

# INDUST & MANUFAC SYS ENGIN (IMSE)

---

## **IMSE 500 Models of Oper Research 3 Credit Hours**

The method of mathematical modeling and its application to decision-making problems in organizations. Some widely used models and techniques: linear programming, queuing, inventory, and simulation.

### **Restriction(s):**

Can enroll if Class is Graduate

## **IMSE 501 Human Factors & Ergonomics 3 Credit Hours**

The analysis and prediction of human performance in industrial and other man-machine systems using work sampling, time-motion analysis, synthetic and standard time study, and learning curves, in the design of such systems. Lecture and laboratory. Cannot receive credit for both IMSE 442, and IMSE 501. This class may be scheduled at the same time as the undergraduate course IMSE 442. Graduate students will be required to do additional research paper and/or project.

**Prerequisite(s):** IMSE 317\* or IMSE 510\*

### **Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

## **IMSE 5010 Fundamentals of Program Mgt 3 Credit Hours**

An overview of the project/program management framework and knowledge areas including plan development and execution; management of scope, time, cost, quality, human resource, communications, risk, and procurement. Typical program phases and life cycles observed in defense, construction, automobile, and software industries. Program organizational structures, program management processes, international project management, role of software tools for program management, product development, applications of Lean Product Development techniques, cutting waste and lead time in program management.

**Prerequisite(s):** IMSE 510

### **Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

Can enroll if College is Business

## **IMSE 502 Computer-Integrated Mfg 3 Credit Hours**

This course provides basic knowledge of elements in Computer-Integrated Manufacturing Systems, with particular emphasis on Computer-Aided Design (CAD), Computer-Aided Manufacturing (CAM), Computer-Aided Process Planning (CAPP), materials handling, and information flow in manufacturing systems. Hands-on experiments and course projects are required. Two lecture hours and three laboratory hours. Credit cannot be given for both IMSE 483 and IMSE 502. This class may be scheduled at the same time as the undergraduate course IMSE 483. Graduate students will be required to do additional research paper and/or project.

### **Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

## **IMSE 503 Computer-Aided M/C & Tool Desg 3 Credit Hours**

Study of the fundamentals of machine tool design, cutting tools, metal forming dies, and jig fixtures for practical applications in machining and assembly. Principles of design for manufacture and assembly as applied to tool and machine design. Laboratory exercise and projects are required using computer-aided design software. Two lecture hours and three laboratory hours. Credit cannot be given for both IMSE 484 and IMSE 503. This class may be scheduled at the same time as the undergraduate course IMSE 484. Graduate students will be required to do additional research paper and/or project.

**Prerequisite(s):** IMSE 382 or ME 381

### **Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

## **IMSE 504 Metal Forming Processes 3 Credit Hours**

This course focus is on fundamentals of metal forming processes; mechanics of metal forming; formability of manufacture; and economic aspect of the process. Emphasis is placed on analysis of bulk and sheet metal forming processes as applied to practical cases such as automobile manufacturing. Laboratory and course project are required. Credit cannot be given for both IMSE 488 and IMSE 504. This class may be scheduled at the same time as the undergraduate course IMSE 488. Graduate students will be required to do additional research paper and/or project.

**Prerequisite(s):** IMSE 382 or IMSE 381

### **Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

## **IMSE 505 Optimization 3 Credit Hours**

Theory of linear and nonlinear programming. Language multipliers and Kuhn-Tucker conditions. Convex programming. Combinatorial and integer programming. Dynamics programming. Heuristic and search optimization techniques. Theory and emphasis on applications using various computer codes.

**Prerequisite(s):** IMSE 300 or IMSE 500

## **IMSE 507 Industrial Robots 3 Credit Hours**

The course introduces the fundamentals of robotics technology, programming and their applications in industrial environment. The emphasis will be on robotics anatomy and configurations, robotics kinematics, end effectors, use of sensors in robotics, robotics programming, design of robot workcell, robotics applications to production problems, cost justifications and robotics safety, rather than on the extensive theory of robotics. A term project is required. (F).

## **IMSE 510 Probability & Statistical Mod 3 Credit Hours**

Review of basic concepts in probability and statistics. Multivariate distributions. Estimation and order statistics. General hypothesis testing, and non-parametric tests. Linear, multiple-linear, and nonlinear regression models. Analysis of variance. Introduction to the design of experiments.

