

MECHATRONICS AND ROBOTICS

The Department of Mechanical Engineering offers an undergraduate certificate program in the area of Mechatronics and Robotics. The program is based on the elective courses of the bachelor of science in engineering degree in mechanical engineering (BSE-ME) program regularly offered by the Department of Mechanical Engineering. The earned credit hours can be applied simultaneously to the certificate program and an undergraduate degree program at the University of Michigan - Dearborn.

The program can be completely entirely on campus, with some courses occasionally offered in the asynchronous online mode.

Mechatronics and robotics is an increasingly important area at the intersection between mechanical and electrical engineering. The certificate program offers undergraduate students the opportunity to deepen their understanding of engineering design in the mechanical engineering area and receive official recognition in the field.

Only courses completed with grade B or better will be counted toward the certificate. A minimum certificate grade point average of 3.0 is required to obtain the certificate.

Certificate Requirements

The certificate program requires a minimum of 9 credit hours.

Code	Title	Credit Hours
Select a minimum of 9 credit hours from the following:		
ME 440	Intro to Mechanical Vibrations	3
ME 445	Sound and Noise Controls	4
ME 4461	Mech Vibration & Noise Control	4
ME 472	Prin & Appl of Mechatronic Sys	4
IMSE 381	Industrial Robots	4
ME 4640	Linear Systems Control	3

Notes:

1. Up to 4 credit hours can be transferred from a degree-granting program at another institution.
2. Pass/fail courses are not allowed.
3. All applicable credits earned in the certificate program can be applied toward one University of Michigan – Dearborn degree program.
4. Credits earned in the certificate program cannot be applied toward another certificate program.
