

COMPUTER AND INFORMATION SCIENCE

Computing professionals offer expertise in the effective and efficient use of computers for solving human problems, whether that be as a member of a project development team, as a builder of powerful and easy-to-use tools, as an individual researcher, or as an educator.

Required courses in the Computer and Information Science (CIS) major stress theory and application, as well as the role of other fields such as mathematics, statistics, electrical and computer engineering, business, and software engineering, among others. The curriculum is modeled on the recommendations of the two main professional computing societies, the Association of Computing Machinery (ACM) and the Institute for Electrical and Electronic Engineering (IEEE). Written and oral communications skills are emphasized throughout the program. The use of teamwork on projects is practiced in many courses. Professionalism and ethics are also stressed for future computing professionals. The CIS courses include software engineering, algorithm analysis, networking, security, programming languages, game design, computer architecture, data structures, operating systems, artificial intelligence, database management systems, graphics, information systems, robotics, web development and capstone design courses. The CIS curricula prepare students to begin careers as computing professionals or to pursue graduate study in the field.

A candidate for the degree of BS in CIS is required to select one of three concentrations: Computer Science, Information Systems, or Game Design. The program encourages innovation on the part of students, prepares students for graduate education, trains students to communicate effectively, and provides students with the tools needed to become leaders in their profession.

The Computer Science (CS) concentration strengthens your knowledge of how computer systems work and prepares you for positions in system programming, graphics and visualization, networks, and web technology.

The Information Systems (IS) concentration is oriented toward the design and development of computer information systems, such as, databases, enterprise computing, system analysis, and web-based information systems. It prepares graduates for positions in applications programming, database management, information systems design, and information engineering.

The Game Design (GD) concentration is tailor-made for those whose dreams include careers in game programming, user experience design and augmented reality applications.

The BS in Computer and Information Science program is accredited by the Computing Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>)

Program Educational Objectives

1. Our graduates will be successfully employed in computer science-related fields or other career paths, including industrial, academic, governmental, and non-governmental organizations, or will be successful graduate students in a program preparing them for such employment.
2. Our graduates will lead and participate in culturally diverse teams, becoming global collaborators.

3. Our graduates will continue their professional development by obtaining continuing education credits, professional registration or certifications, or post-graduate study credits or degrees.

Program Outcomes

To achieve the educational objectives of the program, graduates of the BS in CIS program will have an ability to:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Dearborn Discovery Core

Please see the Dearborn Discovery Core (General Education) (<https://umdearborn.edu/faculty-staff/academic-program-and-course-development/dearborn-discovery-core-general-education/>) webpage or additional information.

Foundational Studies

Written and Oral Communication (GEWO) – 6 Credits

Upper-Level Writing Intensive (GEWI) – 3 Credits

Quantitative Thinking and Problem Solving (GEQT) – 3 Credits

Critical and Creative Thinking (GECC) – 3 Credits

Areas of Inquiry

Natural Science (GENS) – 7 Credits

- Lecture/Lab Science Course
- Additional Science Course

Social and Behavioral Analysis (GESB) – 9 Credits

Humanities and the Arts (GEHA) – 6 Credits

Intersections (GEIN) – 6 Credits

Capstone

Capstone (GECE) – 3 Credits

In addition to completion of the Dearborn Discovery Core, the following courses are required to earn a B.S. degree in Computer and Information Science from UM-Dearborn.

Major Requirements

Code	Title	Credit Hours
Prerequisite Courses		
COMP 105	Writing & Rhetoric I	3

COMP 270	Tech Writing for Engineers	3
ECON 201	Prin: Macroeconomics	3
or ECON 202	Prin: Microeconomics	
MATH 115	Calculus I	4
MATH 116	Calculus II	4
MATH 227	Introduction to Linear Algebra	3
CIS 275	Discrete Structures I	4
IMSE 317	Eng Probability and Statistics	3
Select one laboratory science sequence from the following:		8
BIOL 130	Intro Org and Environ Biology	
& BIOL 140	and Intro Molec & Cellular Biology	
CHEM 134	General Chemistry IA	
& CHEM 136	and General Chemistry IIA	
CHEM 144	Gen Chemistry IB	
& CHEM 146	and General Chemistry IIB	
GEOL 118	Physical Geology	
& GEOL 218	and Historical Geology	
PHYS 125	Introductory Physics I	
& PHYS 126	and Introductory Physics II	
PHYS 150	General Physics I	
& PHYS 151	and General Physics II	

Code	Title	Credit Hours
CIS Core		
CIS 150	Computer Science I	4
CIS 200	Computer Science II	4
CIS 310	Computer Org and Assembly Lang	4
CIS 350	Data Struc and Algorithm Anlys	4
CIS 375	Software Engineering I	4
CIS 427	Comp Networks and Dis Process	4
CIS 450	Operating Systems	4
CIS 4951	Design Seminar I	2
CIS 4952	Design Seminar II	2

CIS students must choose a concentration in Computer Science, Information Systems or Game Design. Concentration requirements are listed below.

