 150)

CHEM 370  Principles of Biochemistry  3 Credit Hours
A concise but comprehensive survey of various areas of biochemistry designed for non-biochemistry majors. The course follows the standard approach to the subject including a description of cells, their structure and constituent macromolecules (proteins, nucleic acids, carbohydrates and lipids), enzymology, bioenergetics, intermediary metabolism and gene regulation. Students cannot take both BCHM 370 and 470 or 471 for any combination of concentration, cognate or minor requirement. Three hours lecture. (F).
Prerequisite(s): BIOL 140 and CHEM 226

CHEM 390  Current Topics in Chemistry  1 to 3 Credit Hours
A course in special topics current to the field of chemistry. Topics and format for the course may vary. See current Schedule of Classes. One to three hours seminar. Permission of instructor. (OC).

CHEM 397  Current Topics in Chemistry  3 Credit Hours
A course for non-science majors which focuses on the interaction of chemistry and society. Sufficient chemical knowledge will be introduced so that the issues can be discussed and competing statements evaluated. Topics covered will include air and water pollution, fuels, designing drugs, etc. (OC).

CHEM 403  Inorganic Chemistry II  3 Credit Hours
A study of coordination and organometallic compounds through the use of current theories. The structure, reactivity, and descriptive chemistry of transition metal complexes will be examined. Three hours lecture. (W).
Prerequisite(s): CHEM 303 and (CHEM 368* or CHEM 468)

CHEM 426  Advanced Organic Chemistry  3 Credit Hours
Spectral analysis, structure determination, reaction mechanisms, synthesis, stereochemistry, and other selected topics are discussed. Three hours lecture. (AY).
Prerequisite(s): CHEM 226 and CHEM 227

CHEM 430  Bioinorganic Chemistry  3 Credit Hours
This course examines the roles that metals play in biological systems, including the chemical principles that make metal ions well-suited for roles in protein structure, in redox catalysis and in acid base chemistry. The physical and experimental techniques that are applied to explore the structure and function of metals in natural systems will be introduced using case studies from the primary scientific literature in the field. BCHM 370 or its equivalent are strongly recommended but not required.
Prerequisite(s): CHEM 136 and BIOL 140
CHEM 435  Green Chemistry  3 Credit Hours  
An examination of green chemistry principles and methods used to assess and improve chemical processes with respect to environmental impact. Topics include: concepts of green chemistry, waste prevention, catalysis, renewable resources, alternative energy resources, and green technologies.  
Prerequisite(s): CHEM 226 or CHEM 325  
Restriction(s): 
Cannot enroll if Class is Graduate  

CHEM 436  Polymer Chemistry  3 Credit Hours  
The macromolecular concept is introduced and polymerization mechanisms are discussed. The chemistry and physical properties of representative polymeric materials are presented. Topics include the determination and distribution of molecular weights, polymer morphology, mechanical properties of polymers, relaxation phenomena in polymers, and methods of polymer characterization. Three hours lecture. (AY).  
Prerequisite(s): CHEM 226 and (CHEM 368* or CHEM 468)  

CHEM 437  Nano-Biotechnology  3 Credit Hours  
An introduction to the fundamentals of nanotechnology, nano-fabrication processes and its application in different fields with special attention to the life sciences. This course introduces different tools used in nanotechnology and investigates how one can borrow the idea of self-assembly from nature to design structures at the nanometer scale. The course also focuses on different contemporary application areas of nanotechnology like biosensor development, cancer research and drug delivery. The research areas of selected companies that are applying nanotechnology to develop new products will also be explored. This course showcases the interchange of ideas between chemistry, materials science and engineering in solving complex biological problems.  
Prerequisite(s): (CHEM 136 or CHEM 146) and (PHYS 126 or PHYS 151) and BIOL 140  
Restriction(s): 
Can enroll if Class is Junior or Senior  

CHEM 447  Instrumental Methods of Analys  0 or 4 Credit Hours  
A study of the theory, operation, and application of instrumental methods of chemical analysis including optical, magnetic, electrochemical, and separation techniques. Two hours lecture, eight hours laboratory. (W).  
Prerequisite(s): CHEM 368* or CHEM 468  

CHEM 450  Adv Org Syn & Character Lab  1 Credit Hour  
Concepts and techniques from previous laboratory courses as well as advanced techniques are applied to synthesis and characterization of organic compounds. Spectroscopic and chromatographic data collection and interpretation are critical to success in the course. Formal writing and data presentation is emphasized. Oral presentation and a poster presentation is required. Crossover experiments with CHEM 452 are likely. Four hours laboratory. (W).  
Prerequisite(s): CHEM 227 and CHEM 226 and CHEM 447 and CHEM 468  
Corequisite(s): CHEM 452  

CHEM 452  Adv Inorg Synth & Char Lab  1 Credit Hour  
Concepts and techniques from previous laboratory courses as well as advanced techniques are applied to the synthesis and characterization of inorganic compounds. The ability to collect and interpret spectroscopic data is an important aspect of the course. Technical writing and data presentation is emphasized. Oral presentation and a poster presentation is required. Crossover experiments with CHEM 450 are likely, Four hours laboratory. (W)  
Prerequisite(s): CHEM 226 and CHEM 227 and CHEM 136 and CHEM 403 and CHEM 447 and CHEM 481  
Corequisite(s): CHEM 450  

CHEM 459  Physical Chemistry II  3 Credit Hours  
Nature of the liquid state, simple mixtures, heterogeneous equilibria; quantum theory, atomic and molecular structure, spectroscopy; statistical thermodynamics. Three hours lecture, one hour discussion. (F).  
Prerequisite(s): CHEM 368  

CHEM 470  Biochemistry I  3 Credit Hours  
Life processes from a chemical viewpoint: structure/function relationships of biomolecules, with emphasis on proteins, enzyme kinetics, and mechanisms of action. Three hours lecture. (F).  
Prerequisite(s): BIOL 140 and BIOL 130 and CHEM 226  

CHEM 471  Biochemistry II  3 Credit Hours  
Intermediary metabolism, bioenergetics, energy transformation, metabolic interrelationships, biochemical regulation, highly structured subcellular biochemical systems. Three hours lecture. (W).  
Prerequisite(s): BCHM 470 or CHEM 470 or BIOL 470  

CHEM 472  Biochemistry Laboratory I  1 Credit Hour  
The techniques of preparative and analytical biochemistry. Preparation and characterization of proteins and nucleic acids. Physical and chemical properties of proteins and nucleic acids. Four hours laboratory. CHEM 344 Recommended. (F).  
Prerequisite(s): (BIOL 470* or BCHM 470* or CHEM 470*) and CHEM 227  

CHEM 473  Biochemistry Laboratory II  1 Credit Hour  
The techniques of preparative and analytical biochemistry. Preparation and characterization of lipids and carbohydrates. Methods in metabolism. Four hours laboratory. (W).  
Prerequisite(s): (BCHM 471* or BIOL 471* or CHEM 471*) and (BCHM 472* or BIOL 472* or CHEM 472*)  
Corequisite(s):  

CHEM 481  Physicochemical Measurements  2 Credit Hours  
Laboratory work including the determination of molecular weights, measurements of properties of pure liquids and solutions, studies of phase equilibria, thermochemical measurements, and analysis of atomic and molecular spectra. Eight hours laboratory. (W).  
Prerequisite(s): CHEM 469*  

CHEM 490  Topics in Chemistry  1 to 3 Credit Hours  
Examination of problems and issues in selected areas of chemistry. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. One to three hours lecture. (YR).  
Prerequisite(s): CHEM 226  
Restriction(s): 
Can enroll if Class is Junior or Senior or Graduate  

CHEM 490D  Topics in Chemistry  3 Credit Hours  
Topic: Bioinorganic Chemistry. Introduces the roles metals play in biological systems. Explores chemical principles that make metals particularly well suited for these roles. Introduces physical and experimental techniques used to explore the structure and function of metals in natural systems. Explores case studies from the literature to synthesize results of various experiments to develop a final understanding of the systems. Students will not receive credit for both CHEM 490D and 590B.  
Prerequisite(s): CHEM 226 and BIOL 140
Chemistry (CHEM)

**CHEM 493 Presentations in Chemistry** 1 Credit Hour

Employment or graduate studies in chemistry involve integration of experiences and knowledge from one's undergraduate courses. This course is designed to help prepare students for their professional endeavors beyond UM-Dearborn. Students will submit a proposal for a senior project, present the completed project in an appropriate forum, and submit a written report on the project. Students will assemble and present a professional portfolio, and complete an exit interview. The experimental work on the project may be done in an advanced laboratory course or an independent study. (F, W).

**Restriction(s):**
Can enroll if Class is Senior

**CHEM 495 Off-Campus Research Participant** 1 to 3 Credit Hours

Participation in ongoing experimental research at an off-campus laboratory. Arrangements made between the research laboratory, the student and the chemistry concentration advisor. No more than six hours combined from CHEM 495, 498, and 499 may be credited toward the 120 hours required for a degree. Four to twelve hours laboratory. Permission of concentration advisor. (F, W, S).

**CHEM 497 Seminar in Chemistry** 1 Credit Hour

Weekly seminars on topics of current chemical interest presented by faculty members, guest lecturers or students. The subject will vary from term to term. The course may be elected up to three times. One hour seminar. (W).

**Restriction(s):**
Can enroll if Class is Junior or Senior or Graduate

Cannot enroll if Major is Chemistry (ACS Certified), Chemistry (Instructional)

**CHEM 498 Readings in Chemistry** 1 to 3 Credit Hours

Library research in a specific area of chemistry performed under the guidance of a faculty member. No more than six hours combined from CHEM 495, 498 and 499 may be credited toward the 120 hours required for a degree. Four to twelve hours readings. Permission of instructor. (F, W, S).

**CHEM 499 Laboratory Research in Chem** 1 to 3 Credit Hours

Directed laboratory research performed under the guidance of a faculty member. No more than six hours combined from CHEM 495, 498 and 499 may be credited towards the 120 hours required for a degree. Four to twelve hours laboratory. Permission of instructor. (F, W, S).

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Communication (COMM)

**COMM 220 Survey of Mass Communication** 3 Credit Hours

Course covers historical, economic, theoretical and research foundations of various mass media of communication: newspapers, magazines, radio, television and others. Includes study of the functions of media, and their creative and destructive potential in society. Textbook study and critical analyses of media products: advertisements, news stories, TV programs. (F, W).

**Prerequisite(s):** COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

**COMM 260 Public Relations Principles** 3 Credit Hours

Explores how public relations, as an area of communications management and production, can contribute to an organization's success. Provides a comprehensive introduction to the field of public relations, including: history and contemporary professional status of the public relations practitioner; role of public relations as a management discipline; major areas of public relations work, including media relations, public affairs, issues management, lobbying, organizational relations, development; techniques of public relations production - planning and presentation - with attention to the uses of specific tools available to practitioners, i.e., news releases, brochures, multimedia, Internet communications, special events. (YR).

**Prerequisite(s):** COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

Civic Engagement (CIVE)

**CIVE 333 Service-Learning Practicum** 1 Credit Hour

CIVE 333 is a one credit course that links an academic service-learning project to a relevant three or four credit course (not an independent study course) in which the student is or was recently enrolled. Students complete at least 30 hours of pre-approved, unpaid service hours. Students reflect upon their experience and its current and future impact through the writing of reflection papers, other brief writing assignments, and a final project. A student may repeat CIVE 333 up to three times with different linked courses.

**Restriction(s):**
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters or Business

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Child Life (CLS)

**CLS 401 Hospitalized Child** 3 Credit Hours

This Hospitalized Child course is a requirement for those who would like to sit for Child Life Professional Certification Examination and become Certified Child Life Specialist. The course is taught by a Certified Child Life Specialist and focuses on children in the health care environment. Topics of study include: 1. Child Life documents, 2. Scope of practice, 3. Impact of illness, injury and health care on patients and families, 4. Family-centered care, 5. Therapeutic play and 6. Preparation. (W)

**Restriction(s):**
Can enroll if Class is Junior or Senior

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

**An asterisk denotes that a course may be taken concurrently.**
**COMM 300  Communication Research Methods  3 Credit Hours**
Gives detailed view of landmark research studies in the field. Acquaints students with logic of research inquiry, design and analysis, including questions of validity, reliability, causation, etc. Imparts basics of various research methods used in the communication field, such as survey interviews, depth interviews, focus groups, content analysis, and rhetorical analysis. Students design and conduct at least one study in communication, individually or in groups. (F,W).

**Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

**Restriction(s):**
Can enroll if Level is Undergraduate

**COMM 306  Comparat. American Identities  3 Credit Hours**
This course will confront and complicate the following key questions: what does it mean to be an American? What is American culture? Participants in this course will respond to the questions central to the American Studies field by reading and discussing historical, sociological, literary, artistic, material culture, political, economic, and other sources. Students will use this interdisciplinary study to examine the multiple identities of Americans - as determined by factors such as gender, race, class, ethnicity, and religion. While emphasizing the diversity of American culture, participants will consider some core values and ideas uniting America both in historical and contemporary society. Students will be invited to seek out and share fresh narratives of the American experience.

**Prerequisite(s):** COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

**Restriction(s):**
Can enroll if Level is Undergraduate

**COMM 317  Case Studies in Tech Writing  3 Credit Hours**
COMM 317 offers both practical and conceptual studies in technical writing and is open to non-technical as well as technical students. The course offers in-depth treatment of the communication problems and various document designs common to technical writing professionals. Instructional format includes lectures and discussions based on case material derived from actual events, followed up by preparation of written documents. Topics include document design, language barriers, and the role of the technical documents in product liability. (F,W,S).

**Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

**Restriction(s):**
Can enroll if Class is Junior or Senior or Graduate

**COMM 340  Professional Communication  3 Credit Hours**
Course covers essential skills of professional written and oral communication within the organization; the purpose, process, and problems of professional communication; the influence of organizational structure; audience analysis; the writing and editing of reports (formal and informal, including memo reports) and of professional correspondence; the preparation of graphics; and the planning and delivery of oral presentations. May count toward Communications minor. (F,W,S).

**Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

**Restriction(s):**
Can enroll if Class is Junior or Senior or Graduate

**COMM 360  Social Media for PR  3 Credit Hours**
This course explores the emerging social media technologies and studies their application in contemporary PR practice. It examines the nature and role of social media in organizations and explores technologies including blogs, Microblogs, collaboration tools, podcasts, viral video, social bookmarking, mobile platforms, and other evolving technologies.

**Prerequisite(s):** COMM 260

**Restriction(s):**
Cannot enroll if Class is Freshman

**COMM 364  Writing for Civic Literacy  3 Credit Hours**
In Writing for Civic Literacy, students will study how politicians, the media and critical citizens use language to engage with the broader community. Students themselves will learn to use language to become more active, well-informed citizens. They will study rhetorical awareness, audience analysis and persuasive writing techniques and put those lessons to use in community settings. They will perform community service at agencies of their choosing and use those experiences as objects of analysis, researching the social context in which those agencies operate and writing analytically about the agencies. Further, students will synthesize classroom lessons and real-world experience by executing writing tasks for and with the agencies (these tasks might include editorials for the local press, informational webpages and fundraising materials).

**Prerequisite(s):** COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

**Restriction(s):**
Can enroll if Class is Junior or Senior

**COMM 365  Health Communication  3 Credit Hours**
Provides skills necessary for creating, interpreting, and critically evaluating messages about issues related to health and illness and encouraging active participation in healthcare. Examines theory and research regarding messages related to physical, mental, and social well-being from interpersonal, organizational, and mass communication approaches. (W, YR)

**Restriction(s):**
Can enroll if Class is Junior or Senior

**COMM 366  Public Comm and Culture Stdies  3 Credit Hours**
This gateway course provides the theoretical and methodological foundation to embark on the study of three key interrelated spheres of communication: Public and Organizational Culture, Public Advocacy and Democratic Culture, and Intercultural Communication and Global Culture. Students will have the opportunity to examine salient societal issues within each of the major areas, and explore connections between the different areas. Through a variety of class exercises and both individual and collaborative projects, the course will help students to acquire an analytical and practical "toolkit" enabling them to function effectively as communicators in culturally diverse organizations and civic contexts.
COMM 381  Postwar European Cinema  3 Credit Hours
The course will concentrate on a series of films from various European
countries with a focus on the socio-political issues, historical events and
cultural preoccupations that have defined and also challenged European
societies from WWII to the present. Zeroing in on the construction of
European identities, the course will analyze and compare modes of
narrating national, class, racial, sexual and social differences in different
European nations. Themes such as memories of war and the Holocaust,
new conflicts, class, immigration, women’s rights, gender, and East-West
relations will be addressed. The course will thus privilege a cinema that
offers a “recit,” a story. Particular attention will be given to discourses on
otherness and on the ways in which film culture has reflected, reinforced,
reshaped and, in some instances, contested Europe’s past and current
dominant ideologies, and identities. Readings by cultural historians and
analysts will provide the context for an understanding of the films. The
course will conclude with a discussion of the possible existence of a
specific postwar European Cinema.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

COMM 390  Topics in Communication  3 Credit Hours
A course in nonfiction narrative that focuses on memoir writing,
emphasizing technique. Students will read book-length examples by
Azar Nafisi, Nelson Mandela, Frank Conroy, Mar Karr, Susanna Kaysen,
Frank McCourt, Ann Patchett and Joan Didion, examining these books as
models for writing.

COMM 397  Communications Thesis  3 Credit Hours
A thesis project that is the culmination of the Communications major.
Students will choose the project area and write a thesis (40-50 pages)
under the direction of a Communications faculty member. The thesis
option is available only to students with substantial practical experience in
the communication field, and requires the approval of Communications
faculty.
Restriction(s):
Can enroll if Class is Junior or Senior

COMM 398  Independent Studies-Comm  1 to 3 Credit Hours
Readings, supervised practice, or analytical assignments in
Communications, determined in accordance with the needs and interests
of those enrolled. May count toward Communications minor. (F,W).

COMM 420  Critical Media Studies  3 Credit Hours
Course presents various critical approaches to the study of the media.
Perspectives include political economy, cultural studies, critical theory
of the Frankfurt school and feminism. Through readings and first hand
analysis of the media students will delve deeply into the institutional
underpinnings, content, use and reception of media. There will be special
emphasis on how broader economic, cultural and technological changes
influence our experience of media in everyday life as creators, citizens,
audiences and consumers.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a
score of 40 or COMP 280
Restriction(s):
Can enroll if Class is Junior or Senior

COMM 422  Language and Popular Culture  3 Credit Hours
This course provides an overview of popular culture theories and
communication models along with research methods. It offers an
accessible, in-depth presentation of popular culture including music, film,
television, magazines, comics, animation, and advertising in the US and
the beyond. The main focus of the course is to highlight the functions
of language, particularly, dialects, accents, and foreign languages, in
producing and consuming local and global pop culture texts.
Restriction(s):
Can enroll if Level is Undergraduate

COMM 430  International Communications  3 Credit Hours
Course examines the relationship between globalization and
communication from various vantage points such as cultural imperialism,
global media flows, and hybridity theory. Students use these theoretical
approaches to understand how people in particular locations experience,
adapt, resist and modify globally circulating aspects of media, popular
culture, news and information. Through critical responses to readings,
class exercises, individual and team projects, students also explore how
global pressures and changes influence the way people understand and
project their identities, buy and sell communication as a commodity,
negotiate borders, and create social change.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a
score of 40 or COMP 280
Restriction(s):
Can enroll if Class is Junior or Senior

COMM 442  20th Century Public Argument  3 Credit Hours
This class is a survey of American public address in the 20th Century.
Students will examine and critically analyze several of the most
significant speeches and rhetorical movements of the last one hundred
years. Through lectures, discussions, and analysis of speeches and
other artifacts, we will focus on the relationship between rhetoric and
history, and how theories of rhetorical action help us appreciate the
role of discourse in the effective functioning of a democratic system.
Students will learn to utilize several critical perspectives as a means of
understanding both historical and contemporary political discourse. (W).
Prerequisite(s): SPEE 101

COMM 450  Principle of Organization Comm  3 Credit Hours
Course examines how communication networks function in
organizations. Purpose: to provide an organizational context and
conceptual framework for the practice of professional writing and
speaking skills. Writing projects include a research report, a case study,
and several shorter papers, practical and analytical, on assigned topics.
Students cannot receive credit for both COMM 450 and COMM 550. (OC).
Prerequisite(s): COMM 340 or COMM 360 or COMM 440
Restriction(s):
Can enroll if Class is Junior or Senior
COMM 455  Gender and Media Studies  3 Credit Hours
The course will focus on several feminist approaches used in understanding the media and attempting to create social change through the media. The role of media in the definition and reproduction of gender-based hierarchies and in the renegotiation of gender boundaries will both be explored. To this end, both mainstream and women's media will be examined. The course will take a multicultural and international perspective, incorporating concerns of class, race, ethnicity, and nation as these intersect with the study of gender and media. Mainstream and alternative media will be analyzed through readings, films, case studies, in-class collaborative exercises and longer term projects. News, entertainment, and advertising genres will be examined in a variety of media such as the printed press, television, video, film, and the Internet. (W).
Prerequisite(s): WGST 275 or WGST 303 or ANTH 275 or PSYC 275 or SOC 275 or ANTH 303 or PSYC 303 or SOC 303 or HUM 275 or HUM 303 or WST 275
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if Level is Undergraduate

COMM 460  Public Relations Campaigns  3 Credit Hours
Focuses on strategies and tactics involved in planning and implementing a public relations campaign. Extends and refines skills acquired in earlier, prerequisite course work by incorporating management, production, and writing within a four-stage model for planning and action. This model provides a framework for role-playing, case study work, and projects done for evaluation by public relations professionals at local firms. The semester's portfolio of finished communications and "mock-ups" - including planning materials, news releases, brochures, newsletters, Internet communications, video and audio scripts - should demonstrate command of entry-level, professional abilities as a public relations campaign manager and producer. (YR).
Prerequisite(s): COMM 260 and (COMM 360 or COMM 440)

COMM 464  Contemporary Rhetorical Theory  3 Credit Hours
An examination of contemporary rhetorical theories through study of representative practitioners and related developments in linguistics, philosophy, psychology, communication, and composition and rhetoric. Students may not receive credit for both COMM 464 and COMM 564.
Prerequisite(s): COMM 201 or COMM 220 or COMM 290 or ENGL 230 or ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 240 or ENGL 250
Restriction(s):
Cannot enroll if Class is Graduate

COMM 466  Arguing Feminism: Rhetoric  3 Credit Hours
An introduction to the work of major twentieth century feminists working in rhetoric and related fields. Students examine recurring themes of language, meaning, ethics and ideology, and practice writing strategies which address rhetorical and ethical concerns central to feminist/academic writing. (OC)
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40
Restriction(s):
Cannot enroll if Class is Freshman

COMM 477  Prof Communication Ethics  3 Credit Hours
An examination of professional communication ethics in the organizational context, focusing on important issues, problems, and concepts. This course is designed to help students become conscious of the role of values in a wide range of professional communication situations; to locate organizational behavior in an ethical framework based on considered definitions, standards, perspectives, and criteria for evaluation and analysis; to consider individuals as well as organizations as moral agents in a changing and complex universe; and to analyze topical cases on emergent issues in communication ethics. Some sample topics: ethics in decision-making and conflict-resolution; privacy and confidentiality; sexual harassment; whistleblowing; the "engineering" of consent; corporate image and ethos; issues in documentation, record-keeping, and technology; "issues management" and corporate responsibility; groupthink; obedience and personal responsibility; employee socialization. Students cannot receive credit for both COMM 477 and COMM 577. (OC).
Prerequisite(s): COMM 340 or COMM 360 or COMM 440 or COMM 450
Restriction(s):
Can enroll if Class is Junior or Senior

COMM 481  Gender and Globalization  3 Credit Hours
Mass media, politics, and academia are full of references to globalization, and a future "world without borders." This interdisciplinary course considers the implications of globalization for women's lives, gender relations, and feminism. Topics covered include the global factory, cross-cultural consumption, human rights, global communications, economic restructuring, nationalism, and environmental challenges. Rather than survey international women's movements, this course explores how globalization reformulates identities and locations and the political possibilities they create. (AY).
Prerequisite(s): ANTH 303 or HUM 303 or SOC 303 or PSYC 303 or WGST 275
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Community Health Education (CHE)

CHE 101  Intro to Health Education  3 Credit Hours
This course is designed to introduce students to the field of community health education. Students will explore the theoretical and practical issues of health education and will identify and apply health education principles to health challenges facing individuals, groups and communities.
CHE 201  Medical Terminology   3 Credit Hours
This course will focus on an in-depth presentation of medical language to serve as a solid foundation for students interested in health care, medicine, nursing, pharmacy, physical therapy, or related careers. Medical terminology for both health and disease is presented in relation to human structure and function. Understanding of the course content builds a framework by introducing the key terms as they are applied to specific body systems.

CHE 401  CHE Methods   3 Credit Hours
This course is designed to prepare students with skills necessary to implement health education programs within the context of community health settings. Emphasis will be placed on a variety of community health education methods and strategies including but not limited to educational presentations and material development, mass media and media advocacy, legislative action and involvement, community organization, and working with groups.
Prerequisite(s): CHE 101 and CHE 201 and EDC 400
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Education, Health, and Human Services

CHE 402  Internship CHE   3 Credit Hours
CHE 402 Internship in Community Health Education is designed to provide opportunities for students to develop, enhance, and assess health education skills and competencies in the direct application of community health education. Students will observe an academically prepared health educator within a health service agency/organization and be directly involved in the delivery of health education and will reflect on learning experiences and discuss health education issues within the seminar sessions.
Prerequisite(s): CHE 101
Restriction(s):
Can enroll if College is Education, Health, and Human Services

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Comparative Literature (COML)

COML 221  Great Books I: Ancient World   3 Credit Hours
Introduction to masterpieces of Western world literature from the ancient world. Readings include the Bible, Iliad, Odyssey, Greek drama, and Roman authors. (YR).

COML 222  Great Books II   3 Credit Hours
Introduction to masterpieces of Western world literature from the Middle Ages and Renaissance. Readings include Dante, Chaucer, Wolfram, Cervantes, Shakespeare, Moliere, and Racine. (YR).

COML 223  Great Books III: Modern Era   3 Credit Hours
Introduction to masterpieces of Western world literature from the Modern Era. Readings include Swift, Voltaire, Rousseau, English romantic poets, fiction and drama of the 19th and 20th century. (YR).

COML 301  Literary Criticism   3 Credit Hours
This course introduces literary criticism and theory from Aristotle to the present, focusing on the changing concept of literature’s nature and function. Lectures, readings, and discussion cover such critics as Aristotle, Dryden, Pope, Johnson, Wordsworth, Coleridge, Arnold, T. E. Hulme, I. A. Richards, T. S. Eliot, and such movements as New Criticism, Phenomenology, Reader-Response, Archetypal Criticism, psychological approaches to literature, New Historicism, Marxism, Feminism, and Deconstruction. (OC).
Prerequisite(s): COMP 280 (COMP 106 or COMP 270 or COMP 220 and (ENG 200 or CPAS with a score of 40) or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

COML 340  Modern European Short Fiction   3 Credit Hours
A careful reading of between 10 and 15 short novels (in English translation) with particular attention being paid to the manner in which their plots and characters express contemporary cultural issues. Such works as Dostoyevsky’s Notes from Underground, Conrad’s Heart of Darkness, and Unamuno’s Abel Sanchez will be included.
Prerequisite(s): ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200

COML 341  Mod Eur Poetry in Translation   3 Credit Hours
Movements and genres of modern European poetry, from the Symbolists to the present. Included will be such poets as D’Annunzio, Cavafy, Rilke, Blok, Mayakovskv, Valery, Eliard, Pavese, Seferis, Akhmatova, Mandestram, Marinetti, Trakl, Mistrale, Vallejo, Morgenstern, Apollinaire, Loren, Transtromer, Brodsky, Milosz, and others in translation. (OC).
Prerequisite(s): ENGL 231

COML 342  Myth and Motif   3 Credit Hours
A study of archetypal figures and thematic motifs. Their recurrent appearance in different literary periods and genres and their lineage will be examined in order to increase understanding of the works themselves and of the ages which produced them. A selection will be made from classical myth, Biblical narrative, and historical sources. Thus the figures may vary from Oedipus and Cain to Faust and Don Juan. Motifs or story patterns may include such devices as the spiritual quest, the journey into Hell, or the patricide prophecy.
Prerequisite(s): ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200

COML 344  Modern Literature: the Novel   3 Credit Hours
A careful examination of five or six significant modern novels in translation, with particular emphasis on their influence on the development of the novel, and their reflection of contemporary cultural issues. The works of such authors as Flaubert, Dostoyevsky, Tolstoy, Gide, Joyce, and Mann will be included.

COML 345  Modern Literature: Drama   3 Credit Hours
A careful reading of selected plays from Ibsen to the contemporary theater, designed to develop appreciative criticism and an understanding of the plays in their relationships to movements to modern drama, theater, background, social forces and trends of thought.

COML 347  Clas Lit in Engl Translation   3 Credit Hours
A careful reading of selected plays from Ibsen to the contemporary theater, designed to develop appreciative criticism and an understanding of the plays in their relationships to movements to modern drama, theater, background, social forces and trends of thought.

Restriction(s):
Can enroll if Class is Junior
COML 355  Urban Voices: France and Italy  3 Credit Hours
This course is an interdisciplinary approach to the concepts of urban development and literary, visual and cultural responses to the process of urbanization mainly in Rome and Paris. The readings will illustrate how the city shaped the writers' creativity, as well as how their works interpret urbanization.
Restriction(s):
Can enroll if Class is Freshman

COML 375  The Hero in Literature  3 Credit Hours
Reflections on myth, history, and literature, based on analyses of literary texts. The individual hero may change from term to term. The course, for example, might center on the transition from Faust to anti-Faust. In this instance, some of the writers or works might include: The Faustbook, Marlow's Doctor Faustus, Goethe's Faust, Byron's Manfred, a Faust opera, Thomas Mann's Doktor Faustus, Gunter Grass' The Tin Drum. All reading in English translation. (OC).

COML 390  Topics in Comparative Lit  3 Credit Hours
Examination of problems and issues in selected areas of comparative literature. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).

COML 399  Independent Studies  1 to 3 Credit Hours
Readings or analytical assignments in Comparative Literature in accordance with the needs and interests of those enrolled and agreed upon by the student and instructor.

COML 404  Medieval Mystical Writers  3 Credit Hours
A study of the genre of mystical writing as it was developed and practiced throughout the Middle Ages and in 14th century England particularly. Attention will be given to the historical, religious, and cultural contexts that enabled and were created by mystical texts. In addition, the course will explore how traditional and contemporary trends in the fields of religious and literary studies can be brought to bear on the genre of mystical writing. (OC)
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40) or COMP 280 or ENGL 230 and (ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237)

COML 433  Writing Women in Renaissance  3 Credit Hours
This course will be taught in English, and will focus on the influence of Italian literary models for the construction of female literary types as well as female voices in France and Italy from 1300 to about 1600. Italian authors studied include three very influential Florentines, Dante, Petrarch and Boccaccio, as well as Castiglione and Ariosto. We will read women poets, patrons, prostitutes and queens from Italy and France such as Veronica Gambara, Isabella di Morra, Vittoria Colonna, Christine de Pizan, Louise Labe, and Marguerite de Navarre. At last issue will be women's roles and women's images in city and court culture during the early modern period, and the interaction of their writings with the literary canons of Italy and France. (OC).
Restriction(s):
Can enroll if Level is Undergraduate

COML 455  This American Life  3 Credit Hours
The course "This American Life: Immigrant Literature and the American Dream" is a literary and cultural analysis of the literature of immigration. The readings are from works of fiction in a variety of genres, and are written by American and non-American prize-winning authors. Their common denominator is the pursuit of the American Dream and its many multifaceted aspects. The themes explored include: assimilation, acculturation, diversity, language, subculture, intertextuality, nostalgia, belonging, and double identity. Student wishing to take this course for graduate credit should sign up for COML 555. Students cannot receive credit for both COML 455 and COML 555.
Restriction(s):
Cannot enroll if Class is Freshman or Graduate

Corequisite(s):
An asterisk denotes that a course may be taken concurrently.
Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Computer & Computational Math (CCM)

CCM 150  Computer Science I  4 Credit Hours
An introduction to structured computer programming covering problem formulation, algorithm development, the C++ programming language, program testing and debugging, capabilities and elements of computer organization, and object-oriented software methodologies.
Prerequisite(s): MATH 115*
Corequisite(s): CCM 150L

CCM 172  Computing Environ for Math  3 Credit Hours
This course covers introductory programming techniques for Mathematics majors. Students will learn to program in sage and python. Topics include data types, variables and assignments, decisions, loops, functions, recursion, arrays and objects. Programming assignments focus on problems that are mathematical in nature, giving students an opportunity to use simulations to understand and verify familiar mathematical results. This course, or CIS/CCM 150, satisfies the programming requirement for the Mathematics concentration.
Prerequisite(s): MATH 115
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if College is Arts, Sciences, and Letters

CCM 305  The Theory of Computation  3 Credit Hours
An introduction to the foundations of computer science including the theory of computability, Turing machines, automata, and formal languages.
Prerequisite(s): CIS 175 and (CIS 200 or IMSE 200)
CIS 112  Computer Literacy/Info Mgmt  3 Credit Hours
This is a microcomputer literacy course with primary emphasis on the application tools of the word processor, spreadsheets, and database. Additional topics of computer terms, systems, and use in society are included. The course is intended for undergraduates in the College of Arts, Sciences, and Letters. No previous experience with computers is expected. (YR).

CIS 125  Survey of Computer Science  3 Credit Hours
A survey of computer science topics, including history of computing, office productivity software, the internet, HTML, JavaScript, web design, algorithms, assemblers and compilers, gates and logic design, models of computation, artificial intelligence and expert systems, computing ethics, privacy issues, intellectual property. No credit for CIS majors. (F,W,S).

CIS 150L  Survey of Computer Science Lab  2 Credit Hours
A laboratory course to provide hands-on experience in the topics presented in CIS 125. Students will use computer hardware and software to explore various aspects of computer science. (YR).

CCM 315  Applied Combinatorics  3 Credit Hours
An introduction to methods and applications of enumerative and configural combinatorics. Students study several elegant and useful techniques for counting and/or generating the elements in large and unwieldy finite sets. Students also study topics in graph theory that are applicable to real world problems. Topics include basic counting principles, the principle of inclusion-exclusion, generating functions and recurrence relations. Topics from graph theory include graph models, paths, circuits, cycles, and connectedness; additional topics include the theory and applications of planarity, coloring, directed graphs, networks and network flows.
Prerequisite(s): MATH 300, MATH 200 and (MATH 217 or MATH 227)

CCM 372  Computing with Mathematics  3 Credit Hours
The course explores a variety of topics from different areas of undergraduate mathematics including calculus, matrix algebra, number theory, geometry, and discrete mathematics. Students learn to design customized Mathematica functions to solve specific problems in these areas using the symbolic, computational, graphics, and programming tools provided within Mathematica.
Prerequisite(s): MATH 217 or MATH 227

CCM 390  Topics in Computational Math  1 to 3 Credit Hours
A course designed to offer selected topics in different areas of applied mathematics. The specific topics will be announced together with the prerequisites for each separate offering. Course may be repeated when the topics covered differ.

CCM 399  Independent Studies  1 to 3 Credit Hours
Readings or analytical assignments in Computers and Computational Mathematics in accordance with the needs and interests of those enrolled and agreed upon by the student and advising instructor.