**Prerequisite(s):** IMSE 317

## **IMSE 511 Design and Analysis of Exp 3 Credit Hours**

One factor, two factor, and multifactor experiments. Fixed random and mixed models. Blocked confounding, incomplete blocks, factorial experiments, fractional factorial experiments. Introduction to response surface analysis.

**Prerequisite(s):** IMSE 510

**IMSE 512 Taguchi Method of Quality Eng 3 Credit Hours**

Quality engineering methodology developed by Genichi Taguchi. Design and analysis of experiments using orthogonal arrays and linear graphs. Accumulation analysis for categorized data. Signal-to-noise ratio as a measure of quality characteristics. Simulation using orthogonal arrays. Parameter design for reducing variability around the target without cost increase. Tolerance design for reducing variability with minimum cost increase. Evaluation and improvement of measurement.

**Prerequisite(s):** IMSE 510

**IMSE 513 Robust Design 3 Credit Hours**

Students will learn models and methods in the context of overall strategies to empirically study the design of products and manufacturing processes to reduce variability and to reduce sensitivity to parameter variation. Topics include: process capability studies and measures, basic DOE concepts, factorial experiments, evaluating sources of variation, evolutionary operation and adaptive statistical process control.

**Prerequisite(s):** IMSE 510

**IMSE 514 Multivariate Statistics 3 Credit Hours**

Linear statistical models used in simple and multiple regression, and analysis of variation. Principles and techniques of principle component analysis are studied and applied to business and engineering problems using statistical computer software. (YR)

**Prerequisite(s):** IMSE 510

**IMSE 515 Fundamentals of Program Mgt 3 Credit Hours**

An overview of the project/program management framework and knowledge areas including plan development and execution, scope management, time management, cost management, quality management, human resource management, communications management, risk management, and procurement management. Typical Program Phases and Life Cycles observed in Defense, Construction, Automobile, and Software Industries. Program Organizational Structures, Program Management Processes, and International Project Management are covered. Role of software tools for Program Management and Product Development are discussed. Applications of Lean Product Development Techniques are considered. Cutting waste and lead time in program management are covered. Case studies are used extensively throughout the course.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Level is Rackham or Professional Development or Graduate

**IMSE 516 Project Management and Control 3 Credit Hours**

Project Planning, Scheduling, and Controlling functions are discussed in detail including work breakdown structure, CPM and PERT methods, resource allocation and leveling techniques, cost control and minimization, trade-off analysis, learning curves overlapping relationships and concurrent engineering, multiple project execution and optimization. Applications of Lean Techniques in program management are discussed as well as the role of IT in accelerating the product development and reducing the program time. The importance of integrating the Supply Chain in the Product Development is also considered. Case studies and project management software are used throughout the course.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Level is Rackham or Professional Development or Graduate

**IMSE 517 Managing Global Programs 3 Credit Hours**

This course focuses on some of the central strategic and organizational problems that arise in managing global programs, including cultural conflicts, developing and managing international managers, global and local brands, and organizing to resolve global-local conflicts. The course uses a combination of case studies, problems, lectures and discussion, over a wide variety of companies and countries.

**Prerequisite(s):** IMSE 515

**Restriction(s):**

Can enroll if Level is Rackham or Professional Development or Graduate

**IMSE 519 Quan Meth in Quality Engin 3 Credit Hours**

This course introduces the advanced quantitative and analytical methods used in quality measurement, prediction, control and improvement. The topics include sampling design and plan, control charts, statistical quality control, time series, process capability analysis and quality cost analysis. Quality related topics in robust and tolerance design are also included.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Level is Doctorate or Rackham or Graduate or

**IMSE 520 Managerial Decision Analysis 3 Credit Hours**

Normative decision analysis, decisions, structures, and trees. Utility theory, game theory, and statistical decision theory are introduced. Applications of the theories to management studies in capital investment, bidding, purchasing, and risk analysis are discussed.