Computer Science Concentration Requirements

Code	Title	Credit Hours
Four additional science credits; must be a different subject than the two course sequence prerequisite:		4
ASTR 130	Introduction to Astronomy	
& ASTR 131	and Introductory Astronomy Lab	
BIOL 130	Intro Org and Environ Biology	
BIOL 140	Intro Molec & Cellular Biology	
CHEM 134	General Chemistry IA	
CHEM 136	General Chemistry IIA	
CHEM 144	Gen Chemistry IB	
CHEM 146	General Chemistry IIB	
CHEM 225	Organic Chemistry I	

CHEM 226	Organic Chemistry II	
CHEM 227	Organic Chemistry Laboratory	
GEOL 118	Physical Geology	
GEOL 218	Historical Geology	
PHYS 125	Introductory Physics I	
PHYS 126	Introductory Physics II	
PHYS 150	General Physics I	
PHYS 151	General Physics II	
CIS 306	Discrete Structures II	4
CIS 296	Java Programming	3
or CIS 297	Intro to C Sharp	
or CIS 298	Intro to Python	
CIS 405	Algorithm Analysis & Design	3
or CIS 479	Intro to Artificial Intel	
Two Courses (from below)		6
CIS 479	Intro to Artificial Intel (If CIS 479 also selected above, an additional Tech Elective is required)	
ENGR 400	Appl Business Tech for Engr	
ENT 400	Entrepreneurial Thinking&Behav	
IMSE 421	Eng Economy and Dec Anlys	

Technical Electives 21

Select from the following:		21
CIS 285	Software Engineering Tools	
CIS 316	Prac. Comp. Sec.	
CIS 376	Software Engineering II	
CIS 381	Industrial Robots	
CIS 387	Digital Forensics I	
CIS 400	Programming Languages	
CIS 405	Algorithm Analysis & Design	
CIS 411	Natural Language Processing	
CIS 421	Database Mgmt Systems	
CIS 423	Dec Support and Exp Systems	
CIS 425	Information Systems	
CIS 435	Web Technology	
CIS 436	Mobile App Des & Impl	
CIS 437	Advanced Networking	
CIS 447	Intro Computr & Ntwrk Security	
CIS 449	Intro to Software Security	
CIS 451	Computer Graphics	
CIS 452	Information Visualization and Virtualization	
CIS 467	Digital Forensics II	
CIS 474	Compiler Design	
CIS 476	Soft Arch & Design Patterns	
CIS 479	Intro to Artificial Intel	
CIS 481	Computational Learning	
CIS 487	Computer Game Design & Implem	
CIS 488	Computer Game Design II	
CCM 404	Dynamical Systems	
CCM 472	Intro to Numerical Analysis	
CCM 473	Matrix Computation	
ENGR 399	Experiential Honors Prof. Prac	
ENGR 400	Appl Business Tech for Engr	

ENGR 492	Exper Honors Directed Research
ENGR 493	Exper Hnrs Dir Dsgn
ENT 400	Entrepreneurial Thinking&Behav

General Electives

Any 100 to 400 level course with no more than 6 credits, as needed to get a minimum of 120 credits for graduation.

Information Systems Concentration Requirements

Code	Title	Credit Hours
ACC 298	Financial Accounting	3
IMSE 3005	Intro to Operations Research	4
CIS 296	Java Programming	3
or CIS 297	Intro to C Sharp	
or CIS 298	Intro to Python	
CIS 421	Database Mgmt Systems	4
CIS 425	Information Systems	4
CIS 476	Soft Arch & Design Patterns	3
OB 354	Behavior in Organization	3
Two Courses (From below)		6
CIS 479	Intro to Artificial Intel	
ENGR 400	Appl Business Tech for Engr	
ENT 400	Entrepreneurial Thinking&Behav	
IMSE 421	Eng Economy and Dec Anlys

ENGR 493	Exper Hnrs Dir Dsgn
ENT 400	Entrepreneurial Thinking&Behav

General Electives

Any 100 to 400 level course with no more than 6 credits, as needed to get a minimum of 120 credits for graduation.

Minor in Computer and Information Science

The minor in CIS requires a minimum of 24 credit hours, which must include CIS 150, CIS 200, CIS 275, CIS 350 and eight additional credit hours at the 300 or 400 level approved by the student's faculty advisor in CIS. An introduction to calculus (MATH 115) is required and does not count toward the 24 hours. Completion of MATH 116 is strongly recommended.

