

BIO/MECHANICAL ENGINEERING

Students with an interest in both areas can pursue a dual BSE program in Bioengineering and Mechanical Engineering and thus can earn two BSE degrees at the same time:

- BSE degree in Bioengineering
- BSE degree in Mechanical Engineering

The dual degree program requires specified coursework that equals a minimum of 143 total credits.

Dual Bioengineering/Mechanical Engineering Accelerated Master Option

The accelerated undergraduate/master's studies option allows current students enrolled in the BENG/ME undergraduate dual degree program at UM-Dearborn to complete the ME and BENG BSE degrees and the MSE bioengineering degree in an accelerated format. This is achieved via combining a portion of undergraduate and graduate coursework. Admitted students can double-count up to 9 credits of 500-level or above bioengineering elective, core, or cognate courses taken during their junior or senior years. Of these, only one cognate course is allowed.

In practice with the usual graduate student program rules, these students may also transfer a maximum of 6 additional 500 level credits toward the 30-credit master's degree. These additional transfer credits can be taken during the junior and senior years and cannot be used for any portion of the undergraduate degree. Depending on the number of double-counted and transfer credits, 15-21 credits of graduate coursework would be needed to complete the master's program after completion of the undergraduate degree.