**Prerequisite(s):** IMSE 510

**IMSE 5205 Eng Risk-Benefit Analysis 3 Credit Hours**

Analysis risk assessment, decision and cost-benefit analysis, and fault-tree methods for describing and making decisions about societal risks associated with large engineering projects. Balancing risks and benefits in situations involving human safety, environmental risks, and financial uncertainties. Presentations of major risk assessment and the public decision processed associated with them.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

Can enroll if College is Business

**IMSE 521 Mfg Cost Estimation & Control 3 Credit Hours**

In this course, concepts of strategic costing in product development and manufacturing are introduced. Engineering economy techniques are used in the study of life cycle cost elements. Equipment acquisition and replacement justification methods under risk and uncertainty are presented.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 5215 Program Budget, Cost Est & Con 3 Credit Hours**

This course focuses on cost estimation and control for program managers and engineers. The course introduces a systematic approach for applying engineering economy techniques in cost estimating, resource planning, cost planning, cost management and control, and the study of life cycle cost elements. An introduction to decisions under risk and uncertainty as well as an introduction to project crashing are also presented.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

Can enroll if Level is Doctorate or Rackham or Graduate or Professional Development

Can enroll if College is Engineering and Computer Science or Business

**IMSE 533 Manufacturing Systems 3 Credit Hours**

This course introduces methodologies and tools for modeling, design and operations planning of manufacturing systems. Topics include introduction to integrated manufacturing systems, manufacturing system and data modeling methodologies, process planning, group technology, manufacturing system layout, scheduling, push and pull production systems. Industrial case studies are presented and discussed.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 536 Machinery Diagnostics 3 Credit Hours**

Introduction to diagnostic system design. Fundamentals of mechanical vibration and noise. Vibration-generating sources in machinery. Sensing and data acquisition methods. Data interpretation by statistical and spectral analysis methods. Fault classifications methods. Computer implementation.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 537 Metal Machining Processes 3 Credit Hours**

Detailed study of the principles of conventional and non-traditional metal removing processes, machine tools accuracy, cutting fluids, and cutting tools. The course emphasis will be on the mechanics of metal cutting, machining processes, cutting tool materials and tool geometry, selection of cutting conditions, planning for machining and optimization of manufacturing process. Role of numerical control in improving machining process and productivity of manufacturing system.

**Prerequisite(s):** ME 381 or IMSE 382 or AENG 587

**IMSE 538 Intelligent Manufacturing 3 Credit Hours**

A comprehensive and integrated approach to topics associated with the science of artificial intelligence and their role in today's manufacturing environments. Design and management issues including information systems in an automated and integrated manufacturing environment.

**Prerequisite(s):** IMSE 317

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 543 Industrial Ergonomics 3 Credit Hours**

Effective ergonomic interventions in industrial environment enhance productivity, safety and job satisfaction. This course introduces engineers and engineering students how to apply ergonomic principles in designing industrial and manufacturing operations in which people play a significant role, so that human capabilities are maximized, physical fatigue is minimized, and performance is optimized. Case studies and topics emphasize industrial applications. (OC).

**Prerequisite(s):** IMSE 4425

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 544 Industrial Biomechanics 3 Credit Hours**

This course introduces the mechanical behavior of the musculoskeletal systems as related to physical work activities. Fundamentals of human body mechanics (Kinetic and Kinematic aspects of locomotion, body link systems, muscle strength and performance), muscle fatigue and musculoskeletal injury mechanism are covered with application to design of physical work activities and equipment. (OC).

**Prerequisite(s):** IMSE 4425

**Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

**IMSE 545 Vehicle Ergonomics I 3 Credit Hours**

Overview of drive characteristics, capabilities, and limitations. Human variability and driver demographics, driver performance measurements. Driver information processing models, driver errors and response time. Driver sensory capabilities: vision, audition, and other inputs. Vehicle controls and displays. Driver anthropometry, biomechanical considerations.

**Restriction(s):**

Cannot enroll if Class is

Can enroll if Level is Rackham or Graduate

Can enroll if College is Engineering and Computer Science

**IMSE 546 Safety Engineering 3 Credit Hours**

Safety requirements for production processes, equipment, and plants; organization and administration of safety programs, current safety laws, current occupational safety research.