CCM 404  Dynamical Systems  3 Credit Hours
The aim of this course is to survey the standard types of differential equations. This includes systems of differential equations, and partial differential equations, including for each type, a discussion of the basic theory, examples of applications, and classical techniques of solutions with remarks about their numerical aspects. Also included are autonomous and periodic solutions, phase space, stability, perturbation techniques and Method of Liapunov. (AY).
Prerequisite(s): MATH 216 and (MATH 217 or MATH 227)

CCM 451  Computer Graphics  3 Credit Hours
Basic geometrical concepts: graphics output primitives, two-dimensional transformations, windowing and clipping, three-dimensional viewing, visible surface detection methods, graphical user interfaces.
Prerequisite(s): (CCM 350 or CIS 350 or IMSE 350) or (ECE 370 and MATH 276) and (MATH 215 or MATH 205) and (MATH 217 or MATH 227)
Restriction(s):
Can enroll if Class is Graduate

CCM 458  Introduction to Wavelets  3 Credit Hours
This course will introduce the students to theory and application of wavelets using linear algebra. Topics will include the discrete Fourier transform, the fast Fourier transform, linear transformations, orthogonal decomposition, discrete wavelet analysis, the filter bank, Haar Wavelet family, Daubechies's Wavelet family, and applications. Students cannot receive credit for both MATH 458 and MATH 558. (OC)
Prerequisite(s): MATH 216 and (MATH 217 or MATH 227)
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

CCM 472  Intro to Numerical Analysis  3 Credit Hours
Solution of linear systems by Gaussian elimination, solution of nonlinear equations by iterative methods, numerical solutions of ordinary differential equations, data fitting with spline functions, numerical integration, optimization. (F).
Prerequisite(s): MATH 217 or MATH 227

CCM 473  Matrix Computation  3 Credit Hours
A study of the most effective methods for finding the numerical solution of problems which can be expressed in terms of matrices, including simultaneous linear equations, orthogonal projections and least squares, eigenvalues and eigenvectors, positive definite matrices, and difference and differential equations. (AY).
Prerequisite(s): MATH 217 or MATH 227

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Computer & Information Science (CIS)
CIS 1501  CS I for Data Scientists  4 Credit Hours
This course provides a foundation for further studies in computer and information science and emphasizes a structured approach to problem solving and algorithm development using a high-level language more suited to data science applications. Topics include principles of program design, coding, debugging, testing, and documentation. Students are introduced to the Unified Modeling Language for requirements analysis using use-cases and activity diagrams, an object-oriented programming language for data science applications, and the fundamentals of computer hardware, system software, and components. The course will consist of three lecture hours and one two-hour laboratory. The labs will cover various data science applications. (F,W,S)
Prerequisite(s): MATH 115* or MATH 113* or MPLS with a score of 116

CIS 167  Proxy Server  3 Credit Hours
This course will cover installation, configuration, and troubleshooting Microsoft Proxy Server, methods of controlling internet access, enhancement to performance monitor, and creation of a plan for integrating Proxy Server in an existing environment. (F,W)
Prerequisite(s): CIS 162
Restriction(s):
Can enroll if Program is

CIS 200  Computer Science II  4 Credit Hours
This course presents techniques for the design, writing, testing, and debugging of medium-sized programs, and an introduction to data structures (stacks, queues, linked lists) using an object-oriented programming language. Topics covered include pointers, templates, and inheritance. The principles of UML modeling are continued. This course will consist of three lecture hours and one two-hour laboratory.
Prerequisite(s): (MATH 115 or MPLS with a score of 116) and (CIS 150 or IMSE 150 or CCM 150)
Corequisite(s): CIS 200L

CIS 2001  CS II for Data Scientists  4 Credit Hours
This course presents techniques for the design, writing, testing, and debugging of medium-sized programs, and an introduction to data structures (stacks, queues, linked lists) using an object-oriented programming language for data science applications. Topics covered include pointers, templates, and inheritance. The principles of UML modeling are continued. This course will consist of three lecture hours and one two-hour laboratory. The labs will cover various data science applications. (F, W, S)
Prerequisite(s): CIS 1501 and MATH 115 or MATH 113 or MPLS with a score of 116

CIS 205  C Programming  3 Credit Hours
A study of the C programming language. Students write several programs illustrating the use of C in science, engineering, and business. No credit for CIS Majors.
Prerequisite(s): ENGR 100 or (MATH 105 or MPLS with a score of 113)

CIS 275  Discrete Structures I  4 Credit Hours
This course introduces students to various topics in discrete mathematics, such as set theory, mathematical logic, trees, and graph theory. Applications to relational databases, modeling reactive systems and program verification are also discussed. (F,W,S)
Prerequisite(s): MATH 115 (MATH 115 or MPLS with a score of 116) and CIS 200*
Corequisite(s):

CIS 280  Prac Aspects of Computer Sec  3 Credit Hours
This course provides a practical introduction to a broad range of computer security topics. Covered topics include: practical computer security principles to help empower students to secure their own connections to cyberspace; firewalls, malware, and intrusion detection; cryptography basics and its applications; mobile devices and related security issues; network technologies and their vulnerabilities.
Prerequisite(s): CIS 200

CIS 285  Software Engineering Tools  3 Credit Hours
This course will cover various CASE tools, such as UML modeling and code generation tools, configuration management tools, defect management tools, an integrated development environment for coding and debugging, unit and testing tools, and build tools. Students will learn these tools in a laboratory environment. This course will be comprised of one lecture hour and one two-hour laboratory. (F,W)
Prerequisite(s): CIS 200*

CIS 290  Topic in Programming Languages  2 Credit Hours
One significant programming language is covered in depth. The particular language changes from term to term. The language chosen might be Ada, C, MODULA 2, USP, PROLOG, or SMALLTALK.
Prerequisite(s): CIS 200

CIS 290A  Topic in Programming Languages  2 Credit Hours
Prerequisite(s): CIS 200

CIS 294  Programming with Visual Basic  3 Credit Hours
An introduction to create professional-looking applications using the graphical user interface of Windows. Students learn how to create graphical objects and controls, write event driven code that responds to clicking on buttons, work with multiple forms and executable files. (F,S)
Prerequisite(s): CIS 200 or IMSE 200

CIS 296  Java Programming  3 Credit Hours
Course covers Java Programming language, focusing on GUI development, distributed computing and network applications.
Prerequisite(s): CIS 200 or IMSE 200

CIS 297  Intro to C Sharp  3 Credit Hours
This course provides an introduction to the C# programming language and the .NET Framework for the development of Windows game applications. Some discussion of DirectX programming and Xbox game development is also included. (W)
Prerequisite(s): CIS 200

CIS 299  Internship  1 Credit Hour
Student works with an industrial sponsor in the area of CIS. Approval of Internship Coordinator required. (F,W,S).

CIS 306  Discrete Structures II  4 Credit Hours
This course introduces students to further topics in discrete mathematics, including theory of computation, more complexity theory, coding theory, and game theory.
Prerequisite(s): CIS 275

CIS 310  Computer Org and Assembly Lang  4 Credit Hours
The architecture of computer systems and associated software. Topics include digital logic circuits, computer interfacing, interrupt systems, input/output systems, memory systems, assemblers and assembly language programming, and computer networks. (F,W,S)
Prerequisite(s): (MATH 115 or MPLS with a score of 116) and (CIS 200 or IMSE 200) and CIS 275
CIS 3200  Data Science II  4 Credit Hours
This course provides an overview of what Big Data is and explores its characteristics. It introduces the fundamental technologies, platforms, and methods that enable Big Data analysis, and covers how to acquire, store, and analyze very large amounts of information to complete Big Data analysis tasks. Topics include MapReduce, similarity search, mining real-time data streams, link analysis, clustering, recommender systems, social network graph mining, and large scale data mining tasks. (W)
Prerequisite(s): (CIS 2001 or CIS 200) and ECE 3100

CIS 350  Data Struct and Algorithm Anlys  4 Credit Hours
This course focuses on data design and algorithm design. Data design topics include object-oriented discussions of hashing, advanced tree structures, graphs, and sets. Algorithm design topics include the greedy, divide-and-conquer, dynamic programming, backtracking and branch-and-bound techniques. A significant discussion of algorithm complexity theory, including time and space trade-offs and elementary computability theory, is included. (F,W,S)
Prerequisite(s): (MATH 115 or MPLS with a score of 116) and (CIS 200 or IMSE 200) and CIS 275

CIS 3501  Data Strc & Alg Anlyys for SE  4 Credit Hours
This course focuses on data design and algorithm design for software engineers. Data design topics include object-oriented discussions of hashing, advanced tree structures, graphs and sets. Algorithm design topics include the greedy, divide-and-conquer, dynamic programming, backtracking and branch-and-bound techniques. A significant discussion of algorithm complexity theory, including time and space trade-offs and elementary computability theory, is included. (F,W,S)
Prerequisite(s): (CIS 200 or IMSE 200) and CIS 275 and CIS 285* and MATH 115

CIS 375  Software Engineering I  4 Credit Hours
This course presents an in-depth treatment of the following software engineering topics: software engineering paradigms, requirements, specification, functional design, object-oriented design, user interface design, software verification and validation, and the maintenance and management of software engineering artifacts, as well as an introductory discussion of software reliability. Various phases of the software engineering process will be modeled using UML. (F,W)
Prerequisite(s): IMSE 350 or CIS 3501 (CIS 350 or (ECE 370 and MATH 276) and ECE 276) or (ECE 370 and (COMP 270 or COMP 106 or COMP 220 or CPAS with a score of 40)

CIS 376  Software Engineering II  4 Credit Hours
This course continues the formal development of the software engineering material begun in CIS 375. Topics covered include personal software process, team software process, formal methods, security, software architecture, software quality assurance, software fault tolerance, the evaluation of the effectiveness of human computer interaction and software reliability. (W,S)
Prerequisite(s): CIS 375

CIS 381  Industrial Robots  4 Credit Hours
The course introduces students in engineering and computer science to fundamentals of robotics technology, programming and their applications in industrial environment. The emphasis will be on robotics anatomy and configurations, robotics kinematics, end effectors, use of sensors in robotics, robotics programming, design of robot workcell, robotics applications to production problems, cost justifications and robotics safety, rather than on the extensive theory of robotics. Three-hour lecture and three-hour laboratory per week.
Prerequisite(s): MATH 115
Restriction(s):
Can enroll if Class is Junior or Senior

CIS 387  Digital Forensics I  4 Credit Hours
This course takes a detailed, hands-on approach to study the procedures and techniques used to identify, extract, validate, document and preserve electronic evidence. Students completing this course will be familiar with the core computer science theory and practical skills necessary to perform basic computer forensic investigations, understand the role of technology in investigating computer-based crime, and be prepared to deal with investigative bodies at a basic level.
Prerequisite(s): (CIS 200 or ECE 270) and (CIS 310* or ECE 370* or ECE 372*)
Restriction(s):
Cannot enroll if Class is Freshman
Can enroll if Level is Undergraduate

CIS 390  Topics in Computer Science  1 to 3 Credit Hours
A course designed to offer selected topics in an area of computer science. The specific topics will be announced (together with special prerequisites) each time offered. Students must elect different topics to take both CIS 390 and CIS 391. (OC).
Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and ECE 276) or (ECE 370 and MATH 276)

CIS 391  Topics in Computer Science II  1 to 3 Credit Hours
A course designed to offer selected topics in an area of computer science. The specific topics will be announced (together with special prerequisites) each time offered. Students must elect different topics to take both CIS 390 and CIS 391. (OC).
Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and ECE 276) or (ECE 370 and MATH 276)

CIS 399  Internship  1 Credit Hour
Student works with industrial sponsor in the area of CIS. Permission of Internship Coordinator required. (F,W,S).

CIS 400  Programming Languages  4 Credit Hours
Systematic study of programming languages with regard to their implementation, structures, and use. Languages are compared with regard to their various data types, data structures, operations, control structures, programming environments, and ease of use in solving various programming problems. (F,W)
Prerequisite(s): (CIS 350 or IMSE 350 or CIS 3501) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276)

CIS 405  Algorithm Analysis & Design  3 Credit Hours
This course investigates how to design efficient algorithms. Topics include asymptotic analysis, amortized analysis, divide-and-conquer, dynamic programming, greedy algorithms, branch and bound, backtracking, lower bounds, NP-completeness and approximation algorithms.
Prerequisite(s): CIS 350

CIS 421  Database Mgmt Systems  4 Credit Hours
An introduction to database systems, concepts, and techniques. Topics covered include: database environments, ER modeling, relational data model, object-oriented databases, database design theory and methodology, database languages, query processing and optimization, concurrency control, database recovery, and database security.
Prerequisite(s): CIS 350 or CIS 3501 or IMSE 351 or (ECE 370 and MATH 276)
CIS 422  Massive Data Management  4 Credit Hours
An introduction to database systems, concepts, and techniques for big data. The course discusses classical relational technologies, and then covers the more current approaches to managing massive amounts of data for analytics purposes. Topics include database environments, database design, the relational data model, normalization, SQL, query processing, parallel databases and query processing, in-database analytics, data warehousing, key-value and column stores, NoSQL and NewSQL approaches for managing massive data. (F).
Prerequisite(s): (CIS 201 or CIS 200) and CIS 3200

CIS 423  Dec Support and Exp Systems  3 Credit Hours
The application of artificial intelligence to building decision support and expert systems for management and other applications. Topics include fundamentals of artificial intelligence, knowledge representation and knowledge processing, tools for building expert systems (logic programming, expert shells), decision support system design (modeling and simulation), expert system design (knowledge engineering, learning). (F).
Prerequisite(s): CIS 421

CIS 425  Information Systems  4 Credit Hours
This course is an introduction to the principles of information systems analysis and design and their role in business organizations. Topics include Systems Development Life Cycle (SDLC), using CASE (Computer Aided Software Engineering) tools for systems design and analysis, prototyping, Rapid Application Development (RAD), extreme programming, quality assurance through software engineering, and object-oriented systems design and analysis using UML (Unified Modeling Language). Participation in a major design project is a requirement for this course.
Prerequisite(s): CIS 375 and CIS 421*
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore

CIS 4261  Inf Sys Analysis & Design I  4 Credit Hours
An introduction to the principles of information systems analysis and design and their role in business organizations. Topics include information systems strategy and planning, ethical issues in information systems, system modeling, clean-room system engineering, domain ontologies, UML, Enterprise Unified Process, e-business, and supply-chain management, deployment and support. Participation in a major design project is a requirement for this course. (F).
Prerequisite(s): CIS 375 and CIS 421*

CIS 4262  Inf Sys Analysis & Design II  4 Credit Hours
This course is a continuation of CIS 4261 and provides students with breadth and depth in the information systems area. Topics include web-based information systems, e-commerce, computer-supported collaborative work, workflow systems, data mining, and data warehousing. Participation in a major design project is a requirement of this course. (W).
Prerequisite(s): CIS 4261

CIS 427  Comp Networks and Dis Process  4 Credit Hours
Study of the management aspects of computing networks and distributed systems. Topics include network architectures (ISO/OSI, TCP/IP, ATM), communication hardware (transmission media, network adaptors, switches), encoding, framing, error detection and correction, reliable transmission, data link control and LAN technology, internetworking, routing/congestion control, network design/management.
Prerequisite(s): (CIS 350 or CIS 3501 or IMSE 351) or (CIS 370 and ECE 276) or (ECE 370 and MATH 276) and IMSE 317

CIS 428  High Speed Network Admin  3 Credit Hours
The course requires students to setup and manage their own computer network in the lab. Topics include: overview of file servers, LAN configurations and protocols, server hardware (CPU, hard drives, memory), server clients, server installation, domains, user accounts, groups, rights, directories, permissions, applications, printers, other OS, monitoring, maintenance, high speed switching, ATM, video, routers, firewalls. (YR).
Prerequisite(s): CIS 427

CIS 435  Web Technology  3 Credit Hours
This course deals with the study of technologies used to design and implement multimedia web sites. Topics include web servers, HTML, CGI, scripting languages, Java applets, back-end database connectivity, web security, multimedia, XML. (F,W).
Prerequisite(s): CIS 553 CIS 375*
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

CIS 436  Mobile App Des & Impl  3 Credit Hours
This course introduces students to the development of software applications for programmable mobile and wireless intelligent handheld devices. Topics covered include the different mobile development platforms, best practices in mobile user interaction design, software quality assurance in mobile environment, security and privacy issues, and context-aware computing. Students will participate in a final project.
Prerequisite(s): CIS 375*
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters

CIS 437  Advanced Networking  3 Credit Hours
Topics include an overview of the internet, congestion control, quality of service, internet multicasting, multimedia networking, mobile and wireless networks, vehicular networks, overlay networks, peer-to-peer networks, internet management (SNMP), and internet applications (web-HTTP and email-SMTP).
Prerequisite(s): CIS 427
Restriction(s):
Cannot enroll if College is Business

CIS 447  Intro Computr & Ntwrk Security  3 Credit Hours
This course will provide a broad-spectrum introduction to the fundamental principles of computer and network security. Topic will include security policies, models and mechanisms for confidentiality, integrity and availability, access control, authorization, cryptography and applications, threats and vulnerabilities in computer networks, key management, firewalls and security services in computer networks.
Prerequisite(s): CIS 450*
Restriction(s):
Cannot enroll if College is Business or Education, Health, and Human Services

CIS 450  Operating Systems  3 or 4 Credit Hours
Introduction to computer operating systems. Process control, threads, concurrency, memory management, virtual memory, uniprocessor, multiprocessor, and real-time scheduling, I/O management, disk scheduling, file management, distributed processing, client/server, clusters, distributed process management, security. (F,W).
Prerequisite(s): CIS 310 and (CIS 350 or CIS 3501 or IMSE 350) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276) and IMSE 317*
CIS 451 Computer Graphics 3 Credit Hours
Basic geometrical concepts: graphics output primitives, two-dimensional transformations, windowing and clipping, three-dimensional viewing, visible surface detection methods, and graphical user interfaces. (F).
Prerequisite(s): MATH 227 (MATH 217 and CIS 350 or IMSE 350 or CIS 3501 or (ECE 370 and MATH 276) or (ECE 370 and ECE 276))

CIS 452 Inf Vis & Multimedia Gaming 3 Credit Hours
This course introduces basic techniques for digital animation, computer and video games, and web multimedia. Topics include the process of creating animated video clips from start to finish, including story creation, storyboarding, modeling, animation, and post-production; several key techniques for video editing and motion generation, including keyframe, motion capture editing, collision detection, particle systems, physical simulation, and real-time rendering; techniques for web animation and multimedia; and internet gaming.
Prerequisite(s): CIS 451
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

CIS 456 Windows Programming 3 Credit Hours
This course covers the core tenets of the Microsoft Foundation Class (MFC) or similar package and Windows programming. The emphasis will be on the relationship between Windows Operating System and MFC. Windows OS has three major components: user, graphics device interface (GDI), and kernel. User is a module that controls input devices, GDI is a module that services output devices, and kernel controls internal resources. These three components are called the API and communicate with MFC. Projects will be assigned to simulate the major components of API using MFC. (YR)
Prerequisite(s): CIS 350

CIS 457 Digital Forensics II 4 Credit Hours
This course is a continuation of Digital Forensics I and will focus on Internet Forensics. Students will examine in-depth concepts in Internet evidence collection and preservation, as well as applications of contemporary commercial forensic investigative software.
Prerequisite(s): (CIS 427* or ECE 471*) and (CIS 387 or ECE 387)
Restriction(s):
Cannot enroll if Class is Junior
Cannot enroll if College is Business

CIS 467 Compiler Design 3 Credit Hours
Principles of language compilation. Introduction to formal languages. Lexical analysis, top-down and bottom-up parsing, code generation and optimization. Error handling and symbol table management. Run-time storage management. Programming language design. Introduction to compiler-writing tools such as LEX and YACC. (F,W)
Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and MATH 276)

CIS 475 Software Engineering Seminar 3 Credit Hours
The focus of this course is on management issues related to modern software engineering practice. Students read and discuss papers written by master software engineering professionals. Seminar topics discussed include: management of software engineering processes, software measurement, software engineering ethics, and legal issues related to professional practice. (W, S).
Prerequisite(s): CIS 376

CIS 476 Soft Arch & Design Patterns 3 Credit Hours
This course focuses on design patterns in object-oriented programming. This course begins with an overview of UML and a review of object-oriented programming and then moves on to various structural, behavioral and creational patterns, including: facades, adaptors, bridges, factories and the template method. Analysis of case studies will also be discussed. Using various modern software tools, students will apply various design patterns to real-world software design problems to gain complete practical understanding. (F,W)
Prerequisite(s): CIS 375
Restriction(s):
Can enroll if College is Engineering and Computer Science

CIS 479 Intro to Artificial Intel 3 Credit Hours
This course introduces students to basic concepts and methods of artificial intelligence from a computer science perspective. Emphasis of the course will be on the selection of data representations and algorithms useful in the design and implementation of intelligent systems. The course will contain an overview of one AI language and some discussion of important applications of artificial intelligence methodology. (S).
Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and MATH 276) or (ECE 370 and ECE 276)

CIS 481 Computational Learning 3 Credit Hours
This course covers basic computational aspects of learning to perform a task and improve with experience. Topics include learning frameworks and problem formulations; standard models, methods, computational tools, algorithms and modern techniques; and methodologies to evaluate learning ability and to automatically select optimal models. The main focus is on computer science (e.g., basic runtime, space and complexity analysis, programming, and empirical evaluations?). Simple applications to areas such as computer vision, natural language processing (NLP), and robotics will also motivate the course material. (W)
Prerequisite(s): CIS 306 and (MATH 217* or MATH 227*) and (IMSE 317* or BENG 364* or MATH 425*)
Restriction(s):
Cannot enroll if Class is Graduate or Doctorate

CIS 487 Computer Game Design & Implem 3 Credit Hours
This course deals with the study of the technology, science and art in the creation of computer games. The focus of the course will be hands-on development of computer games. Students will study a variety of software technologies relevant to computer game design, including programming languages, scripting languages, operating systems, files systems, networks, simulation engines and multi-media design systems. Lecture topics will be taken from several areas of computer science: simulation and modeling, computer graphics, artificial intelligence, real-time processing, game theory, software engineering, human computer interaction, graphic design and game aesthetics. (F)
Prerequisite(s): CIS 375*
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
CIS 488 Computer Game Design II 3 Credit Hours
This course is a continuation of the material studied in CIS 487. The focus of the course will be hands-on development of computer game development tools (e.g. game engines). Students will study a variety of software technologies relevant to computer game design, including: 3D graphics, computer animation, data-driven game design, multiplayer game programming, and game AI. Lecture topics will be taken from several areas of computer science: simulation and modeling, computer graphics, artificial intelligence, game theory, software engineering, human computer interaction and game content development. (W)
Prerequisite(s): CIS 487
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Engineering and Computer Science

CIS 490 Advanced Topics 1 to 3 Credit Hours
This course is intended for seniors and graduate-level students in CIS. For specific topic, consult current semester’s Schedule of Classes. (OC).
Prerequisite(s): CIS 350 or CIS 3601 or IMSE 350 or (ECE 270 and ECE 276) or (ECE 370 and MATH 276)

CIS 491 Research Project I 1 to 4 Credit Hours
Provides the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to registration in the semester when such a course is to be elected, an interested student must submit to the CIS chair and one CIS faculty member a written request for permission to elect a research course on the appropriate form available in the CIS Office. The request will include a description of the proposed research project. The CIS chair will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit. Grades will be granted on a Pass/Fail (S/E) basis exclusively. (F,W,S).
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is CIS/Information Systems

CIS 492 Research Project II 1 to 4 Credit Hours
This course is a second registration for a research project in CIS. (F,W,S).
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is CIS/Information Systems

CIS 493 Independent Study I 1 to 4 Credit Hours
Readings or analytical assignments in accordance with the needs and interests of those enrolled and agreed upon by the student and an instructor, which shall not duplicate a formal course offering. Permission of instructor required. (F,W,S).

CIS 494 Independent Study II 1 to 4 Credit Hours
This course is a second registration for an independent study in CIS. Permission of instructor required. (F,W,S).

CIS 495 Design Seminar 4 Credit Hours
Students participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice in computer science. (F,W,S)
Prerequisite(s): CIS 375
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

CIS 496 Design Seminar for SE 4 Credit Hours
Software engineering students participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice in software engineering.
Prerequisite(s): CIS 376 and CIS 476

CIS 497 Design Seminar for SE I 2 Credit Hours
Software engineering students continue to participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice in software engineering.
Prerequisite(s): CIS 4961 and CIS 476*
Restriction(s):
Can enroll if Class is Engineering and Computer Science

CIS 4971 Cap Sem for Data Sci I 2 Credit Hours
Data science students participate in the design and implementation of a major data science project. Seminar topics discussed include: computing ethics and professional practice in data science. (F, W, S)
Prerequisite(s): CIS 3200 and (STAT 326 or STAT 425)
Restriction(s):
Can enroll if Class is Senior

CIS 4972 Cap Proj for Data Sci II 2 Credit Hours
Data science students continue to participate in the design and implementation of a major data science project. Seminar topics discussed include: computing ethics and professional practice in data science. (F, W, S)
Prerequisite(s): CIS 4971 and STAT 430*
Restriction(s):
Can enroll if Class is Senior

CIS 499 Internship 1 Credit Hour
Student works with industrial sponsor in area of CIS. Approval of Internship Coordinator required. (F,W,S).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

**Criminal Justice Studies (CRJ)**

**CRJ 200  Intro to Criminal Justice  3 Credit Hours**
This course provides an introduction to issues of crime and neighborhood disorder as well as society's responses to these problems. We will examine the nature and causes of crime, criminal law, constitutional safeguards, and the organization and operation of the criminal justice system including the police, courts, and corrections. The history of the criminal justice system, terminology and career opportunities will also be discussed.

**CRJ 240  Ethics  3 Credit Hours**
A study of ethical concepts and theories. Typical questions: Is the morality of an action based on its results or on the intent of the person acting? Is ethics purely rational? What makes a good person? Ethical principles may be applied to such issues as abortion, capitalism, war, and capital punishment. (F, W).

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 300  Political Analysis  3 Credit Hours**
Introduction to research design, data collection and analysis, sampling, and statistics for social scientists. Should be elected as soon as possible after the declaration of major. POL 101 or equivalent recommended. (F, W).

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 302  Theory of the Law  3 Credit Hours**
A comprehensive introduction to the theoretical foundations and the political functions of law, with special emphasis on the different moral justifications of law; the relation between law and justice; the relation between law and freedom; due process and fairness in any legal system. This course is designed to have special relevance for those considering law as a career. POL 101 or equivalent recommended. (OC).

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 307  Forensic Anthropology  3 Credit Hours**
Forensic anthropology has recently seen a lot of exposure through popular television shows like CSI and Bones. Have you ever wondered how much of what you were seeing was real? Do the dead really *talk* about their lives and how they died? This course is designed as an introductory course for students interested in demystifying and getting to know the real forensic anthropology. Forensic anthropology is a specialized sub-field of biological anthropology that applies many of the methods of biological anthropology to the discovery, excavation, and identification of human remains in a medico-legal context. In this class we learn about the human skeleton and explore the key methods that are used in the identification of individuals, such as age-at-death estimation, sex determination, stature, ancestry, and personal identification. We also deal with assessment of the different types of trauma, and whether or not we can tell the cause and manner of death. The broader ethical roles and responsibilities of forensic anthropologists are also discussed, including discussions of how we determine race/ancestry, as well as ethical responsibilities we have during the investigation of human rights abuses, disasters and criminal inquiries. (F)

**Restriction(s):**
Cannot enroll if Class is Freshman

**CRJ 308  Moral and Political Dilemmas  3 Credit Hours**
This course focuses on the tensions and relations between personal morality and political action by examining the moral aspect of contemporary policy issues such as the right to life, environmental policy, and discrimination. POL 101 or equivalent recommended. (YR).

**Restriction(s):**
Can enroll if Class is Junior or Senior

**CRJ 309  Introduction to Law & Society  3 Credit Hours**
Law and Society is a field of study that examines the interaction between the legal system and society from the perspective of the social sciences and humanities. This course focuses on core components of the legal system including courts, lawmaking bodies, regulatory administration, alternative dispute resolution systems, and the legal profession. Throughout the course, students develop the ability to examine the legal system and its relationship to equality, social change, and public benefits using social science evidence. (YR)

**Restriction(s):**
Cannot enroll if Class is Freshman

**CRJ 316  The American Judicial Process  3 Credit Hours**
An analysis of American legal institutions, processes, doctrines, and their relationship to the formulation of public policy and the solution of social problems. POL 101 or equivalent recommended. (AY).

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 322  Psychology of Prejudice  3 Credit Hours**
A consideration of ethnic (including racial, sexual, and religious) prejudice from the psychological point of view, focusing on the mind of both the oppressor and the oppressed. (AY).

**Prerequisite(s):** PSYC 170 or PSYC 171 or PSYC 101

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 323  Urban Politics  3 Credit Hours**
A survey of the political process in urban areas, giving special attention to the changing roles of cities in American politics. POL 100 or equivalent recommended. (YR).

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 325  Psyc of Interpersonal Relation  3 Credit Hours**
This course presents an overview of theory and research conducted by social psychologists that has been aimed at understanding interactions between individuals. Topics include an exploration of the research process that is used to investigate interpersonal relationships, the processes underlying social perception, friendship, liking, love, close relationships, aggression and violence in interpersonal relationships. (YR).

**Prerequisite(s):** PSYC 170 or PSYC 171 or PSYC 101

**Restriction(s):**
Can enroll if Level is Undergraduate

**CRJ 335  Philosophy of Law  3 Credit Hours**
An examination of some of the important philosophical issues relevant to law and legal theory, including legal punishment, legal responsibility, and the relationship between law and morality. Both classical and contemporary writings will be studied. Prerequisite: a previous philosophy course or permission of instructor. (AY).

**Restriction(s):**
Can enroll if Level is Undergraduate
CRJ 350 Poverty and Inequality 3 Credit Hours 
In a middle class-oriented culture, the poor experience many problems and are also considered deviant, which tend to make poverty self-perpetuating. This stratum will be explored with respect to life styles, life changes, contributing factors, characteristics, individual and social consequences, and evaluation of attempted solutions. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s): Can enroll if Level is Undergraduate

CRJ 362 Women, Politics, and the Law 3 Credit Hours
An introductory study of interrelationships of the functioning of social life. (F, W).
Restriction(s): Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

CRJ 363 Crim Justice Syst and Policy 3 Credit Hours
The structure and processes of criminal justice administration in America, including analysis of current issues in police behavior, courts, and corrections. POL 101 or equivalent recommended. (AY).
Restriction(s): Can enroll if Level is Undergraduate

CRJ 369 US Civil Rights Movement 3 Credit Hours
A survey of race relations and civil rights activity from the late 19th century to the present. The principal focus, however, is on the period since World War II, especially on the mass-based Southern civil rights movement (1955-1965) and the various policy debates and initiatives of the past thirty years, most notably affirmative action and busing. We also examine critiques of non-violence and integrationism. (AY).
Restriction(s): Can enroll if Level is Undergraduate

CRJ 382 Social Psychology 3 Credit Hours
An introductory study of interrelationships of the functioning of social systems and the behavior and attitudes of individuals. (YR).
Prerequisite(s): PSYC 170 or PSYC 171 or SOC 200 or SOC 201 or PSYC 101
Restriction(s): Can enroll if Level is Undergraduate

CRJ 390 Topics in Criminal Justice 3 Credit Hours
Examination of problems and issues in selected areas of criminal justice. Title as listed in the Schedule of Classes will change according to content. Course may be repeated when specific topics differ. (OC)

CRJ 403 Minority Groups 3 Credit Hours
The status of racial and ethnic minorities in the United States with particular reference to the social dynamics involved with regard to majority-minority relations. Topics of study include inequality, segregation, pluralism, the nature and causes of prejudice and discrimination and the impact that such patterns have upon American life. (F, W).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s): Can enroll if Level is Undergraduate

CRJ 407 Psychology of Adolescence 3 Credit Hours
Considers adolescence as an interaction of rapid biological and social change. Examines the theoretical and empirical literature in some detail. Prerequisite or permission of instructor. (F, W).
Prerequisite(s): PSYC 170 or PSYC 171 or PSYC 101
Restriction(s): Can enroll if Level is Undergraduate

CRJ 408 Police and the Community 3 Credit Hours
This course examines the diverse roles of the public police and how to achieve effective community policing. After reviewing the evolution of community policing, this course focuses on understanding police mission and culture, involving the community, proactive policing, implementing community policing, communicating with a diverse population, the challenge of gangs, forming partnerships with the media, and building partnerships in the community. (F, W)
Prerequisite(s): CRJ 200

CRJ 409 Intel and Homeland Security 3 Credit Hours
Full Title: Intelligence and Homeland Security This course will provide an in-depth examination of the principles that guide the collection, analysis, and sharing of intelligence in the United States and how these principles impact homeland security. Topics will include the US Intelligence community (CIA, FBI, military intelligence), the National Criminal Intelligence Sharing plan, the National Intelligence Strategy, and the recent emphasis placed on Intelligence-Led Policing. Emphasis will also be placed on the increased role that local and state law enforcement agencies as well as private sector entities play in contributing to the assessment of threats to homeland security. (F,W,S)
Prerequisite(s): CRJ 200

CRJ 410 Quantitative Research 4 Credit Hours
An introduction to methods of data collection and analysis. Also discussion of research design and the philosophy of social science. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s): Can enroll if Level is Undergraduate

CRJ 412 Men and Masculinities 3 Credit Hours
This course addresses the question, "What is a man?" in various historical, cross-cultural, and contemporary contexts. A major focus on the social and cultural factors that underlie the shape and conceptions of manhood and masculinity in America as well as in a variety of societies around the globe. (AY)
Prerequisite(s): SOC 200 or SOC 201 or ANTH 101 or WST 275 or WGST 275 or PSYC 275 or SOC 275 or ANTH 275 or HUM 275 or WGST 303 or PSYC 303 or SOC 303 or ANTH 303 or HUM 303
Restriction(s): Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

CRJ 413 American Constitutional Law 3 Credit Hours
A major theme of this course is the development of the constitution, especially focusing on the themes of judicial review: judicial self-restraint and judicial activism; the expansion of executive and legislative powers; and the rise of "substantive due process of law." POL 101 or equivalent recommended. (AY)
Prerequisite(s): POL 101
Restriction(s): Can enroll if Level is Undergraduate
CRJ 4130 Qualitative Research Methods 3 Credit Hours
Qualitative research methods involve the observation and study of people in their everyday lives, in their taken-for-granted worlds. Qualitative research seeks to combine close empirical observation with analytic techniques that demand (and teach) personal and social self-consciousness as necessary to an understanding of the social world of "others". This course in qualitative methods is designed to acquaint students with field research theories and techniques. Students will gain hands-on experience in participant observation, interviewing, and the use of sociological scholarship. Qualitative Reserach Methods will prepare students to gather data, focus the data in a social scientific manner, analyze the data, and then organize it in reportable form. (F, W).
Prerequisite(s): SOC 308

CRJ 414 Civil Rights and Liberties 3 Credit Hours
An analysis of the Bill of Rights and the 14th Amendment, with particular emphasis upon recent landmark or controversial Supreme Court decisions dealing with freedom of speech and religion, rights of criminal defendants; cruel and unusual punishment, right to privacy; civil rights and equal protection clause; and apportionment. POL 101 or equivalent recommended. (YR).
Prerequisite(s): POL 101
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

CRJ 416 Criminal Law 3 Credit Hours
A survey of the major judicial, executive, and legislative decisions in the field of criminal law. (AY)
Prerequisite(s): POL 101
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 421 Group Processes 3 Credit Hours
Topics treated include group cohesiveness, "group think," the social structure of groups, emotional factors in group life, leadership, and development of groups. (YR).
Prerequisite(s): PSYC 170 or PSYC 171 or SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 423 American Social Classes 3 Credit Hours
Stratification of American communities and society: a review of the findings of major studies and an introduction to methodology. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 425 Lab in Social Psychology 4 Credit Hours
A broad introduction to research methods in basic and applied social psychology. Students will receive training in construction, implementation, and interpretation of scientific procedures used in the study of social psychology. Topics include: questionnaire construction, experimental design, and various multivariate analytic techniques. (AY).
Prerequisite(s): PSYC 381*
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 435 Urban Sociology 3 Credit Hours
A descriptive study of the form and development of the urban community with respect to demographic structure, spatial and temporal patterns, and functional organization. The relationship of city and hinterland. Social planning and its problems in the urban community. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 440 Abnormal Psychology 3 Credit Hours
An introduction to the field of psychopathology, the study of mental disorders. Includes exposure to a number of historical and theoretical perspectives, each with their own theories, methodologies, and treatment approaches. Disorders covered will include: anxiety and mood disorders, personality disorders, schizophrenia, sexual disorders, and psychosomatic disorders. (F, W).
Prerequisite(s): PSYC 170 or PSYC 171 or PSYC 101
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 443 Gender Roles 3 Credit Hours
This course will investigate the development of gender roles in childhood and adolescence due to either innate physiological differences or sociological patterning, the effect of gender roles upon male-female relationships within our society, and the possibility of transcending sociological gender roles in alternate modes of living. (F,W).
Prerequisite(s): PSYC 170 or PSYC 171 or SOC 200 or SOC 201 or PSYC 101
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 445 Contemporary Ethical Theory 3 Credit Hours
An intensive study of a topic in recent ethical theory. Topics will vary with each offering. Among the topics: ethics and law, utilitarianism, virtue theory, theories of justice, morality and emotion, ethics and partiality. (AY).
Prerequisite(s): PHIL 240
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 446 Marriage and Family Problems 3 Credit Hours
Sociological analysis of problems encountered within the institution of marriage with particular reference to such issues as choosing a marriage partner, sexual adjustment, occupational involvement, conflict resolution, child rearing, divorce and readjustment. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 447 Family Violence 3 Credit Hours
Sociological analysis of various forms of family violence which occur disproportionately in the lives of girls and women. Topics such as incest, sexual abuse, date rape, wife battering, and elder abuse will be situated within the social and cultural context of contemporary gender relationships. Social and political responses to the phenomena will be examined. Permission of instructor is an optional prerequisite. (YR).
Prerequisite(s): SOC 200 or SOC 201 or SOC 301 or SOC 443 or PSYC 405 or WST 405
Restriction(s):
Can enroll if Level is Undergraduate
CRJ 453  Sociology of Law  3 Credit Hours
Various aspects of the relationship between law and society are explored. After a look at processes of law making, attention is turned to the administration of law. This involves a study of the activities of legislatures, courts, police, and correctional agents. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 455  Immigrant Cultures and Gender  3 Credit Hours
The history and culture of immigration since 1850, including: (1) formation and perseverance of immigrant communities and interethnic boundaries; (2) relations between the homeland and the immigrant; and (3) impact of migration on family life and gender roles. Prerequisite: ANTH 101 and junior or senior standing. (AY).
Prerequisite(s): ANTH 101 or WST 275 or WGST 275 or PSYC 275 or SOC 275 or ANTH 275 or HUM 275 or WGST 303 or PSYC 303 or SOC 303 or ANTH 303 or HUM 303
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

CRJ 460  Law & Culture  3 Credit Hours
This course explores the ways in which legal norms, and processes are shaped by the societies in which they are created. Issues discussed may include the role of culture in criminal defenses, conflicts between religious and secular law, and how race, gender and ethnicity impact engagement with the law as lawyers and as clients. The class addresses anthropological and sociological theories about the nature of law and disputes, examines related studies of legal structure in non-Western cultures, and considers the uses of sociology and anthropology in studying our own legal system. By examining individual legal institutions in the context of their particular cultural settings, students can begin to make cross-cultural comparisons and contrasts. In doing so, the class confronts the challenge of interpreting and understanding the legal rules and institutions of other cultures while assessing the impact of our own social norms and biases. (W)
Restriction(s):
Can enroll if Class is Junior or Senior

CRJ 461  Cops & Cons: Women in Prison  3 Credit Hours
Course uses contemporary theories of gendered organizations to frame analyses of prison policies and practices in employment and incarceration as they reflect and reproduce gender inequalities. Analyses will be framed within a restorative justice defense, that is, a critique of the current criminal justice system of retributive justice and a paradigm of what a alternative system could be.
Prerequisite(s): SOC 200 or SOC 201 or WST 275 or CRJ 240 or CRJ 300 or WGST 275 or PSYC 275 or SOC 275 or ANTH 275 or HUM 275 or WGST 303 or PSYC 303 or SOC 303 or ANTH 303 or HUM 303
Restriction(s):

CRJ 465  Deviant Behavior/Soc Disorganz  3 Credit Hours
General analysis of the concepts of social deviance and social disorganization: factors producing each condition, the effects of social control measures on the course of deviance and disorganization, consequences for the social system, and the relationship between the two concepts. (YR)
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 466  Drugs, Alcohol, and Society  3 Credit Hours
Analyzes of the sociology of substance use and abuse. Provides a sociological framework for understanding issues and evaluating our nation's responses to the phenomenon of drug use. Drawing on sociocultural and social psychological perspectives, this course systematically examines the social structure, social problems, and social policy aspects of drugs in American society. Prerequisite or permission of instructor. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Class is Junior or Senior

CRJ 467  Drugs, Crime, and Justice  3 Credit Hours
Provides a comprehensive analysis of the current state of research on interactions between crime and drug abuse. Examines drug distribution, organization of drug systems, and mechanisms of social control of drug systems. Analyzes the social problems associated with drugs and crime. The course also focuses on drug-law enforcement and public policy strategies for dealing with drugs and crime. Prerequisite or permission of instructor. (YR).
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Can enroll if Class is Junior or Senior

CRJ 468  Criminology  3 Credit Hours
Analysis of criminal behavior in relationship to the institutional framework of society. Emphasis upon the more routinized and persistent forms of criminality along with the joint roles played by victims, the criminal, the police, and all other relevant parties. (F,W)
Restriction(s):
Can enroll if Level is Undergraduate

CRJ 469  Juvenile Delinquency  3 Credit Hours
The analysis of juvenile delinquent behavior in relationship to the institutional framework of society. Emphasis on the extent, causes, and methods of juvenile delinquency in the United States. (YR)
Prerequisite(s): SOC 200 or SOC 201

CRJ 470  Current Issues in Crim Justice  3 Credit Hours
Current issues in the field of criminal justice and law enforcement in the U.S. and other countries. Topics include an evaluation of police activities, problems of apprehensions and prosecution, the courts and the correctional system, and the efficacy of the legal structure in its social context. (F,W,S).
Prerequisite(s): CRJ 200

CRJ 471  Comp Crim Justice Systems  3 Credit Hours
Description, analysis, and evaluation of selected criminal justice systems throughout the world. Course focuses on the various systems, theories, structures, methods and functions, including common law systems and socialist law systems. (YR).
Prerequisite(s): CRJ 200

CRJ 472  Correctional Systems  3 Credit Hours
Analysis of the legal, social, and political issues affecting contemporary correctional theory and practice. Topics covered include the history of corrections; the nature of existing institutions; the functions and social structure of correctional institutions; and alternatives to institutional incarceration, probation, and parole. (OC).
Prerequisite(s): CRJ 200
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
CRJ 473  Race, Crime and Justice  3 Credit Hours
This course is an analysis of race and its relation to crime in the criminal justice system. Students will analyze and interpret the perceived connection between race and crime, while exploring the dynamics of race, crime, and justice in the United States. This course is designed to familiarize students with current research and theories of racial discrimination within America’s criminal justice system.
Prerequisite(s): SOC 200 or SOC 201
Restriction(s):
Cannot enroll if Class is Freshman

CRJ 474  Cyber Crimes  3 Credit Hours
This course is in a hands-on approach investigating cyber crimes (e.g. child exploitation, predators, sexual/vice crimes, identity theft, etc.). Students will explore and discuss legal cases involving cyber technology and predatory practices and review applicable evidentiary rules. Students will also analyze the practical and ethical considerations that apply to undercover internet operations, and evidence collection and use to locate and apprehend offenders.
Prerequisite(s): SOC 200

CRJ 475  Digital Evidence  3 Credit Hours
This course is a detailed approach to how computers and networks function, how they can be used in virtually any type of crime, and how they can be used as a source of evidence. Students will analyze relevant legal issues and specific investigative and forensic processes related to technology. This course examines how deductive criminal profiling, a systemic approach to focusing an investigation and understanding criminal motivations, is utilized to locate and apprehend offenders.
Prerequisite(s): SOC 200

CRJ 476  Inside Out Prison Exchange  4 Credit Hours
This community-based course, taught in a local correctional facility, brings university students and incarcerated students together to study as peers. Together students explore issues of crime and justice, drawing on one another to create a deeper understanding of how these issues affect our lives as individuals and as a society. The course creates a dynamic partnership between UM and a correctional facility to allow students to question approaches to issues of crime and justice in order to build a safer and more just society for all. The course encourages outside (UM) students to contextualize and to think deeply about what they have learned about crime and criminals and to help them pursue the work of creating a restorative criminal justice system; it challenges inside students to place their life experiences into larger social contexts and to rekindle their intellectual self-confidence and interest in further education.
Restriction(s):
Can enroll if Class is Junior or Senior

CRJ 477  Criminal Justice Internship  3 to 6 Credit Hours
Provides field experience in social welfare or criminal justice agencies, e.g., for children/adolescents, in residential programs, in abuse remediation, in probation, for chemical dependencies, in victim advocacy, for the elderly, in prisons, for special needs populations, in court services, in medical/public health, in police services, and for families and communities. Supervision by approved field instructors. An internship of 80 hours is required for three (3) credits. Instructor and student will work together to determine appropriate intern placement. Approval of instructor. (F,W).
Prerequisite(s): CRJ 200

CRJ 479  Women's Studies Internship  3 Credit Hours
Provides field experience in social welfare agencies, e.g., for children/adolescents, abuse, chemical dependencies, the elderly, special needs populations, criminal justice/probation, medical/public health, and families and communities. Supervision by approved field instructors. Focus is on analysis of the social context of agency, the clients, and staff. An internship of 80 hours is required for three (3) credits. Prerequisite: WGST 275 and permission of the Women's Studies Director is required. (F, W).
Prerequisite(s): WST 275

CRJ 480  Criminal Justice Theory  3 Credit Hours
Criminal Justice theorists study of formal and informal mechanisms of social control in specific places, such as bars and night clubs, city parks, schools and shopping malls. Students in this course will learn to apply their theories to practical, real life situations to achieve behavioral changes among individuals and groups toward the objective of effective crime control.