CIS 112 Computer Literacy/Info Mgmt 3 Credit Hours

This is a microcomputer literacy course with primary emphasis on the application tools of the word processor, spreadsheets, and database. Additional topics of computer terms, systems, and use in society are included. The course is intended for undergraduates in the College of Arts, Sciences, and Letters. No previous experience with computers is expected. (YR).

CIS 125 Survey of Computer Science 3 Credit Hours

A survey of computer science topics, including history of computing, office productivity software, the internet, HTML, JavaScript, web design, algorithms, assemblers and compilers, gates and logic design, models of computation, artificial intelligence and expert systems, computing ethics, privacy issues, intellectual property. No credit for CIS majors. (F,W,S).

CIS 150 Computer Science I 4 Credit Hours

This course provides a foundation for further studies in computer and information science and emphasizes a structured approach to problem solving and algorithm development. Topics include principles of program design, coding, debugging, testing, and documentation. Students are introduced to the Unified Modeling Language for requirements analysis using use-cases and activity diagrams, an object oriented programming language, and the fundamentals of computer hardware, system software, and components. The course will consist of three lecture hours and one two-hour laboratory.

Prerequisite(s): MATH 115* or MATH 113* or Mathematics Placement with a score of 116

Corequisite(s): CIS 150L

CIS 1501 CS I for Data Scientists 4 Credit Hours

This course provides a foundation for further studies in computer and information science and emphasizes a structured approach to problem solving and algorithm development using a high-level language more suited to data science applications. Topics include principles of program design, coding, debugging, testing, and documentation. Students are introduced to the Unified Modeling Language for requirements analysis using use-cases and activity diagrams, an object-oriented programming language for data science applications, and the fundamentals of computer hardware, system software, and components. The course will consist of three lecture hours and one two-hour laboratory. The labs will cover various data science applications. (F,W,S)

Prerequisite(s): MATH 115* or MATH 113* or Mathematics Placement with a score of 116

CIS 200 Computer Science II 4 Credit Hours

This course presents techniques for the design, writing, testing, and debugging of medium-sized programs, and an introduction to data structures (stacks, queues, linked lists) using an object-orientated programming language. Topics covered include pointers, templates, and inheritance. The principles of UML modeling are continued. This course will consist of three lecture hours and one two-hour laboratory.

Prerequisite(s): (MATH 115 or Mathematics Placement with a score of 116) and (CIS 150 or IMSE 150 or CCM 150)

Corequisite(s): CIS 200L

CIS 2001 CS II for Data Scientists 4 Credit Hours

This course presents techniques for the design, writing, testing, and debugging of medium-sized programs, and an introduction to data structures (stacks, queues, linked lists) using an object-oriented programming language for data science applications. Topics covered include pointers, templates, and inheritance. The principles of UML modeling are continued. This course will consist of three lecture hours and one two-hour laboratory. The labs will cover various data science applications. (F, W, S)

Prerequisite(s): CIS 1501 and MATH 115 or MATH 113 or Mathematics Placement with a score of 116

CIS 205 Comp Programming for Engineers 3 Credit Hours

Full Course Title: Computer Programming for Engineers- Intermediate topics in computer programming: arrays, files, structured data types, pointers, functions. Overview of digital computer hardware and system software components: machine architecture, operating systems, computer networks, data security, and performance evaluation. No credit for CIS majors.

Prerequisite(s): ENGR 100 or (MATH 105 or Mathematics Placement with a score of 113)

CIS 275 Discrete Structures I 4 Credit Hours

This course introduces students to various topics in discrete mathematics, such as set theory, mathematical logic, trees, and graph theory. Applications to relational databases, modeling reactive systems and program verification are also discussed. (F,W,S)

Prerequisite(s): (MATH 115 or Mathematics Placement with a score of 116) and CIS 200*

CIS 285 Software Engineering Tools 3 Credit Hours

This course will cover various CASE tools, such as UML modeling and code generation tools, configuration management tools, defect management tools, an integrated development environment for coding and debugging, unit and testing tools, and build tools. Students will learn these tools in a laboratory environment. This course will be comprised of one lecture hour and one two-hour laboratory. (F,W)

Prerequisite(s): CIS 200*

CIS 290 Topic in Programming Languages 2 Credit Hours

One significant programming language is covered in depth. The particular language changes from term to term. The language chosen might be Ada, C, MODULA 2, USP, PROLOG, or SMALLTALK.