**Restriction(s):**

Can enroll if Level is Graduate

**IMSE 548 Res.Meth.Human Fctrs/Ergonomic 3 Credit Hours**

Full Course Title: Research Methods in Human Factors and Ergonomics -This course covers principals and guidelines of Human Factors and Ergonomics (HFE) practices applied to complex human machine systems. The emphasis is on understanding advanced HFE assessment and surveillance methods in describing and quantifying human-machine-environment interaction. Key topics include, human modeling and simulation, information processing and related motor behavior, and ergonomics design and evaluation tools. (W).

**Prerequisite(s):** IMSE 4425 or IMSE 501

**IMSE 549 Product Design and Evaluation 3 Credit Hours**

Design approaches and processes used in developing customer/user-oriented products. Study of widely used product evaluation techniques: methods of observation, communication and experimentation; subjective (e.g., psychological scaling) and objective measurement methods. Review of product design and evaluation case studies. Laboratory projects to evaluate several products. (OC).

**Restriction(s):**

Can enroll if Level is Graduate

**IMSE 550 Data Management 3 Credit Hours**

Topics in computer organization; principle data structures (stacks, trees, linked lists) and their use; searching and sorting; algorithm specification, and recursion. Programming assignments will deal with applications of these subjects.

**IMSE 551 Compiler Construction 3 Credit Hours**

The design and construction of compilers and programming systems. Lexical scan; parsing techniques; code generation and optimization; storage allocation. Applications of formal language theory in compiler design. Translator writing systems; XPL.

**Prerequisite(s):** IMSE 550

**IMSE 552 Design/Analysis of Algorithms 3 Credit Hours**

Design, evaluation, and communication of algorithms for solving problems using a digital computer. Topics include problem-solving approaches, algorithm notation, determination of algorithm correctness, measures of efficiency, improvement of algorithms. Examples and homework in designing algorithms for data processing, scheduling, combinatorial optimization, and elementary computer graphics, and numerical analysis.

**Prerequisite(s):** IMSE 550

**IMSE 553 Software Engineering 3 Credit Hours**

Program design methodologies; control flow and data flow in programs; program measurement. Software life cycle; large program design, development, testing, and maintenance. Software reliability and fault tolerance. Evolution dynamics of software.

**Restriction(s):**

Can enroll if Level is Rackham or Graduate or Doctorate or  
Can enroll if College is Engineering and Computer Science  
Can enroll if Major is Software Engineering, Computer & Information Science, Info Systems and Technology,

**IMSE 555 Decision Support/Expert Sys 3 Credit Hours**

Decision support process and decision support systems, development tools, executive support systems, expert systems and their development processes, expert shells, integration of decision support and expert systems.

**Prerequisite(s):** IMSE 350

**IMSE 556 Database Systems 3 Credit Hours**

Introduction to database system concepts and techniques. Topics covered include: database environment, ER model, relational data model, object-oriented databases, object-relational databases, database design theory and methodology, database languages, query processing and optimization, concurrency control, database recovery, and database security. No credit given to both CIS 421 and CIS 556.

**Restriction(s):**

Cannot enroll if Class is  
Can enroll if Level is Rackham or Graduate or Doctorate or  
Can enroll if Major is Software Engineering, Data Science, Info Systems and Technology, , Computer & Information Science

**IMSE 5585 Electronic Commerce 3 Credit Hours**

This course examines how new information technologies and networks affect the exchange of goods and services between buyers and sellers in firms. What are economics of different electronic commerce models for firms? The course combines critical evaluation of business strategies with hands-on experience in building supporting electronic commerce systems utilizing electronic data interchange (EDI) software. (YR).

**Restriction(s):**

Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Graduate

**IMSE 559 System Simulation 3 Credit Hours**

The modeling and simulation of discrete-change, continuous-change and combined-change stochastic systems. Conducting simulation studies using contemporary software such as SLAM II or random number generation, distribution sampling, and output analysis. Comparisons with analytical queuing models.