CRJ 481  Terrorism & US Natl Security  3 Credit Hours
The United States responded to the events of September 11, 2001 with a series of unprecedented action under the umbrella of homeland security and the War on Terror. This course examines American National security policy by asking a few key questions: What is terrorism and how does it threaten the United States? How has the United States responded to the threat of terrorism over time? What have the consequences of US policy been to date? Finally, how would we balance a desire for security with our desire for civil liberties and ethical action?
Prerequisite(s): CRJ 468

CRJ 482  Legal Ethics  3 Credit Hours
This course will explore the many ethical dilemmas faced by professionals in the legal system. We will pay particular attention to the criminal justice system and to the Rules of Professional Conduct for attorneys. Some of the questions we may address are: How should an attorney consider his/her own ethical beliefs when deciding the appropriate course of action in a case? How should a judge consider his/ her own ethical beliefs when making a juvenile justice decision? How should a police officer determine the ethical course of action when the law’s instructions are ambiguous?
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if Level is Undergraduate

CRJ 483  Justice, Crime and Environment  3 Credit Hours
This service-learning course focuses on environmental justice and law. Environmental Justice is defined as the fair treatment of all people with respect to the development, implementation, and enforcement of environmental laws. In the classroom, students learn the theory, history, and enforcement of environmental laws and regulations in Detroit, Michigan, and nationwide. In a required civic engagement project, students apply their substantive knowledge to solve local environmental problems. Through classroom learning and projects with community organizations, students connect law and justice concerns to Detroit’s environmental problems.
Restriction(s):
Can enroll if Class is Junior or Senior
CRJ 484  White Collar Crime  3 Credit Hours
This course reviews the history, categories, and problems related to white-collar crime. The course covers these topics by incorporating both legal and empirical perspectives in the study of white-collar crime. In this course, we will focus on the substantive and procedural white collar crime laws ('law on the books') and analyze real white collar crime cases. Simultaneously, we will pay special attention to the dynamic relationship between white collar crime and the American regulatory framework. As a result, we will assess the relationship and differences between various types of white collar crime and the regulatory regimes that oversee the business sector ('law in action'). (OC)

CRJ 485  Psychology Internship  3 or 6 Credit Hours
The psychology internship offers experience in a wide variety of placements dealing with human services. These include programs related to child abuse, crisis intervention, geriatrics, human resources/staff development, mental retardation, probation departments, teenage runaways, substance abuse, and women's issues. The program is designed for juniors and seniors with a concentration in psychology or behavioral sciences and involves training in listening and helping skills. Written permission of instructor required. (F,W).
Prerequisite(s): PSYC 170 or PSYC 171 or PSYC 101
Restriction(s):
Can enroll if Class is Junior or Senior

CRJ 486  Criminalistics: CSI to Justice  3 Credit Hours
This course is a hands-on approach to learning about crime scene investigation. The course takes the student from the first response on the crime scene to documenting crime scene evidence and preparing evidence for courtroom presentation. It includes topics such as arson, homicide, suicide, and felony murder. CRJ 486 examines how the police conduct successful investigations, how the associated crime scene evidence is collected, and how to use the evidence to locate, apprehend, and prosecute the suspect.
Prerequisite(s): CRJ 200

CRJ 487  Forensic Science  3 Credit Hours
This class is a study of the increasing use of scientific evidence in criminal cases, gathered by crime scene investigators (CSI) and/or later developed in a crime laboratory. After a review of the history and development of forensic scientific evidence, the class will study the standards used by courts to prevent the admission of so-called "junk science" and the emergence of DNA as a new model for forensic science evidence. Several common forms of scientific evidence, beginning with DNA, will be studied, including fingerprints, handwriting, hair, bite marks, ballistics, fire and arson debris, and blood stains. The study also includes the forensic use of social sciences testimony, including the reliability of eyewitness testimony and several forms of abuse "syndrome" testimony. Each of these forms of evidence will be described and then compared to the "junk science" standards and to the most recent information about their reliability. The class will examine the impact of forensic science evidence or jurors and the so-called "CSI Effect". The reaction of courts, attorneys and police to juror expectations for scientific evidence will be reviewed. Finally, the class will review the impact of DNA exonerations and the National Academy of Sciences report on the reliability of forensic science evidence and how judges and appeals courts are responding to those challenges, particularly the current controversies concerning over the validity of such violence. (W)

CRJ 488  Criminal Procedure  3 Credit Hours
This class is a study of Constitutional law regarding criminal procedure in the United States. Initially the class reviews the federal and state court structure relating to criminal prosecutions and the flow of cases through those systems. The focus is then on the nature of individual rights under the Constitution, the case law, and the concept of the "exclusionary rule." The class then examines specific issues and procedures relating to arrests, searches, confessions and identifications, and analyzes the constitutional requirements for each. (W)

CRJ 489  Law, Crime, and Society  3 Credit Hours
This course will incorporate both legal and empirical perspectives to emphasize the dynamic relationship between law, crime, and society. In this course, we will focus on the substantive and procedural criminal law ('law on the books') while we simultaneously focus on empirical research of enforcement, case processing and sentencing in the criminal justice system (the 'law in action'). As a result, we will assess the relationship and differences between what the criminal law says 'on the books' and the criminal justice system 'in action'.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

CRJ 490  Topics in Criminal Justice  3 Credit Hours
Examination of problems and issues in selected areas of criminal justice. Title as listed in Schedule of Classes will change according to the content of the course. Course may be repeated when specific topics differ.
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

CRJ 494  Pol Sci Internship Seminar  3 or 6 Credit Hours
This is the academic part of the internship. Students must meet with other interns once a week to analyze political dynamics within their placements. Students are required to keep journals, prepare papers and reports, and do other written work. Anyone taking POL 495 or 496 is required to take POL 494. It may not be taken by itself. Repeatable if topic differs. Only six hours of internship credit is allowable toward concentration requirement. (F,W,S).

CRJ 495  Political Science Internship  3 to 6 Credit Hours
Field study placements in national, state, local government or private agencies. Primarily for junior or senior political science concentrators or other qualified applicants. Maximum of 20 students selected each term. Students must also register for CRJ 494. Only six hours of internship is allowed toward concentration requirement. (F,W,S).

CRJ 497  Political Science Internship  3 to 6 Credit Hours
Field placements in Washington, D.C. Course is offered only in summer semester. Primarily for junior or senior political science concentrators or other qualified applicants. Only six hours of internship credit is allowed toward concentration requirement.

CRJ 498  Directed Studies  1 to 6 Credit Hours
Directed individual study of any subject agreed upon by the student and the instructor. May not duplicate a formal course offering.
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
Decision Sciences (DS)

DS 300 Quantitative Model and Anlys I 3 Credit Hours
To introduce fundamental concepts and methods in data analysis, probability, estimation, and statistical inference for application in management and management science. Topics include: basic probability theory, discrete and continuous random variables and distributions, sampling and data analysis, sampling distributions, estimation, confidence intervals and hypothesis testing, introductory regression analysis and utilization of statistical software packages.
Prerequisite(s): MATH 104 or MATH 105 or MATH 113 or MATH 115 or MPLS with a score of 115
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior

DS 301 Intro Business Statistics 3 Credit Hours
Introductory concepts and methods in data analysis and probability, together with their applications to business. Students will be introduced to the use of Excel® to analyze data and communicate data to a business audience through statistical reports. Topics covered are data generation and categorization; visualization data; numerical descriptive measures; basic probability; random variables (discrete and continuous); and an introduction to sampling methods and sampling distributions. (F,W,S)
Prerequisite(s): MATH 104 or MATH 105 or MATH 113 or MATH 115 or MPLS with a score of 115
Restriction(s):
Can enroll if Class is Freshman

DS 310 Data Mining for Bus Intel 3 Credit Hours
Data Mining offers a suite of analytical techniques to examine large sets of data in order to discover, diagnose, and identify new and valuable information to aid the decision-making process. This course is designed to introduce the core concepts of data mining, its techniques, implementation, benefits and outcomes from this technology. Examples from industries such as, retail, marketing, fraud protection, personal security, health care, web and e-commerce will be presented throughout the course to emphasize usage and application of data mining. Among data mining techniques to be discussed in the course are k-means clustering, principal component analysis, factor analysis, linear and logistical regression, neural networks, decision trees, text and web mining. The class format consists of discussion of published articles/cases, presentations by business professionals, class lectures and discussions, and hands-on work with popular data mining software. (F)
Prerequisite(s): DS 300 or STAT 325

DS 350 Quantitative Model and Anly II 3 Credit Hours
To continue from DS 300, during the first half of the course, the study of the concepts and methods in data analysis and statistical inference, as well as to introduce, in the second half of the course, basic linear optimization methods and models applied in the formulation, quantification, analysis, and solution of management decision problems. Topics include: simple and multiple linear regression, analysis of variance, sampling, correlation, formulation and solution of linear programming problems, transportation and transshipment models, utilization of software packages for statistical analysis and optimization.
Prerequisite(s): DS 300

ECON 100 Personal Economics & Finance 3 Credit Hours
Students in ECON 100 will acquire the knowledge and tools needed to survive and thrive in the economic realities of the 21st century. Students will become familiar with the Michigan and U.S. economies, and will learn how to apply basic economic concepts to common personal choices, for example how to finance their education. They will also learn how to use economic concepts to critically evaluate economic information presented to them by others.
ECON 201  Introductory Economics  3 Credit Hours
Introduction to economic reasoning, basic economic concepts and
theories used in microeconomics and macroeconomics. Economic
techniques including graphing and marginal analysis will also be
introduced and applied to practical problems in everyday life. In addition,
this course will focus on the way economic concepts can be taught at the
elementary and high school level in a way that integrates economics into
a broader understanding of Michigan history, government and geography. (F).

ECON 202  Prin: Macroeconomics  3 Credit Hours
Together with ECON 202, this course serves to introduce the student to
the basic ideas and concepts of modern economic analysis, and applies
them to current economic problems, policies and issues. The focus of
this course is on macroeconomics: income and wealth, employment,
and prices at the national level in the United States economy. It is
recommended that students take ECON 201 before ECON 202. MATH 105
is highly recommended but not required. (F,W,S).

ECON 205  Business in Japan  3 Credit Hours
How did Japan accomplish its economic success? How are businesses
in Japan managed? To answer these questions, this course examines the
social context of industries, organization and management of a company,
cultural traits which contributed to Japanese-style management, and the
historical background of modern Japanese culture. (OC).

ECON 290  Topics in Economics  3 Credit Hours
Examination of problems and issues in selected areas of economics. Title
as listed in Schedule of Classes will change according to content. Course
may be repeated for credit when specific topics differ. (OC).

ECON 301  Intermediate Macroeconomics  3 Credit Hours
A systematic study of the determinants of national output, economic
growth, inflation, and unemployment. The effects of monetary policy,
fiscal policy and other economic factors are analyzed for both
the long run and short run. Debates about various approaches to
macroeconomics policy are also discussed. (F,W).
Prerequisite(s): ECON 201 and ECON 202 and (MATH 104 or MATH 105 or
MATH 115 or MPLS with a score of 113) or MATH 113

ECON 302  Intermediate Microeconomics  3 Credit Hours
A systematic study of the role of prices in organizing economic activity.
The tools necessary for such study will be developed and applied to the
analysis of the household, the firm, and the market under varying degrees
of competition and monopoly. (F,W).
Prerequisite(s): ECON 201 and ECON 202 and (MATH 104 or MPLS with a
score of 113) or MATH 105 or MATH 113 or MATH 115

ECON 305  Economic Statistics  3 Credit Hours
Introduction to the logic and use of statistical analysis, with emphasis
on statistical inference. Topics covered include descriptive statistics,
probability, estimation, hypothesis testing, and the use of linear
regression analysis to study relationships between two variables. (F,W).
Prerequisite(s): ECON 201 and ECON 202 and (MATH 104 or MPLS with a
score of 113) or MATH 105

ECON 311  Money and Banking  3 Credit Hours
The structure, workings, and regulation of financial systems,
concentrating on bank-like financial institutions. While financial
instruments like stocks, bonds, and some derivatives are discussed,
the focus is on the economic theory behind financial markets. That is,
the study of monetary policy underscores the interaction between the
financial system and the economy. (F,W).
Prerequisite(s): ECON 201

ECON 321  Labor in the American Economy  3 Credit Hours
An analysis of the nature and underlying causes of the problems facing
the worker in modern economic society. Includes an examination of
wages, unemployment, economic insecurity, the trade union movement,
collective bargaining, and labor legislation. (F,W).
Prerequisite(s): ECON 201 and ECON 202

ECON 325  Economics of Pov and Discrm  3 Credit Hours
An analysis of the economic aspects of poverty and discrimination.
Emphasis on the theoretical economic causes of poverty and the
economic bases for discriminatory behavior, the impact of poverty
and discrimination on individuals and society, and the effect of reform
policies on the two problems. (AY).
Prerequisite(s): ECON 201 and ECON 202

ECON 331  Industrial Organization  3 Credit Hours
Theory and empirical evidence on the causes and effects of market
power, especially in industrial markets. The focus is on the relationships
between market structure and performance, and policy formation. (YR).
Prerequisite(s): ECON 202

ECON 335  Experimental Economics  3 Credit Hours
This course on experimental economics is devoted to laboratory
experiments on individual behavior in markets as well as in social
situations. It focuses on different forms of strategic interactions
between agents, including competition, coordination, bargaining, and
public choice. We will consider individual decision experiments, choice
anomalies, and the role of information in learning and signaling. We
will also discuss the design of various economic experiments, such as
market bargaining, auctions, trust, gift giving, adverse selection, public
goods, common pool resources, etc. Students are recommended (but not
required) to take Econ 302 before enrolling in this class. Basic knowledge
of Excel is required for this class.
Prerequisite(s): ECON 202 or ECON 2001

Restriction(s):
Cannot enroll if Class is Freshman

ECON 351  Environmental Economics  3 Credit Hours
Course examines the economic aspects of pollution problems. Topics
covered in this course include the economic theory of externalities,
the theory of public goods, and the optimum use of depletable natural
resources. The role of cost-benefit analysis as a part of the decision-
making process is also examined. (AY).
Prerequisite(s): ECON 202

ECON 355  Econ of the Medical Sector  3 Credit Hours
Course examines the health of a population and the health care industry,
using the tools of economic analysis. Topics include the demand and
supply of health services, alternate ways of financing health care, the
application of cost-benefit analysis to health projects, and comparative
health economic systems (e.g., Britain, Sweden). (AY).
Prerequisite(s): ECON 202
ECON 361  U S Economic History  3 Credit Hours
A survey of the processes of development of the United States economy, their social implications, and the sources of today's economic problems. (YR).
Prerequisite(s): ECON 201 and ECON 202

ECON 362  Eur and Intl Economic Hist  3 Credit Hours
A survey of the processes of industrialization in the major non-American industrial economies, with a focus on their relevance and implications. (AY).
Prerequisite(s): ECON 201 and ECON 202

ECON 372  Economic Demography  3 Credit Hours
Course offers an introduction to economic demography, focusing on the interrelation between economic and population variables, and the techniques of demographic analysis. (OC).
Prerequisite(s): ECON 201 and ECON 202

ECON 375  Heterodox Economics  3 Credit Hours
This course introduces students to alternative perspectives on economic theory and method. These alternatives include: Marxian and radical political economics, institutional and evolutionary economics, behavioral economics, post-Keynesian economics and feminist economics. (OC).
Prerequisite(s): ECON 201 or ECON 202 or ECON 2001

ECON 385  Public Choice  3 Credit Hours
Public policy decision making, particularly governmental decisions regarding economic policies. Emphasis is on the use of economic methodology to analyze resource allocation via the political system rather than through private markets. (OC).
Prerequisite(s): ECON 201 and ECON 202

ECON 390  Topics in Economics  1 to 3 Credit Hours
Examination of problems and issues in selected areas of economics. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).

ECON 390H  Topics in Economics  3 Credit Hours
Topic: The Economics of Religion, Crime, and Marriage. This course uses the tools of economics, particularly microeconomics, to explain key characteristics of religion, criminal behavior, and marriage. For religion, the course will explore church organization, church architecture, beliefs about the afterlife, doctrine about usury, and religious market structure, among others. For crime, the course will evaluate claims about the death penalty, gun control and the demand for crime. For marriage, the course will analyze multiple, marriage payments, family organization, and marriage for love, among others.
Prerequisite(s): ECON 202

ECON 390M  Topics in Economics  3 Credit Hours
Topic Title: Comparative Institutions: Cuba, the US and More. This course will analyze different institutions. This will range from colonialism to the mafia to prison gangs to economic development. A significant part of the class will be a spring break trip to Cuba. Before we go we will study the institutional literature on democracies and dictatorships and then spend a week traveling around one of the last communist countries that still exists.

ECON 398  Economics Internship  3 to 6 Credit Hours
This internship affords the student the opportunity to apply tools learned in economics courses to real-world work situations. The student has 8-16 hours of unpaid work per week under the guidance of a faculty advisor and complementary academic work supervised by an economics professor. Only three credit hours may be applied to meeting the concentration requirements in economics; up to six credit hours may be applied toward graduation credit. The internship is offered only on the S/E grading basis. Students cannot receive credit for both ECON398 and ECON498. (F,W,S). 3.000 TO 6.000 Credit hours

ECON 401  Monetary Economics  3 Credit Hours
This course examines financial institutions in a macroeconomic theoretical context. A rigorous treatment of monetary theory is presented followed by practical discussion of U.S. monetary policy as implemented by the Federal Reserve System. Students cannot receive credit for both ECON 401 and ECON 411.
Prerequisite(s): ECON 311 and ECON 301
Restriction(s):
Can enroll if Level is Undergraduate

ECON 4011  Introduction to Econometrics  3 Credit Hours
The theory and practice of the statistical analysis of economic relationships. Topics covered include the construction and estimation of econometric models and tests of economic theories, emphasizing the use of multiple linear regression. Students cannot receive credit for both ECON 4015 and ECON 415.
Prerequisite(s): MATH 113 or MATH 115 and ECON 305
Restriction(s):
Can enroll if Level is Undergraduate

ECON 4021  Economics of the Labor Sector  3 Credit Hours
Theoretical analysis and empirical studies of the nature and operation of labor markets. Includes theories of wage determination and income distribution, the nature of unemployment, the impact of collective bargaining on the economy, the extent and economic effects of discrimination, and the nature and effects of government wage and employment policies. ECON 321, Labor in the American Economy, is valuable background to this course although it is not a prerequisite. This course counts as a required capstone (4000-level) course in Economics and also counts toward the Economics Honors designation. Students cannot receive credit for both ECON 421 and ECON 4021.
Prerequisite(s): ECON 302
Restriction(s):
Can enroll if Level is Undergraduate

ECON 4065  History of Economic Thought  3 Credit Hours
Course examines the evolution of economic thought and theory from the early origins to the present, focusing on the major contributions to economics, especially from Adam Smith onward, and assesses the current condition of economic analysis. Students cannot receive credit for both ECON 465 and ECON 4065.
Prerequisite(s): ECON 302
Restriction(s):
Can enroll if Level is Undergraduate
**ECON 407  Cost-Benefit Analysis  3 Credit Hours**
Cost-benefit analysis arguably is the most important tool in evaluating public and private policies. Conceptually, cost-benefit analysis is simple: subtract the costs from the benefits and adopt those policies yielding the greatest net benefit. In practice cost-benefit analysis is much more complicated. Costs and benefits must be summed over time, requiring a calculation of net present value. Costs and benefits must be summed over different people, requiring a social welfare function. Finally costs and benefits must be summed over a variety of goods and services, some of which do not have market values or where market values are not appropriate measures. This course reviews the techniques involved in cost-benefit analysis and employs case studies to illustrate these techniques. (AY)

Prerequisite(s): ECON 202 and ECON 302
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

**ECON 4085  Public Finance  3 Credit Hours**
Analysis of the role of government in the economy. Course examines theories of the need for and nature of government intervention in economic activities. Includes analysis of public goods, externalities, taxation, state, and local finance, and models of public decision making. Students cannot receive credit for both ECON 4085 and ECON 481.

Prerequisite(s): ECON 302
Restriction(s):
Can enroll if Level is Undergraduate

**ECON 416  Mathematical Economics  3 Credit Hours**
The mathematical techniques of sets, matrix algebra, and differential calculus are applied to economic problems of comparative statics, constrained optimization, linear equation systems, input-output planning, and dynamic growth models. Recommended for students planning to attend graduate school. (YR).

Prerequisite(s): MATH 113 or MATH 115

**ECON 433  Antitrust and Regulation  3 Credit Hours**
This course uses economic theory to examine major antitrust laws and to evaluate government regulation of industry. ECON 331, Industrial Organization, is valuable background to this course although it is not a prerequisite. Students cannot receive credit for both ECON 433 and ECON 333. (OC).

Prerequisite(s): ECON 202
Restriction(s):
Can enroll if Level is Undergraduate

**ECON 437  Behavioral Public Policy  3 Credit Hours**
This course teaches you to apply the insights from behavioral economics and psychology to public policy design. Empirically-based behavioral science offers policy makers the opportunity to decrease the impact of psychological limitations of lazy or boundedly rational individuals. In this course we consider various public policies that are informed by behavioral science research in the areas of retirement savings, household borrowing, health care, energy use and choice of nutrition. Graduate version of the course requires completion of additional assignments.

Prerequisite(s): (ECON 201 and ECON 202) or PPOL 500
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore

**ECON 438  Beh Econ for Business & Policy  3 Credit Hours**
This course is a reading intensive seminar on behavioral economics, which is the combination of psychology and economics that investigates what happens in markets in which some agents display human limitations and complications. The course focuses on the behavioral economics theory and its’ application to business practice and policy decision making. Specifically, in this course we: (1) examine the ways in which people deviate from the standard economics models, including irrationality, preferences for fairness, propensity to cooperate, trust, dual-interest, empathy and emotions; (2) explore behavioral economics theories and models; (3) discuss how the behavioral economics theories and models can be applied to solve business and policy problems. Graduate version of this course requires completion of additional assignments. Students cannot receive credit for ECON 336 and ECON 438 or ECON 538. (F,W,A,Y)

Prerequisite(s): ECON 202 or ECON 2001
Restriction(s):
Cannot enroll if Class is Freshman

**ECON 442  Economic Development  3 Credit Hours**
A survey of economic problems currently affecting third world countries and the various policy options available to them. Topics covered will include agrarian vs. industrial growth, and monetary and fiscal policies, planning problems, foreign exchange and debt problems. Students cannot receive credit for both ECON 442 and ECON 342 (OC).

Prerequisite(s): ECON 201 or ECON 202
Restriction(s):
Can enroll if Level is Undergraduate

**ECON 444  Economies of the Middle East  3 Credit Hours**
Survey of socio-economic issues of the post-WWII Middle East, using textbooks and web-based readings. Topics include population growth, urbanization, migration, gender issues, land reform, privatization, and stabilization policies. The Arab-Israeli conflict is not a focus of study. Grade based on papers and exams. Students cannot receive credit for both ECON 344 and ECON 444.

Prerequisite(s): ECON 201 or ECON 202
Restriction(s):
Can enroll if Level is Undergraduate

**ECON 447  International Finance  3 Credit Hours**
This course studies the large-scale economic issues in interdependent economies, such as the behavior of exchange rates, interest rates, income, wealth, prices, and the balance of payments. International finance focuses particularly on economic policies in a world with a multitude of currencies and increasingly integrated goods, financial, and capital markets. Students cannot receive credit for both ECON 447 and ECON 347.

Prerequisite(s): ECON 201
Restriction(s):
Can enroll if Level is Undergraduate

**ECON 448  International Trade  3 Credit Hours**
Course analyzes in depth the debate of free trade vs. protectionism. Different theoretical models of the “gains from trade” are presented, as well as studies of their empirical validity. Some historical perspective is included, as well as discussion of the current situation of the European Union. Students cannot receive credit for both Econ 348 and Econ 448.

Prerequisite(s): ECON 201 and ECON 202
Restriction(s):
Can enroll if Level is Undergraduate
ECON 482  Regional Economics  3 Credit Hours
Course explores methods of economics evaluation of regions in terms of intra- and inter-regional activity. Regions may be a nation, or composed of portions of more than one nation, or be a collection of regions. Theoretical topics include the theories of (1) the location of the firm, (2) spatial demand, (3) agglomeration economies, and (4) input-output analysis. Regional development policy is discussed using Michigan and Ontario as subjects. Students cannot receive credit for both ECON 382 and ECON 482.
Prerequisite(s): ECON 201 or ECON 202 or ECON 2001
Restriction(s):
Can enroll if Level is Undergraduate

ECON 483  Urban Economics  3 Credit Hours
The economics of the city and the introduction of space in economic analysis; the determination of land use patterns, the location of firms and industries, and an urban area’s growth; economic analysis and policy issues concerning urban poverty, housing, transportation, the local public sector, and other urban problems. Students cannot receive credit for both ECON 483 and ECON 381.
Prerequisite(s): (ECON 201 and ECON 202) or ECON 2001
Restriction(s):
Can enroll if Level is Undergraduate

ECON 497  Economics Seminar  3 Credit Hours
An advanced study in selected areas of Economics. Topics vary; see the current Schedule of Classes for topics and prerequisites. May be offered in satisfaction of 400-level elective requirement for concentration. (OC).
Restriction(s):
Can enroll if Level is Undergraduate

ECON 499  Directed Research  1 to 3 Credit Hours
Independent study under the direction of a faculty supervisor in advanced topic areas. Normally must be elected on the "pass/fail" option, in which case it does not count toward credit hour requirement for concentration. Special consideration for the A through E grading option must be approved by members of the Economics discipline. In all cases students must have faculty supervisor’s permission to register.
Restriction(s):
Can enroll if Level is Undergraduate

EDUC A-Theoretical Foundatns (EDA)

EDA 205  Introduction to Education  3 Credit Hours
This course is designed to introduce students to the field of education. In this course students will gain a working knowledge of teacher certification and professionalism, state standards, and high-stakes testing. Additionally, students will be introduced to basic forms of lesson planning, classroom assessment, and instructional techniques. As a part of the course, all students will begin to use the M-Portfolio system. Students will also carryout assignments in schools and therefore must complete required clearance forms prior to field placement. For more information access the Field Placement Office website at: www.umdearborn.edu/cehhs/cehhs_fpo
Restriction(s):
Cannot enroll if Class is Post-baccalaureate NCFD or Undergraduate NCFD or Undergraduate NCFD or Graduate
Can enroll if Level is Undergraduate

EDA 340  Foundations of American Ed  2 to 3 Credit Hours
A general survey of education’s theoretical and structural foundations. This course introduces students to the history and philosophy of education as well as to the organization and financing of schools in America. Particular attention will be given to the role of education in a democratic society and to the notion of teaching as a profession.
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Sophomore or Junior or Senior

EDA 419  Early Literacy/Language Devel  3 Credit Hours
This course examines early language development, the factors that contribute to its growth and the role that it plays in the development of literacy. Diagnostic techniques for assessing language and literacy and teaching strategies and materials to facilitate language and literacy growth in children birth through third grade will be discussed.
Restriction(s):
Cannot enroll if Class is Freshman or Graduate

EDA 450  Hist/Theory of Bilingual Educ  2 to 3 Credit Hours
The course provides an extensive background on bilingual education (programs where two languages are used as media of instruction) in the United States, and the events that led to the inception of such programs on the Federal as well as the State levels. The course provides a background on the concept itself, its rationale and implementation.
Restriction(s):
Can enroll if Class is Junior

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
Edu B-Educational Admin (EDB)

EDB 421  Current Issues in Early Ed   2 Credit Hours
Examines the expanding field of early childhood in order to understand major issues which are shaping the development and support of early education and child care programs. Designed for present and future teachers, administrators, and other workers in the field of early childhood, and for the general public who must participate in major pending decisions relating to such questions as proposed changes in state licensing, teacher certification, and funding sources.
Prerequisite(s):
Affecting young children and families.
Corequisite(s):
Certification, funding resources, parental involvement and other issues relating to public policy and legislation, state licensing, teacher certification, and funding sources.
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
EDB 422  Lead,Advoc, Admin Early Ch Prg   3 Credit Hours
This course promotes role of the early childhood educator as a leader and advocate for young children and families. Designed for present and future teachers, administrators and other professionals who participate in decisions relating to public policy and legislation, state licensing, teacher certification, funding resources, parental involvement and other issues affecting young children and families.
Prerequisite(s): EDC 240
Restriction(s):
Can enroll if Class is Post-baccalaureate
Certification only or Undergrad Certification only or Junior or Senior

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Edu C-Psychological Foundation (EDC)

EDC 240  Psych of Child Development   3 Credit Hours
An introductory presentation of facts and theories concerning the development of the child from birth to adolescence. The practical applications of present knowledge in this field will be examined. Field observations and directed interactions with children are required. Limited to undergraduates. Not open to students with credit in C540.
Corequisite(s): EDC 241
Restriction(s):
Can enroll if Class is Post-baccalaureate
Certification only or Undergrad Certification only or Freshman or Sophomore or Junior or Senior

EDC 241  Psych: Child Devel Practicum   1 Credit Hour
A supervised field experience related to the study of child development involving a minimum of 45 clock hours of observation and work spread over a semester in an early childhood setting.
Corequisite(s): EDC 240
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDC 300  Educational Psychology   3 Credit Hours
Consideration of research findings relevant to the learner in the classroom with emphasis on factors that influence learning. Topics include: the teacher trainer's role in motivation; formulation of generalizations pertaining to the physical, mental, social, and emotional development of learners; analysis of selected aspects of the teaching-learning situation including the dynamics of interaction, classroom control, guidance, and appraisal of growth.
Corequisite(s):
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Sophomore or Junior or Senior
Can enroll if College is Business or Engineering and Computer Science or Arts, Sciences, and Letters or Education, Health, and Human Services

EDC 301  Practicum in Ed Psychology   1 Credit Hour
A supervised field experience related to the study of educational psychology involving a minimum of 45 clock hours of participation/observation and work spread over a semester in a school setting. TB clearance and criminal background check are required.
Corequisite(s):
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDC 302  Adol Devl & Classroom Mgmt   3 Credit Hours
An examination of the current theories and research findings concerning the physical, social, emotional, and cognitive development during the early and late adolescent years. Theory will be related to educational and parenting practices. Significant material will be included addressing classroom management of the middle school and high school classroom using simulation, case studies and videos of actual classrooms.
Corequisite(s): EDC 304
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Sophomore or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDC 304  Pract Adol Devl&Clsrm Mgmt   1 Credit Hour
This one credit practicum consists of 45 clock hours of observation over the course of the semester in a secondary classroom. Reflective journals and guided assignments will focus the observations on an understanding of developmental concepts and classroom management policies. Active participation with secondary students will ensure the application and critique of these concepts in an educational setting.
Corequisite(s): EDC 302
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Post-baccalaureate NCFD or Sophomore or Junior or Senior

EDC 306  Applied Behavior Analysis I   3 Credit Hours
This is the first in a two course sequence in applied behavior analysis, focusing on best practices and current research. General topics to be covered include principles of learning, research methods in applied behavior analysis, skills training and stimulus control techniques, interventions for problem behavior, ethical issues, and the application of behavior analysis across a wide range of populations, settings, and behaviors. (F, S)
EDC 307 Applied Behavior Analysis II 3 Credit Hours
This is the second of a two-course sequence in applied behavior analysis. This course covers advanced behavior change procedures and processes including maintenance and generalization of behavior chaining, staff training, and Functional Communication Training. The course also provides advanced consideration of ethical and legal issues related to behavioral intervention. (Prerequisite ABA I). (F, W)
Prerequisite(s): EDC 306 and EDC 308 or EDC 309

EDC 308 Intro Dev Disabilities 3 Credit Hours
Full Title: Introduction to Developmental Disabilities This course will provide an overview of the issues related to the diverse group of individuals with developmental disabilities. Topics include the history and public policy issues related to this population. Special consideration will be given to familial issues within the context of socio-cultural issues and the role of families in the provision of services across the lifespan. Students will be exposed to the range of assessment practices for developmental disabilities, including intellectual, adaptive behavior, psychosocial, behavioral, psychoeducational, and developmental. Specific conditions under the category of developmental disabilities are covered, along with the diagnostic criteria for these conditions. Other topics include educational and behavioral interventions, person centered planning/family centered support, post-school and adult issues, physical and mental health issues, services and supports to improve quality of life, controversial therapies, and ethical issues for individuals with developmental disabilities. (F, S)

EDC 390 Observe and Particip in Ed Set 1 to 3 Credit Hours
An opportunity for supervised observations of, and participation with, children and adolescents in educational settings. For students who need additional laboratory experience prior to student teaching.
Restriction(s): Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDC 400 Adult Learning:Theory/Practice 3 Credit Hours
This course introduces students to current theory and practice for understanding and working with adult learners in today’s society.
Restriction(s): Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Post-baccalaureate NCFD or Sophomore or Junior or Senior

EDC 401 Introduction to LD 3 Credit Hours
Introduction to LD is designed to provide students with an overview of the field of learning disabilities. Discussions will include physical, social, emotional, and cognitive comparisons of developmental differences and similarities between persons of all ages with and without LD, historical and theoretical perspectives, current trends and issues, assessment, and collaboration among educators.
Restriction(s): Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Post-baccalaureate NCFD or Sophomore or Junior or Senior