Prerequisite(s): CIS 200

CIS 294 Programming with Visual Basic 3 Credit Hours

An introduction to create professional-looking applications using the graphical user interface of Windows. Students learn how to create graphical objects and controls, write event driven code that responds to clicking on buttons, work with multiple forms and executable files. (F,S).

Prerequisite(s): CIS 200 or IMSE 200

CIS 296 Java Programming 3 Credit Hours

Course covers Java Programming language, focusing on GUI development, distributed computing and network applications.

Prerequisite(s): CIS 200 or CIS 2001

CIS 297 Intro to C Sharp 3 Credit Hours

This course provides an introduction to the C# programming language and the .NET Framework for the development of Windows game applications. Some discussion of DirectX programming and Xbox game development is also included. (W)

Prerequisite(s): CIS 200 or CIS 2001

CIS 298 Intro to Python 3 Credit Hours

Full Title: Introduction to Python An introduction to the Python programming language and its various libraries, packages, and toolkits. The focus of this course will be on the development of analytics/data science applications. (W)

Prerequisite(s): CIS 200 or IMSE 200

Restriction(s):

Can enroll if Level is Undergraduate

CIS 299 Internship 1 Credit Hour

Student works with an industrial sponsor in the area of CIS. Approval of Internship Coordinator required. (F,W,S).

CIS 306 Discrete Structures II 4 Credit Hours

This course introduces students to further topics in discrete mathematics, including theory of computation, more complexity theory, coding theory, and game theory.

Prerequisite(s): CIS 275

CIS 310 Computer Org and Assembly Lang 4 Credit Hours

The architecture of computer systems and associated software. Topics include digital logic circuits, computer interfacing, interrupt systems, input/output systems, memory systems, assemblers and assembly language programming, and computer networks. (F,W,S).

Prerequisite(s): (MATH 115 or Mathematics Placement with a score of 116) and (CIS 200 or IMSE 200) and CIS 275

CIS 316 Prac. Comp. Sec. 3 Credit Hours

Full Title: Practical Aspects of Computer Security This course provides a practical introduction to a broad range of security topics including legal, ethical and professional issues in information security. Covered topics include: practical computer security principles; firewalls, malware, and intrusion detection; cryptography basics and its applications; mobile devices and related security issues; network technologies and their vulnerabilities. (YR)

Prerequisite(s): CIS 200

Restriction(s):

Can enroll if College is Engineering and Computer Science

CIS 3200 Data Science II 4 Credit Hours

This course provides an overview of what Big Data is and explores its characteristics. It introduces the fundamental technologies, platforms, and methods that enable Big Data analysis, and covers how to acquire, store, and analyze very large amounts of information to complete Big Data analysis tasks. Topics include MapReduce, similarity search, mining real-time data streams, link analysis, clustering, recommender systems, social network graph mining, and large scale data mining tasks. (W)

Prerequisite(s): (CIS 2001 or CIS 200) and ECE 3100

CIS 350 Data Struc and Algorithm Anlys 4 Credit Hours

This course focuses on data design and algorithm design. Data design topics include object-oriented discussions of hashing, advanced tree structures, graphs, and sets. Algorithm design topics include the greedy, divide-and-conquer, dynamic programming, backtracking and branch-and-bound techniques. A significant discussion of algorithm complexity theory, including time and space trade-offs and elementary computability theory, is included. (F,W,S)

Prerequisite(s): (MATH 115 or Mathematics Placement with a score of 116) and (CIS 200 or IMSE 200) and CIS 275

CIS 3501 Data Struc & Alg Anlys for SE 4 Credit Hours

This course focuses on data design and algorithm design for software engineers. Data design topics include object-oriented discussions of hashing, advanced tree structures, graphs and sets. Algorithm design topics include the greedy, divide-and-conquer, dynamic programming, backtracking and branch-and-bound techniques. A significant discussion of algorithm complexity theory, including time and space trade-offs and elementary computability theory, is included. (F,W,S)

Prerequisite(s): (MATH 115 or Mathematics Placement with a score of 116) and (CIS 200 or IMSE 200) and CIS 275

CIS 375 Software Engineering I 4 Credit Hours

This course presents an in-depth treatment of the following software engineering topics: software engineering paradigms, requirements, specification, functional design, object-oriented design, user interface design, software verification and validation, and the maintenance and management of software engineering artifacts, as well as an introductory discussion of software reliability. Various phases of the software engineering process will be modeled using UML. (F,W)

Prerequisite(s): (CIS 350 or CIS 3501 or IMSE 350) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276) and (COMP 270 or COMP 106 or COMP 220 or Composition Placement Score with a score of 40 or Composition Placement Score with a score of 107)

CIS 376 Software Engineering II 4 Credit Hours

This course continues the formal development of the software engineering material begun in CIS 375. Topics covered include personal software process, team software process, formal methods, security, software architecture, software quality assurance, software fault tolerance, the evaluation of the effectiveness of human computer interaction and software reliability. (W,S)

Prerequisite(s): CIS 375

CIS 381 Industrial Robots 4 Credit Hours

The course introduces students in engineering and computer science to fundamentals of robotics technology, programming and their applications in industrial environment. The emphasis will be on robotics anatomy and configurations, robot kinematics, end effectors, use of sensors in robotics, robotics programming, design of robot workcell, robotics applications to production problems, cost justifications and robotics safety, rather than on the extensive theory of robotics. Three-hour lecture and three-hour laboratory per week.