**Prerequisite(s):** IMSE 510

**IMSE 561 Tot Qual Mgmt and Six Sigma 3 Credit Hours**

This course covers implementing Total Quality Management (TQM), undertaking Six Sigma Projects, and applying Baldrige National Quality Award criteria and ISO 9000 principles to improve quality performances in an organization. Topics include Definitions and Importance of Quality, Quality Costs, Quality Function Deployment (QFD), Product Specification and Critical-to-quality Measures (CQM), Statistical Quality Control (SQC), Robustness Concepts, Quality System Design and Evaluation. Six Sigma and DMAIC Methodologies, Design for Six Sigma (DFSS) process, IDOV (Identity requirements, Design alternatives, Optimize the design and Verify process capability) Methodology, and several other concepts and tools related to quality are also covered.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 564 Applied Data Analytics and Modeling for Enterprise Systems 3 Credit Hours**

This course explores the theory, practice and application of data analytics to consolidate, arrange, analyze and model vast amount of data for organizations which supports forecasting and prediction of future events. In-depth studies and hands on exercises will be covered in Data Warehousing, Business Intelligence for ERP systems, Data Mining, Predictive Analysis, Provisioning and Modeling of In-memory Analytics system. Various software tools, such as SAP HANA Cloud Analytics, Lumira and Modeling Software, will be introduced and used in this class. (W).

**Restriction(s):**

Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Graduate

**IMSE 5655 Supply Chain Management 3 Credit Hours**

This course will address theories, concepts, models, methodologies and techniques for managing a supply chain. Topics include supply chain strategy, drivers and metrics of performance, designing global and regional supply chain networks using optimization models, planning demand and supply in a supply chain using forecasting, aggregate planning, and inventory optimization models, designing the transportation systems, pricing, and employing IT systems effectively in supply chains.

**Restriction(s):**

Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Graduate

**IMSE 567 Reliability Analysis 3 Credit Hours**

Statistics of reliability and life testing. Application of stochastic models for failure based on Poisson and related processes. Use of exponential and extreme value distribution in reliability. Use of Markov process in the areas of equipment reliability, maintenance and availability.

**Prerequisite(s):** IMSE 510

**IMSE 569 Sys Simulation in Auto Engin 3 Credit Hours**

The modeling and simulation of discrete, continuous and combined change stochastic systems. Conducting simulation studies using contemporary software such as ARENA and WITNESS. Topics in simulation methodology include random number generation, distribution sampling, input and output analysis. Integration techniques for continuous simulation, application to design of manufacturing and automotive systems.

**Prerequisite(s):** IMSE 510

**IMSE 570 Enterprise Information Systems 3 Credit Hours**

The purpose of this course is to provide a foundation for the analysis, design and implementation of enterprise information systems. Topics include systems and organization theories, and information systems planning and evaluation. Students will be also introduced to various systems development life cycle phases of an enterprise information system. Students will acquire an understanding of the flow of information (forecasts, financial, accounting and operational data) within an enterprise and the factors that should be considered in designing an integrated enterprise information system. This includes all systems in the business cycle from revenue forecasts, production planning, inventory management, logistics, manufacturing, accounts payable, sales, accounts receivable, payroll, general ledger and report generation. Specifications for some of these systems will be developed utilizing ERP software such as SAP R/3 application development software suite. (F, W).

**Restriction(s):**

Cannot enroll if Class is

**IMSE 5715 Modeling of Int Info Syst 3 Credit Hours**

A review of approaches for modeling of integrated information systems. ARIS architecture. Data, control, function, and organization views of an information system. Requirements definition, design specification, and implementation definition of the different views. Process chain diagrams. Management of ERP projects. (YR).

**Restriction(s):**

Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Graduate

**IMSE 5725 Object Oriented System Design 3 Credit Hours**

Students will be introduced to fundamental concepts and methods of object oriented design and development. Topics that will be covered include object oriented database concepts, data models, schema design (conceptual schemas and physical schemas), query languages, physical storage of objects and indexes on objects, version management, schema evolution and systems issues such as concurrent control and recovery from failure. For application programming, a programming language such as C++ will be used for database design and query language. (YR).