EDC 402 Research Methods Beh Analysis 3 Credit Hours
The purpose of this course is to introduce you to the fundamentals of behavior-analytic research methods. The course will review single-case time series methodologies to assess various dimensions of behavior and evaluate the effects of interventions of behavior. Single-case research has played an important role in developing and evaluating interventions designed to modify some aspect of human behavior. This course will encompass a broad range of research areas that utilize single-case designs within both the behavior analytic literature and other disciplines including school psychology, medicine, and business. (F, S)
Prerequisite(s): EDC 306

EDC 410 Dev Peer/Social Relationships 2 Credit Hours
Students will examine the processes of peer relations and socio-emotional development from birth to adolescence. Topics to be covered in this course include attachment, peer popularity and intimacy. As well, students will discuss the importance of the family on social development. Classroom environment and peers as educators will also be covered.
Prerequisite(s): EDC 340 or EDC 240

EDC 412 Social Devl/Pos Guidnce Techn 3 Credit Hours
This course will examine the process of social and emotional development in childhood through adolescence. Positive strategies to promote and guide this development in the classroom will be explored using behaviorist and constructivist frameworks. Topics will include character education, discipline models, conflict resolution and family collaboration. Guiding the development of emotional regulation, perspective taking and peer relationships in children including children with special needs will be investigated.
Restriction(s): Can enroll if Class is Post-baccalaureate Cert only or Sophomore or Junior or Senior Can enroll if Degree is Bachelor of Arts, *Teacher Certificate Can enroll if College is Education, Health, and Human Services Can enroll if Major is Elementary Certification, Child&Fam:Early Childhood Educ, Early Childhood, Children & Families, Child&Families:Family Support

EDC 414 Early Child Ed Special Needs 3 Credit Hours
Focuses on the psychological and educational needs of the young child with special needs. Discusses identification techniques and educational strategies for teaching in a regular early childhood classroom with young children having special needs. Special emphasis will be placed on behavioral, linguistic, and intellectual areas. Suitable for classroom teachers, childcare directors, and teachers in training.
Prerequisite(s): EDC 540 or EDC 340 or EDC 240
Restriction(s): Can enroll if Class is Post-baccalaureate Cert only or Sophomore or Junior or Senior

EDC 417 Mgmt of Classroom Behavior 3 Credit Hours
Provides intervention and management techniques for teachers and teacher candidates using principles of behavior modification. Includes examination of theoretical foundations, research and field reports, participation in self-management projects, and consideration of various applications in regular and special classrooms. Field experience is optional. Course will focus on classroom management in early childhood and elementary environments, allowing a more focused examination of topics and case studies geared to those grade levels. (OC)
Restriction(s): Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Sophomore or Junior or Senior
EDC 420 Hum Sexuality:Psyc-Ed Concepts 2 Credit Hours
The course is intended to acquaint elementary and secondary teachers with the elements that comprise sexuality as it relates to their lives and those of their students. Although a basic core of information is to be covered, the content of each class will provide for the needs and interests of the teachers. Teachers will be directly involved in identifying problems and the development and collection of strategies for problem resolution.
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

EDC 431 Constructivist Education 3 Credit Hours
An examination of constructivist theory and its application to educational practices. The nature and stages from birth through adolescence of cognitive and social development from the constructivist viewpoints of Piaget, Vygotsky, and others will be discussed. The major focus will be the application of constructivist theory to educational goals, teaching strategies and curriculum. (OC)
Prerequisite(s): (EDC 340 or EDC 240) and (EDC 341 or EDC 241)
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Sophomore or Junior or Senior

EDC 439 Child Maltreatment and Trauma 3 Credit Hours
This course will examine adverse childhood experiences, including the impact of physical abuse, neglect, sexual abuse, and other forms of psychological trauma. Particular emphasis will be placed on the role of trauma informed professionals to identify, assess, and support the needs of children, youth, and families impacted by trauma and child maltreatment. This course will explore various levels of prevention, intervention, and collaborative response to suspected cases of child maltreatment by multi-disciplinary teams, including investigation and treatment. (YR)

EDC 440 The Child: Birth to Three 3 Credit Hours
An examination of current theories and findings concerning the physical, social, emotional, and intellectual development of the young child from prenatal to three years of age. Topics include fetus maturation, capabilities of the newborn, language, cognition, and environmental influences on development. Theory will be related to infant care practices in the home and in early childhood centers.
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Undergraduate NCFC or Undergraduate NCFC or Post-baccalaureate NCFC or Sophomore or Junior or Senior

EDC 442 EC: Fam/Sch/Comm Collaboration 3 Credit Hours
Focuses on factors that influence the building of partnerships among early childhood professionals, families and communities. Includes understanding and working with culturally and linguistically diverse families. Various communication and problem-solving strategies that promote family involvement and community outreach are practiced through discussion and role play.
Prerequisite(s): (EDC 340 or EDC 240) and (EDC 341 or EDC 241)
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDC 443 Family/School/Community Collab 2 Credit Hours
Characteristics, roles, and functions of contemporary families are described. Various communication and training strategies designed to promote collaboration and teamwork within and between the school staff, the families, and community are described and practiced through discussion, problem-solving activities, and role playing. Family effectiveness assessment instruments and strategies are also described and practiced.
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior

EDC 445 Develop Assess of Young Child 3 Credit Hours
Survey and demonstrations of formal and informal measures to assess young children's physical, social, intellectual, and emotional development. Instruction in some techniques appropriate for use by classroom teachers, childcare directors, health care professionals, and others who are interested in assessing the development of children aged birth to nine years. For graduate credit elect EDC 545. (AY)
Prerequisite(s): EDC 240 or EDC 340
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDC 446 Cog/Memory Dev in Children 3 Credit Hours
Examines the theories and recent research on the development of cognition and memory. Selected topics include: perception, language, representation, social cognition and problem solving. Educational implications and strategies for developing children's thinking and memory are explored.
Prerequisite(s): EDC 240 or EDC 340
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

EDC 454 Formal & Informal Testing&Eval 2 to 3 Credit Hours
In this course students will develop their knowledge and skills in traditional and non-traditional methods for evaluating classroom learning, performance technology and training. Students will learn how to construct evaluations, tests, analyze evaluation results, conduct program evaluation and educational assessment in relation to performance technology, training, and teaching and learning. (OC)
Restriction(s):
Can enroll if Class is Junior or Senior

EDC 455 Assmt: Sec Lang Learning K-12 2 Credit Hours
In this course students will learn to identify, assess, and place second language learners for appropriate instruction and instructional programs. Students will review, evaluate, and implement a variety of assessments and strategies intended for use with limited English proficient students, K-12. Students will also examine the impact and issues regarding high-stakes assessments on English language learners. Official admission to and good standing in the teacher certification program are required. (W)
Prerequisite(s): EDD 447 and EDD 448
Restriction(s):
Can enroll if Class is Junior or Senior

EDC 456 Learning & Classrm Assessment 3 Credit Hours
In this course students will examine the relationship between curriculum, instruction and assessment. Students will review different forms of assessment and evaluate the strengths and weaknesses of each format. Students gain experience in 1) selection of assessment formats based on curricular focus and student developmental levels; 2) development of assessments; 3) decision-making based on the results of the assessments. (YR)
EDC 460  Educating the Exceptional Child  3 Credit Hours
Characteristics, identification, assessment, and instruction of students with exceptionalities are addressed. Includes students with learning disabilities, behavior disorders, emotional impairment, mild mental retardation, communicative disorders, visual and hearing impairments, orthopedic impairments, giftedness, and chronic medical conditions. Service delivery models, general assessment procedures, and curricular and instructional adaptations that help integrate students with exceptionalities into the general education classroom will also be addressed.

Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Sophomore or Junior or Senior

EDC 476  Literacy Assessmt for Instr  4 Credit Hours
Topics include various diagnostic tools for reading, writing, speaking, and listening. Students will learn to implement a variety of diagnostic techniques for assessing literacy for instructional purposes and communication with parents, other professionals, and paraprofessionals about student progress.

Prerequisite(s): EDD 468 and (EDD 419 or EDA 419)

Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

* An asterisk denotes that a course may be taken concurrently.

Prerequisite(s): (EDC 240 or EDC 340) and (EDC 341 or EDC 241) and PII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)

Corequisite(s): EDD 410

Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
EDD 407 Workshop: Global Ed Soc Stds 1 to 3 Credit Hours
A course designed to help elementary and secondary teachers develop strategies that will help them to teach about an interdependent and changing world. Concepts such as change, the culture, and interdependence will be introduced and examined in terms of implementation within the framework of the existing social studies curricula.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Graduate
EDD 410 Practicum in Early Child Ed 1 Credit Hour
A supervised field experience related to the study of early childhood education involving a minimum of 45 clock hours of observation and work spread over a semester in an early childhood school setting. TB clearance, FIA clearance, criminal background check, and physician’s statement of good health are required. (F,W).
Prerequisite(s): (PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and CPAS with a score of 40) or (COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 406
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
EDD 411 Directed Tchg: Early Childhood 3 or 4 Credit Hours
Supervised observation and teaching in early childhood programs under the joint direction of university and school personnel. Open only to students in the Early Childhood Education program or Children and Families Program who have been approved by the program director. Must be elected concurrently with EDD 412. TB clearance, FIA clearance, criminal background check, and physician’s statement of good health are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (COMP 105 or COMP 110 or CPAS with a score of 40 or COMP 280 or COMP 270) and EDD 406 and EDD 410
Corequisite(s): EDD 412
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
EDD 412 Seminar in Early Childhood Ed 2 Credit Hours
Focuses on developmentally appropriate educational practices for children in early childhood programs. With an emphasis on writing developmentally appropriate lesson plans, the Reggio Emilia Inspired Approach, assessment of young children, classroom and staff management, multiculturalism, family centered approaches, children with special needs and professional development. The seminar provides a theoretical foundation for the field placement (D411, D418 and D494). Open only to students in Early Childhood or Children and Families program who have been approved by the program director. TB clearance and physician’s statement of good health required. EDD 406 and 410 are required for undergraduates.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270) and EDD 406 and EDC 410
 Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior or Graduate
EDD 413 LD Elem Directed Teaching 2 Credit Hours
Field experience with elementary students with learning disabilities in general and special education classrooms. Experiences include delivery of direct instruction through observation, tutoring, small and large group instruction, curriculum development and adaptations, participation in the IEP and ITP process, collaboration and co-teaching with regular classroom teachers in various academic content areas, and other activities under the on-site supervision of a certified teacher of LD and LD certified University field supervisor. Pre-requisite: Grade of "B" or better in C401, N401, N403, N404, and N402 General Ed. Directed Teaching: EDN 408 and EDD 420.
Prerequisite(s): EDC 401 and EDN 401 and EDN 403 and EDN 404 and EDN 402
Corequisite(s): EDD 420, EDN 408
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services
Can enroll if Major is Special Education
EDD 416 Creatvty/Crit Thnk Yng Chldr 3 Credit Hours
This course intends to study the processes and products of creativity for both adults and young children. Strategies for promoting the emerging creative disposition of the young child, birth to eight years, will be explored. Areas of focus will include art, music, movement, dramatic play, improvisation, storytelling, and problem-solving. The importance of understanding and encouraging the young child’s capacity for representation skills will be emphasized.
Prerequisite(s): EDC 340 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Senior or Graduate
EDD 417  Workshop: Bilingual/ Bicultural Pupils  1 to 4 Credit Hours
The course will focus on developing a) an understanding of bilingual and bicultural pupils by examining their ethnic and racial backgrounds in terms of their values and institutions and how these affect their adjustment in the school and community environments, and b) effective learning strategies, techniques, and materials to use in various content areas.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Corequisite(s):
Can enroll if Class is Junior or Graduate

EDD 418  Children and Families Intern  4 Credit Hours
Supervised observation and teaching in an Early Childhood classroom setting, or parent education program in a Family Service Agency under the joint direction of University and school or Agency personnel. Open only to students in the Children and Families program who have been approved for the course by the program director. Must be elected concurrently with EDD 412. TB clearance, FIA clearance, criminal background check, and physician's statement of good health required.
Prerequisite(s): EDD 411 and EDD 412
Corequisite(s):
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDD 419  Early Literacy/ Language Development  3 Credit Hours
This course examines early language development, the factors that contribute to its growth and the role that it plays in the development of literacy. Diagnostic techniques for assessing language and literacy growth of children will be discussed. (YR)
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270) and EDA 340
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Education, Health, and Human Services
Can enroll if Program is

EDD 420  LD Sec Directed Teaching  2 Credit Hours
Field experience with elementary students with learning disabilities in general and special education classrooms. Experiences include delivery of direct instruction through observation, tutoring, small and large group instruction, curriculum development and adaptations, participation in the IEP and ITP process, collaboration and co-teaching with regular classroom teachers in various academic content areas, and other activities under the on-site supervision of a certified teacher of LD and LD certified University field supervisor. Pre-requisite: Grade of ?B? or better in C401, N401, N403, N404, and N402 General Ed. Directed Teaching Corequisite: EDN 408.
Prerequisite(s): EDC 401 and EDN 401 and EDN 403 and EDN 404 and EDN 402 and EDD 413
Corequisite(s): EDN 408, EDN 413
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Education, Health, and Human Services
Can enroll if Major is Special Education

EDD 421  Directed Teach Secondary Sch  6 to 12 Credit Hours
Directed teaching consists of a teaching internship in a selected classroom for a full term under the direction of an experienced teacher. Includes a brief period of observation followed by several weeks of responsible teaching including the writing, implementing, and evaluation of lesson plans using University-approved practices. Official admission and good standing in the School of Education certification program are required. Completion of methods courses in the major and minor and passing appropriate MTTC tests required. Students cannot receive credit for both EDD 421 and EDD 301.
Prerequisite(s): EDC 300 and EDC 301 and (PSYC 407 or EDC 302) and EDC 460
Corequisite(s): EDD 424
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Education, Health, and Human Services

EDD 424  Seminar: Teaching Secondary Grades  1 Credit Hour
This course draws upon the resources found in the directed teaching environment. Students will consider problems and issues in four broad areas: students in the school, the teacher's professional responsibilities, curriculum understandings, and administrative/organizational problems. Open only to students enrolled in EDD 421.
Corequisite(s): EDD 421
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Education, Health, and Human Services

EDD 427  Workshop: Art in Elementary School  2 Credit Hours
A course which presents the rationale, trends, and principles of art education for elementary teachers. Teachers will have ample opportunities to experiment with various art media such as printmaking, puppetry, paints, and clay. Different strategies that focus on the creative growth of children will be developed.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Graduate

EDD 429  Teaching Controversial Issues at Elementary/Lower Secondary Levels  2 to 3 Credit Hours
This course is designed to provide the classroom teacher with the rationale, various approaches, and strategies and techniques to use in teaching controversial issues at the elementary and secondary levels.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
EDD 435  Dir Teaching: Elementary Sch  6 to 12 Credit Hours
Directed teaching consists of a teaching internship in a selected classroom for a full term under the direction of an experienced teacher. Includes a brief period of observation followed by several weeks of responsible teaching including the writing, implementing, and evaluation of lesson plans using University-approved practices. Official admission and good standing in the School of Education certification program are required. Completion of methods courses in the major and minor and passing appropriate MTTC tests required. Student may not receive credit for both EDD 435 and EDD 305.
Corequisite(s): EDD 437
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Senior
Can enroll if College is Education, Health, and Human Services or Arts, Sciences, and Letters

EDD 437  Sem: Teaching Elementary Grds  1 Credit Hour
This course draws upon the resources found in the directed teaching environment. Students will consider problems and issues in four broad areas: students in the school, the teacher's professional responsibilities, curriculum understandings, and administrative/organizational problems. Open only to students enrolled in EDD 435.
Corequisite(s): EDD 435
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Senior
Can enroll if College is Arts, Sciences, and Letters or Education, Health, and Human Services

EDD 440  Teach English in Second Grds  2 to 3 Credit Hours
Investigates the general and specific goals and objectives of English education. Trends, materials, and strategies are presented. A study of outstanding problems in the teaching of English composition, literature, grammar, and language are discussed. Official admission to and good standing in teacher certification program are required. EDD 441 required concurrently for undergraduate only.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 441
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDD 441  Practicum: English Second Grd  1 Credit Hour
A supervised field experience related to the study of English in the secondary grades involving a minimum of 45 clock hours of observation and work spread over a semester in a school setting. Official admission to and good standing in teacher certification are required. For graduate credit elect EDD 502.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 440
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior or Graduate

EDD 442  Differentiating Inst K-12 Crlm  2 to 3 Credit Hours
Individualized instruction combined with the latest information on the brain and our understanding of multiple intelligences leads us to a new method of meeting the needs of students called differentiating instruction. This course will look at the concept of differentiating instruction in-depth. (OC).
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDD 443  Tchg Writ at the Secondary Lvl  2 to 3 Credit Hours
This course is designed to help the classroom teacher promote functional and creative writing among students at the secondary school level. Attention will be given to both theory and research with emphasis on the development of instructional strategies, teaching materials and practical resources. (OC)
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Undergrad Certification only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDD 444  New Mthds,Strat/Mat Soc Stud  2 Credit Hours
Examines new developments in methodology in relation to learning theory. Investigates systems for evaluating curricular materials. Explores experimental programs, new courses of study, multimedia approaches and current research in the social studies. (OC)
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

EDD 446  Intervention Strat EC Spec Ed  3 Credit Hours
Strategies and methods which early educators can use when planning and implementing interventions for infants, toddlers and young children with disabilities and their families. Emphasis will be on addressing family identified priorities and the goals and objectives stated on the Individual Family Service Plan (IFSP) or Individual Educational Plan (IEP) using activity-based intervention, adapting materials, modifying environments and using assistive technology. (W, YR).
Prerequisite(s): EDC 414 and (EDC 340 or EDC 240) and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDD 447  Tchng English as Second Lang  3 Credit Hours
This course examines current methodologies and theories for English as a second language learning and instruction. Emphasis will be placed on a standards-based curriculum for English language learners. The use of communicative activities and strategies for developing English language skills in the elementary grades will be emphasized. Official admission to and good standing in a teacher certification program are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 448
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

EDD 448  Pract: Tchng Engl Secnd Lang  1 Credit Hour
This course examines current methodologies and theories for English as a second language learning and instruction. Emphasis will be placed on a standards-based curriculum for English language learners. The use of communicative activities and strategies for developing English language skills in the elementary grades will be emphasized. Official admission to and good standing in a teacher certification program are required. TB clearance, physician’s statement of good health, criminal background clearance, and bloodborne pathogens/infectious diseases training are required. (F).
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 447
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

EDD 450  Teach Math in Second Grades  3 Credit Hours
This course discusses: 1) the more important parts of recent pedagogical literature, 2) new instructional materials, methods, and curricular trends, and 3) procedures useful in the construction of new units and in the improvement of curricular units. Official admission to and good standing in a teacher certification program are required. EDD 451 required concurrently for undergraduates only. For graduate credit elect EDD 565.
Prerequisite(s): MATH 331 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 451
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior

EDD 451  Practicum: Math Second School  1 Credit Hour
A required supervised field experience related to the teaching of mathematics in grades 7-12. Involves 45 clock hours of work and observation in a classroom setting. The practicum includes the construction of classroom activities and lesson plans designed to strengthen students’ skills in communication, problem solving, making connections, and in the use of technology. Official admission to and good standing in teacher certification program are required. TB clearance and physician’s statement of good health required. For graduate credit, elect EDD 556.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 450
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior or Graduate

EDD 452  Methods of Teaching Math K-8  3 Credit Hours
The course relates to the teaching of the mathematics curriculum in the elementary and middle school. The emphasis is on the development of teaching techniques that promote problem solving, reasoning, connections, communication, and concept and algorithmic development. Cooperative groups, manipulatives, technology, and alternative assessment will be explored as tools for meeting the special needs of every child in grades K-8. Required of all preservice elementary teachers. Official admission to and good standing in teacher certification program required. The course includes a field experience in an assigned school setting.
Prerequisite(s): MATH 387 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

EDD 454  Wkshp: Newspaper in Education  2 Credit Hours
A course designed to familiarize elementary and secondary teachers with the use of newspapers as a classroom resource. Workshop participants will use the daily newspaper and other resource materials to develop activities appropriate for meeting their own professional needs. Emphasis will be on the enhancement of academic skills, practical life skills and creative expression. (OC)
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Senior
EDD 463 Tchng Giftd Stdnt Reglr Clssr  2 Credit Hours
This course introduces classroom teachers to the education of gifted and talented students in the regular classroom. It is designed to help teachers understand the social, emotional, and intellectual needs of gifted students and to show them ways of effectively addressing these needs along with those of the other students present. It will offer specific proposals for structuring the learning environment as well as for selecting appropriate levels and types of subject matter. (OC).
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

EDD 466 Tchg Coll Scie: Clssrm Dynamics  3 Credit Hours
A seminar analyzing current methods of college science teaching. Students will be paired with a senior faculty mentor and participate in the planning and teaching of introductory courses. Recommended for advanced undergraduates planning to attend graduate school and/or those interested in teaching. Written permission of instructor required. (OC).
Prerequisite(s): (NSCI 390 or EDD 390) and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)

EDD 467 Practicum in Reading Instruct  1 Credit Hour
A required supervised field experience related to the teaching of reading in the elementary and/or K-8. Involves a minimum of 45 clock hours of work and observation in a supervised classroom setting. Techniques learned in EDD 468 and EDD 471 will be applied to reading and language arts instruction. Official admission to and good standing in teacher certification program required. TB clearance, criminal background check, and physician's statement of good health required.
Prerequisite(s): EDD 468 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 220 or COMP 280 or COMP 270)
Corequisite(s):
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDD 468 Teach Read/Lang Arts- Elem Grd  3 Credit Hours
Acquaints the student with theory, methods, materials, and research related to the teaching of reading and other communications skills in the elementary and/or K-8. Includes classroom activities designed to strengthen skills in reading comprehension, word recognition, word attack, and the related language arts. Official admission to and good standing in the School of Education certification program are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s):
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDD 469 Reading in the Content Areas  3 Credit Hours
Emphasis on developmental and remedial reading activities at the middle grades and the secondary level: diagnosis, testing, and materials; reading in the content subjects; study habits; independent reading activity; exemplary programs. Some attention will be given to related problems in the teaching of written composition. Official admission to and good standing in the School of Education certification program are required. For graduate credit, elect EDD 569.
Prerequisite(s): (COMP 106 or COMP 220 or COMP 280 or COMP 270)
 Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior

EDD 470 Practicum in Reading Instruct  1 Credit Hour
A required supervised field experience related to the teaching of reading in the elementary and/or K-8. Involves a minimum of 45 clock hours of work and observation in a supervised classroom setting. Techniques learned in EDD 468 and EDD 471 will be applied to reading and language arts instruction. Official admission to and good standing in teacher certification program required. TB clearance, criminal background check, and physician's statement of good health required.
Prerequisite(s): EDD 468 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 467
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDD 471 Reading Instr: Models and Meth  3 Credit Hours
Various approaches to reading instruction are required. The teaching of reading/study skills in content areas and an introduction to different forms of testing will be addressed. Students will be required to complete a reading tutorial in meeting the needs of an elementary student. Not open to students who have taken EDD 472, EDD 532, or EDD 570. Official admission to and good standing in SOE certification program are required.
Prerequisite(s): EDD 468 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 467
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EDD 474 Environmental Education  2 to 3 Credit Hours
An analysis of environmental education at both the elementary and secondary school level particularly stressing the environment as a teaching resource. Community resources as they relate to environmental education also are investigated.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

EDD 480 Teach of Sci in the Second Grd  2 to 3 Credit Hours
A survey of the place of science in the secondary school curriculum, an analysis and evaluation of objectives, and a consideration of modern practices in teaching science. Official admission to and good standing in teacher certification program are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 280 or COMP 270)
Corequisite(s): EDD 481
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
EDD 481 Practicum in Science: Second Grd 1 Credit Hour
A supervised field experience related to the study of science in the secondary grades involving a minimum of 45 clock hours of observation and work spread over a semester in a school setting. Official admission to and good standing in teacher certification program are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 480
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior
EDD 482 Teach of Sci in Second Grd II 3 Credit Hours
This course builds upon the concepts and skills developed in EDD 480 as students learn to become effective, reflective science teachers. Students will learn multiple strategies for effective lesson planning, teaching, and assessment in science. Science, technology, engineering and mathematics (STEM) and integration of reading/writing strategies will be emphasized throughout the course. Students cannot receive credit for both EDD 482 and EDD 582. Students seeking graduate credit should enroll in EDD 582.
Prerequisite(s): EDD 480 and EDD 481
Restriction(s):
Can enroll if Class is Post-baccalaureate Certificate only or Undergraduate Certification only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters or Education, Health, and Human Services
EDD 483 Wkshp: Sci Teach Elem/Midd Sch 1 to 3 Credit Hours
Deals with existing and innovative science materials. Offered at various times emphasizing one or more areas from elementary and middle level science. Centers on a laboratory approach. May be elected twice for a total of six credits. (OC).
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
EDD 485 Teach Science in the Elem Grd 2 to 3 Credit Hours
Explores the objectives, methods, and instructional emphasis of elementary school science. Stresses concept development in several areas of elementary science. Provides opportunity for preparation of materials for classroom use. Official admission to and good standing in teacher certification program are required. For graduate credit, elect EDD 585.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Post-baccalaureate Certificate only or Undergraduate Certification only or Junior or Senior
EDD 486 Environmental Interpretation 3 Credit Hours
Course deals with the interpretation of the environment, its characteristics, and its presentation to school groups as well as to the general public. Intended to acquaint students with a variety of skills and techniques necessary for interpreting the environment to others. Extensive use is made of the UM-D Environmental Study Area.
Restriction(s):
Can enroll if Class is Junior or Graduate
EDD 489 Practicum in Soc Stud: Sec Sch 1 Credit Hour
A supervised field experience in a selected middle or high school social studies classroom. The course requires a minimum of 45 hours of observation of an experienced teacher as well as the writing, implementation, and assessment of one or more lessons. Official admissions to and good standing in the teacher certification program are required.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 490
Restriction(s):
Can enroll if Class is Post-baccalaureate Certification only or Undergraduate Certification only or Junior or Senior
EDD 490 Tch of the Soc Stud in Sec Sch 2 to 3 Credit Hours
This course examines theoretical and practical approaches to teaching social studies at the secondary level. Students explore, develop, and evaluate instructional methods. In light of professional standards, they consider diverse strategies for teaching and assessing middle and high school students.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270)
Corequisite(s): EDD 489
Restriction(s):
Can enroll if Class is Undergraduate Certification only or Post-baccalaureate Certificate only or Junior or Senior
EDD 491 Soc Std Elem Grades Practicum 1 Credit Hour
A supervised field experience related to the methods and strategies associated with the teaching of social studies in grades K-5. This experience requires 45 clock hours of observation and participation spread over one semester.
Prerequisite(s): EXPS 282 and EXPS 283 and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (COMP 105 or COMP 110 or COMP 270 or COMP 280 or CPAS with a score of 40)
Corequisite(s): EDD 495
Restriction(s):
Can enroll if Class is Undergraduate Certification only or Post-baccalaureate Certificate only or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDD 493 Simulation and Gaming 1 to 3 Credit Hours
This course focuses on simulation and gaming as approaches to learning which are fundamentally different from methods traditionally used in education, industry, business, and psychology. Students will have the opportunity to examine many different types of simulations and games and to participate in selected ones. They will also be able to design one for use in their own area of interest.
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 106 or COMP 220 or COMP 280 or COMP 270)
Restriction(s):
Can enroll if Class is Undergraduate Certification only or Post-baccalaureate Certificate only or Junior or Senior
EDD 495  Social Studies in the Elem Grd  2 to 3 Credit Hours
Examination and analysis of various programs and materials currently available for teaching social studies at the elementary level. Critical investigation of new developments and trends. Opportunity is provided to experiment with various techniques and to evaluate their effectiveness. Official admission to and good standing in teacher certification program are required. 
Prerequisite(s): PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270) 
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

EDD 496  Second Lang Tchg: Sec Level  3 Credit Hours
An examination of current methodologies and techniques for instruction in foreign languages in grades 7-12. Emphasis will be placed on a standards-based curriculum with special attention given to the creation of learning scenarios. The use of communicative activities and the assessment of language skill areas will also be emphasized. Official admission to and good standing in teacher certification program are required. 
Prerequisite(s): (FREN 301 or GER 301 or SPAN 301) and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 270 or COMP 280 or COMP 110) 
Corequisite(s): EDD 497
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior

EDD 497  Second Lang Tchg: Sec Level  1 Credit Hour
A required supervised field experience related to the teaching of a foreign language in grades 7-12. Involves a minimum of 45 clock hours of work and observation spread over one semester in a supervised classroom setting. Methods and techniques learned in EDD 496 will be used to increase the second language proficiency of learners in grades 7-12. Official admission to and good standing in teacher certification program are required. TB clearance, physician's statement of good health, criminal background clearance, and bloodborne pathogens/infectious diseases training are required. 
Prerequisite(s): (FREN 301 or GER 301 or SPAN 301) and PIII with a score of 1 and MGPA with a score of 2.75 and MIBM with a score of P and MIBR with a score of P and MIBW with a score of P and (CPAS with a score of 40 or COMP 105 or COMP 110 or COMP 280 or COMP 270) 
Corequisite(s): EDD 497 
Restriction(s):
Can enroll if Class is Junior or Graduate

EDD 498  Writing Meth: Formal&Informal  3 Credit Hours
This course is designed for those wishing to establish or improve creative writing programs in their elementary school classrooms. Theoretical models will be discussed. Strategies and materials that facilitate the writing of prose and poetry will be emphasized. 
Restriction(s):
Can enroll if Class is Junior or Graduate

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Educ F-Physical Education (EDF)

EDF 270  Physical Activity and Health  2 to 3 Credit Hours
Discussion of topics related to attaining a healthy lifestyle including nutrition, stress management techniques, physical training programs, cardiovascular disease, risk factors and other health-related topics. 
Prerequisite(s):
EDF 450  Hlth, Nutr, & PE/Clsrm Tchrs  2 Credit Hours
Instruction and participation in health, nutrition and physical education concepts and principles as they relate to elementary school curriculum. The six-dimensional model of wellness will be applied to meet legislative goals and objectives for the various grade levels. Required for elementary education majors. 
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior

EDK 380  Undergraduate Reading Research  1 to 2 Credit Hours
Permits qualified students to pursue a program of reading under the direction of a staff member selected by the student. The faculty member must agree to serve prior to the course election. May be elected twice for a total of two hours credit. 
Restriction(s):
Can enroll if Class is Junior or Graduate

EDK 480  Independent Action Research  1 to 4 Credit Hours
Requires the student to initiate and pursue to completion an informal field-based research study under faculty supervision. The faculty member must agree to supervise prior to course election. May be elected twice for a total of two hours credit. 
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Certification only or Junior or Senior

Educ K-Independent Study (EDK)

EDK 490  Education Internship  2 to 10 Credit Hours
This internship provides the student with opportunity for supervised, non-classroom experience in a school, college, or other educational setting. Between eight and forty clock hours of unpaid work per week, in conjunction with an arranged seminar, are required. The course may be elected twice for a total of four to ten semester credit hours.

Educ M-Community & Bilingual (EDM)

EDM 405  TESOL Strategies for Classroom  2 Credit Hours
This course examines instructional strategies and assessment for teaching English to speakers of other languages (TESOL). These strategies are intended for students who are learning English as a foreign language. This course is specifically designed for individuals planning on teaching English to children and adults in non-English speaking communities abroad.

Restriction(s):
Can enroll if Class is Junior

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Educ N-Special Education (EDN)

EDN 227  Inclusion: Multisens/Direct Inst  2 to 3 Credit Hours
Course addresses developing, implementing, and evaluating teaching strategies and materials that incorporate principles of direct instruction and multi-sensory activities that promote inclusion of students with special needs in general education settings, increase all students’ academic achievement, and improve social interaction among students from a wide variety of social, economic, and cultural backgrounds. (F, W, S).

Restriction(s):
Can enroll if Class is Undergraduate NCFD or Undergraduate NCFD or Freshman or Sophomore or Junior or Senior

EDN 401  Strategies for LD  3 Credit Hours
Content includes strategies for teaching K-12 students with learning disabilities in special and regular education classes. Course addresses diagnostic-prescriptive teaching, direct instruction, and specific strategies and materials addressing each academic area. The Individualized Education Program (IEP), development of goals and objectives, linking assessment with instruction, inclusion, and generality of behavior change will also be included.

Prerequisite(s): EDC 401

Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Post-baccalaureate Cert only or Post-baccalaureate NCFD or Junior or Senior

EDN 402  Socio-vocational Transitions  3 Credit Hours
This course includes strategies that teach age-appropriate social skills to students with disabilities in a variety of social settings found in the school, home and community. This course will also focus on issues relevant to vocational and community transitions for students with disabilities. As opposed to rote learning of material the course intends to provide students with a conceptual understanding of issues related to social and vocational transitions.

Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Post-baccalaureate Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDN 403  Assessment of the Learner  3 Credit Hours
Formal and informal assessment strategies used in the identification and service of students with handicaps are described. Technical and operational aspects of standardized testing, curriculum based assessment, and informal strategies are described.

Prerequisite(s): EDC 401

Corequisite(s): EDN 404

Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Junior or Senior

EDN 404  Assessment Practicum  1 Credit Hour
Clinical experiences with formal and informal assessment strategies currently used by special educators to identify and program for students with handicaps. Activities include administration, scoring and interpretation of norm- and criterion-referenced tests, Curriculum Based Assessments and informal assessment strategies. Deriving goals, objectives, activities and strategies from assessment data are also included. Must be taken with EDN 403 for the LD endorsement.

Prerequisite(s): EDC 401

Corequisite(s): EDN 403

Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Post-baccalaureate Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDN 406  Collaboration in the Classroom  3 Credit Hours
Techniques for enhancing collaboration between special and regular classroom teachers of mainstreamed exceptional and low-achieving learners at all levels. Included are essential skills for managing and monitoring the learning process and maintaining collaborative partnerships. As opposed to rote learning of material, the course will provide students with a conceptual and practical understanding of issues relevant to collaboration.

Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Undergrad Certification only or Post-baccalaureate Cert only or Sophomore or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDN 408 LD Directed Teaching Seminar 2 Credit Hours
Seminar will focus on the discussion, development, and evaluation of Individualized Educational Programs, Individualized Transition Plans, and Behavior Intervention Plans for students with learning disabilities at a variety of directed teaching sites. Topics will include academic and behavior assessment and strategies, curriculum, child study teaming, service delivery options and inclusion strategies. Co-requisite: EDD 415 and EDD 413. Pre-requisite: Grade of ?B? or better in a C401, N401, N403, N404, and N402 General Ed. Directed Teaching.
Prerequisite(s): EDC 401 and EDN 401 and EDN 403 and EDN 404 and EDN 402
Corequisite(s): EDD 413
Restriction(s):
Can enroll if Class is Senior
Can enroll if Major is Special Education

EDN 410 Intro to Cognitive Impair I 3 Credit Hours
Historical perspectives, definition, terminology, and assessment of the full spectrum of cognitive impairments are addressed. Identification of the behavioral, social, intellectual, communicative, vocational, adaptive, psychological, and educational/instructional needs of individuals with mild cognitive impairments across the lifespan.
Prerequisite(s): EDC 460
Corequisite(s): EDN 411
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDN 411 Cognitive Impair Pract I 1 Credit Hour
Experience in an educational setting with students with mild cognitive impairments for no less than 45 clock hours. Activities include working with the cooperating teacher on tasks such as individual instruction, data collection, informal assessment and program implementation and evaluation of IEP goals and objectives.
Prerequisite(s): EDC 460
Corequisite(s): EDN 410
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDN 412 Intro to Cognitive Impair II 3 Credit Hours
This course is an extension of introduction to Cognitive Impairments I. Identification of the behavioral, social, intellectual, communicative, vocational, adaptive, psychological and educational/instructional needs of individuals with moderate and severe cognitive impairments across the lifespan.
Prerequisite(s): EDC 460 and EDN 401 and EDN 411
Corequisite(s): EDN 413
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDN 413 Cognitive Impair Pract II 1 Credit Hour
Experience in an educational setting with students with moderate and severe cognitive impairments for no less than 45 clock hours. Activities include working with the cooperating teacher on tasks such as individual instruction, data collection, informal assessment and program implementation and evaluation of IEP goals and objectives.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411
Corequisite(s): EDN 412
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDN 414 Assessment Cognitive Impair 3 Credit Hours
Course discusses different theories of intelligence and intellectual development. Students learn to identify and describe different instruments used to assess the intellectual, adaptive behavior, academic, language/communication, vocational and social needs of students with mild, moderate and severe cognitive impairments.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411 or EDN 412 and EDN 413
Corequisite(s): EDN 415
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDN 415 Assessment Pract Cogn Impair 1 Credit Hour
Clinical experience with formal and informal assessment strategies currently used by special educators to identify needs and develop programming for students with mild, moderate and severe cognitive impairments. Activities include practicing observational techniques, completing, analyzing and interpreting various formal and informal assessments, including norm referenced and criterion referenced tests, achievement tests, rating scales and checklists.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411 and EDN 412 and EDN 413
Corequisite(s): EDN 414
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services
EDN 416  Strategies Cognitive Impair I  3 Credit Hours
Course content includes strategies for teaching students with mild cognitive impairments. Strategies for effective teaching and the development of instructional materials and learning environments for students with mild cognitive impairments is addressed. Functional academics, positive behavior supports, community based instructional support, self-determination, the use of instructional technology and supports, communication skills, adaptive behavior skills are covered within the context of the IEP, development of goals and objectives linking assessment with instruction, designing effective learning environments, and integrating students with mild cognitive impairments into the least restrictive environment.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411 and EDN 414 and EDN 415
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDN 417  Strategies Cognitive Impair II  3 Credit Hours
Course content includes strategies for teaching students with moderate and severe cognitive impairments. Strategies for effective teaching and the development of instructional materials and learning environments for students with moderate and severe cognitive impairments are included. Functional academics, positive behavior supports, community based instructional support, self-determination, the use of instructional technology and supports, communication skills, adaptive behavior skills are covered within the context of the IEP, development of goals and objectives linking assessment with instruction, designing effective learning environments and integrating students with moderate and severe cognitive impairments into the least restrictive environment.
Prerequisite(s): EDC 460 and EDN 412 and EDN 413 and EDN 414 and EDN 415
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services
EDN 418  Dir Teach I: Mild CI  2 Credit Hours
Field experience with students with mild cognitive impairments in classroom settings. Experiences include the delivery of direct instruction in functional academic, community based skills, functional living skills, and communication skills. Academic and behavioral assessments leading to the development and implementation of IEPs and BIPs are included. Students will also engage in observations, small and large group instruction, curriculum development, program development and implementation and participation in the EIP process. Collaboration with other classroom teachers in general and special education settings, and other activities under the on-site supervision of a certified CI teacher and university field supervisor. Directed teaching also includes weekly seminar.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411 and EDN 414 and EDN 415 and EDN 416
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services
EDN 419  Dir teach II: Mod/Sev CI  2 Credit Hours
Field experience with students with moderate and severe cognitive impairments in classroom settings. Experiences include the delivery of direct instruction in functional academic, community based skills, functional living skills, and communication skills. Academic and behavioral assessments leading to the development and implementation of IEPs and BIPs are included. Students will also engage in observations, small and large group instruction, curriculum development, program development and implementation and participation in the EIP process. Collaboration with other classroom teachers in general and special education settings, and other activities under the on-site supervision of a certified CI teacher and university field supervisor. Directed teaching also includes weekly seminar.
Prerequisite(s): EDC 460 and EDN 410 and EDN 411 and EDN 414 and EDN 415 and EDN 417
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate
Cert only or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services
EDN 420  Intro to Emotional Impairments  3 Credit Hours
Identification of the behavioral characteristics and instructional needs of children with emotional impairments/behavior disorders. Causes of emotional impairments and environmental influences as well as strategies for identification, assessment and interpreting such instruments will be addressed. Finally, instructional strategies for students with emotional impairments will be described and practiced through classroom activities.
Corequisite(s): EDN 421
Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Post-baccalaureate
Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDN 421  Practicum at Psych Facility  1 Credit Hour
Experience in a clinical setting with emotionally impaired individuals, for no less than 45 clock hours. Activities include working with cooperating teacher on tasks such as individual tutoring, data collection, informal assessment, interpretation of psychological data, and program implementation and evaluation. Also included will be the development of individualized instructional strategies, classroom activities, the use of adaptive technology, interdisciplinary approaches and the development of relevant goals and objectives for emotionally impaired students.
Corequisite(s): EDN 420
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate
NCFD or Junior or Senior
Can enroll if College is Education, Health, and Human Services
EDN 423  **Strat: Emotional Impairments**  3 Credit Hours
Course content includes strategies for teaching students with emotional impairments, including instruction on reading and mathematics. Course also includes strategies to deal with hyperactive behavior, aggressive behavior, socially withdrawn behavior, and delinquency. Strategies for effective teaching and the development of instructional materials and learning environments for students with emotional impairments are included. The Individualized Education Program (IEP), development of goals and objectives, linking assessment with instruction, and integrating students with emotional impairments into the regular classroom will also be covered.

