

SPANISH FOR HEALTH CARE PROFESSIONALS

The Certificate in Spanish for Health Care Professionals prepares students to better serve Hispanic patients who otherwise may not get equal access to health care services because of the linguistic and cultural barriers.

The Certificate in Spanish for Health Care Professionals will also prepare students for today's growing demand for Spanish among physicians and healthcare workers in the United States. In addition, students will develop cross-cultural competency in Hispanic culture, Hispanic health care system, and health beliefs as well as practices.

Certificate Requirements

Code	Title	Credit Hours
12 credit hours required		
SPAN 101 & SPAN 102	Spanish Language & Culture I and Spanish Language & Culture II	8
