

PHILOSOPHY (PHIL)

PHIL 542 Medical Ethics 3 Credit Hours

Issues in medical ethics are among the most exciting and the most urgent in the world today. This course will explore some of these issues: the relationship between patient and health caregiver (truth-telling, informed consent, the right to refuse treatment, confidentiality); assisted suicide and euthanasia; treatment of defective newborns; scarce resources, social justice and the right to health care; cloning and genetic manipulation; new reproductive technologies; and others. We will discuss issues from the standpoint of patients, medical professionals, and citizens who shape policy in a democratic society. Ethical theories and concepts will be stressed. (F, YR)

Prerequisite(s): PHIL 240

Restriction(s):

Can enroll if Class is Graduate