**Restriction(s):**

Can enroll if Class is Post-baccalaureate Cert only or Post-baccalaureate NCFD or Graduate

**IMSE 5755 Bus Proc Int using Entrpr Tech 3 Credit Hours**

Full Title: Business Process Integration using Enterprise Technology  
This course introduces the concept of integration, optimization and configuration of strategic business processes across the enterprise using ERP software technology. Use cases and specifications for some of these systems are introduced in different functional areas, such as Finance, Human Capital Management, Logistics, and Project Systems utilizing ERP software. (F)

**Restriction(s):**

Can enroll if Level is Rackham or Graduate

**IMSE 577 Human-Computer Interaction 3 Credit Hours**

Full Course Title: Human-Computer Interaction for UI and UX Design -This course introduces current theory and design techniques concerning how user interfaces (UI) and user experience (UX) should be designed and assessed to be easy to learn and use. Course includes flowing general modules introduction of HCI & UX; Interface/Interaction design strategy; Advanced Issues in HCI; and Evaluation methods. (W).

**Restriction(s):**

Can enroll if Class is Graduate

Can enroll if Level is Doctorate or Rackham or Graduate or

**IMSE 580 Prod & Oper Engineering I 3 Credit Hours**

Production and operations management techniques including forecasting, inventory control, MRP, detailed scheduling, aggregate planning, process variability and its effects on throughput and inventory, factory physics principles, and lean methods.

**Prerequisite(s):** EMGT 505

**Restriction(s):**

Can enroll if Level is Rackham or Graduate

**IMSE 581 Prod & Oper Engineering II 3 Credit Hours**

This course addresses the advanced theory and techniques of production and inventory systems. Topics include advanced forecasting methods, production scheduling and lot-sizing, stochastic single-and multi-item inventory systems, and service operations. This course also includes discussions of research articles on production and inventory systems.

**Prerequisite(s):** IMSE 580 or EMGT 520

**IMSE 5825 Industrial Controls 3 Credit Hours**

This course introduces the principle aspects of computers and their applications in systems control, principles of automation, with emphasis on manufacturing industries. Discussion on the hardware and software associated with this task and other topics such as integrated systems modeling, sensor technologies, digital and analog signal processing and control, and information communication are also included. Laboratory exercises and projects are required. Credit cannot be given for both IMSE 482 and IMSE 5825. This class may be scheduled at the same time as the undergraduate course IMSE 482. Graduate students will be required to do additional research paper and/or project.

**Prerequisite(s):** ECE 305

**Restriction(s):**

Can enroll if Class is Post-baccalaureate NCFD or Graduate

**IMSE 584 Logistical Systems 3 Credit Hours**

Introduction to concepts of physical distribution and logistics management. Quantitative treatment of topics in materials management, transportation, forecasting, warehouse location. Logistical system design techniques which synthesize the above topics in order to design a fundamental system.

**Prerequisite(s):** IMSE 580

**IMSE 585 Material Handling Systems 3 Credit Hours**

Studies of material handling methods and equipment, study of techniques used in the analysis and design of material handling systems, study of storage and warehousing systems.

**Prerequisite(s):** IMSE 500

**IMSE 586 Big Data Anal & Visualiztn 3 Credit Hours**

Introduction to big data analytics and visualization. This course provides students with hands-on experience of using analytical and predictive modeling techniques and software for practical applications. Topics include data visualization principles and techniques, data processing and manipulation, and statistical learning methods such as linear regression, classification, model selection, clustering, principal components analysis, and time-series analysis. (F).

**Prerequisite(s):** IMSE 510

**Corequisite(s):** IMSE 510

**IMSE 587 Facilities Planning 3 Credit Hours**

Analysis, planning and design of physical facilities utilizing operations research, engineering and economic principles. Synthesis of physical plant equipment and man into an integrated system for either service or manufacturing activities. Design of material handling systems. Students are required to select problems of interest and present design project reports. Credit may not be given for both IMSE 474 and IMSE 587. This class may be scheduled at the same time as the undergraduate course IMSE 474. Graduate students will be required to do additional research paper and/or project.

**Prerequisite(s):** IMSE 500

**IMSE 588 Bldg High Perf Learning Org 3 Credit Hours**

The purpose of this course is to develop students' knowledge and skills to explore and experience how the disciplines of systems thinking, personal mastery, mental models, team learning and shared vision impact on organizational learning and influence management practices for building highly performing organizations.