Prerequisite(s): MATH 115

Restriction(s):

Can enroll if Class is Junior or Senior

CIS 387 Digital Forensics I 4 Credit Hours

This course takes a detailed, hands-on approach to study the procedures and techniques used to identify, extract, validate, document and preserve electronic evidence. Students completing this course will be familiar with the core computer science theory and practical skills necessary to perform basic computer forensic investigations, understand the role of technology in investigating computer-based crime, and be prepared to deal with investigative bodies at a basic level.

Prerequisite(s): (CIS 200 or ECE 270) and (CIS 310* or ECE 370* or ECE 372*)

Restriction(s):

Cannot enroll if Class is Freshman

Can enroll if Level is Undergraduate

CIS 390 Topics in Computer Science 1 to 3 Credit Hours

A course designed to offer selected topics in an area of computer science. The specific topics will be announced (together with special prerequisites) each time offered. Students must elect different topics to take both CIS 390 and CIS 391. (OC).

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and ECE 276) or (ECE 370 and MATH 276)

CIS 391 Topics in Computer Science II 1 to 3 Credit Hours

A course designed to offer selected topics in an area of computer science. The specific topics will be announced (together with special prerequisites) each time offered. Students must elect different topics to take both CIS 390 and CIS 391. (OC).

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and ECE 276) or (ECE 370 and MATH 276)

CIS 399 Internship 1 Credit Hour

Student works with industrial sponsor in the area of CIS. Permission of Internship Coordinator required. (F,W,S).

CIS 400 Programming Languages 4 Credit Hours

Systematic study of programming languages with regard to their implementation, structures, and use. Languages are compared with regard to their various data types, data structures, operations, control structures, programming environments, and ease of use in solving various programming problems. (F,W).

Prerequisite(s): (CIS 350 or IMSE 350 or CIS 3501) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276)

CIS 405 Algorithm Analysis & Design 3 Credit Hours

This course investigates how to design efficient algorithms. Topics include asymptotic analysis, amortized analysis, divide-and-conquer, dynamic programming, greedy algorithms, branch and bound, backtracking, lower bounds, NP-completeness and approximation algorithms.

Prerequisite(s): CIS 350

CIS 411 Natural Language Processing 3 Credit Hours

This course provides an introduction to the theory and practice of natural language processing (NLP), as well as the approaches that allow understanding, generating, and analyzing natural language. The course will cover the three major areas in NLP: syntax, semantics, and pragmatics. The course will introduce both knowledge-based and statistical approaches to NLP, illustrate the use of NLP techniques and tools in a variety of application areas, and provide insight into many open research problems. (YR)

Prerequisite(s): CIS 350 or CIS 3501

CIS 421 Database Mgmt Systems 4 Credit Hours

An introduction to database systems, concepts, and techniques. Topics covered include: database environments, ER modeling, relational data model, object-oriented databases, database design theory and methodology, database languages, query processing and optimization, concurrency control, database recovery, and database security.

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 351 or (ECE 370 and MATH 276)

CIS 422 Massive Data Management 4 Credit Hours

An introduction to database systems, concepts, and techniques for big data. The course discusses classical relational technologies, and then covers the more current approaches to managing massive amounts of data for analytics purposes. Topics include database environments, database design, the relational data model, normalization, SQL, query processing, parallel databases and query processing, in-database analytics, data warehousing, key-value and column stores, NoSQL and NewSQL approaches for managing massive data. (F)

Prerequisite(s): (CIS 2001 or CIS 200) and CIS 3200

CIS 423 Dec Support and Exp Systems 3 Credit Hours

The application of artificial intelligence to building decision support and expert systems for management and other applications. Topics include fundamentals of artificial intelligence, knowledge representation and knowledge processing, tools for building expert systems (logic programming, expert shells), decision support system design (modeling and simulation), expert system design (knowledge engineering, learning). (F).

Prerequisite(s): CIS 421

CIS 425 Information Systems 4 Credit Hours

This course provides in-depth coverage of advanced infrastructures for the development of next-generation information systems/ Topics include information systems, data integration, XML, web services, ontologies, workflow, data warehousing, and data mining.

