

HEALTH INFORMATION TECHNOLOGY

This is a fully online program and can only be completed in that modality.

The Master of Science in Health Information Technology (HIT) is designed for professionals in either health or information technology who are seeking masters level specialization in information systems dedicated to healthcare. The degree emphasizes data management, financial systems, and information security as well as treatment progress, patient management and outcome measurement.

The program prepares graduates for mid-level positions in hospital information technology departments, community health care clinics' medical records departments, public health agencies, government health departments (federal, state and local), research departments for medical and health schools. The degree consists of 30 semester hours, available to both full and part-time students, and courses are scheduled during the late afternoon and evening sessions to accommodate the working professional. Summer course work is also available.

Admission Requirements & Application

Eligibility for regular admission includes:

- Completed application form
- Application fee
- Official transcript(s) from each college/university attended
- Completion of a bachelor's degree
- 3.0 (B) undergraduate/graduate grade point average or better
- Two letters of recommendation using required form
- Statement of purpose

Admission to this program is by cohort during the fall semester only. The application deadline is March 15th. The university's academic policies for graduate students (<https://catalog.umd.umich.edu/academic-policies-graduate/>) apply.

Program Requirements

Code	Title	Credit Hours