**Prerequisite(s):** EDN 320

**Restriction(s):**
Can enroll if Class is Post-baccalaureate Certification only or Post-baccalaureate NCFD or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDN 425  **Eco-Behavioral Assessment**  3 Credit Hours
Formal and informal assessment strategies used in identifying and serving students with emotional impairments are described. Assessment strategies include eco-behavioral assessment, functional analyses, naturalistic observation techniques, norm-referenced and criterion-referenced tests, interviewing, achievement test, and curriculum based assessment. Technical aspects of assessment, interpretation of data, and diagnostic strategies are also addressed, as well as using adaptive technology and assessment instruments to facilitate more effective individualized instruction for students with emotional impairments. Finally, integrating assessment results from other disciplines will also be addressed.

**Prerequisite(s):** EDN 320

**Corequisite(s):** EDN 426

**Restriction(s):**
Can enroll if Class is Post-baccalaureate NCFD or Post-baccalaureate Certification only or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDN 426  **Eco-Behav Assessment Pract**  1 Credit Hour
Clinical experiences with formal and informal assessment strategies currently used by special educators to identify and program for students with emotional impairments. Activities include practicing observation techniques, and completing and analyzing eco-behavioral assessments and functional analyses. Also included are administration, scoring, and interpretation of norm-referenced and criterion-referenced tests, curriculum based assessments, achievement tests, rating scales and checklists, and informal assessment strategies. Practicum activities will also focus on using assessment results in curriculum design and instructional strategies to meet the individualized instructional needs of EI students.

**Prerequisite(s):** EDN 320

**Corequisite(s):** EDN 425

**Restriction(s):**
Can enroll if Class is Post-baccalaureate Certification only or Post-baccalaureate NCFD or Junior or Senior
Can enroll if College is Education, Health, and Human Services

* An asterisk denotes that a course may be taken concurrently.

---

**Educ T-Education Technology (EDT)**

**EDT 210  **Tech in Elementary Education**  3 Credit Hours**
Introduces students to the application of technology in elementary education. Students experience and become familiar with advanced learning technology tools; learn to use telecommunication tools for emailing, participating in educational listserv and online discussion groups, and accessing electronic resources on the WWW; learn to use productivity tools for word processing, drawing, painting and digital editing, spreadsheet application, database management, and multimedia presentation; learn to use educational multimedia for visual thinking, creativity, and multimedia authoring, learning to practice ethical and legal use of technology resources, and explore the use of such technology tools in the elementary classroom.

**Restriction(s):**
Can enroll if Class is Post-baccalaureate Certification only or Undergraduate Certification only or Sophomore or Junior or Senior
Can enroll if College is Education, Health, and Human Services

**EDT 211  **Design Tech-Based Learn Soltn**  3 Credit Hours**
EDT 211 provides students with the opportunity to design and develop technology-based learning solutions for real-world instructional problems. Students will identify an instructional problem, collect data to assess relevant needs of an authentic population of learners and work collaboratively to create learning solutions for face-to-face, blended and/or online environments. Students will also become proficient in the operation of various pieces of hardware and software and develop skills for evaluating and integrating technology into the different learning environments.

**EDT 401  **Res, Trends,&Issues in Ed Tech**  3 Credit Hours**
This course is designed to acquaint the students with research and issues facing education in the digital era. This course will look at the wide range of developments in technology and investigate the trends that are impacting the field of educational technology. Students explore and analyze key issues related to technology in the classroom of the twenty-first century. (YR)

**Restriction(s):**
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

**EDT 402  **Survey of Educ Tech Tools**  3 Credit Hours**
This course provides students with a general overview of relevant educational software and hardware technologies as well as web-based digital resources that can be used in instructional settings. The students will learn how to identify, select, and integrate a broad range of technologies into different learning environments. Students will also create several technology-based instructional products using various tools, applications, and authoring environments. (YR)

**Restriction(s):**
Can enroll if Class is Professional Development or Junior or Senior
Can enroll if College is Arts, Sciences, and Letters or Education, Health, and Human Services
EDT 410 Teaching with Technology 3 Credit Hours
Provides student teachers/interns with improved knowledge, skills, and confidence integrating advanced technology tools into the teaching and learning process in meaningful ways. Student teachers/interns design and teach multi-week units of instruction where student learning is enhanced with advanced technology tools. Student teachers/interns create electronic portfolios to present their achievement in teaching with technology demonstrating a superior level of achievement on the Proposed Standard with Related Indicators for the Achievement of Entry-Level Skills in Information Technology for all Michigan Teachers. (F,W,S). 
Prerequisite(s): EDT 210 or EDT 211

EDT 414 Application of Instl Design 3 Credit Hours
The course provides students with necessary skills to apply Technological Pedagogical Content Knowledge (TPCK) instructional design process in a specific subject area. (YR)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Education, Health, and Human Services

EDT 420 Intro Teaching Learning Online 3 Credit Hours
This course will introduce students to best practices in the design, creation and implementation of instructional materials in an online environment. Students will create and implement several instructional activities and assessments in blended, hybrid and online environments. (YR)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDT 422 Educating the Digital Learner 3 Credit Hours
Students are introduced to Universal Design for Learning (UDL) theory and how to apply it to learning activities in the blended, hybrid and online environment. Emphasis is placed on learning how to make accommodations for students in the online environment as well. Students will also learn to critically assess different approaches to online instruction. (YR)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Education, Health, and Human Services

EDT 430 Assistive Technology 3 Credit Hours
This course is designed as an introductory course in assistive technology (AT) including the history, relevant legislation and development of assistive technology. Students will be introduced to key AT categories by function including high tech and low tech assistive hardware, software and mobile devices to increase learning opportunities for individuals with disabilities. (YR)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally.
ECE 3100  Data Science I  4 Credit Hours
This course provides an overview of the mathematical techniques and computer tools needed in the field of data science. The important types of problems addressed in the field of data science are rigorously formulated and analyzed, including regression, pattern recognition and classification, time series prediction, and clustering. Effective mathematical and computational solution methodologies are discussed, including exploratory data analysis, statistical methods, and machine learning. At the end of the course, the student will have an analytic and computational toolkit with which they can solve real problems and "tell a story" with data. (F)
Prerequisite(s): (CIS 1501 or CIS 150) and (MATH 227 or MATH 217) and (STAT 325* or IMSE 317* or BENG 364*)
Restriction(s):
Can enroll if Level is Undergraduate

ECE 311  Electronic Circuits I  4 Credit Hours
Terminal characteristics and biasing of semiconductor diodes, bipolar and field-effect transistors, operational amplifiers. Rectifiers, amplifiers, and logic. Design projects. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): ECE 210 and CHEM 144 and (COMP 270* or COMP 106* or COMP 280* or CPAS with a score of 40) or COMP 220*
Corequisite(s):
Restriction(s):
Can enroll if Major is Electrical Engineering

ECE 314  Filter Design  3 Credit Hours
Review of filter descriptions, transfer functions, and frequency response characteristics; first and second order passive and active filters; biquad circuits; filter transformations. Butterworth, Chebyshev, and Elliptic filters; OPAMP realization of active filters; sensitivity analysis of active circuits. Three lecture hours per week.
Prerequisite(s): ECE 311 and ECE 317

ECE 316  Computer Electronics  0 to 3 Credit Hours
Design of selected electronic circuits such as signal conditioning amplifiers. Switching and digital logic circuits, using FET and BJT devices, A/D and D/A converters. Two-hour lecture and one three-hour lab per week. (YR).
Prerequisite(s): ECE 210 and ECE 273 and (COMP 270* or COMP 106* or CPAS with a score of 40) or COMP 220*

ECE 317  Electronic Signals and Systems  4 Credit Hours
Prerequisite(s): MATH 216 and (MATH 217* or MATH 227*) and ECE 311*
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

ECE 319  Electromagnetic Compatibility  4 Credit Hours
Introduction, cabling, grounding, balancing and filtering, passive components, shielding, digital circuit noise and PCB layout, radiation, ESD, regulations, demos, experiments, lab projects and guest lectures. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): ECE 311

ECE 321  Electromagnetic Fields/Waves  3 Credit Hours
Vector analysis; static electric field; steady electric currents; static magnetic fields; time-varying fields and Maxwell's equations; plane electromagnetic waves. Three lecture hours per week.
Prerequisite(s): ECE 311*

ECE 329  Intro to Computer Music  4 Credit Hours
This course will introduce students to methods and technologies of computer music. The basics of digital audio will be covered, including sampling, quantization, and compression standards. Various analysis tools will be covered, including the Fourier transform and windowing techniques. Mathematical models of physical instruments will be introduced. Various sound synthesis strategies will be introduced: wave tables, additive synthesis, subtractive synthesis, frequency modulation, and granular synthesis.
Prerequisite(s): MATH 105
Restriction(s):
Can enroll if Class is Junior or Senior

ECE 347  Applied Dynamics  4 Credit Hours
Introduction to rigid, multi-body dynamics tailored to the analysis and design of linkage-based robotic systems. Three dimensional kinematics, Eulerian angles, general motion of rigid bodies subjected to various forcing functions. Matrix methods, numeral and software-based problem solving. Project required. Four lecture hours per week.
Prerequisite(s): ME 265 and MATH 216 and MATH 217
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 351  Bio-Sensors & Instrumentation  4 Credit Hours
The course covers measurements in biological materials using a variety of sensor technologies along with electronic instrumentation design and use. Safety and FDA requirements are also presented.
Prerequisite(s): ECE 305 and (ENGR 216 or ECE 270) and MATH 216 and BIOL 103 and BIOL 140
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Arts, Sciences, and Letters or Engineering and Computer Science

ECE 3641  Robotics I  4 Credit Hours
Design, construction, and testing of field robotic systems. Focus on electronics, instrumentation, and machine elements. Particular attention to modeling dynamic systems, measuring and controlling their behavior, and making decisions about future courses of action. Examples include industrial robots, service robots, mobile robots, and medical robots. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): (ECE 3731 or ECE 372) and IMSE 317*
Corequisite(s): ECE 347
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
ECE 365  Control Syst Analysis & Design  4 Credit Hours
System and signal representation, elementary modeling of physical systems. Laplace transform, transfer functions and block diagrams representation. State variable representation. Concept of feedback, and transient and frequency response methods. System stability criteria. Control system design. Three lecture hours and one three-hour laboratory per week. (Not open to ECE students.)
Prerequisite(s): ECE 305 or ME 345
Corequisite(s): ECE 365L
Restriction(s):
Cannot enroll if Major is Electrical Engineering

ECE 370  Adv Soft Techn in Comp Engr  4 Credit Hours
Advanced concepts and techniques of modular object oriented and structured programming; representative real-world computer engineering applications including data structures, search and sorting. A term project is required. Four lecture hours per week. (F,W,S).
Prerequisite(s): ECE 270 and ECE 273*

ECE 371  Information Structures  3 Credit Hours
Fundamentals of computer data structures. Introduction to abstract data types. Characteristics and implementation of structured data types including arrays, stacks, queues, linked lists, generalized lists, trees, and graphs. Algorithms and applications of data structures in sorting and searching. Considerations of algorithm efficiency and complexity. Engineering applications and design. Three lecture hours per week.
Prerequisite(s): ECE 370 or ECE 274

ECE 372  Intro to Microprocessors  0 or 4 Credit Hours
Introduction to operation, interfacing, and applications of microcomputers and microprocessor-based systems. Assembly language programming, interrupts and interfacing. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): (ECE 270 and ECE 273) or CIS 310 and (COMP 270 or COMP 106 or COMP 220 or CPAS with a score of 40)
Corequisite(s):

ECE 3731  Microproc and Embedded Sys  4 Credit Hours
This course is an introduction to the operation, interfacing, and applications of microprocessor based systems, and real-time embedded system design. Topics include: microprocessor architecture, embedded C programming, real-time programming. Final project required. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): (ECE 270 and ECE 273) or CIS 310
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 375  Intro to Comp Architecture  4 Credit Hours
Introduction to architecture of mini- and mainframe computers. CPU, memory, and I/O characteristics. Introduction to parallel architectures and hardware design languages. Case studies of popular computer systems and design considerations. A design project is required. Three lecture hours and one laboratory hour per week.
Prerequisite(s): ECE 270 and ECE 273 and (ECE 276* or MATH 276*) and ECE 372*
Corequisite(s):
ECE 413  Intro to VLSI Design  3 Credit Hours
Introduction to digital systems and VLSI, CMOS fabrication, layout and CMOS integrated circuits, basic principles of MOSFET theory, CMOS logic circuits, subsystem design, Architecture design and HDL, CLSI chip design, advanced topics, laboratory consist of a series of design projects. Three lecture hours per week.
Prerequisite(s): ECE 273 and ECE 311

ECE 414  Electronic Systems Design  4 Credit Hours
Review of solid state device characteristics and circuit analysis. Design of selected electronic circuits such as operational amplifiers, power amplifiers, power supplies, oscillators, switching and digital circuits to further illustrate analysis and design of representative electronic circuits using classical and computer-aided design techniques. Four lecture/ laboratory per week.
Prerequisite(s): ECE 311 and (ECE 317* or ECE 3171*)

ECE 415  Power Electronics  4 Credit Hours
Introduction to power electronic circuit analysis and design. Power electronic circuits, power converters, power semiconductors. Time domain analysis emphasized. A design project is required. Four lecture/ laboratory hours per week.
Prerequisite(s): (ECE 317 and ECE 385 or ECE 3171)

ECE 420  EMC Measurement and Testing  3 Credit Hours
Introduction to EMC measurements, RF measurement fundamentals, EM waves, radiation mechanisms, measurement and measurement systems, screened rooms, open field test sites, practical measurements, conducted emission measurements, radiated emission measurements, radiated immunity, conducted immunity and electrostatic discharge. Projects will be assigned. (YR).
Prerequisite(s): ECE 319

ECE 426  Multimedia Forensics  4 Credit Hours
The objective of this course is to introduce current state-of-the-art in digital multimedia editing, its impacts on multimedia tampering, and multimedia forensics techniques to uncover inconsistencies due to tampering. This course will cover existing digital multimedia tampering techniques such as copy-move, cut-and-paste, etc. and digital multimedia tamper detection techniques. The course will also cover covert communication methods such as steganography and covert channel detection method steganalysis. This course will cover the limitations of existing state-of-the-art in multimedia forensics. Hands-on experience will be provided in various aspects of multimedia tampering and analysis through the numerous assignments and projects. Three lecture hours per week and one three-hour laboratory per week. (F)
Prerequisite(s): (ECE 387 or CIS 387) or CIS 447 or ECE 317
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
Can enroll if Major is Software Engineering, Electrical Engineering, Computer Engineering, Computer & Information Science

ECE 427  Digi Content Protec  4 Credit Hours
The objective of this course is to introduce current techniques information security in general and multimedia security in particular. This course will cover existing information hiding techniques such as digital watermarking, steganography, and fingerprinting. The course will also cover conventional digital content protection methods such as cryptography. This course will cover the pros and cons of conventional and non-conventional digital content protection methods and associated design issues to give the student hands-on experience in various aspects of information security and analysis through the various assignments and projects. (W)
Prerequisite(s): (ECE 387 or CIS 387) or CIS 447 or ECE 317
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science
Can enroll if Major is Software Engineering, Electrical Engineering, Computer & Information Science, Computer Engineering

ECE 428  Cloud Computing  3 Credit Hours
Cloud computing represents the emerging Internet-based services/ platforms with elastic and scalable computation powers operating at costs associated with service. Topics may include advanced web technologies (AJAX and Mashup), distributed computing models and technologies (Hadoop and MapReduce), Infrastructure-as-a-Service (IaaS), Software as a Service (SaaS), Platform-as-a-Service (PaaS), virtualization, parallelization, security/privacy, and other issues in cloud computing. This course will also explore the current challenges facing cloud computing. Course work will include homework assignments, presentations and a term project. Students cannot take both ECE 428 and ECE 528 for degree credit. Three lecture hours per week.
Prerequisite(s): ECE 270
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Computer Engineering, Mechanical Engineering, Electrical Engineering, Industrial & Systems Engin, Computer & Information Science, Software Engineering

ECE 431  Electrical Eng Design  4 Credit Hours
The course is conducted as a guided project design course with the class divided into teams and assigned a specific design project. Periodic progress reports are submitted during the term. A final written report and oral presentation including demonstration are required at the end of the term. Cost analysis, evaluation of design alternatives and application of engineering principles are emphasized. Two scheduled contact hours and six hours open laboratories per week.
Prerequisite(s): ECE 311 and ECE 373 and ECE 493*

ECE 432  Electrical Eng Design  6 Credit Hours
The course is conducted as a guided project design course over a two-semester period with the class divided into teams and assigned a specific design project. Periodic progress reports are submitted during the term. A final written report and oral presentation including demonstration are required at the end of the term. Cost analysis, evaluation of design alternatives and application of engineering principles are emphasized. Two scheduled contact hours and six hours open laboratories per week.
Prerequisite(s): ECE 311 and ECE 372 and ECE 493*
ECE 433 Intr to Multimedia Technologies 4 Credit Hours
This course will introduce students to basic terminology and methods of multimedia. Basic concepts of digital audio will be reviewed, including frequency, sampling, and popular compression schemes. Concepts of digital images will be introduced, such as resolution, color theory, and compression formats. Basic concepts of digital video and animation will be introduced. Relevant web technologies will be reviewed. Four lecture hours per week.
Prerequisite(s): ECE 311 or ECE 370
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

ECE 434 Machine Learning in Engin 4 Credit Hours
Introduce fundamental theories and basic techniques in machine learning with an emphasis on engineering applications. Topics include learning concepts, search algorithms, neural networks, fuzzy learning, paradigms for problem solving using machine learning. (F, W).
Prerequisite(s): ECE 370
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

ECE 435 Intro to Mobil/Smrt Dev & Tech 4 Credit Hours
This class will introduce students to the technology used in mobile/ smart devices and mobile communication networks. Various hardware and software aspects will be introduced, with particular emphasis on the constraints intrinsic to such systems. Students will get an overview of various mobile operating systems and how to develop software for mobile devices. Four lecture hours per week.
Prerequisite(s): ECE 372
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Computer Engineering, Electrical Engineering, Software Engineering

ECE 436 Elec Machines & Hybrid Drives 4 Credit Hours
This is an introductory course on electric machines and drive systems and their application in EV, HEV, PHEV and FCV powertrains. The objectives are to familiarize the students with the basic concepts of electromechanical energy conversion and various drives. Case studies in automotive applications such as electric and hybrid drivetrains, industrial and residential electric variable speed drive systems, will be discussed. Students cannot take both ECE 436 and ECE 4361 for credit. Four lecture hours per week.
Prerequisite(s): ECE 311
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Computer Engineering, Electrical Engineering, Mechanical Engineering, Software Engineering, Electrical Engineering

ECE 4361 Electric Machines and Drives 4 Credit Hours
This is an introductory course on electric machines and drive systems and their application in HEV/PHEV powertrain and other industrial and residential systems. The objectives are to familiarize the students with the basic concepts of electromechanical energy conversion and electric drive systems. Students are expected to be able to analyze and design electric drive systems for automotive, industrial, and residential applications. The topics covered in this course include DC machines, induction machines, permanent magnet synchronous machines, and switched reluctance motors and drives. Case studies in automotive applications such as electric and hybrid drivetrains, industrial and residential electric variable speed drive systems, will be discussed. Students cannot take both ECE 436 and ECE 4361 for credit. Four lecture hours per week.
Prerequisite(s): ECE 311
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Computer Engineering, Electrical Engineering, Mechanical Engineering, Software Engineering, Electrical Engineering

ECE 437 Intro to Electric Power Systems 3 Credit Hours
This course will introduce students to basic methods of electric power systems. Topics include AC circuits, phasors, complex power and complex impedance, transformers, per unit system, transmissions lines, power flow, economic dispatch, real and reactive power control, symmetric and unsymmetric faults, transient stability, relaying and protection. Three lecture hours per week.
Prerequisite(s): ECE 317 or ECE 3171
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Computer Engineering, Electrical Engineering, Computer Engineering

ECE 438 Web Engr: Prin & Tech 4 Credit Hours
Advanced concepts and techniques of web technology, focusing on interactive applications; real-world web engineering applications including data persistence, web security, hardware/software issues and asynchronous client/server communication. A term project is required. Four lectures per week.
Prerequisite(s): ECE 311 or ECE 370
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Software Engineering, Electrical Engineering, Computer Engineering

ECE 439 Intr to Electric Power Systems 3 Credit Hours
This is an introductory course on power systems and load analysis with focus on automotive applications. The objectives are to familiarize the students with the basic principles and concepts of vehicular power systems and loads. Students are expected to be able to analyze and design basic vehicular power systems. The topics covered in this course include an overview of power systems, vehicular power system architecture, DC and AC power grid in vehicular systems, power system stability, reliability, reactive power control, load flow analysis, short circuit analysis, and vehicular power system protection. Four lecture hours per week.
Prerequisite(s): ECE 317 or ECE 3171
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Engineering and Computer Science
ECE 4432 Renewable Electric Power Systems 4 Credit Hours
This course is an introduction to traditional power grids as well as renewable electric power systems. This course covers long-distance transmission of electric power with emphasis on admittance and impedance modeling of components and systems, complex power-flow studies, symmetrical and unsymmetrical fault calculations, economic operation of large-scale generation and transmission systems, an overview of emerging renewable energy technologies (e.g. wind and solar) and the impact of grid integration of renewable energy on power grids. Students cannot take both ECE 4431 and ECE 4432 for credit. Four lecture hours per week.
Prerequisite(s): ECE 3171
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Major is Mechanical Engineering, Industrial & Systems Engineering, Electrical Engineering, Software Engineering, Computer Engineering, Computer & Information Science

ECE 446 Electromechanical Energy Conversion 4 Credit Hours
Introduces fundamental concepts and specifications of electromechanical energy conversion: AC and DC machines drive, electric and magnetic storage and transfer, transformer, and performance analysis of AC and DC machines. The topics include principles of energy conversion, permanent magnet synchronous machines, induction machines, and DC machines. The lab projects for the course will focus on modeling, evaluation, and practice of AC and DC machine drives based on computer simulation and DSP based experiments; transient and dynamic analysis; linearization and small signal analysis of machines. Four lecture/laboratory hours per week.
Prerequisite(s): ECE 311 and (ECE 317* or ECE 3171*)

ECE 450 Analog and Digital Communication Systems 4 Credit Hours
Topics include introduction to communication systems, baseband communications, sampling theorem, amplitude and frequency modulation system design, statistical analysis of error and performance, digital modulation of analog signals, digital communication and digital modulation schemes, random processes and applications in digital communications, and noise analysis, optimal receiver. Four lecture hours per week.
Prerequisite(s): (ECE 317 or ECE 3171) and IMSE 317

ECE 451 Signal Detection 3 Credit Hours
Introduction to signal detection, parameter estimation and information extraction theory and its application to communication systems. Subject areas covered within the context of a digital environment are decision theory, detection and estimation of known and random signals in noise, adaptive recursive digital filtering, optimal linear filtering and pattern recognition. Three lecture hours.
Prerequisite(s): ECE 450

ECE 452 Probabilistic Methods/Signal Analysis 3 Credit Hours
Introduction to probability, random processes, correlation functions, and spectral density. Response of linear systems to random inputs. Applications in the field of communications.
Prerequisite(s): ECE 300

ECE 454 Introduction to Modern Wireless Communication 3 Credit Hours
This course provides an introduction to the fundamentals of modern wireless communication. The focus of this course will be on the (i) basic signal propagation issues and channel impairments, (ii) modulation schemes and bandwidth/power trade-offs, and (iii) overcoming channel impairment using equalizers, diversity and channel coding. Additionally, case studies will examine current wireless LANs and cellular systems. Three hours of lecture per week.
Prerequisite(s): ECE 450 or ECE 471
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 456 Introduction to Electro-optics 3 Credit Hours
Laser sources, detectors, imaging systems, optical signal processing, illumination and image acquisition, triangulation, and fiber optics. Three one-hour lecture periods.
Prerequisite(s): ECE 311 and ECE 321

ECE 460 Automatic Control Systems 4 Credit Hours
Modeling and response of dynamic systems. Transfer functions, poles and zeros and their significance to transient and steady state response of feedback systems. Analysis of stability of closed-loop systems. Steady state errors and transient performance of closed-loop systems. Design of feedback control systems by root locus techniques and by frequency domain methods. Laboratory projects include modeling, controller design, controller realization, system performance evaluation, and simulation studies. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): ECE 317 or ECE 3171
Corequisite(s): ECE 460L

ECE 464 Robotics 4 Credit Hours
Prerequisite(s): (ECE 300 or ECE 365) and ME 265

ECE 4641 Robotics II 4 Credit Hours
This is the second of a two-course sequence introducing foundational theory and applications of robotics engineering. The topics of this course include embedded computing, locomotion, localization, dead reckoning, inertial sensors and perception, navigation, multi-robotics systems, and human-robot interaction, and complex response processes. Three lecture hours and one three-hour laboratory per week.
Prerequisite(s): ECE 3641
Restriction(s):
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 465 Digital Control Design and Implementation 4 Credit Hours
Discrete model of a continuous-time system. Differential equations and Z-transforms. Similarities and differences between discrete-time and continuous-time models. Translation of analog designs to digital designs. State-space methods including state feedback and observers. Hardware limitations and implementation issues. Four lecture/laboratory hours per week.
Prerequisite(s): ECE 460
ECE 467  Digital Forensics II  4 Credit Hours
This course is a continuation of Digital Forensics I and will focus
on Internet Forensics. Students will examine in-depth concepts in
Internet evidence collection and preservation, as well as applications of
contemporary commercial forensic investigative software.
Prerequisite(s):  (ECE 387 or CIS 387) and (ECE 471* or CIS 427*)
Restriction(s):
Cannot enroll if Class is Freshman
Cannot enroll if Level is Rackham or Graduate
Cannot enroll if College is Business

ECE 470  Computer Int and Data Comm  4 Credit Hours
Hardware and software techniques used in interfacing between
computers and other computers or devices. Analog and digital
techniques. Parallel and serial communications. Popular communication
protocols. Error detection and correction. Lab project involves interfacing
and communicating with a microprocessor.
Prerequisite(s): ECE 372

ECE 471  Comp Networks/Data Comm  4 Credit Hours
Hardware and software techniques used in interfacing between
computers and other computers or devices. Data transmission
protocols and techniques. Introduction to popular local area network
protocols. Forward Error Control Techniques and Data Compression.
Introduction to wireless communications with focus on major challenges
and obstacles and the cellular phone infrastructure. Term projects involve
developing a data link layer protocol for interfacing and communication
with microprocessors. Four lecture hours per week.
Prerequisite(s): IMSE 317 and (ECE 372 or ECE 373)

ECE 473  Embedded System Design  4 Credit Hours
This course studies the issues dealing with real-time embedded system
design. Topics include: microprocessor architecture, assembly language,
real-time programming, space and time limitations, relations between
ANSIC Compiler output and assembly language, compiler linkers and
using a system development package for C programming. (F,W,S).
Prerequisite(s): ECE 372
Corequisite(s):

ECE 474  Compiler Design  3 Credit Hours
Principles of language compilation. Introduction to formal languages.
Lexical analysis, top-down and bottom-up parsing, code generation and
optimization. Error handling and symbol table management. Run-time
storage management. Programming language description. Introduction
to compiler-writing tools. A software design project is required. Three
lecture hours per week.
Prerequisite(s): ECE 370

ECE 475  Comp Hardware Org/Design  4 Credit Hours
Design methodology, performance analysis using probability and statistic
methods, hardwired and microprogramming in CPU design, hardware
design languages and memory design. Advanced concepts in computer
architecture. A design project is required. Three lecture hours per week
and one three-hour laboratory per week.
Prerequisite(s): ECE 375

ECE 476  Intro to Parallel Processing  3 Credit Hours
Advances in computer architecture, parallel structures, performance
evaluation, memory bandwidth considerations, processing bandwidth,
communication and synchronization. A design project is required. Three
lecture hours per week.
Prerequisite(s): ECE 375

ECE 477  Operating Systems  4 Credit Hours
Introduction to computer operating systems. Process management,
threads, CPU scheduling, memory management, process synchronization,
file systems and I/O devices. Selected advanced topics, e.g., distributed
systems, deadlock, I/O, job scheduling, and performance analysis using
queueing models, will be introduced. Case studies of modern operating
systems. A design project is required. Four lecture hours per week.
Prerequisite(s): ECE 370 and IMSE 317

ECE 479  Artificial Intelligence  3 Credit Hours
Basic concepts and methodology of artificial intelligence from
a computer engineering perspective. Emphasis is placed on the
knowledge representations, reasoning and algorithms for the design
and implementation of intelligent systems. Introduction to an AI language
and representative intelligence systems. A design project is required. Three
lecture hours per week.
Prerequisite(s): ECE 370

ECE 480  Intro to Dig Signal Processing  4 Credit Hours
Fundamentals of discrete-time signals and systems. Introduction to z-
transform and its applications. Design of digital filters. Characteristics
of analog-to-digital and digital-to-analog converters. Fourier transform of
sequences, DFT and FFT algorithms. An introduction to software tools
for the simulation and design of real time-digital filters. Implementation
digital systems using digital signal processing boards. Three hours
lecture and three hours laboratory experiments per week.
Prerequisite(s): (ECE 317 or ECE 3171) and (MATH 217 or MATH 227)
Corequisite(s):
Restriction(s):

ECE 481  Introduction to Machine Vision  3 Credit Hours
Applications to machine vision. Representative topics are: optics and
lighting, sensor characteristics, image acquisition, image analysis,
segmentation, connectivity, shape description, hardware for vision
applications, software considerations, applications including automatic
inspection and metrology. Open lab and project will be required.
Prerequisite(s): ECE 270
Restriction(s):
Can enroll if Class is Senior

ECE 4881  Introduction to Robot Vision  3 Credit Hours
This course introduces the theories and modern technologies in robot
vision. Topics include sensors, image analysis, region and segmentation,
object recognition, stereo vision, optical flow, color image, object tracking
and applications. Students cannot receive credit for both ECE 4881 and
ECE 588. Three lecture hours per week.
Prerequisite(s): ECE 270
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if Major is Computer & Information Science, Bioengineering,
Electrical Engineering, Computer Engineering, Mechanical Engineering,
Software Engineering, Industrial & Systems Engin

ECE 490  Selected Topics in Elec Engin  1 to 3 Credit Hours
Advanced or applied topics in electrical engineering offered according to
student’s interest and availability of instructors and equipment. Lecture
hours, laboratory, and/or computation period to be arranged.
ECE 491 Directed Studies 1 to 4 Credit Hours
Student in consultation with a faculty advisor will prepare a proposal in sufficient detail describing a subject topic to be studied. The proposal will be subject to approval by the department. A formal written and oral evaluation of the work performed are required for successful completion. Lecture hours, laboratory, and/or computation periods to be arranged.
Restriction(s):
Can enroll if Class is Senior or Graduate

ECE 492 Directed Research 1 to 4 Credit Hours
Student, in consultation with a faculty advisor will prepare a proposal in sufficient detail describing a research problem to be studied. The proposal will be subject to approval by the department. A formal written and oral evaluation of the research performed are required for successful completion. Lecture hours, laboratory, and/or computation period to be arranged.
Restriction(s):
Can enroll if Class is Senior or Graduate

ECE 493 Design Factors in Eng 2 Credit Hours
This course is comprised of a series of lectures on the subject of design. It will promote awareness of such factors as literature review, performance specifications, design considerations, product liability, standards and ethics, professional registration codes, patents and copyrights, packaging, documentation and report preparation. Two lecture hours.
Restriction(s):
Can enroll if Class is Senior or Graduate

ECE 495 Micro Systems Design 4 Credit Hours
Course content includes discussion and laboratory experience on a number of interfacing topics (timing, serial and parallel communication, ADC/DAC, control loop) and the preparation of a major report on a design topic approved by the course instructor. Team design projects may involve either software or hardware, or both. Two lecture hours and two three-hour laboratories per week.
Prerequisite(s): ECE 373 and (ECE 311 or ECE 316)

ECE 4951 Sys Design and Microcontrollers 3 Credit Hours
Techniques for interfacing actuators and sensors to computers with emphasis on the use of a variety of microprocessors and a broad range of sensors. Topics include introduction to small microprocessors such as PIC16, PIC18, small systems such as opic, basicx as well as using a PC as a controller. Control of motors and other actuators using opto-isolators and discrete electronics, use of H-bridges. Interfacing sensors that provide different encoding data, such as analog signals, digital communication using I2C protocol, handshake I/O, pulse width encoding. Interfacing to wireless communication using RF or IR. Includes laboratory experiments, individual midterm project and a final team project. Three lecture hours per week. (F,W)
Prerequisite(s): ECE 311 and ECE 372

ECE 498 Senior Engineering Design 3 Credit Hours
This course is conducted as a guided project design course over a two-semester period, with the class divided into teams, each assigned a specific design project. Periodic progress reports, a final written report, an oral presentation and project demonstration are required. Cost analysis, evaluation of design alternatives and application of engineering principles will be emphasized. A series of lectures on design issues will be presented in the first semester.
Prerequisite(s): (ECE 311 or ECE 316) and ECE 373

ECE 4981 Electrical Engineering Des I 2 Credit Hours
This course is conducted as a guided project design course over a two semester period, with the class divided into teams, each assigned a specific design project. Periodic progress reports, a final written report, an oral presentation and project demonstration are required. Cost analysis, societal impact, safety issues, evaluation of design alternatives and application of engineering principles will be emphasized. A series of lectures on design issues will be presented in the first semester.
Prerequisite(s): (ECE 317 or ECE 3171) and ECE 372 and (ECE 414 or ECE 415 or ECE 450 or ECE 460 or ECE 480 or ECE 4951)
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 4982 Computer Engineering Des I 2 Credit Hours
This course is conducted as a guided project design course over a two semester period, with the class divided into teams, each assigned a specific design project. Periodic progress reports, a final written report, an oral presentation and project demonstration are required. Cost analysis, societal impact, safety issues, evaluation of design alternatives and application of engineering principles will be emphasized. A series of lectures on design issues will be presented in the first semester.
Prerequisite(s): ECE 372 and ECE 375 and (ECE 471 or ECE 473 or ECE 478 or ECE 475)
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 4983 Electrical Engin Design II 2 Credit Hours
Second Semester Electrical Engineering Design This course is conducted as a guided project design course over a two semester period, with the class divided into teams, each assigned a specific design project. Periodic progress reports, a final written report, an oral presentation and project demonstration are required. Cost analysis, societal impact, safety issues, evaluation of design alternatives and application of engineering principles will be emphasized.
Prerequisite(s): ECE 4981
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore or Junior
Can enroll if College is Engineering and Computer Science

ECE 4984 Computer Engin Design II 2 Credit Hours
Second Semester Computer Engineering Design This course is conducted as a guided project design course over a two semester period, with the class divided into teams, each assigned a specific design project. Periodic progress reports, a final written report, an oral presentation and project demonstration are required. Cost analysis, societal impact, safety issues, evaluation of design alternatives and application of engineering principles will be emphasized.
Prerequisite(s): ECE 4982
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore or Junior
Can enroll if College is Engineering and Computer Science
ECE 4985  Electrical Engineering Design  3 Credit Hours
This course is conducted as a guided project design course over a two-
semester period, with the class divided into teams, each assigned a
specific design project. Periodic progress reports, a final written report,
an oral presentation and project demonstration are required. Cost
analysis, societal impact, safety issues, evaluation of design alternatives,
and application of engineering principles will be emphasized. A series of
lectures on design issues will be presented in the first semester.
Prerequisite(s): (COMP 270 or COMP 106 or COMP 220 or CPAS with
a score of 40) and (ECE 317 or ECE 3171) and ECE 372 and (ECE 414 or
ECE 415 or ECE 450 or ECE 460 or ECE 480 or ECE 4951)
Restriction(s):
Can enroll if Class is Senior

ECE 4986  Computer Engineering Design  3 Credit Hours
This course is conducted as a guided project design course over a two-
semester period, with the class divided into teams, each assigned a
specific design project. Periodic progress reports, a final written report,
an oral presentation, and application of demonstration are required. Cost
analysis, societal impact, safety issues, evaluation of design alternatives
and application of engineering principles will be emphasized. A series of
lectures on design issues will be presented in the first semester.
Prerequisite(s): (COMP 270 or CPAS with a score of 40 or COMP 106 or
COMP 220) and (ECE 317 or ECE 3171) and ECE 372 and ECE 375 and
(ECE 471 or ECE 473 or ECE 478 or ECE 475)
Restriction(s):
Can enroll if Class is Senior

ECE 4987  Robotics Engineering Design I  2 Credit Hours
This course is conducted as a guided project design course over a two-
course sequence, with the class divided into teams, each assigned a
specific design project. Periodic progress reports, a final written report,
an oral presentation and project demonstration are required. Cost
analysis, societal impact, safety issues, evaluation of design alternatives
and application of engineering principles will be emphasized. A series of
lectures on engineering issues will be presented.
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 4988  Robotics Engineering Design II  2 Credit Hours
Second semester Robotics Engineering Design: This course is conducted
as a guided project design course over a two-course sequence, with
the class divided into teams, each assigned a specific design project.
Periodic progress reports, a final written report, an oral presentation and
project demonstration are required. Cost analysis, societal impact, safety
issues, evaluation of design alternatives and application of engineering
principles will be emphasized. Prerequisite(s): ECE 4987
Restriction(s):
Can enroll if Class is Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ECE 499  Internship/Co-op  1 Credit Hour
A four-month professional work experience period of the Engineering
Internship Program, integrated and alternated with the classroom terms.
Restriction(s):
Can enroll if Class is Senior

Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter
terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Engineering Core (ENGR)

ENGR 100  Intro to Eng and Computers  2 Credit Hours
This course gives students a general introduction to the engineering
profession and covers some of the elementary skills that students need
in order to be successful in their engineering studies. The course covers
topics and problems pertaining to mechanical, industrial/manufacturing,
and electrical/computer engineering. Aspects of engineering analysis and
design are highlighted. Computer skills and communication skills (both
oral and written) are emphasized throughout the semester. Two-hour
lecture/two-hour laboratory.
Corequisite(s): ENGR 100L
Restriction(s):
Can enroll if College is Engineering and Computer Science

ENGR 126  Computer Engineering Graphics  2 Credit Hours
Principles of solid modeling and the representation of solid models
using both conventional drawing and computer graphics. Orthographic
representation of points, lines, planes and solids. Reference planes.
Auxiliary views. Sections, conventions, dimensioning. Fundamentals of
computer-assisted graphics in engineering disciplines. Three-dimensional
modeling using computer graphics software. Two-hour lectures and two-
hour laboratory.
Corequisite(s): ENGR 126L
Restriction(s):
Cannot enroll if Class is Graduate
Can enroll if College is Engineering and Computer Science

ENGR 216  Computer Meth for Engineers  2 Credit Hours
Computer programming in C (or one of its derivatives) and application to
basic numerical techniques. Numerical integration, solution of systems
of linear equations, root finding, curve fitting, error properties, numerical
precision. (F,W,S).
Prerequisite(s): ENGR 100 and ENGR 126* and MATH 216* and
(MATH 217* or MATH 227*)
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ENGR 250  Principles of Eng Materials  3 Credit Hours
An introductory course in engineering materials. Particular emphasis is
given to the correlation of material properties and internal structures;
structure of materials; stress-strain curves; temperature effects;
phase diagrams; ferrous and non-ferrous alloys; ceramics; polymers;
composites; electrical, magnetic, and optical properties; corrosion and
failure. Two-hour lectures and two one-hour recitations.
Prerequisite(s): (CHEM 144 and (CHEM 146* or CHEM 134) or
CHEM 136*) and MATH 115*
Corequisite(s): ENGR 250R
Restriction(s):
Cannot enroll if Class is Senior
Can enroll if College is Engineering and Computer Science

ENGR 250R  Prin of Eng Materials Rec  0 Credit Hours
Recitation component for ENGR 250. Must be taken concurrently with
ENGR 250.
Corequisite(s): ENGR 250

* An asterisk denotes that a course may be taken concurrently.
ENGR 290  Study Abroad Technical Subj  1 to 4 Credit Hours
200-level study abroad course in technical subjects.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

ENGR 300  Creative Problem Solving  1 Credit Hour
Principles of creative thinking, innovation, and group dynamics will be examined. The steps of creative problem solving will be presented and used in a practice problem: 1) problem definition, 2) verbal brainstorming and other idea-generating methods, 3) creative idea evaluation, 4) idea judgment and decision making, and 5) implementation. Finally, the two phases of the Pugh method (creative design evaluation) will be studied in a practical application.