Prerequisite(s): CIS 375 and (CIS 421* or CIS 422*)

Restriction(s):

Cannot enroll if Class is Freshman or Sophomore

CIS 427 Comp Networks and Dis Process 4 Credit Hours

Study of the management aspects of computing networks and distributed systems. Topics include network architectures (ISO/OSI, TCP/IP, ATM), communication hardware (transmission media, network adaptors, switches), encoding, framing, error detection and correction, reliable transmission, data link control and LAN technology, internetworking, routing/congestion control, network design/management.

Prerequisite(s): (CIS 350 or CIS 3501 or IMSE 351) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276) and IMSE 317

CIS 435 Web Technology 3 Credit Hours

This course deals with the study of technologies used to design and implement multimedia web sites. Topics include web servers, HTML, CGI, scripting languages, Java applets, back-end database connectivity, web security, multimedia, XML. (F,W).

Prerequisite(s): CIS 375* or CIS 553*

Restriction(s):

Can enroll if Class is Junior or Senior

Can enroll if Level is Undergraduate

Cannot enroll if Major is

CIS 436 Mobile App Des & Impl 3 Credit Hours

This course introduces students to the development of software applications for programmable mobile and wireless intelligent hand-held devices. Topics covered include the different mobile development platforms, best practices in mobile user interaction design, software quality assurance in mobile environment, security and privacy issues, and context-aware computing. Students will participate in a final project.

Prerequisite(s): CIS 375*

Restriction(s):

Can enroll if Class is Junior or Senior

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science or Arts, Sciences, and Letters

CIS 437 Advanced Networking 3 Credit Hours

Topics include an overview of the internet, congestion control, quality of service, internet multicasting, multimedia networking, mobile and wireless networks, vehicular networks, overlay networks, peer-to-peer networks, internet management (SNMP), and internet applications (web-HTTP and email-SMTP).

Prerequisite(s): CIS 427

Restriction(s):

Cannot enroll if College is Business

CIS 446 Wireless & Mobi Comp Security 3 Credit Hours

Full course title: Wireless and Mobile Computing Security. The course focuses on security and privacy issues in the area of wireless networks and mobile computing such as cellular networks, wireless LANs, connected vehicles, smart and mobile devices, sensors and sensor networks, IoT, etc. The course will first present an overview of wireless communication and wireless systems, then focus on attacks, discuss proposed solutions and their limitations. Topics of this course include: (1) introduction to security primitives and wireless networks; (2) security issues in single-hop wireless networks that include cellular networks, RFID, modern vehicle, smartphone security; (3) security issues in multi-hop wireless network that include Mobile Ad Hoc network, wireless sensor network and vehicular network security. (YR)

Prerequisite(s): (CIS 200 or CIS 2001) and MATH 396

CIS 447 Intro Computr & Ntwrk Security 3 Credit Hours

This course will provide a broad-spectrum introduction to the fundamental principles of computer and network security. Topic will include security policies, models and mechanisms for confidentiality, integrity and availability, access control, authorization, cryptography and applications, threats and vulnerabilities in computer networks, key management, firewalls and security services in computer networks.

Prerequisite(s): CIS 450*

Restriction(s):

Cannot enroll if College is Education, Health, and Human Services or Business

CIS 449 Intro to Software Security 3 Credit Hours

This course provides a broad-spectrum introduction to the fundamental principles of software security, as well as the approaches that allow understanding common software practices, analyzing programs for vulnerabilities, and methods for developing secure software systems. The course will cover three major areas: software attacks and defenses, program analysis, and software verification. Various forms of software will be considered in this class including high level applications and system software. The course will also provide insight into many open research problems in this area. (YR)

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and ECE 276) or (ECE 370 and MATH 276)

CIS 450 Operating Systems 3 or 4 Credit Hours

Introduction to computer operating systems. Process control, threads, concurrency, memory management, virtual memory, uniprocessor, multiprocessor, and real-time scheduling, I/O management, disk scheduling, file management, distributed processing, client/server, clusters, distributed process management, security. (F,W).

Prerequisite(s): CIS 310 and (CIS 350 or CIS 3501 or IMSE 350) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276) and IMSE 317*

CIS 451 Computer Graphics 3 Credit Hours

Basic geometrical concepts: graphics output primitives, two-dimensional transformations, windowing and clipping, three-dimensional viewing, visible surface detection methods, and graphical user interfaces. (F).

