

CERTIFICATES (NON-DEGREE UNDERGRADUATE)

The undergraduate certificate program (<https://umdearborn.edu/admissions/undergraduate/non-degree-returning-other/undergraduate-certificates/>) is ideal for students who look to specialize in a particular field without earning a bachelor's degree or would like to add credentials after completing a prior degree. We offer undergraduate certificates (<https://umdearborn.edu/academics/certificates/>) that are flexible and affordable to best serve working students— students can even customize their course of study to meet their industry's specific needs.

Each certificate program has specific GPA and admissions requirements. Detailed information for available certificates is located within the academic program section in the undergraduate catalog.

It is free and easy to apply online (https://umdearborn-portal.force.com/application/TX_SiteLogin/?startURL=), selecting "Certificates" student type, and students may check the application status online. All students must submit official transcript(s) for admission.

Completed non-degree applications will be accepted until midnight the day prior to the start of classes each semester.