ENGR 332  Speech for Professionals  3 Credit Hours
Professionals must effectively communicate in the technical and business environment of a company organization. The course pays particular attention to verbal communications within and between organizations, focusing on multiple audiences and their varying needs for information. Stressing audience awareness, organization, clarity and efficiency in speaking, it will improve speaking skills necessary for confident verbal presentations such as professional briefings and conferences.

ENGR 350  Nanoscience and Nanotechnology  4 Credit Hours
The terms "nanoscience" and "nanotechnology" have come to mean many different scientific and technical disciplines. The course will introduce students to the fundamentals of nanoscience and nanotechnology. Interesting phenomena about individual nanometer scale objects will be discussed. The difference in properties of objects of nanometer scale, containing hundreds or thousands of atoms and those exhibited by individual atoms or molecules or the properties of materials at the macroscale with which we are most familiar will be covered. The analytical techniques that are used to characterize these objects will be discussed. The manufacturing techniques used to make these objects along with their applications will be covered. Cost benefit analysis of nanotechnology and its future will be discussed. (YR)
Prerequisite(s): PHYS 151 and (CHEM 124 or CHEM 134 or CHEM 144)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science, Arts, Sciences, and Letters

ENGR 360  Des Inovtn: Proc, Meth & Prct  4 Credit Hours
Design Innovation: Process, Method and Practice is a highly interactive project-based introduction to design, structured as a hands-on course. This course brings a holistic vision to design innovation. Students work in teams that follow a process of immersion of user experiences, exploration of ideas and prototyping of potential solutions. To work effectively as a team, collaboration and project management concepts and methods are introduced. The course consists of two instructional elements: regular class lectures and in class hands-on exercises based on case studies. In addition, a semester long team based project allows students to apply classroom learnings to real life design problems. Teams present their design concepts, showcase prototypes in engaging and thoughtful ways. (F, W)
Restriction(s):
Can enroll if Class is Junior or Senior

ENGR 390  Study Abroad Technical Subj  1 to 4 Credit Hours
300-Level study abroad topics in technical subjects.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

ENGR 399  Prof. Pract. Engr & Comp Sci  1 Credit Hour
To provide undergraduate engineering and computer science students with an opportunity to develop skills, abilities, and behaviors through both hands-on learning and exposure to the professional work environment. The course provides supervised work experiences relevant to their degree programs with mutually agreed upon engineering work assignments among the student, employer and faculty advisor. (F,W,S)
Prerequisite(s): CIS 275 or (ECE 210 and ECE 273) or (IMSE 255 and IMSE 317) or (ME 230 or ME 260) and (ENGR 126 and ENGR 216 and ENGR 250)
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate
Can enroll if College is Engineering and Computer Science

ENGR 400  Appl Business Tech for Engr  3 Credit Hours
This course will introduce the students those business skills/tools that will be needed in their jobs soon after graduation and will make them better and well-rounded engineers. They will be able to function better within today’s global business environment. The major topics of the course are management finance including cost accounting, organizational behavior, program and project management and business related system thinking. Three hours of lecture per week.
Restriction(s):
Can enroll if Class is Post-baccalaureate NCFD or Senior
Can enroll if Level is Undergraduate or Professional Development

ENGR 490  Study Abroad Technical Subj  1 to 4 Credit Hours
400-level study abroad course in technical subjects.
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

English (ENGL)

ENGL 200  Intro to English Studies  3 Credit Hours
An introduction to English Studies for English concentrators. The course provides students with the interpretive, analytical and basic research skills, the critical vocabulary, the understanding of genre, and the knowledge of major critical approaches necessary for the study of literature. Readings will consist primarily of poetry, fiction, drama, and non-fiction prose written in English by British and American authors, but the course will also include other historical and cultural texts as well as works of criticism. Students will submit at least 20 pages of written work for extensive instructor feedback. (F,W)
Prerequisite(s): COMP 105 or COMP 110 or CPAS with a score of 30
ENGL 223  Intro to Creative Writing  3 Credit Hours
An introduction to the writing of poetry, the short story, and/or the play. Considerable writing, analysis, criticism, and discussion. (F,W).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

ENGL 230  Introduction to Literature  3 Credit Hours
Introduces students to imaginative literature in several genres, including, for example, fiction, poetry, and drama. Stress will be both on appreciation of the aesthetic and cultural value of reading literature and on understanding the process of reading sensitively and intelligently.

ENGL 231  Intro to Literature: Poetry  3 Credit Hours
A disciplined introduction to the reading of poetry, English and American. (F,W).

ENGL 232  Intro to Literature: Fiction  3 Credit Hours
A disciplined introduction to the reading of short stories and novels, English and American. (F,W).

ENGL 233  Intro to Literature: Drama  3 Credit Hours
A disciplined introduction to the reading of plays, English and American. (F,W).

ENGL 235  Engl Lit, Beginnings to 1660  3 Credit Hours
A study of the literature of English from the Anglo-Saxon era to 1660, including Chaucer and Milton, designed to introduce students to important authors, works, and literary movements in their historical contexts. Also designed to introduce students to the various ways of reading about literature. Although ENGL 235 is continued in ENGL 236, either course may be elected by itself.

ENGL 236  Engl Lit, 1660 to the Present  3 Credit Hours
A study of the literary history of England from the Restoration to the 20th century, designed to introduce students to important authors, works, and literary movements in their historical context. Also designed to introduce students to various ways of reading about literature. Although ENGL 236 is a continuation of ENGL 235, either course may be elected by itself.
Prerequisite(s): COMP 105 or CPAS with a score of 30 or COMP 110

ENGL 237  Survey of Amer Literature  3 Credit Hours
A survey of American literature from the Colonial period to the early 20th century, designed to expose students to major American authors, works, and literary movements. Topics covered include Puritanism, the literature of the American Revolution, American Romanticism, Transcendentalism, the 19th-century poetic tradition, Realism and Naturalism, early 20th-century poetry and prose, and 20th-century social fiction. Also designed to introduce students to various ways of writing about literature.
Prerequisite(s): COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

ENGL 238  Intro to Lit: Arab American  3 Credit Hours
This course in an introduction to Arab American literature, its historical and cultural contexts and contemporary relevance. Topics will include the literary and cultural productions of Arab immigrants, their transnational vision, and explorations of such concepts as home, memory and identity; the literary, dramatic and poetic responses of Arab American writers to 9/11 and the ongoing war on terror; the role Arab American literature in offering different versions of Arab and Arab American lives and experiences from the one circulated in mainstream media, Hollywood cinema and culture.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

ENGL 239  Intro to Lit: African American  3 Credit Hours
A study of African-American literature designed to expose students to important periods, works, and authors within historical context. Topics will include slavery, reconstruction, the Great Migration, the Harlem Renaissance, and the contemporary renaissance in Black women's literature. Students will be required to read, critically discuss, analyze, and write their responses to several literary genres that will be incorporated (fiction, drama, poetry).

ENGL 248  Introduction to Screen Studies  3 Credit Hours
This course will introduce students to the development of world cinema by integrating the aesthetics of film with its technology, and its social and economic milieu. It will train the students in analyzing the formalist qualities of the medium, and in understanding the evolution of its various genres and styles. (YR).

ENGL 301  Literary Criticism  3 Credit Hours
This course introduces literary criticism and theory from Aristotle to the present, focusing on the changing concept of literature's nature and function. Lectures, readings, and discussion cover such critics as Aristotle, Dryden, Pope, Johnson, Wordsworth, Coleridge, Arnold, T.E. Hulme, I.A. Richards, T.S. Eliot, and such movements as New Criticism, Phenomenology, Reader-Response, Archetypal Criticism, Structuralist-Semiotic Criticism, Psychological approaches to literature, New Historicism, Marxism, Feminism, and Deconstruction.
Prerequisite(s): (COMP 106 or COMP 270 or COMP 220 or COMP 280 and (ENGL 200 or CPAS with a score of 40) or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 236 or ENGL 237 or ENGL 239)

ENGL 304  Studies in Detroit Culture  3 Credit Hours
This course is an attempt to define a modern cultural history of Detroit. Taught by two faculty members, the emphasis of the course will vary but the following aspects of the city's cultural history will be covered in some detail: its literature, arts, music, and architecture; its social conditions and broader American culture context. (AY).

ENGL 306  Comparat. American Identities  3 Credit Hours
This course will confront and complicate the following key questions: what does it mean to be an American? What is American culture? Participants in this course will respond to the questions central to the American Studies field by reading and discussing historical, sociological, literary, artistic, material culture, political, economic, and other sources. Students will use this interdisciplinary study to examine the multiple identities of Americans - as determined by factors such as gender, race, class, ethnicity and religion. While emphasizing the diversity of American culture, participants will consider some core values and ideas uniting America both in historical and contemporary society. Students will be invited to seek out and share fresh narratives of the American experience.
Prerequisite(s): COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280
Restriction(s):
Can enroll if Level is Undergraduate

ENGL 310  Narrative Journalism  3 Credit Hours
Students learn to identify, understand and use the techniques of fiction in the service of nonfiction material. While studying the texts as literature, students are also encouraged to view them as models for writing. Assignments include the writing and revising of articles, based on research and interviews, and written in story form, drawing on literary techniques. (YR).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40
ENGL 311  British Lit: Beowulf to Milton  3 Credit Hours
A study of British literature from the Anglo-Saxon period to the works
of John Milton, designed to introduce students to important authors,
works, and literary movements in their wider historical and cultural
contexts. (YR)
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231
or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or
ENGL 239)

ENGL 312  British Lit: Milton to 1900  3 Credit Hours
A study of British literature from the works of John Milton to 1900,
designed to introduce students to important authors, works, and literary
movements in their wider historical and cultural contexts. (YR)
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231
or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or
ENGL 239)

ENGL 313  American Lit: Colonial to 1900  3 Credit Hours
A study of American literature from the Colonial period to 1900,
designed to introduce students to important authors, works, and literary
movements in their wider historical and cultural contexts. (YR)
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231
or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or
ENGL 239)

ENGL 314  Brit & Amer Lit: 1900-Present  3 Credit Hours
A study of British and American literature from 1900 to the present,
designed to introduce students to important authors, works, and literary
movements in their wider historical and cultural contexts. (YR)
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231
or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or
ENGL 239)

ENGL 317  Case Studies in Tech Writing  3 Credit Hours
ENGL 317 offers both practical and conceptual studies in technical
writing and is open to non-technical as well as technical students.
(Engineering students may take ENGL/ COMM 317 for elective credit.)
The course offers in-depth treatment of the communication problems and
various document designs common to technical writing professionals.
Instructional format includes lectures and discussion based on case
material derived from actual events, followed up by preparation of written
documents. Topics will include document design, language barriers, and
the role of technical documents in product liability. (AY).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40
Restriction(s):
Can enroll if Class is Junior or Senior or Graduate

ENGL 323  Advanced Creative Writing  2 to 3 Credit Hours
Practice in writing poetry, the short story, the novel, and/or the play. May
be repeated to a maximum of six credit hours. (OC).
Prerequisite(s): ENGL 223 or COMP 223

ENGL 327  Advanced Exposition  3 Credit Hours
A study of rhetorical theory and its application to various types of
expository essays. Writing assignments will reflect the types of essays
studied. May be repeated to a maximum of six credit hours. (YR).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a
score of 40 or COMP 280

ENGL 330  Feature Writing  3 Credit Hours
An introduction to the writing of feature stories for magazines and
newspapers. Students read and discuss classic examples and study the
methods of gathering information, of weaving an article from a variety of
story elements, and of preparing a manuscript for publication.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or
CPAS with a score of 40
Restriction(s):
Can enroll if Level is Undergraduate

ENGL 331  Online Reporting, Research, Writing  3 Credit Hours
Course introduces the technical, social, legal, and ethical practices of
online research, focusing on research skills required by journalists and
other writers. Students use new media technology to generate ideas,
to research subjects, and to develop general-audience writing projects
in their areas of interest. Course covers the use of Web search engines,
directories and databases; finding sources and interviewing people
online; evaluating the credibility of online sources and information; using
Lexis-Nexis to access archives and public records; and using spreadsheet
and database programs.
Prerequisite(s): COMP 106 or COMP 110 or COMP 270 or CPAS with a
score of 40

ENGL 341  Religion and Literature  3 Credit Hours
An investigation of the ways in which religious ideas and practices have
informed works of literature, and vice versa. Surveying a variety of genres
and themes, the course will focus mainly on British and/or American
literature and its engagement with Judeo-Christian religion, though some
attention may be devoted to other literary and religious traditions (e.g.,
ancient and medieval texts, European and world literature, Islam and
Eastern religions).
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280
or CPAS with a score of 40) and (ENGL 230 or ENGL 231 or ENGL 232
or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or
ENGL 239)

ENGL 342  Myth and Motif  3 Credit Hours
A study of archetypal figures and thematic motifs. Their recurrent
appearance in different literary periods and genres and their lineage will
be examined in order to increase understanding of the works themselves
and of the ages which produced them. A selection will be made from
classical myth, Biblical narrative, and historical sources. Thus, the figures
may vary from Oedipus and Cain to Faust and Don Juan. Motifs and story
patterns may include such devices as the spiritual quest, the journey into
Hell, or the patricide prophecy.
Prerequisite(s): ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or
ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200

ENGL 343  Adaptations of Literary Texts  3 Credit Hours
This course explores the adaptation of literary texts in a variety of literary
genres (poetry, drama, fiction) to other artistic mediums (film, graphic
novels/comics, paintings, etc.). Moving beyond limited comparisons of
"good" originals and "bad" adaptations, this course focuses on the
discussion among multiple versions of the same story across a range of
historical periods, asking how and why adaptations modify their sources
in a particular manner. This course addresses the difference between
adaptation and appropriation as well as imitation, quotation, allusion,
pastiche, and parody.
Prerequisite(s): (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or
ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239) and
(COMP 106 or COMP 220 or COMP 270 or COMP 280)
Restriction(s):
Cannot enroll if Class is Freshman
ENGL 345  Modern Literature: Drama  3 Credit Hours  
A careful reading of selected plays from Ibsen to the contemporary theater, designed to develop appreciative criticism and an understanding of the plays in their relationships to movements in modern drama, theater, background social forces, and trends of thoughts.

ENGL 346  Bible and Western Tradition  3 Credit Hours  
A detailed study of major episodes from the Bible, first as a literary work, and second as it is reflected in both poetry and the visual arts during the Renaissance and Baroque periods. Included are selected works by such masters as John Donne, George Herbert, and John Milton in poetry and Michelangelo, Raphael, and Leonardo da Vinci in painting and sculpture. (AY).

ENGL 347  Classic Lit/Engl Translation  3 Credit Hours  
A study of masterworks of ancient Greek and Roman literature with special attention to the development of epic, tragedy, and comedy. Authors studied will include Homer, Virgil, Aeschylus, Sophocles, Euripides, Aristophanes, Terence, and Plautus. 
Prerequisite(s): ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200
Restriction(s):  
Can enroll if Class is Junior or Senior or Graduate

ENGL 349  The Bible In/As Literature  3 Credit Hours  
This course will study selected readings from the Bible, first in regard to their own literary, historical, and cultural contents, and then in regard to their reception, interpretation, and reapplication by later literary tradition. Biblical selections may cover both the Old and New Testaments as well as Apocryphal traditions, while readings from later non-biblical texts will be drawn from various literary periods. 
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40) or COMP 280 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 356  Reading Urban Monstrosity  3 Credit Hours  
This course questions the literary techniques and forms the English writers developed between 1660 and 1900 to characterize and imagine London to be a unified community and to counter the growing perception of London as a "monstrous city." This image of "the English-speaking City" as an uncontrollable monster may be explored in writings by Daniel Defoe, Jane Austen, Elizabeth Gaskell, Robert Louis Stevenson, Charles Dickens, Thomas Hardy, and Joseph Conrad. 
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 280 or COMP 270) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

ENGL 358  Shakespeare on Film  3 Credit Hours  
The course examines the adaption of Shakespeare’s play-scripts for the screen. It goes beyond a discussion of the relative merits of plays and their respective film adaptions, examining the complex exchanges between the two artistic mediums (e.g. how stage convention such as soliloquies or off-stage action are adapted to the screen; how early silent films were used to market stage productions, etc.). It will approach the issue of adaption by examining the works of key directors, multiple films of a single play, silent films, foreign language adaptions, mass market and art house films, and films which deal with fictive or actual productions of Shakespeare’s plays. Special emphasis will be placed on specific stage productions that are later adapted to films. In this course, students will explore a broad range of responses to and interpretations of Shakespeare’s works. This class will stress the idea that each staging is an interpretation of the play, its point of view conditioned by the times, the medium, and the director’s vision. (OC)
Restriction(s):  
Can enroll if Level is Undergraduate

ENGL 361  Am Lit:1630 to Civil War  2 to 3 Credit Hours  
A wide-ranging exploration of American literature from its colonial origins through the Civil War. The works of such major authors as Anne Bradstreet, Benjamin Franklin, Frederick Douglass, and Herman Melville will be studied in cultural context. 
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 200 or COMP 270) or COMP 280 or ENGL 230 or COMP 220 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

ENGL 363  Am Lit:Civil War to WW I  3 Credit Hours  
A study of the major trends in American prose and poetry, including realism and naturalism, during the late nineteenth and early twentieth centuries, through the work of such authors as Walt Whitman, Mark Twain, and Sara Orne Jewett. 
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 200 or COMP 270) or COMP 280 or COMP 220 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

ENGL 364  Writing for Civic Literacy  3 Credit Hours  
In Writing for Civic Literacy, students will study how politicians, the media and critical citizens use language to engage with the broader community. Students themselves will learn to use language to become more active, well-informed citizens. They will study rhetorical awareness, audience analysis and persuasive writing techniques and put those lessons to use in community settings. They will perform community service at agencies of their choosing and use those experiences as objects of analysis, researching the social context in which those agencies operate and writing analytically about the agencies. Further, students will synthesize classroom lessons and real-world experience by executing writing tasks for and with the agencies (these tasks might include editorials for the local press, informational webpages and fundraising materials). 
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40

ENGL 368  20C/21C British/Amer Poetry  3 Credit Hours  
A survey of 20th- and 21st-century British and/or American poetry and poets, including such authors as Wallace Stevens, W.H. Auden, T.S. Eliot, Dylan Thomas, Langston Hughes, and Sylvia Plath. 
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or ENGL 230 or COMP 270) and (ENGL 200 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)
ENGL 370 **Narratives of Film and Lit** 3 Credit Hours
Explores the narrative conventions of literary and filmic fictions in a cultural, historical, and psychoanalytic context. Goes beyond a discussion of the relative merits of novels and their respective film adaptations and examines the more complex interchanges between the two narrative forms, the ideological function of narrative in contemporary society, and the effect of the medium of a fictional text on the reader/viewer. (AY).
Prerequisite(s): HUM 248 or ENGL 248 or FILM 248 or JASS 248

ENGL 371 **Eng Lit from Begin-1500** 2 to 3 Credit Hours
A survey of Old and Middle English literature (mostly in translation) designed to acquaint students with the development of themes and techniques of English authors writing before 1500. (OC)
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 200 or COMP 270) or COMP 280 or COMP 220 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 372 **Eng Lit: 1500 to 1600** 2 to 3 Credit Hours
A survey of English literature from the beginnings of the Renaissance in England through the works of Sidney, Spenser, and Shakespeare (excluding his plays).
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 270) or COMP 220 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 373 **English Lit 1600-1660** 3 Credit Hours
A survey of English literature from Jonson, Bacon, and Donne through the Metaphysicals, the Cavaliers, and Milton's early poems. Representative prose works will also be studied.
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 270) or COMP 280 or COMP 220 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 374 **Restoration and Early Eighteenth-Century Literature** 3 Credit Hours
A survey of English literature of the Restoration and early 18th century, with special emphasis on verse satire (Swift, Montague, and Pope), Restoration drama (Behn, Wycherly, and Congreve), and the origins of the literary gothic, Boswell's journals, the "graveyard school" of poetry, and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 375 **The Age of Johnson and Burney** 3 Credit Hours
A survey of English literature of the late 18th century. Readings address the literary gothic, Boswell's journals, the "graveyard school" of poetry, Samuel Johnson's poetry and prose, the 1789 revolutionary fervor, and the novels of Frances Burney and Jane Austen.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 and (ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 376 **Brit Lit in Romantic Era** 2 to 3 Credit Hours
A survey of British literature from 1789 to 1832 with special emphasis on the rise of Romantic poetry.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 270) and (ENGL 230 or COMP 220 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 377 **Victorian Poetry and Prose** 2 to 3 Credit Hours
A survey of British poetry and prose during the reign of Queen Victoria 1837 to 1901.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 270) and (ENGL 230 or COMP 220 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 381 **Intro to Postcolonial Studies** 3 Credit Hours
This course offers a general introduction to Postcolonial Studies - a field of cultural inquiry that questions how personal identity (specifically race, language and ethnicity) shapes, and is shaped by, the politics of colonization and nationalism. Students will clarify the subject of Postcolonial Studies by examining a variety of cultural and linguistic objects (literature, film, TV-journalism, slave- and middle-passage-narrative, and political manifesto) from a variety of cultural perspectives (Arab American, Anglo-Indian, West African, and Caribbean).
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 280 or COMP 270) and ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 240 or ENGL 250

ENGL 383 **American English** 2 to 3 Credit Hours
The development of American English and its dialects interpreted in the light of cultural history and processes of language change.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270) or COMP 280 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 386 **Gender Issues in Literature** 3 Credit Hours
A study of gender issues in English and American literature. The exact topic will vary from semester to semester, but the course may feature such topics as gay and lesbian literature, feminist criticism, images of masculinity, the representation of sexual ideologies, etc. Course may be repeated for credit when specific topic differs.
Prerequisite(s): ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200

ENGL 389 **The Odyssey of Blk Men in Amer** 3 Credit Hours
This course will examine the struggle of African American men for personal, political, and creative expression. This course incorporates several literary genres (narrative, fiction, essay, drama, and poetry) and the literary voices of black men who range from professional writers to politicians, from athletes to actors. Students will be required to critically read, discuss, analyze, and write their own responses to the literature found in the texts.
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 220 or COMP 280 or ENGL 230 and (ENGL 200 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

ENGL 390 **Topics in English** 3 Credit Hours
Examination of problems and issues in selected areas of English. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or ENGL 230 or COMP 220 or COMP 280 or COMP 270) or COMP 280 and (ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)
ENGL 394  Psychology and Theater  3 Credit Hours
The linkages between psychology and theater are analyzed from the perspective of the actor, the audience, and the analyst (both psychotherapeutic and literary). This includes ties between plays and theories of human behavior, psychodrama, and self-insight through performance. Class involves a significant experiential component.  
Prerequisite(s): (COMP 106 or COMP 220 or CPAS with a score of 40) or COMP 270 or COMP 280 and (ENGL 200 or ENGL 223 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239) and PSYC 101  

ENGL 399  Independent Studies in English  1 to 3 Credit Hours
Readings or analytical assignments in English, selected in accordance with the needs and interests of those enrolled and agreed upon by the instructor and the student. May be repeated for a maximum of 6 credit hours. (F,W).  

ENGL 400  Maj Engl Auth of the Mid Ages  3 Credit Hours
A concentrated study of the works of three or four major authors of medieval England, from the 13th through the 15th centuries.  
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 280 or COMP 270) and (ENGL 230 or COMP 220 or ENGL 231 or ENGL 232 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  

ENGL 401  Lit of Anglo-Saxon England  2 to 3 Credit Hours
A literary analysis of Beowulf and other old English poems. Some attention will be given to the structure and pronunciation of Old English. Students cannot receive credit for both ENGL 401 and ENGL 501.  
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  
Restriction(s): Cannot enroll if Class is Graduate  

ENGL 404  Medieval Mystical Writers  3 Credit Hours
A study of the genre of mystical writing as it was developed and practiced throughout the Middle Ages and in 14th century England particularly. Attention will be given to the historical, religious, and cultural contexts that enabled and were created by mystical texts. In addition, the course will explore how traditional and contemporary trends in the fields of religious and literary studies can be brought to bear on the genre of mystical writing. (OC)  
Prerequisite(s): (COMP 106 or COMP 270 or COMP 220 or COMP 280 or CPAS with a score of 40) or ENGL 230 and (ENGL 200 or ENGL 231 or ENGL 232 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)  

ENGL 405  Chaucer  3 Credit Hours
An introduction to the poetry of Chaucer, with primary reference to the Canterbury Tales and some attention to Chaucer’s short poems. Students cannot receive credit for both ENGL 405 and ENGL 505.  
Prerequisite(s): (COMP 106 or CPAS with a score of 40 and (ENGL 230 or COMP 220 or COMP 280 or COMP 270) or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)  
Restriction(s): Cannot enroll if Class is Graduate  

ENGL 406  Studies in Medieval Lit/Cult  3 Credit Hours
An intensive study of a single author, movement, genre, or theme in the Medieval period. Lectures will explore historical and cultural contexts and the relevance of contemporary methodologies to the study of Medieval texts.  
Prerequisite(s): (COMP 106 or COMP 220 or COMP 280 and (ENGL 200 or ENGL 230 or COMP 270 or CPAS with a score of 40) or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)  

ENGL 408  Shakespeare I: Earlier Works  3 Credit Hours
Intensive study of selected works from the first half of Shakespeare’s career, designed to increase the student’s critical appreciation and understanding. Students cannot receive credit for both ENGL 408 and ENGL 508.  
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270) or COMP 280 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  
Restriction(s): Cannot enroll if Class is Graduate  

ENGL 409  Shakespeare II: Later Works  3 Credit Hours
Intensive study of selected works from the second half of Shakespeare’s career, designed to increase the student’s critical appreciation and understanding. Students cannot receive credit for both ENGL 409 and ENGL 509.  
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 280 or COMP 270) or COMP 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  
Restriction(s): Cannot enroll if Class is Graduate  

ENGL 410  Maj Engl Authors of the Renais  2 to 3 Credit Hours
An investigation of significant themes and attitudes current in the Renaissance, as seen through an intensive examination of the works of two or three major authors, such as More, Spenser, Bacon, and Donne.  
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) and (ENGL 200 or COMP 220 or COMP 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  
Restriction(s): Cannot enroll if Class is Graduate  

ENGL 412  Milton  3 Credit Hours
An intensive study of Paradise Lost and Paradise Regained, Areopagitica and the shorter poems, including Samson Agonistes and Comus. Consideration is given to historical background and to other writings by Milton insofar as they illuminate his major works. Students cannot receive credit for both ENGL 412 and ENGL 512.  
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 220 or COMP 280 and COMP 270) or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)  
Restriction(s): Cannot enroll if Class is Graduate
ENGL 413  Shakespeare's Contemporaries  2 to 3 Credit Hours
An examination of the performance and cultural contexts of plays by English Renaissance playwrights (Marlowe, Middleton, Webster, Jonson, etc.), working around the time of Shakespeare. A limited number of Shakespeare's plays may be included.
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Can enroll if Level is Undergraduate

ENGL 414  Seventeenth-Century Readings  2 to 3 Credit Hours
An intensive study of mid-17th century authors or literary movements, such as Browne, Burton, and the metaphysical poets. Students cannot receive credit for both ENGL 414 and ENGL 514.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 and (ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 420  Maj Engr 18th-Century Authors  2 to 3 Credit Hours
An intensive study of two or three authors, such as Dryden, Behn, Pope, Swift, Burney, Austen, or Samuel Johnson. Students cannot receive credit for both ENGL 420 and ENGL 520.
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 421  Swingers. Flirts, & Libertines  3 Credit Hours
An examination of the functions that writers in English have assigned to literary decadence, libertinism, and aestheticism (or, the study of beauty and "art for art's sake"). We will read writers who identified themselves as libertines as well as writers who represented libertines as we address the Restoration rake (Rochester & Behn), the Regency buck (the Shelleys & DeQuincey), the Victorian dandy (Oscar Wilde, Michael Field, & the Decadents), the modern boy (Wilde, Waugh, and "art for art's sake"). Working around the time of Shakespeare, a selected number of his works may be included.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 and (ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 422  Satire  3 Credit Hours
An exploration of satirical writing and its functions from its English origins in eighteenth-century London (Montagu, Swift, Pope) to its twenty-first-century reincarnations in both America and Britain (Zadie Smith, Burgess, Schulyer, Hughes, Waugh). The course emphasizes the various goals that writers have assigned to satire, especially in terms of race, gender, and nationalism.
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and ENGL 200 or ENGL 230 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239

ENGL 423  Restoration Drama  3 Credit Hours
A survey of playwriting and theatrical performance in England from Charles II's opening of the theaters in 1660 to the Licensing Act of 1737. Playwrights and movements include historical drama (Dryden, Rowe), tragicomedy (Sotherne), urban social satire (Behn, Etherege, Gay, Centlivre, and Congreve), subversive comedy (Behn and Wycherley), sentimental comedy (Steele), and revisions of Shakespeare.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 424  18th-Century English Novel  3 Credit Hours
A study of the rise and development of the English novel during the 18th century. Consideration is given to such novelists as Defoe, Richardson, Fielding, Sterne, Austen, and Smollett. Students cannot receive credit for both ENGL 424 and ENGL 524.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 270) or COMP 280 or COMP 220 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 240 or ENGL 250)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 430  Stud in 19th-Century Brit Lit  3 Credit Hours
An intensive study of a special topic in 19th-century British literature. The course may treat a single author (e.g., Dickens), a movement (e.g., the Pre-Raphaelites), or a theme (e.g., literary responses to the French Revolution, the literature of mental crisis, Victorian social criticism).
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 280 or COMP 270) or COMP 220 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 431  British Romantic Writers  3 Credit Hours
An intensive study of selected British Romantic writers, with attention to the historical and literary contexts in which they wrote. Students cannot receive credit for both ENGL 431 and ENGL 531.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 432  Victorian Writers  3 Credit Hours
An intensive study of selected Victorian poets and/or nonfiction prose writers, with attention to the literary and historical contexts in which they wrote. Students cannot receive credit for both ENGL 432 and ENGL 532.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) or ENGL 230 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 434  The Victorian Novel  3 Credit Hours
A study of the British novel during the reign of Queen Victoria, 1837 to 1901.
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 220 or COMP 280 or COMP 270) or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
ENGL 436  Memoir and Travel Writing  3 Credit Hours
A course in narrative non-fiction that focuses on memoir and travel writing. Reading involves several books as well as classic essay-length examples. Assignments include both short analytical papers and the writing and revising of three original articles, based on research, interviews, memory, and observation, and drawing on literary techniques. (YR).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40

ENGL 440  Major 20C/21C Engl/Amer Authors  3 Credit Hours
An intensive examination of the works of representative English and American authors since 1900. Students cannot receive credit for both ENGL 440 and ENGL 540.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 270) or COMP 220 and (ENGL 230 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 441  Major 20C/21C English Authors  3 Credit Hours
An intensive study of several modern English authors, such as Shaw, Joyce, Forster, Dylan Thomas, D.H. Lawrence, and Woolf. Students cannot receive credit for both ENGL 441 and ENGL 541.
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 220 or COMP 270) and (ENGL 230 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 442  Studies in 20–21 Century Lit  3 Credit Hours
Intensive study of a special topic in 20th- or 21st-century literature in English. The course may treat a single author (e.g. E.M. Forster), a movement (e.g. Postmodernism), a genre (e.g. modern short story), or a theme (e.g. Literature of World War).
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 270) and (ENGL 230 or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Can enroll if Level is Undergraduate

ENGL 443  Anglo-Irish Literature  3 Credit Hours
A survey of Irish Literature written in English. Special emphasis will be given to Swift, Lady Gregory, Synge, Yeats, Joyce, and O’Casey, whose works will be examined in the context of Ireland’s unique history and culture.
Prerequisite(s): CPAS with a score of 40 (COMP 106 and (ENGL 230 or COMP 220 or COMP 280 or COMP 270) or COMP 220 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 444  Sem in 20C/21C Poetry  3 Credit Hours
A seminar focusing on the poems of two or three English and/or American poets of the 20th- or 21st-century. Intensive discussion of individual poems, along with lectures on authors’ critical and historical backgrounds.
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 220 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

ENGL 445  20C/21C Women Authors  3 Credit Hours
An analysis of selected works by significant and emerging 20th and 21st century women authors writing in English, with special emphasis on issues of gender and social and cultural identity.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 450  Maj Am Auth to the Civ War  3 Credit Hours
An intensive study of two or three authors, such as Charles Brockton Brown, Nathaniel Hawthorne, or Harriet Beecher Stowe, from the earlier periods of American Literature. Students cannot receive credit for both ENGL 450 and ENGL 550.
Prerequisite(s): CPAS with a score of 40 (COMP 106 or COMP 220 and COMP 270) or COMP 280 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 451  Maj Am Auth Civ War to WWI  3 Credit Hours
An intensive study of two or three major authors from the period between the Civil War and World War I, such as Emily Dickinson, Charles Chesnutt, or Henry James. Students cannot receive credit for both ENGL 451 and ENGL 551.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) or COMP 220 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 452  Major 20C/21C American Authors  3 Credit Hours
An intensive study of several modern American authors, from the World War I to the present, such as Langston Hughes, Frost, Hemingway, and Faulkner. Students cannot receive credit for both ENGL 452 and ENGL 552.
Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) or COMP 220 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate

ENGL 453  Contemporary American Novel  3 Credit Hours
Study of selected American novels and novelists since WWII with an eye to their social, political, and literary contexts. Course will focus on major works by major authors and representative works by lesser-known writers in order to explore technical, thematic and critical crosscurrents among the works. Students cannot receive credit for both ENGL 453 and ENGL 553.
Prerequisite(s): (COMP 106 or COMP 270) or CPAS with a score of 40 or COMP 220 or COMP 280 and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)
Restriction(s): Cannot enroll if Class is Graduate
**ENGL 454  Postmodern Literature  3 Credit Hours**
This course explores the expression of postmodernism in literature (primarily fiction) and critical theory. Selected works of fiction and creative non-fiction will be analyzed in terms of the problems and issues raised by the postmodern movement. Students cannot receive credit for both ENGL 454 and ENGL 554.