Prerequisite(s): (MATH 217 or MATH 227 or MATH 228) and (CIS 350 or CIS 3501 or IMSE 350) or (ECE 370 and MATH 276) or (ECE 370 and ECE 276)

CIS 452 Inf Vis & Multimedia Gaming 3 Credit Hours

This course introduces basic techniques for digital animation, computer and video games, and web multimedia. Topics include the process of creating animated video clips from start to finish, including story creation, storyboarding, modeling, animation, and post-production; several key techniques for video editing and motion generation, including keyframe, motion capture editing, collision detection, particle systems, physical simulation, and real-time rendering; techniques for web animation and multimedia; and internet gaming.

Prerequisite(s): CIS 451 or CIS 487

Restriction(s):

Can enroll if Class is Senior

Cannot enroll if College is Education, Health, and Human Services or Business

CIS 467 Digital Forensics II 4 Credit Hours

This course is a continuation of Digital Forensics I and will focus on Internet Forensics. Students will examine in-depth concepts in Internet evidence collection and preservation, as well as applications of contemporary commercial forensic investigative software.

Prerequisite(s): (CIS 427* or ECE 471*) and (CIS 387 or ECE 387)

Restriction(s):

Cannot enroll if Class is Freshman

Cannot enroll if College is Business

CIS 474 Compiler Design 3 Credit Hours

Principles of language compilation. Introduction to formal languages. Lexical analysis, top-down and bottom-up parsing, code generation and optimization. Error handling and symbol table management. Run-time storage management. Programming language design. Introduction to compiler-writing tools such as LEX and YACC. (F,W).

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and MATH 276)

CIS 476 Soft Arch & Design Patterns 3 Credit Hours

This course focuses on design patterns in object-oriented programming. This course begins with an overview of UML and a review of object-oriented programming and then moves on to various structural, behavioral and creational patterns, including: facades, adaptors, bridges, factories and the template method. Analysis of case studies will also be discussed. Using various modern software tools, students will apply various design patterns to real-world software design problems to gain complete practical understanding. (F,W)

Prerequisite(s): CIS 375

Restriction(s):

Can enroll if College is Engineering and Computer Science

CIS 479 Intro to Artificial Intel 3 Credit Hours

This course introduces students to basic concepts and methods of artificial intelligence from a computer science perspective. Emphasis of the course will be on the selection of data representations and algorithms useful in the design and implementation of intelligent systems. The course will contain an overview of one AI language and some discussion of important applications of artificial intelligence methodology. (S).

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 370 and MATH 276) or (ECE 370 and ECE 276)

CIS 481 Computational Learning 3 Credit Hours

This course covers basic computational aspects of learning to perform a task and improve with experience. Topics include learning frameworks and problem formulations; standard models, methods, computational tools, algorithms and modern techniques; and methodologies to evaluate learning ability and to automatically select optimal models. The main focus is on computer science (e.g., basic runtime, space and complexity analysis, programming, and empirical evaluations?). Simple applications to areas such as computer vision, natural language processing (NLP), and robotics will also motivate the course material. (W)

Prerequisite(s): CIS 306 and (MATH 217* or MATH 227*) and (IMSE 317* or BENG 364* or MATH 425*)

Restriction(s):

Cannot enroll if Class is Graduate or Doctorate

CIS 4851 Data Security and Privacy 3 Credit Hours

This course covers basics of data security and privacy techniques, which can facilitate the use of data in a secure and privacy-sensitive way. Topics include security and privacy challenges due to data collection and analytics, technologies and strategies for data security and privacy (access control mechanism, integrity policy, cryptography and encryption, notice and consent, anonymization or de-identification, deletion and non-retention). (W)

Prerequisite(s): CIS 200 or CIS 2001

CIS 487 Computer Game Design & Implem 3 Credit Hours

This course deals with the study of the technology, science and art in the creation of computer games. The focus of the course will be hands-on development of computer games. Students will study a variety of software technologies relevant to computer game design, including programming languages, scripting languages, operating systems, files systems, networks, simulation engines and multi-media design systems. Lecture topics will be taken from several areas of computer science: simulation and modeling, computer graphics, artificial intelligence, real-time processing, game theory, software engineering, human computer interaction, graphic design and game aesthetics. (F).

Prerequisite(s): CIS 375*

Restriction(s):

Can enroll if Class is Junior or Senior

Cannot enroll if Major is

CIS 488 Computer Game Design II 3 Credit Hours

This course is a continuation of the material studied in CIS 487. The focus of the course will be hands-on development of computer game development tools (e.g. game engines). Students will study a variety of software technologies relevant to computer game design, including: 3D graphics, computer animation, data-driven game design, multiplayer game programming, and game AI. Lecture topics will be taken from several areas of computer science: simulation and modeling, computer graphics, artificial intelligence, game theory, software engineering, human computer interaction and game content development. (W)

Prerequisite(s): CIS 487

Restriction(s):

Can enroll if Class is Junior or Senior

Can enroll if College is Engineering and Computer Science

Cannot enroll if Major is

CIS 490 Advanced Topics 1 to 3 Credit Hours

This course is intended for seniors and graduate-level students in CIS. For specific topic, consult current semester's Schedule of Classes. (OC).