**IMSE 590 Grad Study in Sel Topics I 1 to 3 Credit Hours**

Individual or group of selected topics in industrial and systems engineering.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 591 Grad Study in Sel Topics II 1 to 3 Credit Hours**

Continuation of IMSE 590.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 593 Vehicle Package Engineering 3 Credit Hours**

Vehicle package specifications related to exterior and interior design reference points, dimensions and curb loadings. Benchmarking package studies, ergonomic tools and design practices used in the automobile industry. Driver positioning considerations; seat height, heel points, hip points, steering wheel location, seat pan, and back angles. Pedal design issues, gear shift positioning. Visibility of instrument panel space. Armrest and console design considerations. Principles and considerations in selecting and location types and characteristics of controls and displays on instrument panels, doors, consoles, and headers. Engine compartment packaging issues. Perception of interior spaciousness and visibility of the road over cowl and hood. (F).

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 600 Research in IMSE 1 to 3 Credit Hours**

Individual or group study or research in a field of interest to the student. Topics may be chosen from any of the areas of industrial and systems engineering. The student will submit a project report and give an oral presentation at the close of the term.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 605 Advanced Optimization 3 Credit Hours**

This course will cover selected advanced optimization methods for engineering disciplines and information systems. Topics include nonlinear programming, network optimization, dynamic programming and optimal control. Theories related to optimality and convergence, population-based optimization, etc. will be covered. Students will be expected to write computer program code to implement optimization methodologies.

**Prerequisite(s):** IMSE 500

**Restriction(s):**

Can enroll if Class is Graduate

Can enroll if Level is Doctorate or Rackham or Graduate or

**IMSE 606 Advanced Stochastic Processes 3 Credit Hours**

This course introduces the theory and applications of discrete and continuous stochastic processes and models. The topics include Poisson process, renewal theory, discrete-time and continuous-time Markov chains, martingales, random walks, and Brownian motion. Other Markov processes with applications to queuing, simulation, and operations research in manufacturing and service systems will also be covered.

**Prerequisite(s):** IMSE 510

**Restriction(s):**

Can enroll if Level is Doctorate or Rackham or Graduate or

Can enroll if College is Engineering and Computer Science

**IMSE 610 Adv Top Enterprise Info Sys 3 Credit Hours**

This course introduces advanced topics in the development, management and improvement of information systems in the context of supporting large enterprises. It covers emerging issues and solutions in modeling, IT infrastructure and technologies, critical enterprise functions, knowledge engineering, security and governance of enterprise information systems. It focuses on the changing requirements posed by the dynamics of their residing environment and information technology.

**Prerequisite(s):** IMSE 5715

**Restriction(s):**

Can enroll if Class is Graduate

Can enroll if Level is Doctorate or Rackham or Graduate or

**IMSE 699 Master's Thesis Project 1 to 6 Credit Hours**

Graduate students electing this course, while working under the general supervision of a member of the department faculty, are expected to plan and conduct the work themselves, to submit a thesis for review and approval, and to present an oral defense of the thesis.

**Restriction(s):**

Can enroll if Class is Graduate

**IMSE 791 Advanced Guided Study for Doctoral Students 1 to 6 Credit Hours**

Independent study and research work on the material related to the doctoral research project under the guidance of the faculty advisor. The course is for doctoral students who have not completed the PhD program's coursework requirements. A report and an oral presentation are required. (F, W, S).

**IMSE 980 Ph.D. diss research precand 1 to 9 Credit Hours**

Full Title: Ph.D. dissertation research pre-candidate Dissertation research by a pre-candidate student of the Ph.D. in Industrial and Systems Engineering (I&SE) Program conducted under guidance of the faculty advisor. The credits earned in this dissertation research course count towards (fulfil) 24 credit hours of dissertation research requirements of the Ph.D. I&SE program. (F,W,S)

**Restriction(s):**

Can enroll if Level is Doctorate or

Can enroll if Major is Industrial & Systems Engin

**IMSE 990 PHD Dis Research Cand 1 to 12 Credit Hours**

Full Title: Ph.D. dissertation research candidate Dissertation research by a candidate student of the Ph.D. in Industrial and Systems Engineering Program conducted under guidance of the faculty advisor. (F,W,S)

**Restriction(s):**

Can enroll if Level is Doctorate or

Can enroll if Major is Industrial & Systems Engin

\*An asterisk denotes that a course may be taken concurrently.

Frequency of Offering

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