**Prerequisite(s):** (COMP 106 or COMP 220 or CPAS with a score of 40 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

**ENGL 455  Stud in 19th-Cent Amer Lit  3 Credit Hours**
Close investigation of a special topic in 19th century American literature. The course may treat a single author (e.g. Whitman), a movement (e.g. transcendentalism), or a theme (e.g. utopianism, technology, or pragmatism), and may draw on work from other field of study.

**Prerequisite(s):** (COMP 106 or CPAS with a score of 40 or COMP 280 or COMP 270) and (ENGL 230 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 200)

**Restriction(s):**
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate
Can enroll if College is Arts, Sciences, and Letters

**ENGL 461  Modern English Grammar  3 Credit Hours**
The morphological and syntactic analysis of the structure of present day English considered in the light of modern linguistic science. Students cannot receive credit for both ENGL 461 and ENGL 561.

**Prerequisite(s):** LING 480 LING 280 or LING 281

**Restriction(s):**
Cannot enroll if Class is Graduate

**ENGL 464  Contemporary Rhetorical Theory  3 Credit Hours**
An examination of contemporary rhetorical theories through study of representative practitioners and related developments in linguistics, philosophy, psychology, communication, and composition and rhetoric. Students may not receive credit for both ENGL 464 and ENGL 564.

**Prerequisite(s):** CPAS with a score of 40 (COMP 106 and (ENGL 200 or ENGL 230 or COMP 280 or COMP 270) or COMP 220 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

**Restriction(s):**
Cannot enroll if Class is Graduate

**ENGL 465  Discourse Analysis  3 Credit Hours**
An examination of the syntactic and semantic devices and structures underlying communication in written texts and oral interaction. Material to be analyzed will vary from term to term (technical reports, scholarly articles, newspaper stories) but examples will be drawn primarily from the written language. Students cannot receive credit for both ENGL 465 and ENGL 565. (OC).

**Prerequisite(s):** (COMP 106 or CPAS with a score of 40 and (COMM 201 or COMP 280 or COMP 270) or COMP 220 or COMM 220 or COMM 290 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 240 or ENGL 250)

**Restriction(s):**
Cannot enroll if Class is Graduate

**ENGL 467  Script-Writing Workshop  3 Credit Hours**
This writing intensive course will train students to compose a film script, focusing on the substance, structure, and style of an original screenplay. The course will be conducted as a workshop in which students will first study classic scripts (and films based on these) of the film-school generation of directors, then model scenes and sequences of their own scripts on the principles of the above texts, and finally, write their own respective film stories in accordance with an appropriate narrative structure and design. (YR).

**Prerequisite(s):** JASS 310 or COMP 310 or ENGL 310 or COMM 310

**ENGL 468  Writing Young Adult Fiction  3 Credit Hours**
In this course participants will explore the young adult novel from the point-of-view of a reader and a writer. They will read recently published and critically acclaimed popular young adult novels. They will use these texts to explore such issues as gender, race and identity as they relate to young adult lives and their respective cultures generally. They will use these texts as models for the production of their own texts and will consider the constraints and benefits of constructing and writing to a particular audience. They will consider if and why young adult novels are abbreviated or limited in relationship to adult literature. In addition to reading about ten novels, they will complete several creative exercises leading up to a final portfolio. Students will not receive credit for both ENGL 468 and ENGL 568.

**Prerequisite(s):** (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 280 or COMP 270) and (ENGL 223 or COMP 223)

**Restriction(s):**
Cannot enroll if Class is Graduate

**ENGL 469  Contemporary African Amer Lit  3 Credit Hours**
An intensive study of major 20th-century African-American writers. Fiction, poetry, autobiography, and drama will be examined but one genre will be stressed in any given term, e.g., the novel. Lectures will provide historical and biographical context for analysis and discussion of the works. Students cannot receive credit for both ENGL 469 and ENGL 569. (OC)

**Prerequisite(s):** CPAS with a score of 40 (COMP 106 and (ENGL 200 or ENGL 230 or COMP 220 or COMP 270) or COMP 280 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

**Restriction(s):**
Cannot enroll if Class is Graduate

**ENGL 4705  Black Women / Lit, Film, Music  3 Credit Hours**
This course will examine works produced by Black women authors, activists, filmmakers and musical performers in order to determine the methods they have incorporated in order to challenge and eradicate the prevailing stereotypes about Black women while advancing their own personal and racial agendas. It will also focus on the extent to which race, gender and class have shaped the creative work of Black women. Students will be required to read, discuss, analyze and write their own responses to the works of such firebrands as author Zora Neale Hurston, activist Ida B. Wells, filmmaker Julie Dash, and singer Billie Holiday.

**Prerequisite(s):** FILM 240 or FILM 248 or FILM 385 or AAAS 239 or AAAS 275 or HUM 303 or HUM 221 or HUM 222 or HUM 223 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or ENGL 248 or ENGL 200 or ANTH 303 or PSYC 303 or SOC 303 or WGST 303
ENGL 471 Sexuality Subcultures in Lit 3 Credit Hours
This course surveys primarily contemporary literature by writers who identify as gay, lesbian, bi-sexual, transgender, or queer. By studying the self-representation and culturally unique perspective of this emerging canon of writers, students in this course understand the emergence of LGBTQ literary traditions and understand the cultural diversity within these traditions. Students learn to identify the aesthetic qualities (such as camp, performativity, coded subtexts, homoeroticism, and the relationship between creativity and sexuality), and historical, political, and social concerns that characterize LGBTQ literary and cultural production. Topics covered include the struggle for civil rights before and after Stonewall, coming out narratives, the negotiation of homophobic cultures, post-colonial writers, and memoirs of the LGBTQ experience, as well as the historical emergence of sexual categories and the literary critique of heteronormativity. This course counts toward the English discipline diversity requirement. Students cannot receive credit for ENGL 471 and ENGL/WGST 571.
Prerequisite(s): (ENGL 200 or ENGL 231 or ENGL 230 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239) and (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40)

ENGL 472 Reading in Multicult Contexts 3 Credit Hours
An examination of the effect of different cultural backgrounds on reading and literature. Topics include contrastive rhetoric, folk narrative, and multicultural juvenile literature. This course does not satisfy requirements for the English concentration. Not open to English concentrators. Students cannot receive credit for both ENGL 472 and ENGL 572. (YR).
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 473 Arab American Women Writers 3 Credit Hours
Examines the literary and cultural contributions of Arab and Arab American women novelists, poets and artists to the development and consolidation of the cultures of understanding and coexistence; explores the tensions between citizenship and belonging, race and the politics of fears, gender and geographical mobility, and ethnic minorities and mainstream consciousness; discerns how Arab women writers and artists retool their various artistic endeavors to channel socio-political disenchantment, critique and civil disobedience; stresses how literary and artistic productions of a heterogeneous number of Arab American women writers and artists can indeed foster alternative visions of socio-cultural coexistence, dialogue and hospitality via artistic commitments to technical and stylistic experimentation and renovation. Students cannot receive credit for both ENGL 473 and ENGL 473. For graduate credit take ENGL 573.
Prerequisite(s): (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 238 or ENGL 239)

ENGL 474 Second Lang Acquisition: Engl 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480

ENGL 475 African American English 3 Credit Hours
An examination of the structure, history and use of African-American English. Topics will include the pronunciation, grammar and vocabulary of African-American English, theories of origin, linguistic repertoire and code-switching in African-American communities, the Ebonics controversy, and the role of this variety in education and identity formation. Students cannot receive credit for both ENGL 475 and ENGL 577.
Prerequisite(s): LING 280 or LING 281 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 476 History of the English Lang 3 Credit Hours
A thorough grounding in the history and structure of the English language. At issue are the linguistic and ideological origins of the concept of Standard English, and the strengths and limitations of different methods of analyzing the history of the language. The course will emphasize sound change, grammatical change, and their sociological context. (YR)
Prerequisite(s): LING 280 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 477 African American English 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480

ENGL 478 African American English 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 479 African American English 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 480 African American English 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 481 African American English 3 Credit Hours
A survey of fundamental concepts and major concerns in the study of English as a Second Language (ESL). The course examines a variety of psycholinguistic and sociolinguistic issues related to second language acquisition (SLA), ranging from theoretical to pedagogical. A primary focus is on developmental patterns and cognitive processes of SLA and individual variation in ESL speakers in terms of their social motivations and learning strategies. Implications for practical concerns such as the ESL teaching profession, instructional materials and curriculum development will be addressed where relevant.
Prerequisite(s): LING 280 or LING 281 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 482 History of the English Lang 3 Credit Hours
A thorough grounding in the history and structure of the English language. At issue are the linguistic and ideological origins of the concept of Standard English, and the strengths and limitations of different methods of analyzing the history of the language. The course will emphasize sound change, grammatical change, and their sociological context. (YR)
Prerequisite(s): LING 280 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 483 History of the English Lang 3 Credit Hours
A thorough grounding in the history and structure of the English language. At issue are the linguistic and ideological origins of the concept of Standard English, and the strengths and limitations of different methods of analyzing the history of the language. The course will emphasize sound change, grammatical change, and their sociological context. (YR)
Prerequisite(s): LING 280 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 484 World Englishes 3 Credit Hours
A study of the origin and significance of different forms of English throughout the world. Contact with other languages, pidginization, creolization, standardization, and the formation of the three circles of English are examined. (YR)
Prerequisite(s): LING 280 or LING 480
Restriction(s):
Cannot enroll if Class is Graduate

ENGL 485 Theories of Writing 3 Credit Hours
In this course we will investigate why and how people write for particular audiences and in a variety of contexts. Subjects will include: cognitive and social theories of writing and the writing process, theories of persuasion, writing across the curriculum, writing for multiple audiences, writing in the workplace, writing for self and for publics, and teaching writing. The course will be useful to students interested in teaching writing at the K-12 level, those interested in careers in communication and those who wish to better understand how writing promotes personal and societal change. (YR)
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280
**ENGL 486 Queer Theory & Literature** 3 Credit Hours
This course reads theories of sexuality to analyze how writers since 1600 have imagined printed text to reflect and shape desire, particularly same-sex desire. The course questions how same-sex desire appears in literature written before the theorization of "the Homosexual" in the late nineteenth century as well as how writers imagine sexuality before a hetero/homosexual binary appears. Writers may include contemporary theorists (Sedgwick, Foucault, Butler) as well as novelists (Gaskell and Stoker), playwrights (Kushner and Wycherley), and poets.

**Prerequisite(s):** (COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40) and (COMP 280 and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239 or AAAS 239)

**ENGL 487 Monsters, Women & the Gothic** 3 Credit Hours
This course questions our inheritance of "the gothic" as a distinct literary style that continues to discipline readers' notions of gender and sexual identity. The course argues that by tracing the gothic's literary history, we may simultaneously witness a history of gender formation. Readings may include English novelists who originated a gothic style in English (Walpole, Radcliffe, Lewis) as well as English and American poets and novelists who have debated as well as resisted the effects of the gothic on readers (particularly women's) psychology (Christina Rossetti, Austen, King, Stoker).

**Prerequisite(s):** (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

**ENGL 488 Env Lit & Reps of Nature** 3 Credit Hours
An interdisciplinary study of the ways in which the relationship between "nature" and humankind has been represented in literature and other forms of cultural expression. Emphasis on American and British texts of the 19th centuries, but assigned materials may include readings from other cultures and historical periods.

**Prerequisite(s):** (COMP 106 or CPAS with a score of 40 or COMP 220 and (ENGL 230 or COMP 280 or COMP 270) or ENGL 231 or ENGL 200 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

**ENGL 490 Advanced Topics in English** 3 Credit Hours
Examination of advanced problems and issues in selected areas of English studies. Title as listed in the Schedule of Classes will change according to content. May be repeated for credit when specific topics differ.

**Prerequisite(s):** (COMP 106 or COMP 220 or COMP 270 or COMP 280 or CPAS with a score of 40) and (ENGL 200 or ENGL 230 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 236 or ENGL 237 or ENGL 239)

* An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

---

**English Composition (COMP)**

**COMP 095 Eng Second Language I** 3 Credit Hours
An alternative to COMP 099. Specifically designed to address the needs of students for whom English is a second language and who are not yet proficient in English. Offers intensive practice in basic English grammar and rhetoric through the writing of short papers and the reading and discussion of appropriate texts. Focuses on the conventions of written English. (OC).

**COMP 099 Writing Techniques** 3 Credit Hours
Course is designed to help the less-prepared student qualify for COMP 105 by providing a review of basic grammar and syntax and frequent practice in writing short papers to develop habits of unified, coherent, and correct composition. Student writing is complemented by the reading and analysis of short prose pieces selected to help students read for understanding and to learn more about writing through the study of professional authors. Must be taken by students who do not qualify for COMP 105. (F,W).

**COMP 105 Writing & Rhetoric I** 3 Credit Hours
Comp 105: Focuses on the study and practice of writing and rhetoric, with special emphasis on the writing process. Students write and read critically a range of texts, and consider academic and nonacademic genres and conventions. (F,W).

**Prerequisite(s):** COMP 099 or CPAS with a score of 20

**COMP 106 Writing & Rhetoric II** 3 Credit Hours
Focuses on the study of writing and rhetoric through composing a range of researched texts. Students study the rhetorical choices effective for writing in different media, and learn practical strategies for academic inquiry and for giving useful feedback in response to the writing of others. Such strategies include those related to the use of electronic and print resources, peer-review and revision. Credit may only be given toward degree one time for Comp 106, 220, 270, or 280, as they are "equivalents".

**Prerequisite(s):** COMP 105 or CPAS with a score of 30 or COMP 110

**COMP 110 Honors Writing & Rhetoric I** 3 Credit Hours
Honors Program introductory composition course. Fulfills the Composition I requirement for students in the Honors Program. Course focuses on college-level expository writing techniques through seminar-type analysis of texts read in the Honors Program and through individualized and group writing workshops. Assignments include at least five finished papers incorporating revision. Honors students, like other students in first-semester composition, must pass the standard exit exam for COMP 105 to continue on to COMP 220 (or COMP 106). (F).

**COMP 220 Honors Writing & Rhetoric II** 3 Credit Hours
Honors Composition fulfills the Composition II requirement for students in the Honors Program. It is designed to develop research, writing, and editing skills and to give the student experience in argumentation and persuasion and in the interpretation of literary texts. Satisfies for honors students the 200-level prerequisite for upper-division English courses, except for English concentrators. Credit may only be given toward degree one time for Comp 106, 220, 270, or 280, as they are "equivalent" courses. (YR)

**Prerequisite(s):** COMP 110 or CPAS with a score of 30 or COMP 105

**COMP 223 Intro to Creative Writing** 3 Credit Hours
An introduction to the writing of poetry, the short story, and/or the play. Considerable writing analysis, criticism, and discussion. (F,W).

**Prerequisite(s):** COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280
COMP 227  Intermed Expo and Arg  3 Credit Hours
Further explorations in exposition and argumentation to develop and enhance the student's ability to write essays and/or articles. Review of basics of grammar and style. Intensive practice in writing and careful examinations of appropriate books and shorter prose works. Written assignments of 500 to 2000 words. (F,W).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

COMP 267  Arab & Arab American Workshop  3 Credit Hours
The Arab and Arab American Writers Workshop is a creative writing workshop focusing on poetry and fiction. Students will explore Arab American literature, writers, and themes. Students are expected to work on their own manuscripts as well as critique outside readings. The workshop will be conducted under the guidance of Arab and Arab American faculty and is open to all students.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

COMP 270  Tech Writing for Engineers  3 Credit Hours
Instruction and practice in designing technical reports. Students study the rhetorical problems facing the professional engineer in industry and learn practical strategies for analyzing and communicating technical information to both technical and non-technical audiences. Topics include audience analysis, technical research methods, report formats (written and oral, formal and informal), argumentation and persuasion, editing. This course fulfills the Composition II requirement for engineering students only. Credit may only be given toward degree one time for Comp 106, 220, 270, or 280, as they are "equivalent" courses. (F,W)
Prerequisite(s): COMP 105 or CPAS with a score of 30 or COMP 110
Restriction(s):
Can enroll if Class is Sophomore or Junior or Senior
Can enroll if College is Engineering and Computer Science

COMP 280  Business Writing & Rhetoric  3 Credit Hours
COMP 280 focuses on instruction and practice in composing and designing business documents, including abstracts, memos, email, letters, reports, resumes, proposals, and slide presentations. Students study the rhetorical problems facing business professionals and learn practical strategies for analyzing business information and communicating with professional and non-professional audiences. Such strategies include those related to the use of electronic resources, peer-review and revision. This course fulfills the Composition II requirement for pre-business students. Credit may only be given toward degree one time for Comp 106, 220, 270, or 280, as they are "equivalent" courses.
Prerequisite(s): COMP 105 or COMP 110 or CPAS with a score of 30
Restriction(s):
Can enroll if Major is Public Health, Prebusiness, Community Health Education

COMP 300  Writing Studio  1 Credit Hour
Concurrent registration in a first-year writing course or an upper-level writing-intensive course required. Writing Studio is a one-credit-hour workshop that provides small-group, student-centered advice on all phases of the writing process, from composing to revising and editing. Special attention given to rhetorical considerations like adapting to audience expectations and critically considering discipline-specific conventions. Focus on drafts-in-progress students are writing concurrently in their Dearborn Discovery Core classes. (F,W,S,YR)

COMP 310  Narrative Journalism  3 Credit Hours
Students learn to identify, understand and use the techniques of fiction in the service of nonfiction material. While studying the texts as literature, students are also encouraged to view them as models for writing. Assignments include the writing and revising of articles, based on research and interviews, and writing in story form, drawing on literary techniques. (YR).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

COMP 327  Advanced Exposition  3 Credit Hours
A study of rhetorical theory and its application to various types of expository essays. Writing assignments will reflect the types of essays studied. May be repeated to a maximum of 6 credit hours.
Prerequisite(s): COMP 106 or COMP 270 or COMP 220 or CPAS with a score of 40 or COMP 280

COMP 331  Online Reptng,Resrch,Writing  3 Credit Hours
Course introduces the technical, social, legal and ethical practice of online research, focusing specifically on reporting (i.e. research and interview) skills required by journalists and others. Students use new media technology to generate ideas, to research subjects, and to develop general-audience writing projects in their areas of interest. Course covers the use of Web search engines, directories and databases; finding sources and interviewing people online; evaluating the credibility of online sources and information; using Lexis-Nexis to access archives and public records; and using spreadsheet and database programs.
Prerequisite(s): COMP 106 or COMP 110 or COMP 270 or CPAS with a score of 40 or COMP 280
Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior
Can enroll if Level is Undergraduate

COMP 341  Writing in the Professions  3 Credit Hours
This course involves students in an examination of rhetoric and argumentation in professional and workplace settings. This course introduces relevant theories of cultural and linguistic analysis, including genre analysis. COMP 341 includes an extended research project focused on writing in professional or workplace settings. (AY)
Prerequisite(s): COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

COMP 364  Writing for Civic Literacy  3 Credit Hours
In Writing for Civic Literacy, students will study how politicians, the media and critical citizens use language to engage with the broader community. Students themselves will learn to use language to become more active, well-informed citizens. They will study rhetorical awareness, audience analysis and persuasive writing techniques and put those lessons to use in community settings. They will perform community service at agencies of their choosing and use those experiences as objects of analysis, researching the social context in which those agencies operate and writing analytically about the agencies. Further, students will synthesize classroom lessons and real-world experience by executing writing tasks for and with the agencies (these tasks might include editorials for the local press, informational webpages and fundraising materials).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

COMP 390  Topics in Composition  3 Credit Hours
Examination of problems and issues in selected areas of rhetoric and composition. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topic differs. (OC).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280
COMP 399  Independent Study  1 to 3 Credit Hours
A significant writing project in non-fiction or fiction prose developed in accordance with the needs and interest of those enrolled and agreed upon by the instructor. Participants may also study texts of published authors. May be repeated for a maximum of 6 credit hours.
Restriction(s):
Can enroll if Level is Undergraduate

COMP 436  Memoir and Travel Writing  3 Credit Hours
A course in narrative non-fiction that focuses on memoir and travel writing. Reading involves several books as well as classic essay-length examples. Assignments include both short analytical papers and the writing and revising of three original articles, based on research, interviews, memory, and observation, and drawing on literary techniques. (YR).
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280
Restriction(s):
Can enroll if Level is Undergraduate

COMP 446  Contemporary Rhetorical Theory  3 Credit Hours
An examination of contemporary rhetorical theories through study of representative practitioners and related developments in linguistics, philosophy, psychology, communication, and composition and rhetoric. Students may not receive credit for both COMP 464 and COMP 564.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

COMP 466  Arguing Feminism: Rhetoric  3 Credit Hours
An introduction to the work of major twentieth century feminists working in rhetoric and related fields. Students examine recurring themes of language, meaning, ethics and ideology, and practice writing strategies which address rhetorical and ethical concerns central to feminist/academic writing.
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280
Restriction(s):
Cannot enroll if Class is Freshman
Can enroll if Level is Undergraduate

COMP 468  Read/Writ Young Adult Fiction  3 Credit Hours
In this course participants will explore the young adult novel from the point-of-view of a reader and a writer. They will read recently published and critically acclaimed popular young adult novels. They will use these texts to explore such issues as gender, race and identity as they relate to young adult lives and their respective cultures generally. They will use these texts as models for the production of their own texts and will consider if and why young adult novels are abbreviated or limited in relationship to adult literature. In addition to reading about ten novels, they will complete several creative exercises leading up to a final portfolio.
Prerequisite(s): COMP 106 and (ENGL 223 or COMP 223)
Restriction(s):
Cannot enroll if Class is Graduate

COMP 475  Supporting Literacies  3 Credit Hours
COMP 475 will help prepare advanced undergraduate students to be successful as writing tutors and/or as supporters of literacy development in diverse higher education and community contexts (work in university writing centers, community literacy organizations, service learning courses, etc.) through sustained focus on the theoretical and practical issues involved in the teaching and tutoring of writing. The course also will help students make explicit connections between the teaching and learning of writing in various college classroom contexts (i.e., writing-across-the-curriculum) and other sites of literacy work. A range of writing projects will provide students with opportunities also to hone their own abilities as reflective and critical writers. (AY)
Prerequisite(s): COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270 or COMP 280

COMP 485  Theories of Writing  3 Credit Hours
In this course we will investigate why and how people write for particular audiences and in a variety of contexts. Subjects will include: cognitive and social theories of writing and the writing process; theories of persuasion, writing across the curriculum, writing for multiple audiences, writing in the workplace, writing for self and for publics, and teaching writing. The course will be useful to students interested in teaching writing at the K-12 level, those interested in careers in communication and those who wish to better understand how writing promotes personal and societal change. (YR)
Prerequisite(s): COMP 106 or COMP 220 or COMP 270 or CPAS with a score of 40 or COMP 280

*  An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Entrepreneurship (ENT)

ENT 400  Entrepreneurial Thinking&Behav  3 Credit Hours
This course introduces entrepreneurship as an approach to one?s life and career advancement. It explores how entrepreneurial thought can create change and opportunities in many organizations, including large corporations, small business, and communities. The course will focus on how the entrepreneurial mindset is a toolkit that can be taught and how entrepreneurial skills empower individuals to bring about change. Students will be challenged to push the boundaries to identify unmet customer needs that are demanded by various demographics. Important aspects of the course include a careful analysis of the following: opportunity recognition, design thinking, market assessment, effective communication, operational partners, strategic management, and financial planning. Students will be exposed to resources from urban areas including speakers with experience and expertise in the entrepreneurial community.
Restriction(s):
Can enroll if Class is Junior or Senior
Environmental Science (ESCI)

ESCI 275 Intro to Environmental Science 3 Credit Hours
A distribution course which surveys major environmental problems. Concepts discussed are ecology, environmental chemistry, methods of investigating the environment, and possible solutions to environmental problems. Three hours lecture. (YR).

ESCI 301 Environmental Science 4 Credit Hours
A survey of historical and current environmental problems, with emphasis on understanding causes, consequences, and control. Topics include human population growth, air pollution, water pollution, and waste disposal. Laboratory emphasizes an experimental approach to environmental problems, including data collection, analysis, and interpretation. Lecture and laboratory/recitation.
Prerequisite(s): (CHEM 124 or CHEM 134 and GEOL 118 or CHEM 144) and BIOL 130

ESCI 304 Ecology 4 Credit Hours
Relationships between organisms and their environments. Patterns in the physical environment, physiological and behavioral adaptations, population dynamics, energy flow, nutrient cycling; succession. Three hours lecture, four hours laboratory (with field trips). (F).
Prerequisite(s): BIOL 130 and (MATH 104 or MATH 113 or MATH 105 or MATH 115 or MPLS with a score of 116)
Corequisite(s): ESCI 304L

ESCI 305 Intro to GIS 4 Credit Hours
An introductory course that examines the digital representation, manipulation, and analysis of geographic data, with emphasis on the analytical capabilities that GIS brings solutions to geographic problems. Students will explore and learn GIS principles using ESRI's mapping software, as well as complete a major GIS project.
Corequisite(s): ESCI 305L

ESCI 305D Intro to GIS & Cartography Dis 0 Credit Hours
Required discussion session for ESCI 305.
Corequisite(s): ESCI 305

ESCI 315 Aquatic Ecosystems 4 Credit Hours
An introduction to the physical, chemical, and biological characteristics of lakes, rivers, and wetlands emphasizing a comparison of ecosystem structure and function. Laboratory emphasizes data collection and analysis to characterize a representative lake, river, and wetland. Lecture and laboratory. (AY,F).
Prerequisite(s): ESCI 275

ESCI 320 Field Biology 4 Credit Hours
Adaptations, taxonomy, systematics, ecology, and behavior of southeastern Michigan flora and fauna. Techniques of field observation and recording are emphasized. Skills in the use of identification keys and guides are developed. The campus Environmental Study Area is used intensively. Three hours lecture, four hours laboratory (with field trips).
Prerequisite(s): NSCI 120 or NSCI 233

ESCI 330 Land Use Planning and Mgmt 4 Credit Hours
Environmental aspects of land use planning, park planning, and site planning. Consideration of soils, groundwater, topography, and sensitive natural features and their role in determining land-use suitability. Examination of the mechanics and effectiveness of the planning process. Lecture and recitation.
Prerequisite(s): (BIOL 130 and CHEM 112 or CHEM 118) or ESCI 275

ESCI 332 Hazardous Waste Management 3 Credit Hours
Environmental problems associated with solid and hazardous waste. Regulations governing the generation, transport, and disposal of hazardous waste. Waste management techniques, including reduction, reuse, recycling, treatment, incineration, and land disposal. Three hours lecture.
Prerequisite(s): GEOL 118 or ESCI 275

ESCI 337 Plant Ecology 3 Credit Hours
This course focuses on different aspects of the relationship between plants and their environment. Topics include: a) interactions of plants with the physical environment; b) ways in which the environment acts to shape plant populations through evolution; c) intra- and interspecific interactions among individuals; and d) large-scale patterns and processes at the landscape-level. Three hours lecture.
Prerequisite(s): BIOL 130

ESCI 348 Environmental Chemistry 3 Credit Hours
Description of the concepts, principles, practices, and current problems in the chemistry of natural waters, the soil, and the atmosphere. Three hours lecture. (AY,W).
Prerequisite(s): CHEM 344 and (CHEM 225 or CHEM 325)

ESCI 349 Environmental Chemistry Lab 1 Credit Hour
Collection and analysis of air, water, soil, and organisms for pollutants such as noxious gases, heavy metals, and trace organics. EPA-approved methods are emphasized. Four hours laboratory. (AY,W).
Prerequisite(s): ESCI 348 or CHEM 348
ESCI 352  Introduction to Toxicology  3 Credit Hours
An introduction to the principles of toxicology with an emphasis on environmental toxicology. Major topics include toxic agents, toxicological mechanisms, and use of toxicological reference literature. Discussion of chemical carcinogenesis, genetic toxicology, immunotoxicology, teratology, and toxic responses of the skin, eyes and nervous system. Three hours lecture. (AY,W).
Prerequisite(s): CHEM 225

ESCI 370  Environmental Geology  3 Credit Hours
Interactions between people and the physical environment. Geological hazards and natural processes, such as earthquakes, volcanism, floods, landslides, and coastal processes. Relationships between geography and environmental health, including chronic disease, water use and pollution, waste disposal, mineral resources, and energy use. Three hours lecture. (AY).
Prerequisite(s): GEOL 118

ESCI 372  Energy Resources  3 Credit Hours
Origin and development of fossil fuels (petroleum, coal, natural gas) and of radioactive ores used in nuclear power. Renewable and alternative energy sources, including hydro, solar, wind, biomass, and geothermal power. Environmental impacts of energy use. Three hours lecture. (OC).
Prerequisite(s): GEOL 118 or ESCI 275 or ESCI 301

ESCI 375  Groundwater Hydrology  4 Credit Hours
Prerequisite(s): GEOL 118

ESCI 390  Topics in Environmental Sci  1 to 3 Credit Hours
A course in special topics current to environmental science. Topics and format may vary. See current Schedule of Classes.

ESCI 395  Sem on Environmental Issues  1 Credit Hour
Readings, discussions, and presentations which examine current environmental issues. One hour seminar. Permission of instructor. (F,W).

ESCI 414  Limnology  4 Credit Hours
The study of the structural and functional relationships and productivity of organisms in lakes and streams as they are regulated by their physical, chemical and biotic environments. Laboratories will emphasize field study of area lakes and streams. Three hours lecture, four hours laboratory. BIOL/ESCI 304 or ESCI 275 recommended.
Prerequisite(s): BIOL 130 and (CHEM 136 or CHEM 146)
Corequisite(s): ESCI 414L

ESCI 416  Stream Ecology  4 Credit Hours
A study of the physical, chemical and biological characteristics of streams and rivers. Three hours lecture, four hours laboratory. (OC).
Prerequisite(s): BIOL 304

ESCI 420  Advanced Field Ecology  4 Credit Hours
An intense study of behavioral ecology and field-oriented research at an advanced level, utilizing ecological habitats on campus and in surrounding urban areas. Focus will be on plant/animal interactions and will include pollination ecology, reproduction and distribution ecology, optimal foraging theory, as well as hypothesis testing of animal migration and distribution of species in extreme urban environments. Three hours lecture, four hours laboratory. (OC).
Prerequisite(s): BIOL 304 or BIOL 320 or ESCI 320

ESCI 422  Conservation Biology  3 Credit Hours
This course is a study of the historical and current preservation of global biodiversity. The value of biodiversity, extinction, threats to biodiversity, and both ex situ and in situ conservation strategies are considered. (F, AY)
Prerequisite(s): BIOL 304 or ESCI 304
Restriction(s):
Can enroll if Level is Undergraduate

ESCI 490  Topics in Environmental Sci  1 to 3 Credit Hours
A course in special topics of current interest in environmental science. Topics and course format may vary; see current Schedule of Classes for availability. (OC)

ESCI 490A  Topics in Environmental Sci  3 Credit Hours
Topic: Conservation Biology. A scientific study of the concept of conservation biology, including its ecological, economic, ethical, and cultural components. Lectures, assigned readings, and class discussions will explore the major threats to biodiversity, the complexities of conservation issues, and the tools, strategies, and techniques conservation biologists use to implement policies for the protection and preservation of ecosystems from local to global and short- to long-term scales.
Prerequisite(s): BIOL 130
Restriction(s):
Can enroll if Class is Junior or Senior

ESCI 492  Capstone Research Experience  3 Credit Hours
An approved research experience with a full-time Environmental Science faculty member. Research results are reported in a seminar presentation and in a poster, thesis, or a manuscript submitted for publication. (F, W, S)
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore or Junior

ESCI 497  Seminar in Environmental Sci.  1 Credit Hour
Readings, discussion, and presentation of research in selected areas of study. One hour seminar. Permission of instructor. (OC).

ESCI 498  Indep Study in Environ Sci  1 to 3 Credit Hours
Library research and independent study performed under the guidance of a faculty member. Four to twelve hours readings. Permission of instructor. (F,W,S).

ESCI 499  Lab Research in Environ Sci  1 to 3 Credit Hours
Directed laboratory or field research performed under the guidance of a faculty member. Four to twelve hours laboratory. Permission of instructor. (F,W,S).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Environmental Studies (ENST)

ENST 201  Cultural Geography  3 Credit Hours
Overview of the major components of culture such as language, religion, agriculture, settlement patterns, and related landscape features in a spatial context. Emphasis on how various cultures perceive and interact with the environment. (F).
ENST 203  Weather and Climate  3 Credit Hours
The controls and conditions of Earth's weather and climate including atmospheric circulation, precipitation processes, severe weather, climatic regions, and climatic change. (F).

ENST 204  Landforms  3 Credit Hours
Processes and agents that shape the landscapes and landforms of the Earth's surface. The discussion of landforms is divided into two parts: (1) constructive processes and their spatial distribution and (2) gradational processes and their spatial distribution. (W).

ENST 300  Urban Geography  3 Credit Hours
The geography of human settlement and urbanization. Particular emphasis is placed on human transformation of the physical environment, and resource use throughout history from ancient civilizations to modern megapolises. Universal urban challenges such as sprawl, pollution, congestion, crime, poverty, etc., are addressed. (W).

ENST 301  Concepts of Environmentalism  3 Credit Hours
Designed to identify the underlying concepts of any environmental issue. The course will demonstrate the interdisciplinary nature of environmental problems solving through current readings, classical monographs and films. Students will conduct a system analysis of a household and a local community. This course will not be open to students who take ENST 105. (W).

ENST 305  Env Instrumentation and Analysis  3 Credit Hours
This course will survey the parameters which must be measured in order to properly assess the environment. Methods for the analysis of the biophysical as well as the social, psychological, and political environment will be studied. (W).
Prerequisite(s): ENST 301

ENST 310  Economic Geography  3 Credit Hours
Spatial aspects of the ways people make their living. Discussion of the spatial distribution of resources and wealth at various scales. Introduction of site selection and location analysis. (W).

ENST 312  Environmental Ethics  3 Credit Hours
The relationship of human beings to the non-human environment raises pressing moral and political issues. This course will use the theories and concepts of philosophical ethics to explore such questions as human obligations to non-human animals; the preservation of wilderness; balancing economic, aesthetic, and spiritual values; and the problems of pollution, urban sprawl, and ecological justice. (F, YR).
Prerequisite(s): PHIL 100 or PHIL 233 or PHIL 240* or CRJ 240 or ENST 105 or ENST 301

ENST 320  Global Climate Change  3 Credit Hours
This course explores concepts and current thinking on global climate change and environmental impacts. It covers the history of Earth's climate, causes of climate change and current research attempting to forecast change. The biotic, economic, and social implications of climate change are discussed. (AY)

ENST 325  Environmental Politics  3 Credit Hours
This course will examine the process of policy making on environmental and energy problems at the global level, at the national level, and at the local level. (AY).

ENST 326  Anth of Health and Environment  3 Credit Hours
Cultural conflicts over pollution, disease etiology, development and natural resources often originate and are played out in local ecosystems. Anthropologists are increasingly becoming involved as researchers, developers, and activists in these cultural strifes. This course reviews the work of environmental and medical anthropologists as well as other critical scholars who unravel the values, meanings and ideologies associated with ecological issues in given localities. Drawing on theoretical advances in critical medical anthropology, environmental anthropology and applied anthropology, the course seeks to improve the knowledge and abilities of student anthropologists in their environmental health work.

ENST 327  Michigan Geography  3 Credit Hours
A geographic study of the landforms, waterways, natural resources, landmarks and economic activities that contribute to the physical and cultural landscapes of Michigan. Population, industry, agriculture, recreation and tourism will all be considered. (W,S,YR)

ENST 330  Land Use Planning and Mgmt  4 Credit Hours
Environmental aspects of land use planning, park planning, and site planning. Consideration of soils, groundwater, topography, and sensitive natural features and their role in determining land-use suitability. Examination of the mechanics and effectiveness of the planning process. Lecture and recitation. (AY).
Prerequisite(s): ESCI 275 or (BIOL 130 and GEOL 118)

ENST 340  Remote Sensing  3 Credit Hours
This course explores the acquisition, processing, and visualization of remotely derived data, with a particular emphasis on local and environmental applications. ENST 340 covers concepts and foundations of aerial and orbital remote sensing, visual interpretation, reflectance and emission spectroscopy, active and passive sensors, topography, and digital image processing software and techniques.
Restriction(s):
Can enroll if Class is Junior or Senior or Graduate

ENST 351  Environmental Economics  3 Credit Hours
This course examines the economic aspects of pollution problems. Topics covered include the economic theory of externalities, the theory of the commons, the theory of public goods, and the optimum use of depletable natural resources. The role of cost-benefit analysis as an intricate part of the decision-making process will also be thoroughly examined. (AY).
Prerequisite(s): ECON 202

ENST 365  Environmental Psychology  3 Credit Hours
A survey of the contributions of the behavioral sciences to the understanding and solution of environmental problems that threaten our survival. Insights derived from psychology, anthropology, and computer sciences are discussed. Major topics include overpopulation, overconsumption, "future shock," cognitive limitations in our understanding of ecological-political systems, and the use of Skinnerian behavior control. (AY).
Prerequisite(s): PSYC 170 or PSYC 171

ENST 385  Environmental Internship  1 to 9 Credit Hours
A field assignment relating to the student's environmental interests. The student will work in an off-campus government or private business for a prescribed number of hours each week to be arranged by the advisor and employer. May be repeated up to three times. Written permission of instructor.
Restriction(s):
Can enroll if Class is Junior or Senior or Graduate
ENST 390  Topics in Environmental Stds  1 to 9 Credit Hours
Examination of problems and issues in selected areas of environmental studies. Title listed in the Schedule of Classes will change according to the content. Course may be repeated for credit when specific topics differ.

ENST 395  Sem on Environmental Issues  1 Credit Hour
Readings, discussions, and presentations which examine current environmental issues. One hour seminar. Written permission of instructor. (YR).

ENST 436  Human Ecology  3 Credit Hours
Deals with the forms and modes of change of social structure and culture, as affected by interactions with environment, population, and technology. Emphasis is given to territorially based social structures.

ENST 445  Environmental Law  3 Credit Hours
A survey of common law theories and analysis of environmental statutes from a functional perspective. The course also includes environmental law aspects of constitutional law, administrative law and criminal law, as well as the public trust doctrine and public lands. Student cannot receive credit for both ENST 350 and ENST/POL 445.