Prerequisite(s): CIS 350 or CIS 3501 or IMSE 350 or (ECE 270 and ECE 276) or (ECE 370 and MATH 276)

CIS 491 Research Project I 1 to 4 Credit Hours

Provides the advanced student with the opportunity to undertake a research project under the supervision of a faculty member. At least two weeks prior to registration in the semester when such a course is to be elected, an interested student must submit to the CIS chair and one CIS faculty member a written request for permission to elect a research course on the appropriate form available in the CIS Office. The request will include a description of the proposed research project. The CIS chair will review the proposal with faculty members to ascertain availability of relevant faculty supervision and to establish appropriate credit. Grades will be granted on a Pass/Fail (S/E) basis exclusively. (F,W,S).

Restriction(s):

Can enroll if Class is Senior

Can enroll if Major is CIS/Information Systems

CIS 492 Research Project II 1 to 4 Credit Hours

This course is a second registration for a research project in CIS. (F,W,S).

Restriction(s):

Can enroll if Class is Senior

Can enroll if Major is CIS/Information Systems

CIS 493 Independent Study I 1 to 4 Credit Hours

Readings or analytical assignments in accordance with the needs and interests of those enrolled and agreed upon by the student and an instructor, which shall not duplicate a formal course offering. Permission of instructor required. (F,W,S).

CIS 494 Independent Study II 1 to 4 Credit Hours

This course is a second registration for an independent study in CIS. Permission of instructor required. (F,W,S).

CIS 4951 Design Seminar I 2 Credit Hours

Students participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice. (F,W,S)

Prerequisite(s): CIS 375 and CIS 310 and (CIS 427 or CIS 450)

Restriction(s):

Can enroll if College is Engineering and Computer Science

CIS 4952 Design Seminar II 2 Credit Hours

Students continue to participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice. (F,W,S)

Prerequisite(s): CIS 4951

Restriction(s):

Can enroll if College is Engineering and Computer Science

CIS 4961 Design Seminar for SE I 2 Credit Hours

Software engineering students participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice in software engineering. (F,W,S)

Prerequisite(s): CIS 376

Restriction(s):

Can enroll if Class is Senior

Can enroll if College is Engineering and Computer Science

CIS 4962 Design Seminar for SE II 2 Credit Hours

Software engineering students continue to participate in the design and implementation of a major software project. Seminar topics discussed include: computing ethics and professional practice in software engineering.

Prerequisite(s): CIS 4961 and CIS 476*

Restriction(s):

Can enroll if College is Engineering and Computer Science

CIS 4971 Cap Sem for Data Sci I 2 Credit Hours

Data science students participate in the design and implementation of a major data science project. Seminar topics discussed include: computing ethics and professional practice in data science. (F, W, S)

Prerequisite(s): CIS 3200 and (STAT 325 or IMSE 317)

Restriction(s):

Can enroll if Class is Senior

CIS 4972 Cap Proj for Data Sci II 2 Credit Hours

Data science students continue to participate in the design and implementation of a major data science project. Seminar topics discussed include: computing ethics and professional practice in data science. (F, W, S)

Prerequisite(s): CIS 4971 and STAT 430*

Restriction(s):

Can enroll if Class is Senior

CIS 4981 Design Seminar for CIS-DS I 2 Credit Hours

Full Course Title: Design Seminar for Dual Degree CIS-DS Majors I Dual degree CIS and Data Science students participate in the design and implementation of a major software project involving data science. Seminar topics discussed include computing ethics and professional practice in data science. (F,W,S)

Prerequisite(s): CIS 375 and CIS 3200 and (STAT 325 or IMSE 317) and CIS 310 and (CIS 427 or CIS 450)

Restriction(s):

Can enroll if Class is Senior

CIS 4982 Design Seminar for CIS-DS II 2 Credit Hours

Dual Degree CIS and Data Science students participate in the design and implementation of a major software project involving data science. Seminar topics discussed include computing ethics and professional practice in data science. (F,W,S)

Prerequisite(s): CIS 4981 and STAT 430*

Restriction(s):

Can enroll if Class is Senior

CIS 499 Internship 1 Credit Hour

Student works with industrial sponsor in area of CIS. Approval of Internship Coordinator required. (F,W,S).

* An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