Restriction(s):
Cannot enroll if Class is Freshman or Sophomore
Can enroll if Level is Undergraduate

ENST 456  Ecological Economics  3 Credit Hours
A review of major theories and issues concerning the relationship between ecological and economic systems. Topics include these questions: What is the purpose of economics activity? How important is the preservation of the natural world compared to the production of economic goods? How do principles of social and intergenerational equity affect the use of resources and choice of goods to be produced? The course utilizes a transdisciplinary approach in the development of new models where conventional economics and ecology alone have been ineffective in addressing questions of sustainability and equity. (AY).

Prerequisite(s): (ECON 201* or ECON 202*) and ENST 301*

Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

ENST 467  Food Politics and Policy  3 Credit Hours
How do politics affect our food at the global, national, and urban/local scale? This course examines close historical relationships between politics and food; the politics of conventional agriculture and food policy; and alternative agricultural movements and food systems, with a particular emphasis on urban food policy and urban food systems. (AY)

ENST 468  Env Lit & Reps of Nature  3 Credit Hours
This service-learning course focuses on environmental justice and law. Environmental Justice is defined as the fair treatment of all people with respect to the development, implementation, and enforcement of environmental laws. In the classroom, students learn the theory, history, and enforcement of environmental laws and regulations in Detroit, Michigan, and nationwide. In a required civic engagement project, students apply their substantive knowledge to solve local environmental problems. Through classroom learning and projects with community organizations, students connect law and justice concerns to Detroit's environmental problems.

Restriction(s):
Can enroll if Class is Junior or Senior

ENST 469  Environmental Interpretation  2 to 3 Credit Hours
A seminar course taken during the student’s senior year to provide an opportunity for students with diverse environmental interests to interact and synthesize the information and skills acquired during their previous studies. (W).

ENST 474  Environmental Education  2 to 3 Credit Hours
An analysis of environmental education at elementary and secondary levels, particularly stressing the environment as a teaching resource. Community resources as they relate to environmental education are also investigated. (AY).

ENST 483  Justice, Crime and Environment  3 Credit Hours
This course explores environmental policy as a result of political processes involving diverse participants and entailing movement through several stages from defining an issue as an environmental problem to placing it on political agenda and then receiving a response at domestic governmental or international levels. This course analyzes environmental issues from a cross-cultural and comparative perspective, with a particular attention given to political institutions, political change, levels of development, political culture, public participation, and international commitments that shape the nature and dynamics of environmental politics and policy in different countries.

Restriction(s):
Can enroll if Class is Junior or Senior

ENST 485  Seminar in Environ Topics  2 Credit Hours
A seminar course taken during the student’s senior year to provide an opportunity for students with diverse environmental interests to interact and synthesize the information and skills acquired during their previous studies. (W).

ENST 486  Environmental Interpretation  2 to 3 Credit Hours
Course deals with the interpretation of the environment, its characteristics, and its presentation to school groups as well as to the general public. Intended to acquaint students with a variety of skills and techniques necessary for interpreting the environment to others. Extensive use is made of the UM-Dearborn Environmental Study Area. (AY).

ENST 487  Comparative Enviro Policy  3 Credit Hours
This course explores environmental policy as a result of political processes involving diverse participants and entailing movement through several stages from defining an issue as an environmental problem to placing it on political agenda and then receiving a response at domestic governmental or international levels. This course analyzes environmental issues from a cross-cultural and comparative perspective, with a particular attention given to political institutions, political change, levels of development, political culture, public participation, and international commitments that shape the nature and dynamics of environmental politics and policy in different countries.

Restriction(s):
Can enroll if Class is Junior or Senior

ENST 488  Env Lit & Reps of Nature  3 Credit Hours
An interdisciplinary study of the ways in which the relationship between "nature" and humankind has been represented in literature and other forms of cultural expression. Emphasis on American and British texts of the 19th centuries, but assigned materials may include readings from other cultures and historical periods.

Prerequisite(s): (COMP 106 or CPAS with a score of 40 or COMP 220 or COMP 270) and (ENGL 230 or ENGL 200 or ENGL 231 or ENGL 232 or ENGL 233 or ENGL 235 or ENGL 237 or ENGL 236 or ENGL 239)

ENST 490  Dir Research in Envir Studies  1 to 6 Credit Hours
This course will provide students with an opportunity to conduct an independent research investigation on topics in environmental studies under the direction of various faculty members. The results will be presented in a paper and public seminar. May be repeated.

ENST 491  Topics in Environmental St  3 Credit Hours
The examination of problems and issues in selected areas of environmental studies. The title listed in the Schedule of Classes will change according to the content. The course may be repeated for credit when the specific topic differs. Also offered for graduate credit. (OC).
ENST 491B  Topics in Environmental Studies  3 Credit Hours
TOPIC: Comparative Environmental Policy. This course explores environmental policy as a result of political processes involving diverse participants and entailing movement through several stages—from defining an issue as an environmental problem to placing it on political agendas and then receiving a response at domestic governmental or international levels. This course will analyze various levels at which environmental issues occur and be addressing politically.

ENST 497  Seminar in Environmental Science  1 Credit Hour
Readings, discussions, and presentation of research in selected areas of study. One-hour seminar.

ENST 498  Independent Study  1 to 3 Credit Hours
Readings or analytical assignments in accordance with the needs and interests of those enrolled and agreed upon by the student and instructor, which shall not duplicate a formal course offering. Permission of instructor.

ENST 499  Independent Study  1 to 3 Credit Hours
Readings or analytical assignments in accordance with the needs and interests of those enrolled and agreed upon by the student and instructor, which shall not duplicate a formal course offering. Permission of instructor.

* An asterisk denotes that a course may be taken concurrently.

Exploratory Studies (EXPS)

EXPS 102  Career Planning  1 Credit Hour
A ten-week seminar exploring strengths, values, and motivations in the context of developing career planning and decision-making skills. Career interest assessment and individualized assistance is incorporated in the course. This is especially helpful to students who are deciding on their major.

EXPS 218  Topics in Exploratory Studies  1 to 3 Credit Hours
An examination, at the freshman and sophomore level, in the selected areas of general study. The title as listed in the Schedule of Classes may change according to content. The course may be repeated for credit when specific topics differ.

EXPS 220  Science in the Elem School  2 to 3 Credit Hours
This course is designed for people intending to become elementary school teachers and who have had little or no previous experience in science. The course utilizes a laboratory approach to the study of the concepts, processes, and value of elementary and middle school science.

EXPS 250  Elem Ed Vis & Perf Arts  3 Credit Hours
This course will teach the elementary education student how to incorporate the various visual and performing arts into everyday elementary education curricula. The course will cover the fundamental and formal elements, the major periods, styles and philosophies, as well as the functions and processes of the visual and performing arts, and how to effectively employ those creative processes through collaboration, communication, cooperation, and interaction in the elementary classroom.

Restriction(s):
Can enroll if Level is Undergraduate

EXPS 270  Inclusion & Cultural Immersion  1 Credit Hour
The seminar is modeled after New Detroit's Multicultural Leadership Series. The format offers a highly innovative approach to building competences to address (ethnic, racial, gender, and sexual orientation) topics relevant to the metropolitan Detroit region. Students attend off-campus sessions where they spend the day immersed in that culture. Each session offers an in-depth look at (but not limited to) the history, culture, and socioeconomic issues that are germane but also transcend regional barriers. Goals of the course: 1) Bridge communication gaps; promote better understanding and appreciation among all people. 2) Develop a greater understanding of the distinctive and subtle differences within our community. 3) Explore various tools to enhance communication and collaborations geared towards closing our regional divide.

Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

EXPS 282  History & Civics Elem Schools  3 Credit Hours
A survey of Michigan and United States history and government through Reconstruction. U.S. historical and political topics taught in grades K-8 are explored. Students also examine families, schools, and local communities.

Restriction(s):
Can enroll if Level is Undergraduate

EXPS 283  Geography & Econ Elem Schools  3 Credit Hours
A survey of the geography and economics taught in grades K-6. Particular attention will be paid to the geography of Michigan and the Great Lakes region. Market and other types of economics will be examined in the light of core economic principles. (F,S)

Restriction(s):
Can enroll if Level is Undergraduate

EXPS 298  Exp Writing-Comm Learn&Tch  3 Credit Hours
This course provides a theoretical foundation for using writing to communicate and learn for personal and professional purposes. Emphasis will be placed on learning effective instructional strategies including modeling, using mentor text (high-quality writing examples to emulate), conferencing with others about one's writing, and peer- and self-assessing writing to support all writers' development. For the first half of the course, students will focus on developing their own writing skills using the writing process with three genres (narrative, informational/explanatory, and argumentative). Additional application of course knowledge will be demonstrated during the second half of the semester through an academic service learning project designed to tutor elementary writers.

Restriction(s):
Can enroll if Level is Undergraduate

EXPS 360  Effective Comm with Eng Lng Lrn  1 Credit Hour
This course provides students with a structured experience with an international student in the University of Michigan-Dearborn's English Language Proficiency (ELP) Program. Students are paired with an ELP student to meet on a weekly basis to provide opportunities to engage in conversation appropriate for academic settings. In this course students will have the opportunity to develop their understandings of the complexity of aural/oral language communication for English language learners.

Restriction(s):
Can enroll if Level is Undergraduate
EXPS 400 STEM2 Teaching and Learning 3 Credit Hours
The content of this course and the pedagogy employed will provide students with experiences in topics related to the integration of science, technology, engineering, health and mathematics (STEM2). Students will experience examples of STEM2 activities and will explore how STEM2 disciplines impact society. (YR)
Prerequisite(s): EXPS 220 and MATH 385
Corequisite(s): EXPS 401
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Post-baccalaureate NCFD or Junior or Senior

EXPS 401 STEM2 Teach/Learn Internship 1 Credit Hour
This internship will provide students an opportunity to gain experience with K-8 students in an educational setting such as a K-8 classroom, an afterschool program, museums, etc. Students will participate in 45 clock hours over the semester at the placement site working with the students and the assigned instructor/supervisor on STEM2 activities. (YR)
Prerequisite(s): EXPS 220 and MATH 385
Corequisite(s): EXPS 400
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Post-baccalaureate NCFD or Junior or Senior
Can enroll if College is Education, Health, and Human Services

EXPS 407 Inquiry-based Math and Science 3 Credit Hours
This inquiry-based laboratory course intends to support the learning of early childhood educators (birth to grade 2) in foundations of science and mathematics. The course integrates concepts and processes that arise in both disciplines, such as classification; units and measurements; shapes and structures and their properties; patterns; problem solving; representation; cause and effect; use of evidence (three credits).
Required for Early Childhood Comprehensive Major. Elective for Elementary Education Certification Students. Elective for Children and Families Students. Students cannot receive credit for both EXPS 407 and 507. The required lab fee is to cover course materials.
Prerequisite(s): EXPS 220 and MATH 385
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Sophomore or Junior or Senior
Can enroll if College is Education, Health, and Human Services
Can enroll if Major is General Studies, Early Childhood

EXPS 410 Multicult in School and Soc 3 Credit Hours
Examines ways to address the needs of diverse student populations. Issues of race, ethnicity, class, gender, and language are explored. Historic and ongoing issues of equity, particularly in school settings, are considered. The focus is on providing an education of high quality to all students.

EXPS 415 Evolution for Teachers 1 to 3 Credit Hours
Course is designed to meet the needs of grade K-12 teachers teaching about evolution. The Michigan Department of Education requires students to be able explain how scientists construct and scientifically test theories concerning the origin of life and evolution of species.
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if College is Education, Health, and Human Services or Arts, Sciences, and Letters

EXPS 420 Science Capstone 3 Credit Hours
A capstone course for pre-service elementary teachers with a laboratory component designed to assist students in achieving deep understanding of a broad scientific concept and a discussion component designed to introduce and provide practice in classroom research. Students will use the classroom research to prove misconceptions about the scientific concept explored in the laboratory.
Prerequisite(s): NSCI 231 and NSCI 232 and NSCI 233 and EDD 485*
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior
Can enroll if Level is Undergraduate

EXPS 443 Family/School/Community Collab 2 Credit Hours
Characteristics, roles, and functions of contemporary families are described. Various communication and training strategies designed to promote collaboration and teamwork within and between the school staff, the families, and community are described and practiced through discussion, problem-solving activities, and role playing. Family effectiveness assessment instruments and strategies are also described and practiced.
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Junior or Senior

EXPS 450 Issues in STEM2 and STEM2 Ed 3 Credit Hours
The content of this course will provide students with experiences in issues related to STEM2 education (STEM2: Science, Technology, Engineering, Mathematics and Medicine). Topics addressed will include definitions of STEM2, the value of STEM2 to society, the integration of STEM2 fields, developmentally appropriate STEM2 activities for K-12 students, misconceptions of STEM2, STEM2 careers and local issues related to STEM2 in Michigan. Students will experience examples of STEM2 activities and will explore how STEM2 disciplines impact society. (YR)
Prerequisite(s): (MATH 104 or MATH 105 or MATH 113 or MATH 114 or MATH 115 or MATH 116 or MATH 131) and (NSCI 101 or NSCI 120 or NSCI 121)
Restriction(s):
Can enroll if Level is Undergraduate

EXPS 460 Capstone: Trnds & Iss Literacy 3 Credit Hours
This course is for pre-service teachers in the elementary certification program majoring in reading. In this course students will explore topical issues relevant to the teaching of literacy in preparation for becoming participating members in the professional community of literacy teachers.
Prerequisite(s): EDD 468 and EDD 419 and EDD 471 and EDD 467 and EDD 447 and EDD 448
Restriction(s):
Can enroll if Class is Undergrad Certification only or Post-baccalaureate Cert only or Senior
Can enroll if College is Education, Health, and Human Services

EXPS 493 Simulation and Gaming 1 to 3 Credit Hours
This course focuses on simulation and gaming as approaches to learning which are fundamentally different from methods traditionally used in education, industry, business, and psychology. Students will have the opportunity to examine many different types of simulations and games and to participate in selected ones. They will also be able to design one to use in their own area of interest.
Restriction(s):
Can enroll if Class is Post-baccalaureate Cert only or Undergrad Certification only or Junior or Senior
EXPS 498 Exploring Writing/Child&Yng Ad  3 Credit Hours
This course provides a theoretical foundation for writing instruction of
children/adolescents in grades K-8. Emphasis is placed on modeling,
instructional strategies, and assessment for supporting student writers
that pre-service and in-service teachers can use to facilitate students?
development of written language across various genres. TB clearance,
criminal background check, and bloodborne pathogens/infectious
diseases training required.
Restriction(s):
Cannot enroll if Class is Freshman or Sophomore or Graduate

EXPS 499 Individ Res in Lit in Educ   1 to 3 Credit Hours
Requires the student to initiate and carry to completion a literature in
education-based research project under the supervision of a faculty
member. May be elected more than once for a total of not more than 3
credits as approved by advisor. Written permission of instructor. (F,W,S).
Restriction(s):
Can enroll if Class is Undergrad Certification only or Junior or Senior
Can enroll if Level is Undergraduate

An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter
terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

Finance (FIN)

FIN 200 Personal Finance  3 Credit Hours
To survey financial planning for the individual. Topics include: bank
relations, credit, borrowing money, savings, budgeting, investments,
stocks and bonds, mutual funds, insurance, real estate, annuities, social
security, income taxes, wills, trusts and estate planning.
Restriction(s):
Cannot enroll if Class is Graduate
Can enroll if College is Business

FIN 401 Corporate Finance  3 Credit Hours
Introduces the financial goals of a corporation with particular
attention to the creation of value. The time value of money and the
valuation of financial and real assets receive particular attention.
Additional topics include risk and return, market efficiency, short-term
financial management, and the domestic and international economic
environments.
Prerequisite(s): (ACC 297 or ACC 298) and ECON 201 and ECON 202 and
(DS 300* or IMSE 317)

FIN 402 Advanced Corporate Finance  3 Credit Hours
To provide the study of advanced topics, with particular attention to
capital structure and dividend policy. Additional topics such as
hedging, option pricing, agency theory, methods of financing, and
corporate control will be presented. Global aspects of these topics will be
addressed where appropriate. (YR).
Prerequisite(s): FIN 401

FIN 406 Fin Mkts and Institutions  3 Credit Hours
This course will introduce students to the financial markets, institutions,
and instruments. The contents consist of the role and importance of
the financial markets, interest rate determination and security valuation,
the functions of money, bond, mortgage, stock, foreign exchange and
derivative securities markets, the activities of financial institutions such
as insurance companies, securities firms and investment banks, hedge
funds, and pension funds, and management of credit and interest rate
risks on the balance sheet of financial institutions. Familiarity with
these topics is necessary for students to be competent in their future
professional career in finance. (YR)
Prerequisite(s): FIN 401

FIN 407 Investment Fundamentals  3 Credit Hours
To study the current investment scene and analyze the characteristics of
financial planning and the role in investment strategies. Topics include: securities
markets, bonds, stocks, options, investment strategies, portfolio theories
and management.
Prerequisite(s): FIN 401

FIN 411 Financial Planning  3 Credit Hours
This course introduces students to the primary areas of personal
financial planning and helps them prepare for the professional financial
planning examinations. Topics include overview of the financial planning
process, analysis of clients’ needs; principles of personal income
taxation; investment analysis and planning; retirement and estate
planning; insurance planning and major types of insurance, ethics and
standards of professional practice; and quantitative methods used in
the analysis and derivations of decision rules. This course is designed
for students who consider a career in financial advising, as well as those
who are interested in managing their own personal finances. Students
will practice critical thinking and business communication through
written presentation of case analysis and recommendations. (YR)
Prerequisite(s): FIN 401

FIN 412 Retirement Planning  3 Credit Hours
This course introduces students to the nature of retirement planning
analysis and the functions of major retirement plans and other
investment-oriented employee benefits, as well as discusses advantages
and disadvantages of the various wealth accumulation and tax deferral
alternatives. Topics include the administration, characteristics and
distributions of qualified corporate retirement plans such as pension
and profit sharing plans; non-corporate retirement programs such as
IRAs and Simplified Employee Pension (SEPs) plans. In addition, stock
options, non-qualified deferred compensation plans, and other non-
pension related benefits, as well as recent legislation will be examined.
This course prepares students for career pursuit in financial advising or
human resources management, as well as for the professional financial
planning examinations. Students will practice critical thinking and
business communication through written presentation of case analysis and
recommendations. (YR)
Prerequisite(s): FIN 401 and FIN 411*

FIN 443 Com Bank: Functn and Operatns  3 Credit Hours
The topics to be included in the course are: commercial bank
management, loan portfolio management and international banking.
Specific aspects of the commercial banking environment, such as
legislation and regulation, are also covered.
Prerequisite(s): FIN 401

* An asterisk denotes that a course may be taken concurrently.
Prerequisite(s): FIN 656.

FIN 447 Derivative Markets 3 Credit Hours
Going beyond investment fundamentals, the focus of this course is on the more speculative aspects of investment. Speculative securities (such as options, warrants, and convertibles) and commodity futures (including financial and currency futures) are covered. The structure of the speculative markets and the role of speculation, such as hedging, risk-shifting, and the establishment of future-spot price relationship are analyzed in the context of a competitive market environment.
Prerequisite(s): FIN 401 and (FIN 402 or FIN 407 or FIN 443)

FIN 448 Real Estate Financing 3 Credit Hours
The purpose of this course is to introduce the student to the different types of mortgages, the sources of real estate loans and the workings of the secondary mortgage markets. It will also cover the application, loan processing, underwriting, and closing processes as well as closely related topics such as property appraisal and insurance, title insurance, and foreclosures.
Prerequisite(s): FIN 401

FIN 456 Fixed Income Securities 3 Credit Hours
The fixed income market, accompanied by the introduction of sophisticated financial engineering techniques, has grown enormously over the last two decades. Today, the fixed income market has been a vital segment of the global financial market. This course covers major topics associated with this market, including bond pricing, yields, and volatility, term structure of interest rates and yield curve; market structure and analytical techniques for Treasury, municipal, corporate bonds, mortgage-backed securities, asset-backed securities, and bond with embedded options. The fundamental objective of this course is to help students develop analytical skills for pricing fixed income securities and managing interest rate risk. In addition, materials covered in this course are compatible with the Common Body of Knowledge in Analysis of Debt Investments that is required by the Chartered Financial Analysts (CFA) examination. Students will not receive credit for both FIN 456 and FIN 656.
Prerequisite(s): FIN 407 and FIN 447 and (MATH 113 or MATH 115 or MPLS with a score of 116)

Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if College is Business
Can enroll if Major is Finance

FIN 484 Seminar: Financial Management 1 to 3 Credit Hours
To provide students with an opportunity for intensive study in current selected areas related to the research activities and/or professional activities of faculty members. Permission of College of Business.
Prerequisite(s): FIN 401
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

FIN 494 Research: Financial Mgt 1 to 3 Credit Hours
To provide the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to the term when such a course is to be elected, an interested student must submit to the dean of the school a written request for permission to elect a research course, on a form available in the school office. The request will include a description of the proposed research project. The dean will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit. Permission of College of Business.
Prerequisite(s): FIN 401
Restriction(s):
Can enroll if Class is Senior
Can enroll if College is Business

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering:
(F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally

French (FREN)

FREN 101 Beginning French I 0 or 4 Credit Hours
First course in a two-course elementary French sequence. Listening comprehension, speaking, reading, writing, and culture are emphasized. Course materials promote the use of language to communicate with others and to function in the French-speaking world. (F).

FREN 102 Beginning French II 0 or 4 Credit Hours
Second course in the two-course elementary sequence. Continued emphasis on culture and the four skills of listening, speaking, reading, and writing. (W).
Prerequisite(s): FREN 101 or FPL with a score of 102 or FPL with a score of 201 or FPL with a score of 202 or FPL with a score of 301 or FPL with a score of 302

FREN 201 Intermediate French I 0 or 4 Credit Hours
An intermediate language course designed to increase the student's ability to read, speak, and write French. The course will utilize a wide range of reading selections representative of modern French prose as the basis for class discussions and written assignments. A systematic review of grammar and oral exercises should enable the student to make definite progress in conversation and composition. (F).
Prerequisite(s): FPL with a score of 201 or FPL with a score of 202 or FPL with a score of 301 or FPL with a score of 302 or FREN 102

FREN 202 Intermediate French II 0 or 4 Credit Hours
Continuation of FREN 201. Further readings in modern French prose, extensive practice in conversation and composition. (W).
Prerequisite(s): FREN 201 or FPL with a score of 202 or FPL with a score of 301 or FPL with a score of 302

FREN 234 French Conversation 1 to 2 Credit Hours
Development of conversational skills through discussion of contemporary readings and the use of communicative activities and games. Emphasis will be placed on vocabulary acquisition by students, on improving their pronunciation, and on increasing their overall fluency in French. (S).
Prerequisite(s): FREN 102
FREN 235  Fren Conversation and Culture  2 Credit Hours  
Intensive practice in developing conversational skills through a coordinated program of classroom and field activities in France. Students will read and discuss current materials of various sorts and will perform skits and other oral exercises designed to increase their fluency in French. A series of planned, extracurricular activities (visits to museums and historical monuments, viewing of plays, interviews of average Frenchmen) will enable students to profit from direct contact with the French and their culture.  
Prerequisite(s): FREN 102

FREN 290  Topics in French  1 to 3 Credit Hours  
Examination of problems and issues in selected areas of French. Title as listed in Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).

FREN 301  Advanced Conversation and Comp  3 Credit Hours  
An advanced course in conversation, composition, and syntax. Numerous oral reports and weekly written assignments based on readings from current sources; discussion of a recent French motion picture; translation exercises and the study of specific topics in French grammar. (F).
Prerequisite(s): FREN 202 or FPL with a score of 301 or FPL with a score of 302

FREN 302  Advanced Conversation and Comp  3 Credit Hours  
Continuation of FREN 301. (W).
Prerequisite(s): FREN 301 or FREN 302 or FPL with a score of 301 or FPL with a score of 302

FREN 305  Language of Business  3 Credit Hours  
A systematic presentation of the vocabulary and conventions of business French. Students will receive extensive training in composing business letters, reports, visas, and similar texts. They will be exposed to French practices in correspondence, accounting and record keeping. They will also be required to translate various business documents from English to French (and vice versa) and to familiarize themselves with the specialized vocabulary of computers. (OC).

FREN 306  Cult Intro to French Business  3 Credit Hours  
An introduction to the practices and organization of the French business world. Students will learn how a typical French firm is structured and how business is normally conducted in France. Special attention will be given to those differences in organization and operation which contrast French businesses with our own. The class will also examine the impact of history and general cultural attitudes on French business practices of today. (OC).
Prerequisite(s): FREN 301

FREN 308  Advanced Writing  3 Credit Hours  
Intensive practice in writing expository prose in French. Students will complete a wide variety of writing assignments (resumes, critical analyses, explications de texte, and the like) over the course of the semester. Class sessions will be devoted to the discussion of student papers and technical issues related to effective writing. Students should expect to prepare several drafts of each assignment under the close supervision of the instructor. (OC).
Prerequisite(s): FREN 300

FREN 330  Fren Lit: Md Ages-18 Century  3 Credit Hours  
A survey of French literature through the Enlightenment based on the study of individual masterpieces of principal French authors: Villon, Rabelais, Montaigne, Pascal, Moliere, Racine, Montesquieu, Voltaire, and Rousseau. (OC).
Prerequisite(s): FREN 301

FREN 331  French Lit: 19th-20th Century  3 Credit Hours  
The sequel to FREN 330. A survey of French literature from Romanticism to the Theater of the Absurd and the nouveau roman. Writers studied will include Balzac, Stendhal, Baudelaire, Flaubert, Proust, Gide, Camus, Sartre, Beckett, and Sarroute. (OC).
Prerequisite(s): FREN 301

FREN 332  French Cinema  3 Credit Hours  
A survey of French films from the experiments of the turn of the century to the trends of the present day. Representative silent films, "classic" and "new-wave" movies of the 1930's and 50's, as well as contemporary productions will be presented in their cultural context and the contributions of major French directors to filmmaking will be highlighted. Attention will also be given to the basic elements of film as a means of expression: camera angle, distance, movement, and editing. (OC).
Prerequisite(s): FREN 301

FREN 334  Workshop in French Theater  3 Credit Hours  
This course will provide a brief survey of representative masterpieces of the French theater. Students will be required to read and analyze a number of celebrated plays and then to perform selected scenes from them. (OC).
Prerequisite(s): FREN 301

FREN 336  French Civilization of Past  3 Credit Hours  
An introduction to the civilization of France (from the Middle Ages to the 20th Century). This course will examine the social and historical developments and the accomplishments in the arts and literature that have combined to shape the French nation. (OC).
Prerequisite(s): FREN 301

FREN 337  France in the 20th Century  3 Credit Hours  
An introduction to France of the Third, Fourth, and Fifth Republics. This course will examine the major political, social, and economic issues of France of the 20th Century as well as its contributions to literature and the arts. (OC).
Prerequisite(s): FREN 301

FREN 338  France of Today  3 Credit Hours  
An exploration of various facets of contemporary French civilization. Although students will consider historical and political developments since World War II, special attention will be given to the values and attitudes of the French, to the contrasting modes of life in Paris and the provinces, and to important forms of popular culture. (OC).
Prerequisite(s): FREN 301

FREN 339  Francophone Lit and Civil  3 Credit Hours  
An introduction to twentieth-century award-winning texts from the Caribbean, Canada, North Africa and West Africa. Students will analyze the strategies through which these powerful, dramatic, post-colonial writers address such issues and themes of universal relevance as love and the search for identity, while also expressing the experience and culture realities of his or her own country. Representative authors include Birago Diop, Simone Schwartz-Bart, Arlette Coustre, Anne Hebert, Roch Carrier, Michel Tremblay, and Tehar Ben Jelloun. (OC).
Prerequisite(s): FREN 301
FREN 375  Parisian Itineraries  3 Credit Hours
Prerequisite(s): and will translate and analyze passages written in various styles. (OC).

FREN 381   French Across the Curriculum  1 Credit Hour
Course is attached to an upper-level course in another discipline and taken concurrently with it. Course materials in French are related to the subject matter of the second course and are discussed with a French-area faculty member. Materials are also integrated into the assignments of the second course. (F,W).

FREN 385  French Across the Curriculum  3 Credit Hours
Course is attached to an upper-level course in another discipline and taken concurrently with it. Course materials in French are related to the subject matter of the second course and are discussed with a French-area faculty member. Materials are also integrated into the assignments of the second course. (F,W).

FREN 388  Socio-Cltrl Iss Contemp France  3 Credit Hours
The course concentrates on a series of socio-cultural issues that are debated in France today, as well as on a number contemporary cultural and artistic phenomena. Particular attention is given to discourses on otherness and on the ways in which French cultural production and media constructions have reflected, reinforced, reshaped and, in some instances, contested the country's past and current dominant ideologies, and identities.

FREN 390  Topics in French  3 Credit Hours
Examination of problems and issues in selected areas of French. Title as listed in schedule of classes will change according to content. Course may be repeated for credit when specific topics differ.

FREN 399  Independent Studies  1 to 3 Credit Hours
Readings or analytical assignments in the humanities in accordance with the needs and interests of those enrolled and agreed upon by the student and advising instructor. May be repeated for a maximum of 6 credit hours. (F,W).

FREN 408  Writing and Translating  3 Credit Hours
A course designed to increase the written fluency of students who have already assimilated the advanced grammatical concepts introduced in the 301-302 sequence. Students will prepare weekly written assignments and will translate and analyze passages written in various styles. (OC).

FREN 490  Topics in French  1 to 3 Credit Hours
Examination of problems and issues in selected areas of French. Title as listed in the Schedule of Classes will change according to content. Course may be repeated for credit when specific topics differ. (OC).

GEOG 201  Cultural Geography  3 Credit Hours
Overview of the major components of culture such as language, religion, agriculture, settlement patterns, and related landscape features in a spatial context. Emphasis on how various cultures perceive and interact with the environment. (F).

GEOG 203  Weather and Climate  3 Credit Hours
The controls and conditions of Earth's weather and climate including atmospheric circulation, precipitation processes, severe weather, climatic regions, and climatic change. (F).

GEOG 204  Landforms  3 Credit Hours
Processes and agents that shape the landscapes and landforms of the Earth's surface. The discussion of landforms is divided into two parts: (1) constructive processes and their spatial distribution and (2) gradational processes and their spatial distribution. (W).

GEOG 205  Geography of the United States  3 Credit Hours
A regional analysis of the United States that stresses the difference in the physical elements of landscapes that explain differences in economic development, cultural attainment, and land use and which, in turn, motivate regional interdependencies and interrelationships. (W).

GEOG 206  World Regional Geography  3 Credit Hours
World Regional Geography includes a systematic study of the world's geographic realms and regions, including Europe, Russia, Australia-New Zealand, East Asia, South Asia, Southwest Asia, N Africa, Subsaharan Africa, Middle and South America. Geographic concepts, such as map reading and spatial analysis, are first introduced. Then, the world is classified into geographic realms and regions using both physical and social criteria. Each region results from a unique interaction between the human societies and the physical environment. The physical, cultural, political, economic and social features of each region are studied, along with any special regional concerns or problems.

GEOG 300  Urban Geography  3 Credit Hours
The geography of human settlement and urbanization. Particular emphasis is placed on human transformation of the physical environment, and resource use throughout history from ancient civilizations to modern megalopolises. Universal urban challenges such as sprawl, pollution, congestion, crime, poverty, etc., are addressed.

GEOG 301  Geography of Western Europe  3 Credit Hours
The geography of Western Europe and the countries of the region. (OC).

GEOG 301D  Intro to GIS & Cartogrphy Dis  0 Credit Hours
Required discussion session for GEOG 301.

GEOG 302  Mapping Our World  3 Credit Hours
Mapping our World provides an introduction to geospatial techniques and the important roles spatial data play in today's world. This course introduces the students to basic concepts of geographic information systems, remote sensing and cartography. A focus of the course is on map analysis and map design.

GEOG 305  Intro to GIS  4 Credit Hours
The basic elements of geographic information systems, map interpretation and map design. Principles and methods of spatial data collection, analysis, and display are introduced. (W)

GEOG 305A  Intro to GIS & Cartogrphy Dis  0 Credit Hours
Required discussion session for GEOG 305.

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
GEOL 310  Economic Geography  3 Credit Hours
Spatial aspects of the ways people make their living. Discussion of the spatial distribution of resources and wealth at various scales. Introduction of site selection and location analysis.

GEOL 315  Political Geography  3 Credit Hours
The spatial dimensions of political activity from the local to the global scale. Themes include: control of territory, relations among political entities, and political ideology.

GEOL 320  Global Climate Change  3 Credit Hours
This course explores concepts and current thinking on global climate change and environmental impacts. It covers the history of Earth’s climate, causes of climate change and current research attempting to forecast change. The biotic, economic, and social implications of climate change are discussed. (AY)

Restriction(s):
Can enroll if Class is Freshman or Sophomore or Junior or Senior

GEOL 325  Global Cities  3 Credit Hours
The course focuses on comparing the urban form, economies, and social life in cities around the world. The societies of the westernized, developed world are already highly urbanized. Cities outside of this sphere are generally growing much faster and experiencing greater social and economic upheaval as a result. Understanding non-North American urbanization is a vital part of understanding cities in general. (F)

GEOL 327  Michigan Geography  3 Credit Hours
A geographic study of landforms, waterways, natural resources, landmarks and economic activities that contribute to the physical and cultural landscapes of Michigan. Population, industry, agriculture, recreation and tourism will all be considered. (S, W, YR)

GEOL 390  Topics in Geography  1 to 3 Credit Hours
Selected topics to be announced. (OC).

GEOL 390B Topics in Geography  1 to 3 Credit Hours
TOC TITLE: Global Climate Change. This course explores concepts and current thinking on global climate change and environmental impacts. It covers the history of Earth’s climate, causes of climate change and current research attempting to forecast change. The biotic, economic, and social implications of climate change are discussed.

GEOL 399  Independent Study  1 to 3 Credit Hours
Readings or analytical assignments in accordance with the needs and interests of those enrolled and agreed upon by the student and the advising instructor.

An asterisk denotes that a course may be taken concurrently.

Frequency of Offering
The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally.

**Geology (GEOL)**

GEOL 110  Urban Geology  3 Credit Hours
The study of how the geosciences can be used to solve community-based environmental problems. Taught within the context of the Rouge River watershed, one of the most urbanized watersheds in the country, the focus of this 3-week course is water and watersheds. Classroom lectures are combined with extensive field work, field trips and guest speakers. Taught as a summer II mini course in July. Open only to high school juniors and seniors participating in the Geosciences Research Institute.

GEOL 118  Physical Geology  4 Credit Hours
An introduction to the study of geologic processes at work in the earth's interior and on its surface. Rocks and minerals, the origin and evolution of the continents, and the gradual and catastrophic processes that shape surface and bedrock features. Three hours lecture, three hours laboratory. (W).

Corequisite(s): GEOL 118L

GEOL 218  Historical Geology  4 Credit Hours
A generalized study of the history of the earth, with emphasis on the fossil record of life development, the stratigraphic sequence of deposits and paleogeography. Laboratory work will include the study of geologic and topographic maps and fossils of prominent invertebrate phyla. (YR).

Corequisite(s): GEOL 218L

GEOL 305  Intro to GIS  4 Credit Hours
An introductory course that examines the digital representation, manipulation, and analysis of geographic data, with the emphasis on the analytical capabilities that GIS brings solutions to geographic problems. Students will explore and learn GIS principles using ESRI's mapping software, as well as complete a major GIS project.

Corequisite(s): GEOL 305L

GEOL 305D  Intro to GIS  0 Credit Hours
Required discussion session for GEOL 305.

Corequisite(s): GEOL 305

GEOL 313  Earth Materials  4 Credit Hours
This course provides a detailed look at the physical and chemical components that constitute the Earth’s surface and subsurface. Critical elements of mineralogy, igneous and metamorphic petrology, sedimentology, and stratigraphy are covered. Laboratory sessions allow students to master the use of a petrographic microscope and sedimentary processes, among other related topics. Field sessions allow for students to identify geologic materials in their natural exposed settings. (W, AY)

Prerequisite(s): CHEM 134 and GEOL 118

GEOL 332  Hazardous Waste Management  3 Credit Hours
Environmental problems associated with solid and hazardous waste. Regulations governing the generation, transport, and disposal of hazardous waste. Waste management techniques, including reduction, reuse, recycling, treatment, incineration, and land disposal. Three hours lecture.

Prerequisite(s): GEOL 118 or ESCI 275

GEOL 340  Remote Sensing  3 Credit Hours
This course explores the acquisition, processing, and visualization of remotely derived data, with a particular emphasis on local and environmental applications. ENST 340 covers concepts and foundations of aerial and orbital remote sensing, visual interpretation, reflectance and emission spectroscopy, active and passive sensors, topography, and digital image processing software and techniques.
GEOL 342  Physical Oceanography  3 Credit Hours
An introduction to physical and chemical oceanography, fundamental
marine processes and plate tectonics. Interactions between the oceans
and atmosphere and the effect of greenhouse gases on the oceans and
the role of physical processes in global climate change will be studied.

GEOL 350  Geomorphology  4 Credit Hours
This introductory course is designed to familiarize students with
the fundamentals of river behavior and the general principles in
fluvial morphology, sedimentation, and hydraulic and stream bank
erosion. Applications of these principles are shown utilizing a stream
classification system. Problem solving techniques for watershed
management, stream restoration, non-point source pollution and
integration of ecosystem concepts in watershed management are
presented. A combination of both lecture and field applications are
provided. (F, AY).
Prerequisite(s): GEOL 118 or (GEOG 203 and GEOG 204)
Corequisite(s):
Restriction(s):
Can enroll if Class is Junior or Senior
Can enroll if Level is Undergraduate

GEOL 370  Environmental Geology  3 Credit Hours
Interactions between people and the physical environment. Geological
hazards and natural processes, such as earthquakes, volcanism, floods,
landslides, and coastal processes. Relationships between geology and
environmental health, including chronic disease, water use and pollution,
and waste disposal, mineral resources, and energy use. Three hours lecture.
(AY).
Prerequisite(s): GEOL 118

GEOL 372  Energy Resources  3 Credit Hours
Origin and development of fossil fuels (petroleum, coal, natural gas) and
of radioactive ores used in nuclear power. Renewable and alternative
energy sources, including hydro, solar, wind, biomass, and geothermal
power. Environmental impacts of energy use. Three hours lecture. (AY).
Prerequisite(s): GEOL 118 or ESCI 275 or ESCI 301
